Big spenders see uptick

ANA hears talk of better days

By NANCY GIGES and LAURIE FREEMAN

Hot Springs, Va.—Executives attending the 77th annual meeting of the Assn. of National Advertisers here, predicting a stronger-than-expected economy next year, say marketing expenditures—especially for consumer promotions—could increase moderately in 1987.

Marvin Koslow, senior vp-marketing services, Bristol-Myers, said he believes the economists may be underestimating the strength of the economy. His company had a strong third quarter, he said, and anticipates healthy sales this quarter. He indicated gains in the budgets being planned for next year.

Joel Weiner, exec vp-corporate marketing services at Kraft Inc., believes media spending industrywide will be up moderately.

"What is probably as important as media spending, if not more so," said Mr. Weiner, "is the continuing shift into consumer promotions, where spending may be as much as one-

GF shifts more to ads for 1987

By JUDANN DAGNOLI

General Foods, one of the nation's largest advertisers, is bucking the promotion trend. Philip Smith, its president and newly anointed ceo, said that "sales and trade promotion have grown at the expense of advertising," and his company is "trying to turn that around."

The executive said the $7 billion-plus White Plains, N.Y.-based marketer is renewing emphasis on ad spending and going to great lengths to reduce trade promotion. A spokesman later emphasized that, as part of a now 3-year-old program, GF would not divert monies from advertising to trade promotions.

Mr. Smith said heavy price-cutting, now the industry norm, "could erode the value of brand names." The company, acquired by Philip Morris Cos. last November, spent well over $350 million in U.S. measured media advertising in 1985. GF markets more than 60 brand-name products, and the company said that 80% of its revenues come from brands

RJR tells boost for promotions

By WILLIAM F. GLOEDE

R.J. Reynolds Tobacco Co. next year will pull more dollars from its advertising budget and push them into promotional marketing. The cuts in media spending won't be nearly as deep as rumored, said company media director Dan Pearson, but "it's going to hurt everybody some."

Mr. Pearson heads up the Winston-Salem, N.C.-based tobacco marketer's in-house media unit, which handles most planning and print and out-of-home buying for Reynolds Tobacco and the other units of parent RJR Nabisco. It spends about $400 million a year.

The shift of more funds into marketing promotion—covering everything from sporting event sponsorships to couponing—is part of an over-all cigaret industry trend being fueled by open warfare in the price/value segment.

"It's driven more by where we see the market going than it is by a conscious decision on our part that there's no future for advertising," Mr. Pearson said. "Our intent is to get it

Wendy's revamp brings back Rich

By PATRICIA WINTERS and SCOTT HUME

The slumping fast-food market got hot and juicy last week as Wendy's International dismissed national agency DFS Dorland Worldwide three days after reporting a third-quarter loss of $47 million as average per-store sales dropped 13%.

Wendy's also announced it will dispose of 9% of its company-owned stores and radically restructured its marketing department.

Earlier, two major chicken chains, Bojangles' Chicken 'n Biscuits and Church's Fried Chicken, said they, too, are being forced to close stores and reorganize to survive.

Such moves all are symptoms of the "panic" gripping the $45 billion fast-food industry (AA, Oct. 20), said Gary Susnjara, chairman of DFS Dorland's New York office.

"They're all ailing," he said, referring to the leading fast-food chains. "And they're saying, 'Make the advertising un-ail us.' And it didn't do it. I don't know if it could."

As abrupt as its firing of DFS—which gave the world 1984's "Where's the beef?" phenomenon and in which Wendy's chairman Robert Barney two weeks ago expressed complete confidence (AA, Oct. 20)—was the decision to move creative responsibility to Dick Rich Inc., New York, without a formal agency review. Mr. Rich was the creative mastermind who in the

Ayer latches onto N.Y. Air, People Express

Houston—Texas Air will consolidate advertising assignments for its New York Air and People Express units at N W Ayer, New York, which already handles Texas Air's Continental Airlines. The action renewed speculation that the People Express and New York Air identities will be eliminated. The $12 million New York Air account had been at Levine, Huntley, Schmidt & Beaver; People Express had been at Plapler Russo & Associates. Ayer's $25 million-plus Continental assignment will grow to $50 million-plus with the new assignments, sources said.

Florida's ad tax next ANA target

By STEVEN W. COLFORD

Hot Springs, Va.—Ad industry lobbyists last week banged their war drums for a total industry campaign aimed at nullifying Florida's proposed 5% tax on in-state advertising.

They see the far-reaching consequences of the state tax, if implemented next July 1, as taking as much as a $250 million bite out of state advertisers; causing an advertising exodus from spot media in Florida to alternative spot tv, radio and print in surrounding states that spill into Florida markets, and setting a precedent for other revenue-squeezed states to impose similar ad taxes in their own jurisdictions.

The threatened Florida tax was the major regulatory concern at last week's 77th annual Assn. of National Advertisers conference here.

G.F. (Pete) Tyrrell, the new ANA chairman and vp-advertising, Johnson & Johnson, said

Highlights

ANA hears growth prediction 1
Executives at the 77th annual meeting of the Assn. of National Advertisers, predicting a stronger-than-expected economy next year, say marketing expenditures—especially for consumer promotions—could increase moderately in 1987.

Wendy's dumps DFS, reorganizes 1
Wendy's International last week dismissed DFS Dorland Worldwide three days after reporting a third-quarter loss of $47 million. Wendy's also announced it will dispose of 9% of its company-owned stores and restructured its marketing department.

Georgia on their minds 3
Mergers, buyouts and bankruptcies are redefining the agency profile of Atlanta, where the number of shops dwarfs the number of choice accounts. D'Arcy Masius Benton & Bowles' decision to sell its Atlanta office to Fahlgren, Swink & Nucifora is the first strengthening of the market, agency executives believe. Agency executives expect more mergers as other branch offices wither.

More juggling at Burnett 3
Leo Burnett Co. is preparing for its third top-management reorganization in as many years, but its top execs do not expect it to affect any client relationships.

BJK&E rising to the top 4
Bozell, Jacobs, Kenyon & Eckhardt broke from the pack to rank among the leading agencies in the eyes of company advertising directors, according to the latest Agency Watch, Advertising Age's national survey.

New chapter for CBS Magazines? 6
Industry observers are betting CBS Inc. will soon sell its magazine publishing division. The hottest rumor both inside and outside CBS Magazines: A prospectus is being circulated to sell the entire division for a whopping $1 billion, with West Germany's Bertelsmann AG expressing the most interest.

Hitting the bricks 12
Procter & Gamble is attempting to chip away at coffee-leader General Foods with the national introduction of Folgers ground-roast coffee in "brick" packaging.

O&M going soft 33
Ogilvy & Mather this month gets its first chance to show what it can do with Sears, Roebuck & Co.'s "soft goods" account. On Nov. 21, Sears breaks a national tv campaign promoting its exclusive collection of children's clothing, bedding, watches and plush animals tied to and coinciding with the opening of "An American Tail," Steven Spielberg's first animated film.

Rethinking at 'The New Yorker' 42
To the agency that created "Yes, *The New Yorker*" *The New Yorker* is saying, "Maybe."

Spring loaded 44
A rift has developed between prospective American Football Teams owners and founder David Dixon even before the parties involved in the new spring football league have committed to begin play.

INTERNATIONAL

U.S. tv news invades Europe 69
European tv execs are trying to stave off a U.S. invasion in an area they had thought was off-limits: News. Pan European news programs are shaping up as a major battleground between U.S. and European programers in the emerging satellite tv market.

OTHER NEWS

Drackett Co.'s Endust remains the dusting aid of choice, despite rival S.C. Johnson & Son's $12 million effort to wipe out the commanding lead of Endust. Page 12.

Volkswagen U.S. is counting on next year's introduction of the VW Fox to get the company back into the entry-level market battle and allow it to position other models against higher-price European imports. Page 24.

Top retail chains are gambling this fall that sophisticated personal computers can be marketed like tvs and videocassette recorders. Mass merchandisers such as Sears, Roebuck & Co., Caldor and Target hope that by stocking their shelves this Christmas season with "clone" pcs battling one another on price alone, they will boost their own margins and help transform the desktop pc into a commodity item. Page 36.

Four days after announcing her retirement from gymnastics last month, Mary Lou Retton appeared on behalf of Hasbro Inc. at the Southdale Mall in Minneapolis. More than 5,000 people attended. "When she told them she had left the sport to go to college, they stood and cheered. It was a decision they could understand," said Ms. Retton's agent, John Traetta. Page 40.

Since it began 18 months ago, *PayPhone Magazine* has grown from an eight-page newsletter with four ads to a slick bimonthly. When *PayPhone* goes monthly in January, ad revenues are expected to nearly double, boasts publisher-editor Marc Ostrofsky. Page 43.

Advertisers striving to reach the rapidly maturing American consumer were advised to keep their ad messages "short and to the point" during one of the best-attended sessions at the annual Assn. of National Advertisers conference in Hot Springs, Va., last week. Page 92.

Godfather's Pizza this week carries out its promise to be competitive in all areas of the pizza market with a new campaign for home delivery. An initial pool of three tv commercials and six radio spots breaks today in Seattle, with subsequent rollout planned throughout Omaha-based Godfather's 700-unit system, about 60% of which currently is equipped for home delivery. NBC on a roll for sweeps; CBS shuffle?

By VERNE GAY

New York—CBS-TV and ABC-TV are headed into the November sweeps in their most precarious competitive positions in years, with the CBS Broadcast Group poised for a top management shakeup and ABC battling a deterioration in prime time household ratings.

Both also are facing a resurgent NBC-TV, winner of the prime time ratings crown for five consecutive weeks for the first time in its history. Helped by strong World Series telecast numbers, NBC won the week ending Oct. 26 by nearly 8 rating points over last-place ABC.

But No. 2 CBS may be facing a greater crisis this month. The company was besieged last week with rumors about the fate of every top executive in the Broadcast Group, including president Gene Jankowski and B. Donald Grant, president of CBS Entertainment.

According to reports sweeping the company, acting ceo Laurence Tisch is preparing to overhaul several key management posts, including the exec vp posts held by Thomas Leahy and Neal Pilson. Mr. Tisch himself is reportedly keeping the ceo position on a permanent basis (AA, Oct. 13).

A CBS spokesman declined comment on the reports.

According to one scenario, the exec vp posts could be abolished, with the presidents of sports, entertainment, network, tv stations, news and radio reporting directly to the CBS Broadcast Group president. Each executive would be responsible for the financial performance of his respective division.

Currently, the divisional heads, the exec vps and the president share some responsibilities. The station, radio and sports divisional presidents report to Mr. Pilson,

Election Day is PM's ticket to campaign

By WILLIAM F. GLOEDE

New York—Philip Morris Cos. will be ferrying voters in six cities to the polls on Election Day, Nov. 4, in a test of a new kind of corporate advertising it hopes will leave the public with that warm feeling so many corporations crave.

In Cincinnati; Dover, Del.; Kansas City, Mo.; Louisville; Milwaukee, and Seattle, PM is running a three-insertion campaign in newspapers, local magazines and regional editions of national magazines, urging people to vote. A sample headline: "The most powerful machine in the world is in America's hands. Why won't we use it?"

The ads, created by Backer & Spielvogel, list an 800 telephone number through which voters can get an "Election Day Kit"—a package containing a brochure providing an overview of senatorial and gubernatorial elections throughout the U.S. and a summary of state issues confronting each market.

The kit's literature is nonpartisan and factual in nature and contains no endorsements or discussion by PM of preferred candidates or positions on issues.

On Election Day, in cooperation with local, nonpartisan groups

Fox Broadcasting eyes BBDO's creative

Los Angeles—Fox Broadcasting Co. has contacted Steve Hayden, BBDO exec vp-senior creative director and former Chiat/Day creative director, concerning an unspecified creative role in the fledgling network. Fox sources say the network plans to hire an agency within three weeks, probably without a review.

Los Angeles—**Frank Mainero** was named president-ceo, CSI Inc., a marketing communications company. He assumes responsibilities previously held by Richard White, who remains as chairman. Mr. Mainero most recently was general manager, McCann-Erickson/Los Angeles.

San Francisco—**R. Dakin & Co.** has moved its $2 million-plus plush toy account to Cole & Weber from Busse & Cummins.

Beverly Hills, Cal.—**Camp Beverly Hills**, apparel and fragrance marketer, hired Scali, McCabe, Sloves, West, Santa Monica, to handle its $1 million-plus corporate account, from in-house. Sources suggest CBH eventually may transfer its $2 million fragrance account, currently at Calvillo Shevack & Partners, New York, to Scali.#

Chef Prudhomme fires off Cajun Martini

NEW ORLEANS—Sazerac Co. begins national distribution next month of Chef Paul Prudhomme's Cajun Martini, a cocktail seasoned with cayenne pepper, testing in southern markets. Fessel, Siegfriedt & Moeller, Louisville, handles trade and print campaigns set to break in the first and second quarters, respectively.

BETHESDA, MD.—**Rosenthal, Greene & Campbell** has laid off 12 employes after losing the $4 million Presidential Airways account, sources said. RG&C chairman Dan Rosenthal confirmed some layoffs, but declined to say how many. Tromson-Monroe, New York, won the account last month, after a review (AA, Oct. 6, *et seq.*).

BIRMINGHAM, ALA.—**Luckie & Forney** would not confirm reports it is opening an Atlanta office this month to service local clients and seek new business.

CHICAGO—**Montgomery Ward & Co.** will open and operate 10 additional Ward-Toys "R" Us stores in 1987 following the successful opening

(Continued on Page 88)

AGENCY WATCH

BJK&E leaps out from agency pack

By CHARLOTTE FLANAGAN

Bozell, Jacobs, Kenyon & Eckhardt broke from the pack to rank among the leading agencies in the eyes of company advertising directors, according to the latest Agency Watch, ADVERTISING AGE's national survey.

Meanwhile, Saatchi & Saatchi Compton Worldwide, one of the U.S. agencies of growth-hungry Saatchi & Saatchi Co., emerged as the hottest agency in the latest poll, which covers the July-to-September quarter. Interviews were conducted before September's management upheaval at Saatchi & Saatchi's Ted Bates Worldwide.

Ad directors again named J. Walter Thompson Co. and Ogilvy & Mather Worldwide the nation's two best agencies. JWT has ranked No. 1 and O&M has been No. 2 in every quarter since the survey began two years ago.

Agency Watch is conducted for ADVERTISING AGE by SRI Research Center Inc., Lincoln, Neb. In each quarter, SRI questions by telephone a random national sample of 300 ad directors of companies with $25 million or more in sales.

The survey is not limited to large advertisers in New York, Chicago and other major agency markets, but includes ad directors of companies based in each of the 20 largest U.S. cities.

Asked to name the agency that "provides the best over-all services and products to its clients," 6% of the directors named BJK&E, a statistically significant rise from the agency's 1.7% score the second quarter. Its score in the latest survey was the third best, behind JWT's 9.3% and O&M's 7.7%.

In the questioning for "best over-all" agency, respondents are allowed as many as three answers. Each of these answers is counted as one mention.

BJK&E also continued to rise in top-of-mind awareness, being named by 10.3% of ad directors as the agency that first comes to mind. Unlike the agency's improvement as "best" agency, which didn't occur until the third quarter, BJK&E's awareness level has increased steadily since the agency was formed through the merger of Bozell & Jacobs and Kenyon & Eckhardt last January.

BJK&E's awareness score was 7.3% in the first quarter this year—up from 3.7% the previous quarter—and 9% in the second quarter.

BJK&E's top-of-mind awareness ranked fourth in the latest survey and just behind BBDO Worldwide, which was named by 10.7% of the ad directors. One vote separated BBDO (32 mentions) and BJK&E (31 mentions).

JWT again dominated the awareness ratings, being named by 21% of the respondents, and O&M was No. 2, with a score of 13.7%. Respondents are allowed up to three answers in questioning for awareness.

BJK&E's high-profile campaigns for Merrill Lynch (featuring the return of the Merrill Lynch bull) and Chrysler (spotlighting Lee Iacocca) may have contributed to its prominence last quarter. But

Special Issue

Second 100 boost ad spending 10.6%

Copyright ©1986 by Crain Communications Inc. Quotation or reproduction in whole or in part without written permission is expressly prohibited.

By R. CRAIG ENDICOTT

The Second 100 leading national advertisers, responding to a sluggish economy in 1985 that continues into the current year, leveled off expenditures for national advertising to $5.35 billion, an increase of 10.6% over the previous year.

The Second 100, which spent $4.84 billion in 1984, up an estimated 26% from 1983 levels, trimmed their ad budgets to soften the impact of reduced earnings as they underwent "corporate restructuring"—corporatese for shoring up, by virtually any means, the bottom line. Advertising Age's second annual report on the Second 100 Leading National Advertisers depicts the extent of restructuring during 1985.

Generally a term applied to the realignment of business segments into more cohesive units, "restructuring" became the buzz word for staff layoffs, plant closings, divestiture of poorly performing units or divestiture to raise debt and buy corporate stock in order to become less attractive to unfriendly suitors.

Despite the reduced spending—which is also a factor of better media buys and reduced rates—the nation's Second 100 still accounted for about 11.2% of all advertising spending measured in 11 national media, up from 10.5% in 1984.

This compendium of the Second 100 is undertaken annually because the spending power of the nation's corporate advertisers is dominated by the top 200. Ad Age, which published its 100 Leading National Advertisers report on Sept. 4, reported the top 200 accounted for 87% of total network tv spending, 72% of network radio, 60.6% of newspaper supplements, 57.4% of magazines, 57.1% of spot tv spending, 52.8% of spot radio, among 11 monitored media.

A residual benefit to advertisers of the down economy in 1986 is reduced prime-time rates in network tv spots. Both CBS and ABC have cut their rates, the first time any network has made an up-front reduction. In the first six months of the year, total network tv ad revenue grew only 1.84% to $4.21 billion. A drop of 2.6% in network tv spending by the top 100 in fact led to a narrow 2.7% increase in advertising of $26.67 billion for the top 100 in 1985. Net tv spending for the Second 100 grew 4%. Magazines, the only other depressed major medium in the first half, 1986, had ad pages of 75,169, down 0.4%, on revenues of $2.51 million, up 4.8%, says Publisher's Information Bureau.

The impact of a recessionary economy on the Second 100 can be seen in the aggregate: Worldwide sales of the companies in the group for which such a figure could be obtained were $850.8 billion in 1985, up 7.0%. Worldwide net income of $33.08 billion represented an increase of only 3.9% over the prior year. U.S. sales of the Second 100 rose 3.4%.

So mediocre a performance—including tighter ad spending—is likely to reoccur this year. Third quarter results showed a 2.4% annual rate of increase in gross national product—far from the 3% annual gnp growth the government is said to need to hold down the deficit and unemployment. Washington has been predicting a 3.2% growth for all of 1986; however, the fourth quarter will have to grow 6% if that is to be met.

The third quarter gnp, though, was a dramatic rise from a weak 0.6% growth in the second quarter when consumers dipped into savings in response to incentives to purchase cars and other items. But this pulled in a heavy flow of imports, which continued to outpace exports, growing at a 20% clip in the third quarter compared with a 15.4% increase in exports. This is not such a negative factor to some among the Second 100, because 20 are based abroad.

"Restructuring" seemed to roll from the lips of corporate relations executives at many of the Second 100. Restructuring cut through the ranks from No. 101 Levi Strauss to No. 200 Doubleday & Co. Levi Strauss restructured by going private; and Doubleday no doubt would have restructured had it not sold out to West German publisher Bertelsmann A.G.

Trans World Airlines, No. 116, restructured by falling to buyout artist Carl C. Icahn, buying hub competitor Ozark Airlines, extracting wage concessions from pilots and machinists and replacing striking flight attendants with lower-paid help. Castle & Cooke, No. 131, went through major restructuring—it was bought out by Flexi-Van Corp., which thinned the corporate staff, sold some Honolulu real estate and relocated to Los Angeles from San Francisco.

Levi Strauss and Doubleday also are symbolic of the movement on the charts by the top 200 advertisers. Levi Strauss, ranked No. 67 in 1984 because of its sponsorship of the Olympic Games, reduced ad outlays in 1985 as it went private and cut back production to hold down costs. It was joined by No. 110 Kimberly-Clark and TWA as top 100 dropouts from 1984.

New entries often followed competitive and hot industries, such as telecommunications. Three of Ma Bell's offspring, No. 122 Ameritech, No. 106 Bell Atlantic Corp. and No. 152 U.S. West, entered the 1985 list for a reunion with No. 102 BellSouth Corp., No. 105 Nynex Corp., No. 108 Southwestern Bell Corp. and No. 134 Pacific Telesis Group.

Other entries: Importers, No. 146 Minolta Co. and No. 194 Mitsubishi Corp.; media companies, No. 187 Hearst Corp., No. 197 Dow Jones & Co. and No. 200 Doubleday; retailers, No. 147 Carter Hawley Hale Stores and No. 120 Zale Corp.; airlines, No. 191 NWA Inc. and No. 178 People Express Airlines; and No. 167 Squibb Corp., and No. 171 Franklin Mint, No. 184 Merrill Lynch Co., No. 193 Armstrong World Industries, No. 196 Craftmatic/Contour Industries.

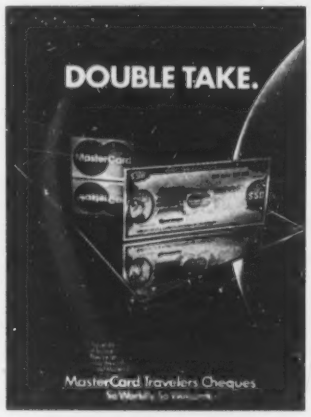
Twenty-two companies on the 1984 list did not reappear in 1985, and others like Doubleday will not be around for a 1986 ranking. Seven of the big spenders on the 1984 list entered the top 100 list. Their spending increased, but there also was more room at the top because of mergers consolidating the top 100. Four were bought out, including Republic Airlines, which was absorbed into NWA Inc. on the 1985 list. And the primary businesses of seven of the dropouts were either in computers or oil and gas, two extremely depressed industries.

A glimpse at the nonfood retail sector of the Second 100, one of the more conspicuous among the dominant groups profiled, presents trends that affect marketing as a whole: Retailers are thinning their business segments for various reasons: Dayton-Hudson Corp., No. 103, is selling the nation's No. 2 retail book chain, B. Dalton Bookseller, to concentrate on its large-scale discount (Target) and value-priced operations (Mervyn's), and building Target via the acquisition of 54 Gemco membership stores from Lucky Stores, No. 164, which also is selling its profitable specialty stores to fight off a takeover attempt by Asher B. Edelman.

No. 172 Household International, whose retail operations experienced

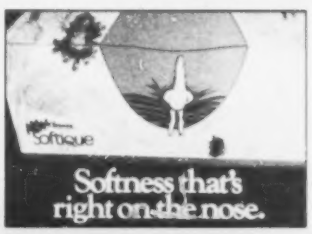
Levi Strauss' "501 Blues" commercials were not only innovative in presentation, much as other work in the past handled for the apparel retailer by Foote, Cone & Belding, San Francisco, but the ads influenced a sales growth of 50% for the 501 Jeans brand in 1985 over 1984 and pushed over-all sales of men's jeans at the now private San Francisco-based company to more than $1 billion.

Cat gets nipped by a vacuuming dowager in dim light, a lamp inside an isolated woodland cabin blinks off as terrified campers cower from what must be an abominable man-beast at the threshold. These are among tv vignettes prepared by DFS Dorland Worldwide for North America Philip's T-shaped bulb in its brand-transition from Westinghouse to Philips.

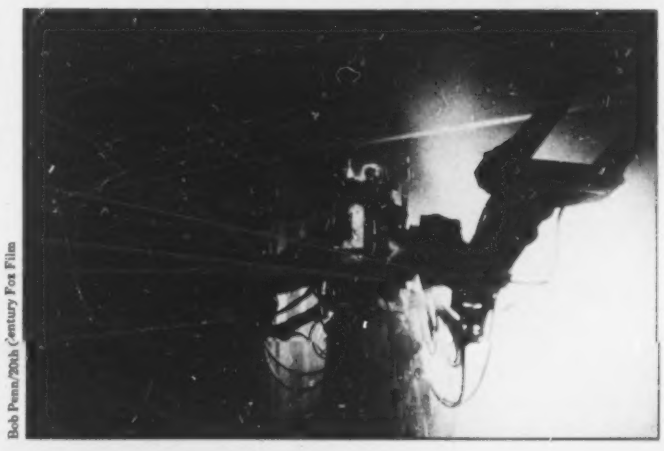


MasterCard dropped its "So Worldly. So Welcome." campaign in 1985 for a more down-to-earth "Master the Possibilities" theme to broaden its appeal. The "So Worldly" campaign, at left, was a mixture of glitz and galaxy with ethereal images divining the message that plastic cards and travelers cheques are "double take" items when traveling. "Master the Possibilities" theme is coordinated by a series of endorsements from gold-card users John Houston, Twyla Tharp and Andre Previn, the latter of whom calls the red and ochre card, the "instrument of credit that speaks a universal language." Angela Lansbury and Robert Duvall take the message via network tv. William Esty Co. handles.

National Distillers is bailing out of the business on which it was founded—distilled spirits—which include one of the industry's leading liqueur brands, DeKuypers. The line, with offerings of Peachtree, Apple Barrel, Mountain Strawberry, Peppermint, Old Tavern Rootbeer and the newly introduced Original Harvest Pear, grew from the 21st best-selling distilled spirits brand in 1984 to No. 9 in 1985 as Americans turned to lighter and sweeter tasting drinks that still carry a bite. Peachtree schnapps held the distinction in 1985 as the fastest growing new liquor product with 2.3 million case depletions.



Proboscis personality Runny Nose finds solace using Kimberly-Clark's Kleenex Softique tissues. Runny Nose proved such a talent that K-C trademarked the theme: "For softness that's right on the nose" and backed Runny Nose with a 54% increase in measured spending. Foote, Cone & Belding, Chicago, handles.



Sigourney Weaver prepares to meet the enemy by donning a Power Loader, specially designed high-tech equipment she uses in 20th Century-Fox's high-tension thriller, "Aliens," which grossed more than $100 million dollars in box-office receipts through mid-October, 1986. The company is now part of a restructured Fox Inc., a multi-faceted media company owned by Rupert Murdoch and Marvin Davis.

Bob Penn/20th Century Fox Film

declines in income and net sales in 1985, sold the business to concentrate on consumer finance, manufacturing and travel. Its biggest unit, TG&Y, went to No. 118 Rapid-American Corp., which sees TG&Y and its McCrory unit as a tight fit.

Carter Hawley Hale Stores, No. 147, is selling off units to raise cash to buy back stock and thwart suitor Limited Inc. Federated Department Stores, No. 111, merged its Lazarus with Shillito Rike's stores and its Gold Circle with Richway units to gain economies of scale, the savings of which will be funneled into store remodeling. The combined May Department Stores, No. 141, and Associated Dry Goods, purchased by May in mid-1986, are expected to achieve economies of $60 million a year as a merged unit.

The product tampering that afflicted top 100 spenders Johnson & Johnson (Tylenol) and Bristol-Myers (Extra-Strength Excedrin), was visited upon No. 157 SmithKline Beckman Corp. (Contac, Teldrin and Dietac), which is still taking write-offs on its quarterly earnings for pulling the products and reintroducing Contac and Teldrin with $30 million in new advertising in mid-1986. Contac also came back in the form of caplets and see-through banded capsules. Druggists, resisting products marketed in capsule form, also influenced No. 183 Thompson Medical Co. to repack its flagship appetite suppressant, Dexatrim, from capsule to caplet.

The 20-year-old beauty Willow Bay, looks very American with her very English suitors in a print ad demonstrating the Estee Lauder cosmetics colors. Willow, said by Estee to "convey the American sense of classic beauty," shares top billing with 14-year Estee veteran, Karen Graham, in cutout, who also remains a valuable commodity at Estee as it turns its eye to the care of mature complexions of baby boomers turned 40. Agency, AC&R Advertising, handles.

Villa Banfi, USA, No. 198, saw shipments of its leading import wine, Riunite, drop 8.6% in case depletions in 1985 when it had to recall 1.2 million cases because minimal traces of toxic diethylene glycol were found in the wine, and early this year, sales got another shock when consumers were scared away from Italian wines in general because cheap table wines from Northern Italy and adjacent Austria (not Riunite) were found to be tainted with wood alcohol.

Research and development units at many of the second 100 companies are seeking "nicheability" among new products—high ideals considering many also are foregoing market testing for an immediate national splash. No. 123 Borden Inc., seeking new category creators much like its Cracker Jack, ReaLemon, Eagle Brand and Elmer's glue products, has developed Hi Calcium milk that delivers 100% of the daily calcium requirement in an 8-oz. serving, and Corn Spirals, a corkscrew-shaped crunchy corn chip made with a rotini pasta machine.

Health-conscious consumers influenced product development. ConAgra Inc., No. 112, launched a battery of products with 30% less salt. Sandoz launched a strawberry-flavored Ovaltine and added NutraSweet and powdered milk to the formula. Riunite introduced fruit-flavored, low-alcohol (6%), unwatered wine coolers; No. 107 G. Heileman Brewing Co. launched four no-alcohol products; and No. 165 Denny's Inc. is propelling its El Pollo Loco chicken fast food franchise into a national chain with advertising that carries the endorsement of the American Heart Assn. because its chicken is low-fat and not breaded or fried.

Merchandising schemes, part of an unmeasured advertising total for the second 100 of $2.31 billion, up 9.2% from the previous year, proliferated during the 1985-86 period. Squibb's Theragran heavily advertised vitamin tablets were placed in four million packages of Kayser-Roth's No-Nonsense panty hose; Kimberly-Clark promoted Huggies diapers by offering a free Polaroid with 36 proof-of-purchase seals; No. 179 Hallmark Cards launched an "A la mode" series of cards with ice cream designs and Baskin-Robbins coupons on the flipside; and A.B. Volvo, No. 166, offered in conjunction with Amoco Motor Club road assistance during its three-year unlimited mileage warranty.

Scott Paper Co., No. 149, seems a sure bet to build its market leadership in the paper towel department and win the hearts of new customers with its intro of Helping Hand, a line of medium-price paper products. Scott, in an introductory offer, is donating a nickel to national children's charities for every line item purchased.

No. 104 Kroger Co. offered to refund consumer's dissatisfied with meat purchases double what they paid for the meat, and BMW A.G., No. 163, was the first auto company to introduce a factory-backed, used-car warranty program—a measure sure to enhance the resale value of the BMW.

Image continues to be a big theme among leading advertisers, particularly those who face negative press and consumer resistance—A.H. Robins Co., No. 174 (Dalcon Shield), SmithKline (tampered Contac and Teldrin capsules), Villa Banfi (European wine tainting).

Avon Products, No. 151, launched an image-enhancing campaign to pull in the big bucks from professional women, but it proved too trendy for its real market ballast, the housewife. Avon scrapped the campaign and its domestic agency.

Few opportunities to turn a buck have gone unheeded, despite the seemingly odd fit. F.W. Woolworth Co., No. 125, plans to have 50 Burger Kings in its stores by the end of the decade. No. 150 Southland Corp. is testing Church's Fried Chicken, Rocky's Pizza and Hardee's units in its 7-Eleven stores.

Southland says market studies show its Big Gulps and other specialty food items are not suffering from the "competition."#

The Second 100 leading national advertisers spent $5.35 billion in total advertising in 1985, up 10.6% from 1984. That compares with $26.67 billion for the nation's 100 leading national advertisers as defined by Advertising Age, a year-to-year increase of only 2.7%. Of the Second 100 total, $3.04 billion was spent in 11 measured media, up 11.8% from 1984.

Alberto-Culver Co., which celebrated its 30th anniversary during fiscal 1985, is renewing its commitment to toiletries and household/grocery products segments. At least one underperforming, nonrelated operation was sold during fiscal 1985, while the company continued searching for acquisitions compatible with its basic businesses.

Still directed by founder and current chairman, president and ceo Leonard Lavin, Alberto-Culver derived 43% of its 1985 consolidated sales from health and beauty aids marketed under Alberto VO5 and other brand names. Sales of professional haircare products marketed through the company's institutional and industrial segment contributed 16% of consolidated sales, while the company's growing Sally Beauty Supply Co. chain of beauty supply products stores accounted for 21% of sales.

Alberto-Culver closed its fiscal year ended Sept. 30, 1985, with its highest ever fourth quarter sales and earnings that helped push yearly sales upward by 13% and earnings from continuing operations, up 25%. That pace picked up in 1986. In the nine months of its 1986 fiscal year, company sales grew 21% to $318.2 million and earnings from continuing operations grew 53% to $8.5 million.

From its inception, Alberto-Culver has taken steps to avoid relying on one product line only, leading to diversification from toiletries into industrial cleaning supplies in 1965 and to the acquisition of the Sally Beauty chain, in 1969.

Sally Beauty operates more than 350 wholesale beauty supply stores in 23 states, primarily in the South and Midwest. Beauty industry analysts say the chain is a leader in the beauty supply business, which sells supplies to cosmetologists and regular customers at deep discounts.

During 1985, Alberto-Culver added Victory Beauty Systems, a 38-store chain that operated under the Bee Discount and Beauty Care Discount Center names in Chicago, Cleveland, Detroit, Milwaukee and St. Louis, as well as the 16-store Payless Beauty Supply Chain.

While concentrating on beauty aids, Alberto-Culver finally divested its money-losing John A. Frye Co. boot maker subsidiary based in Marlborough, Mass. Stanley Kravetz, formerly exec vp and director of the competing Timberland Co., Portsmouth, N.H., bought Frye for an undisclosed price. Alberto-Culver's loss on the sale totaled $5.8 million. The division had sales of about $21 million, about 6% of Alberto-Culver's total sales.

Frye received measured ad support of only about $500,000, out of a companywide $75 million ad and promotional budget worldwide in 1985, up 19% from 1984. The company also spent an additional $4 million on market research.

In measured media, Alberto-Culver's 1985 spending dipped slightly to $21.8 million from $22.2 million the previous year. The company remained firmly committed to tv as its primary advertising medium. Alberto-Culver, a leader in pressing for the availability of 15-second tv spots, continued using the new format for extensive network and spot tv campaigns.

Those campaigns included several for men's toiletries, as Alberto-Culver continued its strong push to capture the leading share in this $130 million men's market. The company signed Indianapolis 500 winner Danny Sullivan as the spokesman for Alberto VO5 hair grooming mousse for men with ads themed, "Danny Sullivan drives his hair crazy but keeps it in place with Alberto VO5 mousse."

Chicago Bears defensive back Gary Fencik continued as the company's spokesman for Consort hair mousse for men, while NBC sports commentator Al McGuire is featured in Consort hair spray ads.

Alberto-Culver spent more than $15 million in ad support for its men's and women's mousse products, holding an estimated 10.3% share of the $200 million category. L'Oreal Free Hold mousse remained the category leader [illegible], an estimated 10.8% share, according to Salomon Brothers.

For women, Alberto-Culver introduced two new Alberto Mousse European styling foams, one for permed and color-treated hair and another for gray, white or silver-blond hair.

Other Alberto-Culver toiletries division products entering the highly competitive $3 billion haircare market include Alberto Styling Fix European sculpting spray and Alberto Hair Sculpture European fixing gel, both extensions to the Alberto Gelee European styling gel introduced in 1984.

These new styling aids provide "total control, especially for the hard-to-hold styles popular with trendy youths," a company spokesman says. Gels are considered to be a $16 million segment of the haircare category. Alberto-Culver incorporated the gels into its estimated $15 million "Ooooo Alberto" campaign, which features high-fashion models and a suave gentleman.

The company in April, 1986, introduced Alberto Natural Silk shampoo and conditioner, a premium line containing real silk. Both the shampoo and conditioner come in two formulas —normal and extra body—and are imported from Europe. The shampoo and conditioner line is believed to be the first of several premium-products the company is planning.

Alberto Natural Silk is being sold through drug and department stores only, a change from Alberto-Culver's drug, food and mass merchandise selling strategy. In the estimated $100 million prestige haircare segment, Alberto-Culver will butt heads with Procter & Gamble's Pantene and Bristol-Myers' Klorane shampoos and conditioners. Alberto-Culver's new line is supported with an estimated $1 million introductory print campaign themed, "We put silk in a bottle." The spending is comparable to the other competitors in the segment.

Also new during the 1986 fiscal year was the TCB Lite haircare line, with ads featuring Chicago Bears defensive tackle William "The Refrigerator" Perry and his wife, Sherry. TCB Lite is a line of five hair moisturizers and conditioners for black men and women, featuring light, nongreasy formulas. Ads appearing in black consumer publications in late 1986 announced the "Lite side of William Perry," with the athlete and his wife in formal attire in a three-page ad. Additional advertising for the regular TCB haircare line was themed, "In minutes, TCB solves the puzzle of your hair."

The household/grocery products division in 1985 lowered its measured media support for Mrs. Dash salt-free food products, including the year-old Mrs. Dash steak sauce and crispy coating mixes. Spending in measured media totaled $2.1 million, down 53% from introductory year spending of $4.5 million, according to Leading National Advertisers, which monitors seven media. However, Alberto-Culver introduced an extra-spicy version of Mrs. Dash in April, 1986, and a lemon-and-herb formula in August, 1986. Ad spending is expected to increase again.

Measured spending for the remaining household/grocery products division—including Static Guard antistatic cling spray, SugarTwin nonsugar sweetener, Baker's Joy antistick oil and flour spray for baking pans—remains essentially unchanged.

Alberto-Culver shifted its more than $20 million creative account to Grey Advertising, Chicago, from Bozell & Jacobs, Chicago, after the latter agency merged with Kenyon & Eckhardt. Agency sources attributed the split to an irresolvable conflict at Bozell & Jacobs, stemming from K&E's handling of the competing Faberge line. Lee King, vice-chairman of BJK&E and the main Alberto creative director, also moved to Grey as a vice-chairman and continues to direct Alberto's creative work.

Stern Walters/Earle Ludgin, Chicago, continues handling Alberto-Culver's $8 million household/grocery products account. Draper Daniels Media Service, Alberto-Culver's in-house media buying agency, handles all media buying and media planning for the company as well as for other clients.

Shareholders in April, 1986, approved antitakeover measures that will allow the company to sell more stock or make acquisitions without diluting the voting control of the family of Mr. Lavin.

American Stores Co. RANK 114
Salt Lake City, Utah

($ in millions)

Worldwide	1986	1984	% chg
Sales	13,890	12,119	14.6
Net income	154	186	(16.7)
U.S. advertising	68	57	18.6

American Stores Co., already the nation's third largest supermarket chain behind Safeway Stores and Kroger Co., by the end of 1986 intends to have opened 23 new stores for the year, including 14 combination food and drug stores. Capital spending for the expansion is expected to be about $280 million.

American boasts 1,621 stores in 40 states, including 123 combination Jewel Food Stores and Osco drugstores.

The company also is restructuring its units, declaring a shareholder rights distribution to ward off what chairman L.S. Skaggs says are potentially "abusive and unfair tactics" used to seize companies.

It is creating three units: Skaggs Cos. Inc. in the West, consisting of 400 stores in 14 states; Osco Drug, 659 stores in 30 states, and American Superstores Co., 562 stores in 13 eastern and midwestern states.

The company says all the units will operate on a more decentralized basis. Mr. Skaggs says the share purchase rights plan, sometimes called a "poison pill," is aimed not at preventing a takeover, but at ensuring it would be done in a fair and orderly manner in which shareholders' rights are protected. American Stores says the move is not in response to any specific suitor, and that it is unaware of any threatened takeovers.

If not a hostile takeover attempt, American has had its share of difficulties. Unionized workers at 191 Alpha Beta food stores in Southern California went on a 9½-week strike early in November, 1985, a strike estimated to have had an impact on earnings of 12 cents per common share.

And American still faces about 1,100 lawsuits stemming from a sal-

Associated Conglomerate Inc. is ranked 111th among the top 200 leading national advertisers picked by Ad Age and based on total U.S. advertising spending in 1985, which is reported in this box either under Worldwide or U.S. bold headings.

Associated Conglomerate Inc., a phantom company, is based in Moscow, Ida.

ACI reports on a calendar basis like most of the top 200. However, should a company report on a fiscal basis, the years heading the column would read, 1986 and 1985, if the fiscal year closing date occurs before this issue was published.

The advertising figure is a composite of ACI's media spending, both measured and unmeasured, contained in the tabular breakout at the end of the text in each profile. See "Where Ad Age got is data" on Page S-16 for an explanation of the tabular breakout.

Division sales are the business segments as defined by ACI and their sales for comparable years. However, should ACI have too many divisions to fit into the box, the editors combined those segments into "other." In this case, ACI segments for its specialty pet foods and farm animal feed—both proving minor contributions to its strong agricultural base—were merged into "other."

monella outbreak allegedly caused by tainted milk in its Jewel Food Stores. Jewel ceased production of dairy products at its Hillfarm Dairy in Melrose Park., Ill., in the wake of the incident. The company has taken an after-tax writeoff of $3.5 million to cover the costs of the outbreak and the closing of the dairy, which supplied products to Jewel.

Crain's Chicago Business, a sister publication of Advertising Age, estimated that 8% of Jewel's regular customers would no longer patronize the store in the wake of the outbreak, but American Stores now says retail sales at Jewel essentially have returned to normal.

American says strong management will be a keystone of its future and, to this end, this year named Tom King as president and chief operating officer. Mr. King began his career 38 years ago as a box buyer with Alpha Beta. He most recently had served as president of Acme Markets, the company's largest volume and most profitable subsidiary.

There is some speculation Mr. King is being groomed to succeed Mr. Skaggs as chairman and ceo. Mr. Skaggs controls 10.9% of American Stores' outstanding shares. Dennis K. Eck, with the company since 1969, was selected to replace Mr. King as president of Acme.

To support its operations, American reports spending $148.5 million in 1985 for advertising, an increase of 11.6% from 1984, although much of this was in local advertising. In 1985, $7.9 million of the measured advertising reported in Leading National Advertisers went to Alpha Beta Supermarkets, up 23%; $6.3 million went to Jewel, up 23.5%; Jewel's Osco Drug Stores received $3.4 millon, up 183%; Star Markets got $1.7 million, down 37%; Acme Food got $5.2 million, down 28%; and Sav-On received $1.7 million, down 32%.

Advertising Age's measured total in 11 monitored media for American Stores in 1985 was $33.2 million, of which $27.3 million was in spot tv, and another $5.6 million was spent on spot radio. The Ad Age measured total for 1985 was about 18.5% more than in 1984.

American Stores reports earnings down in the second quarter, ended Aug. 2, 1986, to $33 million, a drop of nearly 21% from the second-quarter earnings of $41.5 million in 1985. For the first half of fiscal 1986, American Stores had earnings of $65.3 million, down 5.2% from 1985's first half.

The company attributed the decline this year to weak economic conditions in core industries such as agriculture, energy, mining and timber in the Midwest, Southwest and Rocky Mountain regions. Also, Alpha Beta Co. in California, under severe price pressure for the past two years, increased advertising and promotional expenses while lowering retail prices on more than 6,000 items. The company expects the adverse economic conditions to continue for the rest of 1986.

Second-quarter sales are reported at $3.50 billion, up from $3.48 billion a year earlier. Sales through the first half of fiscal 1986 advanced slightly less than 1%, from $6.86 billion to $6.90 billion.

The company says it may divest certain assets. It will do this as it creates the nation's first national drug chain from three separate operations: Osco, Skaggs Drugs and Sav-on Drug. They would all be called Osco.

Ameritech, one of seven Bell holding companies created Jan. 1, 1984, by the breakup of New York-based American Telephone & Telegraph Co., is investing heavily in digital and fiber optics and in developing the computer software needed to transmit voice, video and data.

An important piece in the Ameritech strategy fell into place with the $215 million cash acquisition on Jan. 15, 1986, of Princeton, N.J.-based Applied Data Resources, says Fritz Ringling, analyst with The Garner Group, Stamford, Conn.

Applied Data is one of the nation's leading independent developers of software for mainframe and personal computers manufactured by IBM. Mr. Ringling says the acquisition is important, given that IBM has the lion's share of mainframe installations worldwide, and the capabilities Applied Data brings to the market for unregulated information services. "About 70% of new product development cost is software expense. It is crucial to have this capability," he says.

Data transmission service is just one example of this emerging field. The U.S. Telephone Assn. estimates that revenues from data transmission services alone will grow from a $110 billion industry in 1985 to $200 billion by 1990. That compares with average sales growth of about 3% for basic local phone service and 7% to 9% in long-distance service. By the close of 1986, Ameritech will have invested $5.5 billion in its telecommunications network, with nearly half that amount devoted to digital switching and fiber optic transmission systems, the basis for advanced communications services.

Ameritech's net income increases of 8.8% and 8.1% in revenue in 1985 outpaced growth in the first six months ending June 30, 1986. During the period net income was up 4.5% to $569.2 million on revenues of $4.6 billion, up 4%.

Ameritech's corporate advertising focused in on business users and the investment community in 1985. It also supported the ability to find solutions to large and small telecommunications problems by Ameritech's five Bell telephone companies in Illinois, Indiana, Michigan, Ohio and Wisconsin.

Corporate spending was at a lower level than in 1984 when Ameritech was building name awareness, says Dave Parker, corporate advertising manager. Ad spending for general promotion fell 44% in 1985 to $1.7 million, virtually all magazine. Ameritech's total measured spending for 11-media in 1985 was $28.9 million, up 11% over 1984 on the strength of $10.8 million in national newspaper spending.

Funds were shifted to Ameritech enterprises that are feeling the competition from other Baby Bells eyeing the lucrative unregulated markets in Ameritech's region, which includes about 25% of the headquarters operations of the nation's top 1,000 corporations. Measured media for Troy, Mich.-based Ameritech Publishing jumped from $258,000 in 1984 to $3.5 million in 1985, for example. The spending was mostly in spot tv with a small amount in magazine.

Don Pickard, Ameritech's director of advertising, says publishing has become much more competitive with the aggressive entrance of St. Louis-based Southwestern Bell's huge publishing arm into a number of Ameritech markets. Examples include Southwestern's recently announced plans to begin publishing yellow pages in the northern suburbs of Chicago.

Southwestern Bell also bought most of Metromedia's cellular telephone and paging franchises, including Metromedia's Cellular One franchise in Chicago. The $1.2 billion acquisition makes Southwestern Bell the nation's largest provider of cellular and paging services, compared with Ameritech's No. 7 ranking in cellular. Mr. Pickard expects competition to heat up in 1987. Measured spending for Ameritech Mobile Communications grew 30% in 1985 to $540,000, entirely for spot tv, according to LNA.

Measured 1985 spending for four of Ameritech's Bell subsidiaries fell, according to LNA, which monitors seven media (excluding newspapers—a big spending category for Ameritech), including a 5% drop to $3.4 million for Illinois Bell, mostly in spot tv. Michigan Bell's 1985 spending fell 4% to $1.6 million. Ohio Bell's measured spending fell 46% to $728,000, and Indiana Bell fell 32% in 1985 to $366,000. Wisconsin Bell's 1985 measured spending increased 40% to $1.5 million.

Armstrong World Industries, marketer of flooring, building and industrial products, continued its 1985 pace of record sales and earnings into 1986 in response to a strong residential building and household goods market that overshadowed a slump in commercial construction activity.

Despite these all-time highs, retail sales of building materials, furniture and other home furnishings moved ahead at a much less vigorous pace in 1985 than during the previous two years when double-digit percentage increases were recorded.

In this tougher consumer climate, Armstrong introduced a number of promotional vehicles to enhance its lines and backed its products with $22.8 million recorded in the 11 media indexes in this report, up 28% from 1984. Unmeasured spending was divided among dealer co-op programs, merchandising displays and promotional spending. Sheet and tile floor coverings, which make up almost 51% of Armstrong's net sales, accounted for the largest single category in Armstrong's measured spending.

Measured spending on Armstrong floors in 1985 was $10.2 million, up 5% from 1984, according to figures compiled by Leading National Advertisers. Of this total, $9.3 million was spent on consumer magazines, primarily in the women's service and shelter categories.

Zeroing in on the home improvement market, the company accelerated its "Adventures in Space" campaign. The series of magazine ads proposes potential uses for Armstrong's flooring in household areas that traditionally had been covered by other types of floor coverings. The campaign was paired with a direct response vehicle, including a toll-free telephone number, which generated nearly 200,000 consumer inquiries. The campaign continues through 1986.

The bulk of the company's measured spending, $14.3 million, went to magazines, up 15.3% from 1984. An additional $4.2 million was spent in newspapers. Tv spending was limited to $3.4 million in spot buys.

In November, the company unveiled its Armstrong Idea House 1986, a full-size house targeted to the perceived needs and interests of people buying their second, third or fourth home. The house provided a showcase for innovative uses of the company's featured Armstrong and Thomasville products. Extensive media coverage in magazines, newspapers, radio and tv augmented paid advertising.

Spending increased for Thomasville Furniture, to $2.5 million, up 28% from 1984. Armstrong ceiling products, which account for nearly 25% of the company's sales, were supported with $924,400 in spending, up from $325,000 in 1984, according to LNA.

Measured spending for Armstrong's consumer carpet lines grew 116%, to $1.6 million. Evans-Black carpet lines were supported with $331,100, a big increase from only $3,500 in 1984.

The company also established a network of carpet contractors to position itself in the new construction segment of the commercial carpet market. It now has access to two-thirds of the commercial carpet market being serviced by manufacturers directly through contractors, according to Armstrong reports.

In 1985, the company wooed builders of new homes with the message, "It's easier to build a better home with Armstrong." The pitch was transmitted via trade advertising, direct mail programs and exhibits at industry trade shows.

Founded in 1860, Armstrong has been absent from the list of top advertisers for many years. Through the first half of the century, its heavy print and later network radio spending made the company one of the nation's leading advertisers. In the 1950s and through the 1960s, Armstrong was among the top tv advertisers.

With a 1970 decision to concentrate the company's spending in print media, primarily magazines, the company reduced its media spending, according to Donald G. Goldstrom, vp and director-advertising and marketing services at Armstrong. "Because of

Before Elsie the cow

In 1851, Gail Borden started the world's first condensed milk plant at Torrington, Conn., and in 1857, at Burrville, Conn., he began what became Borden Inc. Officially, the company was established as a New Jersey corporation in 1899.

the nature of our products our advertising depends on the ability of the consumer to look and study their appearance and style," he says.

Avon Products Inc., which has been diversifying the past few years, is trying to rebuild its sluggish sales by focusing more on its core beauty and healthcare businesses. In the process, the company is out to change its image and marketing traditions while shifting its domestic ad business to N W Ayer.

The company reported a loss of $59.9 million for the year, but, completing a long-term divestiture program, sold Mallinckrodt (a medical products and chemicals business) for $675 million in cash to International Minerals & Chemical of Northbrook, Ill. The divestiture is part of Avon's strategy to concentrate on consumer products and expansion of its healthcare services.

Domestic sales performance declined 8% over the year, partly due to a drop in the number of domestic door-to-door representatives. However, in an attempt to turn this around, Avon in 1986 has trimmed its sales management ranks, improved on its training programs, and increased commissions bringing its existing number of representatives from 375,000 in 1985 to 400,000 (the sales force peaked at 440,000 in 1982).

By the end of the first six months of 1986, Avon's earnings had risen 20% to $54.6 million, on sales of $1.32 billion, up 18.4%.

The sales decline came as Avon was spending 34% more on measured advertising in 1985 than 1984. Support for periodicals of $6.5 million almost tripled the spending on magazines of $2.4 million in 1984. Network tv spending was up 25%.

Most of Avon's ad spending was commanded by cosmetics and fragrances, which accounted for 89% of the total ad budget.

New spending came in December, 1985, with the rollout of Imari fragrance, backed by a $3.6 million. The main campaign vehicle was network tv, with spots bearing the theme: "A fragrance to fire the imagination." Ogilvy & Mather handled.

Avon began a major overhaul of its image in 1985, continuing to focus on housewives but also "active and working women" between the ages of 22 and 40 as the target for cosmetic sales. At first, it focused on the latter, but found that shortsighted. A $25 million tv campaign via O&M, themed "Avon, the Art and Science of Beauty," was a bust and spurred an agency move to N W Ayer. Avon said the "classy" image of the campaign lost the company focus. O&M retain the company's international billings of $5 million, but N W Ayer now controls Avon's $27 million ad budget for 1986, which reportedly is up 25% over 1985.

N W Ayer created "Look How Good You Look Now" tv spots directed at Avon's middle-America marketing target and designed to communicate to customers what Avon sells and how to sell it. The campaign debuted last spring in multi-page magazine series. The company also streamlined its business interests in 1985. In June, Avon linked up with Liz Claiborne Inc. in a joint venture of Liz Claiborne cosmetics, marking Avon's first venture into retail stores.

Avon also formed the Parfums Phenix subsidiary in France to market the Deneuve fragrance named for actress Catherine Deneuve. The $165-an-ounce fragrance was first sold through direct response, but will be sold in high-end department stores beginning next spring. The 1985 ad budget for the Deneuve fragrance was estimated between $2 and $5 million. MCA, New York handles.

Although cosmetics are at the core of Avon's existence, the company also owns Foster Medical, a healthcare operation. Division sales increased 64% to $260.3 million in 1985, as Foster Medical acquired 56 new companies to be integrated into the medical equipment and supplies system.

In November, 1985, Avon announced it would acquire for $30 million Retirement Inns, a Los Angeles-based retirement home operator which operates 11 facilities for active senior citizens.

In January, 1986, Avon agreed to acquire Mediplex Group Inc., a nursing home operator, for about $220 million. Group services include nursing homes, alcohol/substance abuse treatment and retirement facilities.

Bell Atlantic, which jumped into markets for a variety of information and communications products and services, financial services and real estate, more recently took steps to shore up its position for regulated telephone products and services as competition stiffened with its former siblings and with other companies.

A key to Bell Atlantic's over-all marketing approach, according to the company, is the selection in mid-1986 of a corporate image theme—"We make technology work for you"—that carries through all advertising.

The theme is scheduled to be used through 1990.

Testing the new theme in 1985 resulted in a 123% increase, to $7 million, in measured media spending for corporate general promotion. The spending was divided 64% magazine and 36% spot tv.

Donald H. Van Lenten, vp corporate communications, says Bell Atlantic plans to boost spending for corporate general promotion to $18.6 million in 1986 and about $21 million in 1987.

The rising competition in regulated telephone services also caused Bell Atlantic to boost over-all measured ad spending for 11 media in 1985 to $30.1 million, up from $15.8 million in 1984.

Most of the increased spending was for products and services offered by Bell Atlantic's network of seven regulated telephone subsidiaries, which provide service to Delaware, New Jersey, Maryland, Pennsylvania, Virginia, West Virginia and Washington.

Network products and services received $7.4 million in seven measured media in 1985, up 178% from 1984. Spending for the category was divided 88% spot tv, 11% magazine and 1% out-of-home. Spending for network products and services is projected to rise to nearly $45 million by 1987, Mr. Van Lenten says.

Examples of the booming budgets for network products and services by Bell Atlantic units includes a 466% increase in 1985 spending for Bell of Pennsylvania, to $3.1 million, and a 108% increase for New Jersey Bell, to $712,000.

Analysts say the telephone subsidiaries are facing competition on several fronts. One threat is that large companies will bypass the phone company's network by constructing communications systems capable of originating and terminating calls, then linking with an interexchange carrier for long-distance service. In this way, a company could avoid paying access charges, which can account for as much as 20 cents of a long-distance minute costing 30 cents on consumer calls, says Gerald Mayfield, president-professional services division, DMW Group, Stamford, Conn.

Merrill Lynch & Co., for example, in the spring of 1985 linked its Manhattan headquarters directly with the long-distance unit of American Telephone & Telegraph, bypassing Nynex Co.'s New York Telephone unit. Similarly, many cable tv systems, shared tenant services and other noncarrier special access systems are capable of bypassing network services.

Network service companies also are encountering increased competition from sales of customer premise equipment, such as private branch exchange (PBX) systems, which perform similar functions as network Centrex service. Centrex is a communications system for large end-users based in a central switching facility. A disadvantage of Centrex systems is that they generally require more subscriber lines than PBX systems with comparable capacity.

Bell Atlantic spent a measured $426,000 on print advertising for Centrex services in 1985, compared with no measured spending in 1984.

Measured spending for Bell Atlantic's Yellow Pages operations also is rising as a result of increased competition, including from New York-based Reuben H. Donnelley & Co., which served as sales agent for Bell Atlantic's Yellow Pages operations in Pennsylvania and Delaware before resigning the account in July, 1986, to begin publishing its own directories.

Bell Atlantic also is competing heavily with St. Louis-based Southwestern Bell, which announced plans to publish Yellow Pages in 1987 for Manhattan, Baltimore and Washington. The Washington and Baltimore books will compete directly with those published by Bell Atlantic units. Through expansion and acquisition, Southwestern's publishing unit now publishes more than 1,000 directories. Bell Atlantic's measured spending in seven-media for Yellow Pages advertising was $4.6 million in 1985, up 36% from 1984. The spending was divided 98% spot tv, 2% out-of-home.

Analysts say Bell Atlantic financially is one of the strongest of the seven regional Bell operating companies. The company, which closed 1986 with a 12% gain in net income and a 12.2% growth in revenues, continues to show strength in 1986. Earnings for the first half of this year increased 11%, to $597.3 million, on revenues of $4.83 billion, up 9% over the comparable period in 1985.

Bell Atlantic consists of two operating groups: A network services group, including the seven regulated telephone subsidiaries, and an "enterprises" group, including nine companies that operate in mostly unregulated markets. The company has a long way to go before its enterprises group accounts for 10% of company revenues, the limit set on the breakup of AT&T as the amount a regional Bell company may gain from unregulated businesses.

During the first six months of 1986, Bell Atlantic gained revenues of $282 million from its enterprises unit, up 68% from the same period in 1984, compared with $4.55 billion from its network services unit, up 7%.

It is Bell Atlantic's aggressive build-up of the enterprises group that has attracted the most attention since divestiture.

In 2½ years, Bell Atlantic has spent $350 million to acquire five companies, and it finalized negotiations in September, 1986, to acquire $150 million in privately held real estate in the greater Philadelphia area. Also in September, Bell Atlantic purchased Greyhound Capitol Corp., the computer leasing unit of Greyhound Corp., with annual sales of more than $200 million and assets exceeding $600 million.

The largest acquisition was Sorbus Inc. in January, 1985, for about $182 million. Sorbus, formerly a division of New York-based Management Assistance Inc., is one of the nation's largest independent computer service and maintenance companies.

Bell Atlantic also acquired MAI Canada, which markets and services computer systems, and the Middle Market division of TriContinental Leasing Corp. in December, 1984, for undisclosed prices.

In June, 1985, Bell Atlantic acquired Dallas-based CompuShop in a stock trade valued at an estimated $21 million.

With 68 stores in mid-1986, CompuShop ranked fourth among nonfranchise computer retailers behind New York-based Nynex Business Centers with up to 105 outlets, Chicago-based Sears, Roebuck & Co. with 101 outlets, and San Jose, Cal.-based Businessland with 100 outlets, according to Dallas-based StoreBoard Inc.

In cellular telephone service, Bell Atlantic is the second largest service provider, serving a market with an adjusted 16.1 million population. Bell Atlantic spent a measured $795,000 for its mobile systems unit in 1985, up 3%, divided 93% spot tv and 7% out-of-home.

Leading the cellular market is Secaucus, N.J.-based Metromedia Inc., which serves a market with an adjusted population of 21.9 million. Metromedia, however, reached agreement in June, 1986, to sell its paging and cellular telephone operations to St. Louis-based Southwestern Bell for $1.2 billion, an acquisition that will vault Southwestern Bell into the lead in the national personal communications market with ownership interest in nine cellular systems and paging operations located in 19 metropolitan areas.

Southwestern Bell now ranks 11th among cellular companies, serving markets with an adjusted population of 7.2 million, according to studies by Arthur D. Little and Frost & Sullivan. Adjusted population is calculated by multiplying 1980 census totals for each service area by the company's per cent ownership of the service franchise.

Bell Atlantic's paging operation, A Beeper Co., Atlanta, acquired for an undisclosed price in December, 1985, was the subject of a landmark legal test that gives all regional Bell companies greater latitude to diversify into new lines of business outside their geographic regions.

The regional Bell companies still must seek waivers to enter lines of business not related to exchange access services, such as insurance. As a result of the ruling, analysts say the regionals could begin targeting each others' corporate clients or other large end-users, providing local access services connected to the services of interexchange carriers. This would facilitate bypassing the local telephone network to avoid costly access charges.

Bell Atlantic also reached a settlement with Washington-based MCI Communications Corp. on May 22, 1985, concerning two antitrust suits that MCI brought against AT&T and the former Bell system companies. Under terms of the settlement, Bell Atlantic paid MCI $30 million, entered an agreement for certain business relationships and agreed to modify procedures used in converting local exchanges to equal access connections.

A regional growth spurt in the southeastern U.S. promises to make BellSouth Corp., Atlanta, a powerhouse in telecommunications. With $25 billion in assets, BellSouth already is the largest of the seven regional Bell holding companies created Jan. 1, 1984, by the breakup of New York-based American Telephone & Telegraph, and it is moving quickly to make the most of a good situation.

BellSouth had measured spending for Leading National Advertisers' seven media in 1985 of $21.9 million, up 31% over 1984. Adding a measured $7.1 million for spot radio and $6.8 million in newspaper spending brings BellSouth's total for 11-media to $36.2 million in 1985, up 20%.

Population and economic growth trends are bright for BellSouth's nine-state region, including Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina and Tennessee. By the year 2000, the area will have an estimated population of 56 million, up 22% over 1985. Economists forecast more than one million new jobs in the area by 1987, and more than a quarter of the nation's new housing construction.

With such strong regional growth, BellSouth has little incentive to expand into less attractive regional markets, analysts say. Net income in 1985 was up 12.8% to $1.4 billion on revenues of $10.66 billion, up 10.7%. Net income for the first nine months of 1986 was $1.23 billion, up 14% over the same period in 1985, on revenues of $8.62 billion, up 8.7%.

Contributing to BellSouth's operating income in 1985 was a 7.6% increase in local service revenue from rate hikes and 493,000 new network access lines in service, and a 16.8% jump in interstate access revenue resulting from higher tariffs and increased usage.

BellSouth is composed of two main telephone subsidiaries, including Southern Bell, which provides service to the Atlantic coast states, and South Central Bell, which provides service to states bordering the gulf coast and the Mississippi River.

A third corporate entity, called BellSouth Enterprises, was created Jan. 1, 1986, to oversee all nonregulated subsidiaries, such as mobile communications, publishing, advanced technology, and international.

The Southern Bell unit had the lion's share of ad spending in 1985 with $8.7 million in LNA brand spending, up 94% and divided 76% spot tv and 24% magazine. South Central Bell was not far behind with $5.9 million in measured media, up 4%, divided 85% spot tv and 15% magazine.

The two units also had combined measured magazine spending of $606,000 in 1985. Measured spending for the two units accounted for 70% of BellSouth's seven-media total. Corporate general promotion increased 13% in 1985 to $2.7 million, almost entirely in measured magazine.

Ad spending by BellSouth's publishing units was down slightly in 1985. Southern Bell's measured spot tv advertising for yellow pages fell 1% to $2.1 million in 1985, and South Central Bell's spot tv spending for yellow pages fell 7% to $1.7 million in 1985.

Analysts generally see one-third of earnings in 1986 and 1987 of the Bell companies coming from unregulated businesses, including such areas as cellular telephones, the sale of business communications equipment such as private branch exchanges and yellow pages. BellSouth is strong particularly in two of these areas: It purchased in February, 1986, L.M. Berry & Co., Dayton, O., giving its publishing unit the nation's second largest independent sales agent for yellow pages in the U.S. with 800 directories in 31 states. The company also is strong in selling voice, data and office systems products to the business customers locally, estimating the local nine-state market to be worth $3.3 billion by 1990.

BellSouth has invested $14 billion over the past five years in modernizing and expanding its network with fiber optics and digital switching systems. Electronic switching now covers 70% of the network, and 30% of all access lines are digitally controlled. Many of BellSouth's enhanced services and products rely on these technologies.

IMPACT!

THE NHL ON ESPN. NOTHING HITS UPSCALE MEN HARDER.

For explosive speed and hard-hitting action, nothing beats ESPN's coverage of the National Hockey League.

With last season's upset-filled finish still fresh in everyone's minds, the 1986-87 campaign promises to be the most exciting in memory.

And with ESPN carrying up to 33 regular season and 30 playoff games—live and in prime time—it's not surprising that millions of upscale men are turning to ESPN to watch a sport they can't find on the broadcast networks.

And these men are a pretty hard-hitting group themselves. For instance, ESPN's typical hockey viewer buys 30% more imported cars, 44% more life insurance and does 82% more business traveling than his national counterpart.*

Without ESPN, your television budget is underdelivering these upscale men. Just 10% of your national TV budget allocated to ESPN will dramatically increase its effectiveness. You'll be reaching the men who spend and do more, and you'll be doing it at a much lower cost-per-thousand.

So give us a call at (212) 661-6040. You supply the message, we'll supply the impact.

Black & Decker Corp., laboring to make the brand transition from its huge General Electric housewares acquisition of 1984, has been restructuring in 1985 and 1986 to improve capacity utilization. The reason: the leveling off of power tool and housewares sales.

In fiscal 1 86, ended Sept. 29, the business clin ate dampened any turnaround. Fo the nine-month period ended June 29, the company reported earnings of $25.4 million, down 31%, and sales of $1.35 billion, up 5.9% from the corresponding period in 1985. But none of this seems to have slowed the momentum of the world's biggest power-tool maker in its drive for marketing promotion, product rebranding or administrative streamlining.

B&D has been advertising vigorously. In 1985, B&D reported to the SEC ad expenditures of $171.8 million worldwide, up 45% from 1984. In the U.S., B&D spent $44.6 million in measured media, up from $31.2 million in 1984. Other outlays included $25 million in unmeasured costs for dealer co-op advertising/promotion. The U.S. claims 60% of sales, followed by 25% in Europe and 15% in the rest of the world.

When B&D, the biggest producer of power tools, moved into small household appliances, it bought the biggest producer of small appliances, the housewares division of General Electric.

The cost to B&D was $212 million for the business that produced about $470 million in 1983 sales. B&D has converted the GE products to B&D brands.

Also in 1985, B&D spent $50 million to buy two Rank Organisation plc appliance companies, Rank Electric Housewares Pty Ltd., Australia, and Rank Appliances, New Zealand. A boost to B&D was getting the 240-volt technology of Rank, necessary for any continued success in Europe where 240-volt service is standard.

B&D, which slugs it out with Sunbeam, Hamilton Beach, Proctor Silex, Toastmaster and Norelco among others in the $3.8 billion housewares business, has found its share slipping, particularly in electric irons, which represent about 25% of B&D's current housewares line. The company's share of that $275 million market reportedly has dropped from 45% to about 43%. The main beneficiary is Sunbeam which has boosted its share to 21%. Other players in the category include Wear-Ever/Proctor Silex 19%, Hamilton-Beach 7%, Norelco 6%, and West Bend 3%, according to Jim Stevens, editor, *Appliance Magazine.* B&D is doing better in cordless and undercabinet appliances, such as mixers, coffee makers and can openers.

The small appliance market, which has a narrow 10% annual turnover, is a hard one in which to stay afloat.

The GE/B&D brand transition along with corporate restructuring are the two main ongoing dynamics at B&D. Half the switchovers were made during 1985. The transition, scheduled over a three-year period, involves replacing the familiar GE script monogram with the newly designed B&D orange hexagon on more than 150 GE housewares products. The way the logo is applied in advertising depends on how the product is perceived. Some print ads show both the monogram and hexagon; some have the tag line, "Now by Black & Decker," and some still carry the GE script.

But the first order of business is for B&D to restore itself to the profit column. After a good first quarter in fiscal 1985, the company went on to suffer the 1985 profit loss of $158.4 million. The year-to-year swing includes a $205.3 million restructuring cost. A big bite came out of earnings to pay for a larger ad program, dealer inventories and rebates.

The company is shutting plants to reduce capacity around the world by about a third. Planned shutdowns announced to date include a housewares plant at Brockport, N.Y., to close at the end of 1986, and the Hampstead, Md., power tool plant, to close by mid-1987. The company says the restructuring will begin to improve earnings in fiscal 1987 and 1988.

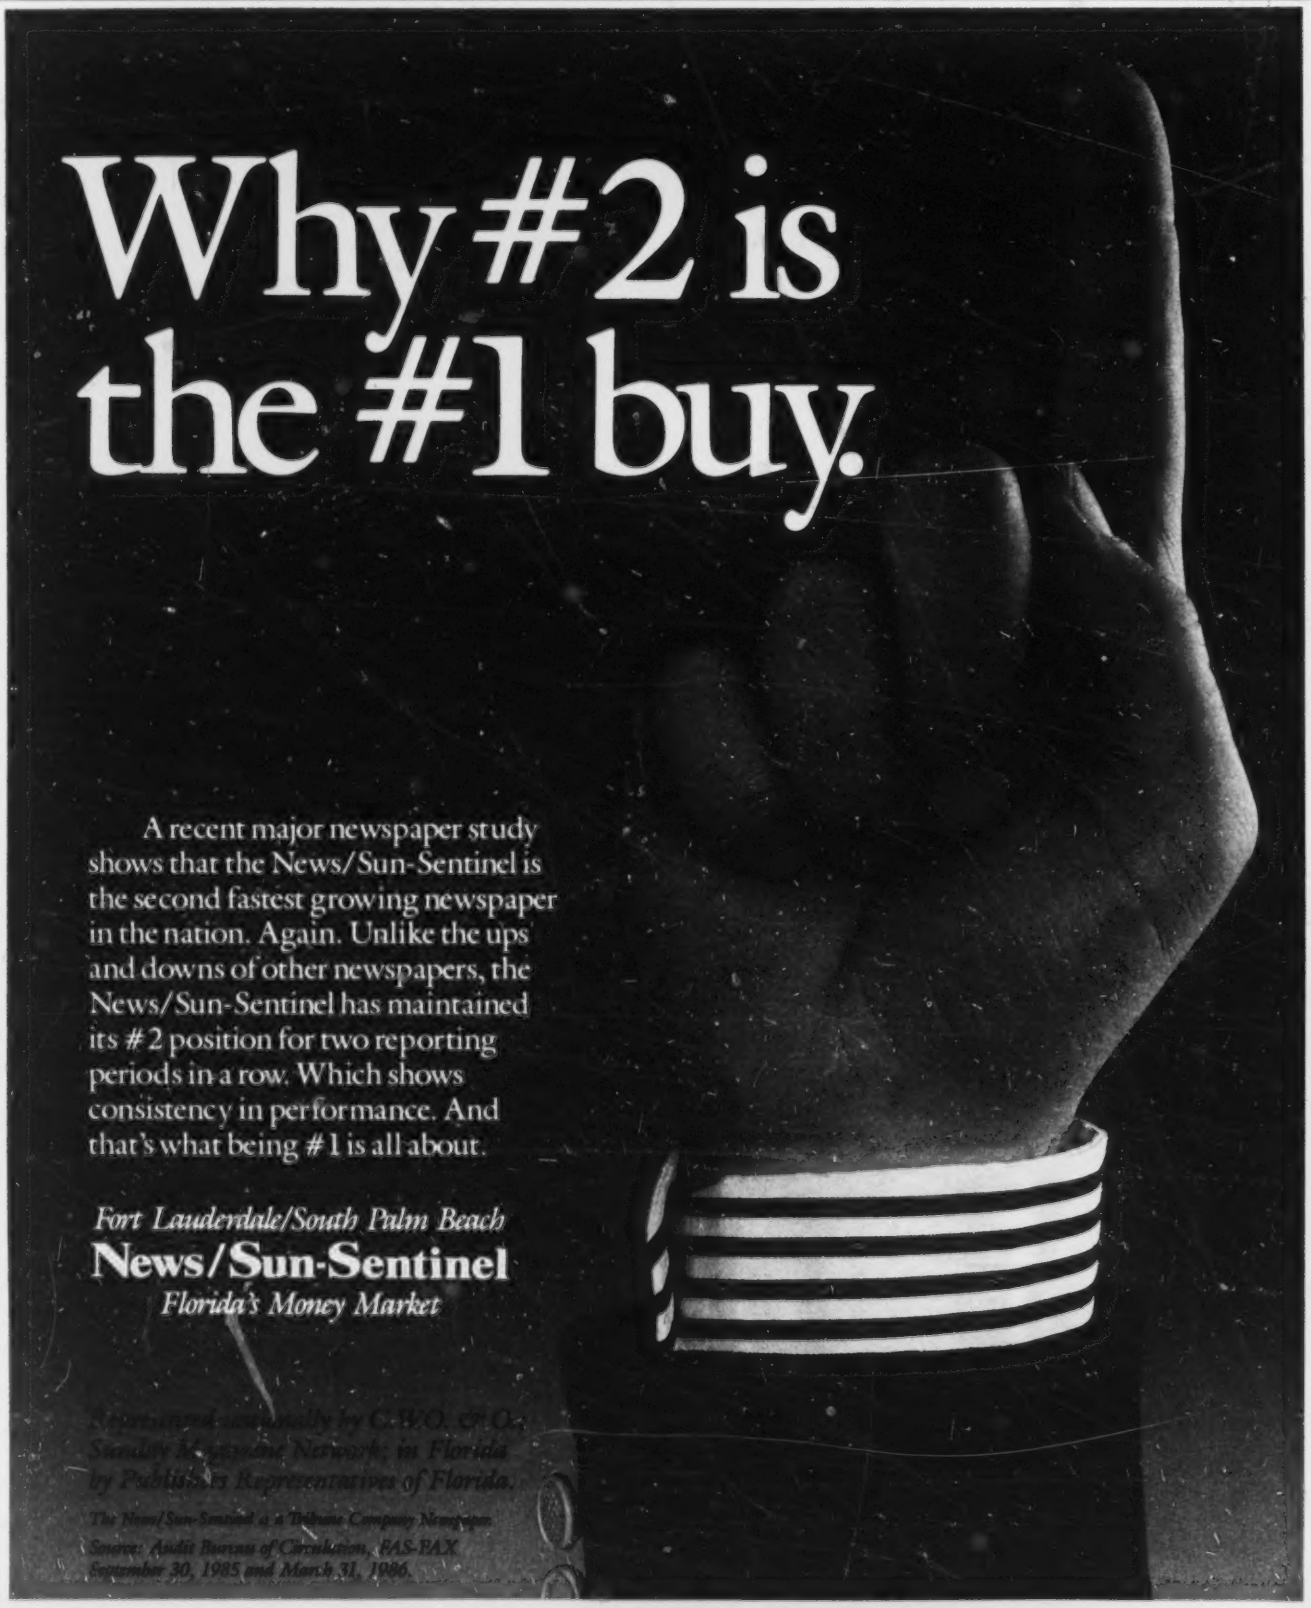
For further streamlining, B&D reduced its number of separately operating business segments from six to five in 1985, and it folded the five into two administrative groups this year—Household Products, consisting of the home appliance group (39% of sales in 1985), and Power Tools, consisting of power tools, accessories, outdoor products and service groups (61%). *(Ad Age reports six divisions in the box accompanying this profile to better reflect year-to-year growth. B&D reduced the number to five by merging professional tools with consumer tools.)*

Both groups in 1985 generated new products: From the Household Products came HandyMixer cordless beater, cordless mixer, cordless knife and two restaged GE appliance lines, the automatic shut-off iron and the Spacemaker line of undercabinet appliances. From Power Tools came a drill/driver combination electric drill and screwdriver and Piranha carbide tooth circular saw blades.

In January, 1986, B&D moved U.S. advertising for its Household Products group from BBDO, New York, to McCann-Erickson, New York. BBDO then resigned from B&D's U.S. Power Tool account, which currently is being handled by several agencies on a project basis. Selection of a new agency is under review. McCann had become the B&D agency overseas in 1985.

B&D says future marketing promotion will be more market driven, and while great marketing energy will continue on the B&D branding of housewares, there will be increased focus on the power tool group. In its 43% overall increase in spending for measured media during 1985, B&D put its major thrust behind network tv, up 69%, to $26.2 million in 1985, and spot tv, up 78%, to $8.8 million.

The company spent 66% more advertising on its small household appliances in 1985 than 1984, rising to



Why #2 is
the #1 buy.
A recent major newspaper study shows that the News/Sun-Sentinel is the second fastest growing newspaper in the nation. Again. Unlike the ups and downs of other newspapers, the News/Sun-Sentinel has maintained its #2 position for two reporting periods in a row. Which shows consistency in performance. And that's what being #1 is all about.

See Page S-10 for breakout of media not monitored by Leading National Advertisers. For further explanation, see *Where Ad Age got its data*, Page S-18.

$31.3 million. But a notable shift, illustrating the brand transitioning, was the great drop in 1985 in GE brand advertising, to just $370,000 in the various media from $7.9 million in 1984. B&D tool advertising received markedly increased support in 1985, jumping 78%, to $9.9 million.

Among the major items, support for the cordless Dustbuster hand-held vacuums was up 25%, to $6.2 million in 1985, largely in magazines and network and spot tv for both years.

While magazine and network tv spending for the company's power tools was comparable to the previous year's, the total committed to spot tv grew to $2.71 million from only $104,400 in 1984, and cable tv spending went to $186,600 from just $11,900 the year before.

Another big, highly competitive product, the B&D new automatic shut-off iron, received nearly fivefold the ad support in 1985 as in 1984, climbing to $5.2 million from $1.1 million. Magazine spending for the irons in 1985 was about even with 1984, with much of the increase going to network tv, which got $3.62 million.

During the year, B&D named Nolan D. Archibald president-ceo on the recommendation of Laurence J. Farley, chairman and formerly ceo. Mr. Farley continues as chairman.

Block Drug Co., marketer of Polident, Poligrip, 2000 Flushes and the ill-fated Efficol Cough Whip, pared back its media advertising expenditures during 1985 to concentrate more on product promotion.

Block, however, increased over-all advertising, reporting to the SEC that its total advertising and promotion budget in 1985 rose to $83.5 million, up 11.3%. The company says this reflects its increasing reliance, in competing with larger competitors, on market research, test marketing, and personal sales and marketing promotion of most of its professional dental and pharmaceutical products.

Block Drug, whose sales and earnings both increased about 11% in fiscal 1986, ended March 31, over the previous year, continued that pattern into the first quarter of fiscal 1987, ended June 30, with net income up 9.7% to $7.8 million on revenues of $73.6 million, up 13.1%.

During calendar 1985, Block trimmed measured advertising 35% to $23 million from 1984. Ad expenditures were reduced for five of the company's seven most-advertised products, and completely eliminated for a sixth.

Block Drug has three sales divisions —professional dental and consumer oral hygiene products; consumer products, which includes proprietary medicine products and insecticides and household products; and ethical pharmaceuticals. All three divisions showed increases in 1985 sales.

Of Block's $274.2 million in 1985 sales, $183 million were in the U.S., $63.2 million in Europe, and $28 million in South America, Asia and Australia.

In 1985, Block obtained X-14, a regional brand of mildew stain remover, among several products purchased for $4.6 million from White Laboratories, Orlando, and began distributing it nationally, spending about $750,000 in 1985. In 1986, it is estimated to be spending $1.2 million on the product. It is introducing Vitawipes, disinfectant-impregnated cloths to control infection in dental offices, with a $750,000 budget.

Block is now test marketing three new products—Caffree Toothpaste, marketed to eliminate caffein stains caused by coffee and tea; Fiberway, a natural bulk laxative; and First Hand, a hand and body lotion.

The company is discontinuing Efficol Cough Whip Syrup after a little more than a year on the market and $4 million dollars of advertising against Robitussin (A.H. Robins) and Vicks Formula 44 (Procter & Gamble). In this $300 million cough segment, Robitussin and Vicks remain leaders with a combined 50% market share. P&G spent $14 million on its Vicks line while A.H. Robins spent about $10.5 million on its Robitussin line in 1985.

Block cut measured advertising for its seven largest-advertised brands in 1985. The cut for 2000 Flushes Bowl Cleaner, No. 1 in its category, was 13.9%, to $3.1 million. Sales of 2000 Flushes have doubled since Block purchased the brand in 1983.

In denture cleansers, spending for Dentu-Creme denture toothpaste dropped 28% to $2.1 million, and fell 25% to $3.6 million for Polident Denture Tablets. Block holds a 45% share of the U.S. denture cleanser market with sales of $40-$45 million, according to Elizabeth P. Wright, analyst with Shearson, Lehman Bros. Total cleanser market is worth $100 million in the U.S. Warner-Lambert's Efferdent is the leader with a 50 share.

In the denture adhesives market worth $115 million nationally, advertising for Poligrip Regular Denture Adhesive dropped 25% to $2.7 million. Poligrip, with sales of $26 million holds a 22.6 share of market. Leader P&G's Fixodent holds a 23-24% share as No. 1, and P&G's Fasteeth powder is No. 3 with a 16-17% share, according to Ms. Wright. In this mature market, Block has maintained market share through restaging of products, extending lines, advertising and incremental price increases.

The company also reduced spending on Tegrin Medicated Shampoo, down 29% to $3.5 million. Most of the cuts in advertising among all company products were in spot and network tv spending.

Only for the ill-fated Efficol did ad expenditures increase last year, up 14% to $3.2 million. But Block eliminated measured advertising for Sensodyne Toothpaste, for which it spent $1.4 million on network and spot tv ads in 1984, concentrating instead on promotional efforts in the trade to market the product.

The company did not extend an experimental one-year agreement with CBS-TV, referred to as the "multi-daypart" deal in which Block let CBS move $5 million to $10 million in network buys from one daypart to another without advance notice in exchange for lower cost-per-thousand rates. The move seems part of an overall shift away from concentration on costly tv advertising.

Peter Mann, Block senior vp-general manager consumer products and household products division, says the deal was discontinued after the 1984-85 tv season, because Block's brand mixes had changed, as had general advertising conditions, and not because of any dissatisfaction with the agreement by either party.

Blue Cross & Blue Shield Assn.

Chicago

($ in millions)

Worldwide	1986	1985	% chg
Sales	41,500	40,000	3.8
Net income	1,500	2,100	(28.6)
U.S. advertising	61	41	49.1

Blue Cross & Blue Shield Assn. is responding to increasing competition from insurance companies and other health care providers by raising its own profile with both the corporate decision maker and the consumer.

The Chicago-based national organization, which frequently ties advertising into sporting events to reach male decision-makers, announced in mid-October, 1986, that it has signed on as a corporate sponsor of the 1988 Winter Olympics to be held in Calgary, Canada. Beginning in 1987, the national organization will begin airing ads featuring special Olympic moments and sponsoring pre-Olympic tv specials, says Duane R. Carlson, vp-communications.

Total measured spending for Blue Cross & Blue Shield has tripled since 1983 when the healthcare industry began reacting to greater competition and concern over rising costs. A key factor in this was the federal government's new method of reimbursing treatment under Medicare, the program that provides health benefits to those 65-years and older. The federal government began phasing in fixed reimbursement levels for treatment of 468 common procedures, called diagnostic related groups of illnesses, forcing the healthcare industry to both contain costs and to find innovative ways to manage healthcare products in the face of growing competition.

In 1983, Blue Cross & Blue Shield's total measured spending was only $10.3 million for seven media. By 1984, total measured spending jumped 94% to $19.9 million. In 1985, total measured spending for seven media increased 50% to $20.1 million, according to LNA, which monitors seven media. Total measured spending for the 11-media reported in this issue was $30.6 million in 1985, up 49% over 1984 on the strength of $4.8 million in newspaper spending and $5.6 million in spot radio.

Blue Cross & Blue Shield Assns. are the names and symbols used by the 77 local, nonprofit community service organizations called Blue Cross and Blue Shield plans. The local plans contract with hospitals, physicians and healthcare organizations to provide prepaid healthcare services to subscribers in the $400-plus billion healthcare industry.

Although they formed an association, sharing administrative costs and offices, Blue Cross and Blue Shield on the local level sometimes are separate legal entities. The association is a nationwide federation of locally governed, autonomous corporations, each operating under state law as a non-profit service organization. The association is needed, among other reasons, to create and place national advertising, and to coordinate insurance coverage in cases where group membership in the local plans crosses regional boundaries.

The national association and local plans joined together in September, 1984, to launch advertising for Blue Cross and Blue Shield plans bearing the first cooperative ad theme: "Carry the Caring Card." In May, 1985, the national and local plans broke an educational campaign on "Managing the new healthcare," which discussed issues and options in healthcare. The local plans have been offering such options as Health Maintenance Organizations (HMOs) since 1969 and Preferred Provider Organizations (PPOs) since 1983, in addition to traditional fee-for-service reimbursement programs.

The national association spent $17.6 million on measured media for Blue Cross and Blue Shield plans in 1985, divided 56% spot tv, 26% network tv, 10% magazine, 7% network radio, and 1% out-of-home. The spending represented 87% of total measured outlays for LNA's seven media.

The national association also spent a measured $2.3 million solely for Blue Cross plans, which cover hospitalization expenses, divided 96% spot tv and 4% out-of-home. Alternative health plans, including HMOs and PPOs, received $110,000 in measured spot tv.

Claims expense in 1985 totaled $86.8 billion for the national association. Of this, $37.8 billion was paid-for care received by subscribers, a decrease of 5% from 1984, and $48.9 billion was paid for persons in federal programs.

Blue Cross & Blue Shield had 77.5 million subscribers at the close of 1985. That figure includes subscribers under the Federal Employee Program and coverage for Medicare, and as carriers for Medicaid and Champus, which includes military dependents. The total number of people covered is about 100 million.

BMW A.G.

Munich

($ in millions)

Worldwide	1986	1985	% chg
Sales	4,755	4,317	10.2
Net income	100	110	(9.0)
U.S. advertising	50	36	40.2

BMW of North America successfully shifted its marketing focus in 1985 to the upper end of its lineup as new models widened its appeal. The move also helped drive up unit sales 23.9% over 1984 to 87,873 units in the U.S. in 1985.

The company's U.S. marketing formerly hinged on its lower-price 300 series ($19,955 to $23,255), but in 1985 ad spending backed the higher-price models to boost sales.

Sales of BMW's 635CSi jumped 41.9% in 1985. Of the $3.8 million spent on the 6 series in seven measured media tracked by Leading National Advertisers, the 635CSi got $3.5 million.

The series got only $898,000 in advertising in 1984. BMW's 325e, introduced in model year 1985, and 325es models were the company's big sellers, with unit sales of 30,819. Advertising in calendar 1985 dropped to $959,400 from $5.5 million in 1984.

The 318i, another top-selling car, posted unit sales of 23,111, a 19.4% drop from 1984. Advertising was only $367,000 for the 318i, down from $1.6 million in 1984. The big spender was the new BMW 735i with $6.8 million. BMW also spent $8.4 million advertising nonspecific model-passenger cars, up from $144,600 in 1984.

BMW had a 3.1% share of the imported car market in 1985, up from 2.9% the previous year. The company also captured 20.1% of the import luxury car market, which includes Audi, Jaguar, Mercedes-Benz, Porsche, Saab and Volvo. In 1984 its share was 18.1%.

BMW increased its network tv ad spending nearly fourfold to $11.5 million in 1985, from $2.9 million in 1984, while spot tv spending dropped 23.7% to $5 million. Spot radio spending almost doubled to $2.9 million.

Importer BMW of North America is one of 13 foreign sales and marketing subsidiaries of parent company Bavarian Motor Works, or Bayerische Motoren Werke AG, in Munich. That includes a Canadian subsidiary, BMW Canada, that opened in early 1986 in Whitby, Ont.

The U.S. is the best foreign market for BMW. U.S. unit sales were more than double those in any other country, including 33,500 in the U.K., 29,300 in France, 19,400 in Italy and 13,000 in Netherlands.

New for model year 1985 was the BMW 325e sedan, designed as an entry-level BMW to attract people into BMW ownership and offer a higher performance option for current 3 series owners. Also launched were four-door sedan versions of the small-body 318i and 325e and the company's first U.S. diesel offering, the 524td. All were marketed under the BMW umbrella tag line, "The ultimate driving machine," via Ammirati & Puris, New York.

To appeal to younger, more affluent buyers, BMW also launched a new line of upscale motorcycles, a K series of four-cylinder cycles that sold for up to $7,500. Most of the company's $500,000 1985 motorcycle ad budget

went into a three-month spring campaign, themed, "The legendary motorcycles of Germany."

In late 1985 BMW's parent company was rumored to be high on Detroit-based General Motors Corp.'s shopping list for a European luxury auto maker to become GM's seventh domestic car division. Although BMW confirmed talks were held with GM, it maintains it isn't for sale.

In November, 1985, BMW became the first auto marketer in the U.S. to offer a factory-backed, used-car warranty. The national program was designed to bolster prices of used BMWs and strengthen dealers. A heavy print and tv introductory campaign broke in February, billing BMW as "The only auto maker that stands behind its cars. Twice."

BMW's marketing effort for model year 1986 involved programs intended to improve the company's image. It increased promotional and merchandising budgets sharply—about 35% of BMW's 1986 marketing activities—as BMW returned to racing and added sponsorships of polo and race track advanced driving school for auto enthusiasts. Of the remaining 65%, four-fifths went to national advertising and one-fifth to its dealer ad group.

The company also increased direct marketing spending by expanding a program that invited prospective buyers to test drive cars at race tracks.

BMW also moved to strengthen its 3 series to combat increasing competition from Japanese imports, says Gunter Kramer, chairman and president. BMW dropped the 318i for 1986 and added 3 sportier 325 models to compete with Honda's Acura entries and sports-luxury entries from Toyota and Nissan expected by 1990. Once again, BMW's "The ultimate driving machine" theme was retained, and ads continued to pitch handling, engineering technology and prestige.

BMW broadened its motor sports involvement in 1986. In addition to fielding a Formula One engine, BMW competed with a two-car entry in the International Motor Sports Assn. GTP class. The BMW/Skip Barber Advanced Driving School, run by the ex-Formula One driver, was incorporated into a direct mail program. BMW solicited prospects by mail for the course. BMW increased the number of regional polo events it sponsors to 12 in 1986 from five in 1985.

Borden Inc. in 1985-86 is trimming costs by cutting about 1,000 from its work force, selling off properties not part of the chosen business segments, and acquiring new companies in growth areas. The 87-year-old company also reduced its common stock outstanding by repurchasing 4 million shares.

Borden has shown positive results so far in 1986. In the first half, ended June 30, it had sales of $2.37 billion, up 4.5%, and net income of $88.6 million, up 9.5%.

The company continues to spend heavily on "advertising and promotion," which rose 6.2% to $267.6 million worldwide in 1985, from $252 million in 1984. Of the total reported to the SEC, Borden says $54.2 million was advertising while $213.4 million was salaries and other expenses including a broad range of promotional activities —couponing, participation in community activities, point of purchase, food premiums, printed materials, and logo caps. The total ad and promotion figure also includes support for Borden international operations which account for about 16% of total sales.

In 11 measured media, Borden spent $21 million in 1985, down 25% from 1984. Borden gives signs of moving more toward unmeasured advertising among its changing corporate strategies in the mid-1980s. Measured ad support for big brands is off noticeably except for Krylon paints, backed by $3.62 million in 1985, up 55%. Support for Eagle Brand sweetened condensed milk, Borden's original product in production for 125 years, was off 28% to $2.1 million. Eagle Brand, however, maintained sales growth of 6% in 1985, better than the over-all corporate sales growth of 3.2%.

Borden, the biggest fresh dairy supplier in the nation, markets manufactured dairy products on a national basis and sells fluid milk and fresh dairy lines regionally in the eastern half of the nation and the Southwest.

Borden's products are now in two major areas, foods and chemicals, with 75% of its sales in consumer products which produce 80% of its operating income. The company also operates in Europe, Latin America, Asia and the Pacific, for the past three years it has run its U.S. and Canadian operations jointly.

Continuing the expansion of its pasta lines, Borden in February, 1984, bought the Anthony Macaroni Co., Los Angeles, maker of Anthony brand dry pasta. Then in August, 1985, it added another dry pasta brand, Vimco, by acquiring Viviano Macaroni Co., Carnegie, Pa. These newcomers joined Borden's other pasta labels, Creamettes, Luxury and Ronco, helping to push the company's U.S. pasta market share up to 15% from the 11.9% share it had in 1984. This inched Borden closer to No. 2 CPC International's Mueller brand with a 15.6% share and 17% for segment leader Hershey Foods, which has American Beauty and five other brands. Borden says its pasta business is the fastest growing part of the market, taking one-third of total U.S. pasta market growth in 1985.

In September, 1985, Borden's ex-

MAKING ROOM FOR A NEW ADDITION.

When it comes to taking the hassle out of store resets, Heinz U.S.A. calls in the Kelly reserves –the merchandising teams of the marketing division of Kelly Services–guaranteed to satisfy your in-store needs in over 200 markets across the nation.

One phone call is all it takes. Because with Kelly Marketing, management of your project is completely centralized.

With 500 offices linked to our exclusive Video Training Network, we can put qualified support people into the field to relieve you of a variety of routine marketing functions.

Retail merchandising. Product demonstrations. Product sampling and couponing. Telemarketing. Billboard audits.

And because Kelly temporary employees are paid only for the length of your assignment, we feel you can't find a more cost-effective way to get the most out of your marketing dollar.

For more details on what Kelly Marketing can do for you, call or write National Marketing Division, PO Box 1179, Detroit, MI 48266-0132. (313) 362-4444.

KELLY SERVICES The Kelly Girl® People

Nobody puts temporaries to the test like Kelly™

©1986 Kelly Services, Inc.

panded its dairy operations by acquiring the business of Detroit Pure Milk Co. and in December, the Sealtest Dairy in Miami, Fla. In March, 1986, the company acquired Midwest Farms Dairy in Louisiana, supplier of milk and ice cream to 7-Eleven stores in that state.

Borden became the world's biggest decorative wall coverings maker in April, 1985, with its purchase of the Crown and Sunworthy businesses of Reed International plc. Crown is the leading U.K. wall-covering maker, and Sunworthy is the biggest in Canada.

In a second recent acquisition from CPC International, Borden on June 30, 1986, purchased Acme Resins Corp., Westchester, Ill. This addition makes Borden one of the top foundry resin producers in the world.

One of Borden's bigger additions was the $40 million purchase on July 12, 1986, of Jays Foods Inc., Chicago-area marketer of potato chips, popcorn, corn-based snacks and pretzels. Borden already has brands such as Wise Cottage Fries, New York Deli, Clover Club and Geiser competing in the $6 billion salty snack segment of the huge U.S. snack market, said to total $29.5 billion this year. The company is second nationally in snacks, behind PepsiCo's Frito-Lay, and in 1985 had Snack Division domestic sales of $619.8 million.

Most recently acquired was Doxsee Food Corp., Baltimore, maker of the biggest U.S. clam product line plus Bennette sauces and toppings and Cary maple syrup. Borden closed this deal Aug. 27 for $32.5 million.

Helping pay for the acquisitions was the sale of Drake Bakery operations this July 12, to Ralston Purina, St. Louis. Cash payment, after taxes and expenses, exceeded $100 million. Drake marketed cakes, pies, and cookies in a 13-state Atlantic seaboard area, and in 1985 boosted operating income nearly 20%, on total sales of $125 million.

Drake did not fit Borden's strategy of building a national franchise in salt snacks, says James J. Sullivan, Borden's chairman/ceo.

Borden also held merger discussions with Purex Industries, Lakewood, Cal., maker of Brillo, Purex and other brands, but talks reported in January, 1985, were called off in February.

Borden says it is refocusing its marketing strategy to come up with new products that are patentable, assuring market segment domination for a period of time like it achieved in years past with such brands as Eagle Brand, Cracker Jack, ReaLemon and Elmer's adhesives.

New products, whether qualifying as market niche products or not, include the industry's first fluid milk, Borden Hi-Calcium milk, which gives the user 100% of the daily calcium requirement in a single 8-ounce serving. Market tests are under way. Other new products are Borden's pioneer thick potato chip, Cottage Fries and Corn Spirals—a corkscrew-shaped crunchy corn chip made by using rotini pasta equipment.

Borden spent 25.5% less on media—down to about $21 million from $28 million in 1984—although spot radio jumped 110% to $3.4 million.

Heaviest measured ad support was for Borden's Lite Line Cheese, $1.38 million; Eagle Brand, $2.1 million; Elmer's Glues, $1.62 million; and Kava acid-neutralized coffee, $1.11 million. All were down from 1984 spending. A major 1985 increase was the $3.62 million for Krylon paints, up 55%. Other smaller increases were for Snows chowder, Coco Lopez Puerto Rican-produced coconut beverage products, and Borden's Ice Cream. Cracker Jack, at $806,700 in 1985, was close to 1984 spending of $879,100.

Borden agency changes include the succession of Jordan, Manning, Case, Taylor & McGrath, New York, to the snack advertising formerly handled by the defunct McDonald & Little, Atlanta. Also, the nonfood advertising handled by Grey, Lyon & King was merged into Grey Advertising, New York, with George Lyon continuing at Grey with responsibility for the brands.

In management, R.J. Ventres was elected president and chief operating officer, effective July 1, 1985, succeeding Eugene J. Sullivan, who is chairman, chief executive officer.

Beverages, food	477	486	(1.9)
Health	73	87	(16.1)

Throughout 1985, London-based Cadbury Schweppes plc shuffled its worldwide confectionery and beverage divisions after a disappointing 1984, but still had lower sales, off 8%.

Sales for the U.S. divisions of Cadbury Schweppes—Peter Paul Cadbury, Duffy-Mott, Rose/Holland House and Schweppes USA—fared worse in 1985, dropping 26.4% from 1984, to $452.7 million.

U.S. losses came despite a boost in advertising expenditures in 1985—up 19.5%, to $27 million. Most of the increase went into radio, newspaper and spot tv, according to Leading National Advertisers.

In moves to consolidate its interests, Cadbury Schweppes divested the beverages and foods division and the unprofitable health and hygiene divisions in the U.K.

Despite losses in its confections division, North American brands—Peter Paul's Mounds, Almond Joy and York Peppermint Pattie—continue as Cadbury's most profitable brands. Cadbury confections (Peter Paul products, Cadbury Creme Eggs and Cadbury molded chocolate bars), hold an 8.2% share of the U.S. market, according to Brian Falk, Cadbury vp-mktg. Cadbury continues to have a difficult time gaining shares against Mars and Hershey confection brands, which combined split a 70% share of the market.

The division hopes to roll Wispa, an aerated chocolate bar, into national markets some time next year. A popular brand in the U.K., Wispa has been in test markets in upstate New York and parts of New England since 1984. Ad spending, concentrated mostly in spot tv, was up in test markets to $800,000 in 1985, from $321,000 in 1984. The Ammirati & Puris agency says a new campaign for Wispa will break next year.

A $1.6 million profit in the soft drink division in 1985 helped reduce Cadbury Schweppes' losses. This year, Schweppes USA acquired the beverage operations of Canada Dry and Sunkist from RJR Nabisco for $230 million, reselling a Canadian bottling company (included in the deal) to Coca-Cola for $90 million.

Schweppes also recently acquired a 30% stake in Dr Pepper Co. The company estimates it now has a respectable 8% share of the U.S. soft drink market, giving it the No. 3 spot in U.S. soft drink sales behind Coca-Cola Co. (38.6%) and PepsiCo (27.4%).

Schweppes had measured ad spending of $4.1 million in 1985, most of which went into spot tv and magazines. The most competition Schweppes faces in its mixer category is from Seagram's, licensed by Premium Beverages, Greenwich, Conn., a subsidiary of Coca-Cola Bottling Co., New York.

Sodamate Inc., a majority owned subsidiary of Cadbury Schweppes, began testing its Sodamate soft drink machine—a do-it-yourself in-home appliance—in Omaha, Neb., last summer. The machines are sold door to door for $124 in test markets, and Cadbury Schweppes will determine later whether to move the product into stores. The test is being backed by advertising estimated at a $50 million national rate.

The marketing push will be supported heavily by tv and print (including women's magazines) and strong public relations, according to Alan Langden, Sodamate vp-sales/marketing. Bozell, Jacobs, Kenyon & Eckhardt, New York handles. Sodamate is positioned as an in-home convenience that alleviates the hassles associated with bottled or canned soft drinks.

In 1985, Rose/Holland House spent $500,000 in support of a campaign for Rose's lime juice. Ads via Ammirati & Puris, which will run through 1987, are designed to attract younger, trend-setting consumers using the theme "The uncommon denominator." Rose's got $277,600 in spending, all spot tv, in 1984.

Holland House spent $255,000 to back its cooking wine in women's service books, promoting everyday use of the product.

Inside Cadbury there was concentration on restructuring North American operations complementing the streamlining efforts behind candy and drinks. Management levels were cut and more than 30% of the group's North American executives were dismissed. In March, 1986, North America chairman Robert Ix resigned and Jim Schadt was named president-ceo for North America.

Where Ad Age got its data for this report

Companies spotlighted in the Second 100 Leading National Advertisers—a companion directory to the 100 Leading National Advertisers, 1986 edition (AA, Sept. 4, 1986)—were selected on the basis of their measured national advertising totals tracked in 11 media.

Ad expenditures are U.S. only and reflect calendar 1985 and 1984. Total ad estimates—on which the company's ranking is based—include measured and unmeasured spending.

Leading National Advertisers supplies measured expenditures in seven media, including: **Magazine** and **newspaper supplements** as supplied by Publishers Information Bureau; **network tv, spot tv, network radio** and **network cable,** as supplied by Broadcast Advertisers Reports, and **outdoor** as supplied by Institute of Outdoor Advertising and Outdoor Advertising Assn. of America.

Other media expenditures listed include **newspaper** as supplied by Media Records, **business publications** as supplied by Rome Reports, **farm publications** as supplied by Agricultural Marketing Information Services (AGRICOM) and **spot radio** as supplied by Radio Advertising Bureau.

PIB monitors 141 consumer magazines and *New York Times Magazine, Parade* and USA Weekend. BAR monitors ABC, NBC and CBS tv networks; 319 tv stations in 75 top markets—with continuous monitoring of New York, Chicago and Los Angeles; CBN, CNN, ESPN, USA, MTV: Music Television and WTBS cable networks, and 15 radio networks. IOA and OAAA measure gross sales from more than 200 national poster and paint advertising plants in markets of over 100,000 population. Rome Reports monitors about 600 trade and professional publications. Media Records monitors 202 daily and Sunday newspapers.

Measured media expenditures for 1985 and 1984 are restated to reflect corporate structure as of Dec. 31, 1985, in accordance with LNA practices. Companies acquired prior to that date are included in the new parent company's ad spending for full calendar 1985 and 1984 totals.

Unmeasured advertising figures are estimates and include direct mail, promotion, couponing, co-op contributions, trade show activity, ad literature, etc. They do not include corporate overhead spending, such as salaries, travel expenses, office rental as permitted under "advertising costs" filed with the SEC, nor do they include local retail ad spending.

Financial information in the profile boxtops may be either public information or estimates from analysts. The information covers the latest fiscal or calendar year.

Average annual exchange rates for 1985 were used to translate foreign currency into U.S. dollars. In this issue, rates included $.7405=C$1; $1.2648=£1; $.3338=DM1; $.004092=Y1; $.2956=Fl.1. The same rate was applied for both years to factor out year-to-year fluctuations.

Carter Hawley Hale Stores

RANK **147**

Los Angeles

($ in millions)

Worldwide	1985	1984	% chg
Sales	3,978	3,724	6.8
Net income	48	90	(46.4)
U.S. advertising	55	37	47.4
Division sales	**1985**	**1984**	**% chg**
Dept. stores	2,890	2,750	5.1
Specialty stores	1,088	974	11.7

Carter Hawley Hale is struggling to reduce its corporate debt and to divest marginal operations as competition, particularly in its own backyard of southern California, intensifies with an increased number of specialty retailers, discounters and off-price stores vying for a softer retail dollar.

The chain, the nation's 10th largest nonfood retailer, sold its Canadian subsidiary, Holt Renfrew & Co., for $29.7 million in April, 1986, to Wittington Investments, a privately held company based in Toronto. The sale of the 15-store, high-fashion specialty unit added $3.5 million to Carter Hawley Hale's accumulated earnings in 1985, and reduced the company's debt by $50 million.

In mid-July, 1986, the company also placed the John Wanamaker division up for sale. Philip M. Hawley, chairman-ceo, says selling the 16-store, Philadelphia-based unit would further reduce corporate debt and free up investment capital for modernization and growth of the company's other retail units, which include New York's Bergdorf Goodman and Dallas-based Neiman-Marcus, among others. Carter Hawley owns a total of 129 department stores and 178 specialty stores.

The decision to sell Wanamaker also was motivated in part by the fact that the bulk of Carter Hawley's holdings are located in the southwest and west and the company plans to concentrate there, a corporate spokesman says.

Measured ad spending by Carter Hawley Hale is dominated by two California-based department store units, including the 22-store Emporium Capwell, San Francisco, and the 42-store The Broadway-Southern California, Los Angeles. These two units accounted for a combined 50% of Carter Hawley Hale's $19.9 million in measured spending for seven media, according to Leading National Advertisers, whose seven-media total was up 40% over 1984.

Measured spending for the two chains was slightly under $5 million each in 1985, divided 97% spot tv and 3% magazine for both. Spending was up 66% in 1985 for The Broadway unit, and up 12% for Emporium Capwell. Carter Hawley Hale's measured 1985 spending for 11-media was $25 million, which included $4.4 million in national newspaper spending. Carter Hawley reported to the SEC its total advertising budget in 1985 at $108.1 million, up 8%, which includes extensive print media, local newspaper, direct mail advertising, salaries and other overhead costs for in-house advertising departments.

John Wanamaker was the next largest unit in terms of 1985 ad spending with $3.4 million in measured media, divided 91% spot tv and 8% magazine. Wanamaker's measured spending was up 95% from 1984.

Dallas-based Neiman-Marcus spent $2.9 million in measured media, up 46% over 1984. Neiman-Marcus's spending was divided 76% magazine, 23% spot tv and 1% newspaper supplement. Sacramento, Cal.-based Weinstock's has measured spending of $1.5 million, up 96%, and Richmond, Va.-based Thalhimers had $1.6 million, up 8%. Weinstock's and Thalhimers measured spending was all in spot tv.

Retail analysts say Carter Hawley is still on the rebound after successfully defending the company from a 1984 takeover bid by The Limited Inc. As part of its defense, Carter Hawley fought back and retired $450 million in outstanding shares and sold off 40% of its preferred stock for $300 million to General Cinema Corp. General Cinema later converted a portion of the preferred stock into 12.2 million shares of common, making a profit of $120 million. The company has a standstill agreement not to sell off Carter Hawley's shares until 1989, a spokesman says.

But the takeover defense was costly. On top of paying about $30 million per year in preferred dividends to General Cinema, the company is working from a smaller capital base, which makes it difficult to gain financing for modernization and expansion, analysts say. To lessen its debt burden, Carter Hawley has been selling off units that do not fit within its core of profitable department store and specialty store units. Late in 1984, the chain sold off its Walden Books chain to K mart for $295 million.

Net income from continuing operations jumped 77% to $48 million for the fiscal year ending Feb. 1, 1986, on sales of $3.97 billion, up 7%. (However, net earnings from continuing operations still lag far behind 1983's $55.4 million on sales of $3.1 billion.) For the six month period ending Aug. 2, 1986, revenues were $1.76 billion, up 3% over the comparable period in 1985.

Net income for the first half was $26.1 million, up 35% over the same period in 1985. Carter Hawley's sales through the end of September, 1986, or the first 35 weeks of the fiscal year, were $2.4 billion, up 5.5% over 1984.

Carter Hawley is making changes that could bode well for its future profitability, however. One such change is the gradual phase in of commission payments in department stores as an incentive for salespeople to provide better service.

The chain also is moving strongly to private label merchandise to differentiate itself from other retailers, analysts say.

California is a major key to Carter Hawley Hale's future. It currently is a soft retail market, but one where the company has most of its assets. The chain's The Broadway division has been hurt by the rapid expansion of Nordstrom's into California and the rise of upscale discount stores there. Competition also is stiff in the high-fashion specialty store segment from upscale retailers such as Macy's in San Francisco, says Monroe H. Greenstein, senior analyst at Bear Stearns & Co., New York.

"My advice is to go to church and pray," Mr. Greenstein says of the California operation. "Only time will tell if the company can turn around. We would have hoped sales would improve by now, but they have not."

"This is a turnaround year for Carter Hawley Hale," says Stanley Iverson, group vp and retail analyst at Chicago-based Duff & Phelps. "Their success depends on how well they execute their new strategies in a fiercely competitive market."

Have your promotional marketing plans been properly diagnosed?

Often, even the most carefully planned marketing program requires a promotion specialist. One who can examine your promotional plan and help it achieve its sales, trade and consumer objectives.

At Marden-Kane, we specialize in helping solve the problems of marketers by analyzing their sales goals...jointly working with marketer and ad agency to create the right promotional program...and then implementing a program that's as trouble-free as it is impactful.

For over 29 years, we've been serving the promotional needs of corporate America with innovative programs that are anything but "off the shelf". Whether it's a contest or sweepstakes, self-liquidator or incentive program, rub-off game or any other promotional vehicle, we carefully design it to address your specific objectives—and then deliver the desired response. From creation to implementation to administration to fulfillment, you'll find that a Marden-Kane promotion is as professionally orchestrated as the most demanding medical procedure. And while some "sales promotion" companies try to be general practitioners, our training enables us to specialize in only one thing—the promotion that brings you more consumers, more sales, and more healthy sales graphs than you've ever enjoyed before.

Have your promotional needs looked over by a specialist—call Marden-Kane for a consultation today. We even make house calls.

The company that brought Arrid deodorant, Miltown tranquilizer and Carter's Little pills to the market, Carter-Wallace Inc., is now producing a line of men's prophylactic products, sparking speculation about intensified advertising and promotion efforts in that market.

In September, 1985, Carter-Wallace bought the biggest U.S. condom marketer, Youngs Drug Corp., Trenton, N.J., for $25 million. Young's Trojan brand has about 60% of the U.S. market.

The Sheik and Ramses brands from the other big prophylactic marketer, Ansell Americas, Tinton Falls, N.J., add up to about 30%.

Carter-Wallace comes to the men's prophylactic products business amid new anxieties about AIDS and herpes plus the intermittent flare-up of the "old" venereal infections.

Promoting the men's products hasn't always been easy. Sales formerly were limited by laws in some states that restricted condom advertising and confined sales to drug stores, but those laws gradually were repealed during the 1970s, and marketing efforts have since heightened. Both men's and women's magazines increasingly have been carrying condom advertising, and drug stores now openly display the brands.

In the fraction of 1985 that Carter-Wallace owned the Youngs' brands, it spent about $320,000 on Trojan, all of it in magazines. That will increase sharply this year as the company expands from 15 to 53 titles for its magazine schedules. Mass audiences, both male and female, are essential for condom marketing success, and the major producers are pressing hard against continued print and electronic media resistance. Carter-Wallace's selection of its new agency for Trojan, Ted Bates Advertising, New York, is said to be on the basis of an energetic tv effort for the prophylactic line.

Ted Bates, which has several major Carter-Wallace brands, including Arrid and Carter's Little Pills (the term "liver" was dropped several years ago), took over the Trojan account from Poppe Tyson Inc., New York. Poppe Tyson continues with another former Youngs product, Triple X pediculicide, used in combatting body lice.

Carter-Wallace's sales of $400 million in fiscal 1986 ended April 1, jumped 15% from 1985, and net earnings of $27.6 million were up an impressive 33%. A pro-forma report for the period showing combined Carter-Wallace/Youngs operations as if the union had been made April 1, 1984, places Carter-Wallace's 1986 sales at $417.2 million and net income, $29 million.

Carter-Wallace, a diversified manufacturer and supplier of prescription and over-the-counter health preparations, personal-care products, and petcare goods, is organized into five divisions that produce and market products in two broad business segments, Health Care Products and Consumer Products (also called Carter Products). Carter-Wallace's antiperspirant/deodorant lines in the Consumer Products segment is reported as a separate subgroup.

The Health Care segment brought 51% of 1986 sales of $203.5 million, up 27%. Consumer Product's 49% share showed sales of $196.7 million, a rise of 4%. U.S. sales were 81% of all sales, up from 79.7%. Health Care segment sales were about 62% of these international totals both years, and consumer sales the rest.

The most recent Carter-Wallace new products include Arrid XX Musk Solid deodorant and Arrid Extra Dry unscented roll-on. Arrid for five years has been the anti-perspirant field's leading seller and accounts for about $23.6 million in sales. Carter-Wallace claims sales of Arrid solids grew three times faster than the whole anti-perspirant/deodorant market in 1985.

Also new for 1985 were Nair Mousse Depilatory, which opened a new field with its regional introduction in January, 1986; and Block Out SPF 15 Spray, described as the first waterproof spray sun block. Rigident denture adhesive is up in sales and now has American Dental Assn. approval.

The company reports that its Wallace Laboratories Division drew record 1985 sales from its major products, including Soma brand muscle relaxant, Organidin expectorant, and its Rynatan and Rynatuss antihistamines. Prescription cough and cold preparations also did well.

New from the Wampole Laboratories Division are Virogen Rubella, for testing immunity to rubella infections, and Virogen Herpes, a fast simple test for diagnosing active herpes. Wampole also has market leaders for serological testing in Mono-Test, which detects mononucleosis, and Rhumaton, a test for rheumatoid arthritis.

Among the pet products from the Lambert Kay Division was the new Good By Dry Shampoo, with aloe vera and lanolin for dry fur. This divison, which markets the Lassie line of pet goods, made strong sales in both health and non-medicinal products.

Carter-Wallace reported to the SEC it spent $81 million on advertising in 1985, up 7.5% from 1984, a figure that includes nonmedia and nonpromotional costs. An AOR includes only national media and promotional spending for this report. Expenses identified as "marketing and selling" totaled another $76.3 million.

Measured advertising spending in the seven Leading National Advertisers' media of $24.6 million for 1985 was about even with $24.5 million in 1984. Network tv spending rose 6% to $18.1 million, the largest medium in the mix.

Spot tv fell 44%. But big additions were made in spot radio, up to $309,000 from just $2,000 a year earlier, and in network cable tv, which more than tripled to $649,000.

Leader among the Carter-Wallace brands in total ad spending is the Arrid deodorant line at $13.7 million, which took 55.7% of the company's measured media budget in 1985. This spending for Arrid was up 8% from 1984. The preponderance of Arrid backing was on network tv where the total, $12.1 million, was up 4% from 1984. Spot tv grew 53% to $1.21 million and magazine dropped back 37%, to $70,400.

Pearl Drops smokers' tooth polish took the second biggest chunk of Carter-Wallace spending, reaching $5.57 million in 1985, up 14.5%, most of that went for network tv, where spending for 1985 reached $4.4 million, 16% above the preceding year. Network cable tv was a new addition in 1985 for Pearl Drops, receiving $100,500.

Other major Carter-Wallace advertising spending was for its Nair depilatory brands, sun-protection products, and the new prophylactic line. Total Nair spending was $1.7 million, up 9%, and mostly in network tv—$1.04 million.

Sea & Ski suntan products received measured ad backing of $992,700, and Block Out suntan products got $338,600, for a total of $1.33 million, 26% ahead of 1984 totals for the two products. All Block Out spending was in magazines, while Sea & Ski was split among the three tv media—network tv, $508,200, spot, $54,500, and cable network, $154,000—and magazines, $276,000.

Spending for the new prophylactic lines, all in magazines, was $124,800 for Trojan-ENZ lubricated prophylactics and $195,100 for a category described as Youngs Drug Products prophylactics by LNA. Added to this was $104,400 for Koromex contraceptive gel and $97,300 for Transit-Lube lubricating foam.

In its second year on the market, Mischief Body Spray deodorant got $849,000, down 55.8%. In the introductory year, the bulk of Mischief advertising support went to network tv, $1.64 million, with magazines receiving $276,300.

In 1985, the division was reversed, with $589,100 going to magazines and $259,900 to spot tv. And the venerable Carter's Little Pills received their due also in measured media spending, with an outlay, largely in magazines, of $90,100 in 1985, up from $35,500 in 1984.

Carter-Wallace in 1985 stopped marketing its Rise Super Gel self-lathering shave cream in response to a law suit brought against it by S.C. Johnson & Sons, Racine, Wis., alleging patent infringement on Johnson's lathering gels. The U.S. District Court for Southern District of New York found for S.C. Johnson as did the Court of Appeals.

The court's finding blocked further marketing of Rise Super Gel until November, 1987.

Flexi-Van	153	165	(7.3)
Castle & Cooke	1,528	1,552	(1.5)

Beginning in early 1985, Castle & Cooke has gone through a continental shift of change, emerging under new control, new management, new organization and a new address.

In February, 1985, a fresh infusion of money—a $250 million loan—from a major C&C shipper (and creditor), Flexi-Van Inc., New York, saved the big food marketer from perhaps going bankrupt. A merger of the two companies was announced March 12, 1985. The change put Flexi-Van's chief officer, David H. Murdock, in the head office as chairman-chief executive officer and brought in a board consisting of eight members of the Flexi-Van board of directors and six of C&C's.

C&C stockholders now own approximately 55% of the new company and Flexi-Van shareholders, 45%. Mr. Murdock owns 33% of Flexi-Van.

For 1985, the newly combined companies had $1.68 billion in sales, down 2.2% from $1.72 billion in 1984, and $46.4 million in net income, up 256% from $18.4 million in 1984. These figures are based on a pro forma reading that combines the sales and earnings of the companies for both years.

C&C is by far the bigger of the two. In 1984, the last full year prior to the sale, C&C had sales of $708.7 million and a net loss of $63.9 million and Flexi-Van had sales of $152.6 million and earnings of $21.4 million.

In the first six months of 1985 ended June 14, C&C boosted its sales to $900.7 million, up 3% over a pro forma reading for the comparable year-earlier period. Net income was $53.7 million, up 21% from the year-earlier period.

Other major changes at C&C have affected costs. Cutting the corporate staff and relocating officers from Honolulu and San Francisco to new corporate headquarters in Los Angeles cost $4 million. The mid-year resignation of Robert D. Cook, senior executive vice president and chief executive officer of C&C Foods, cost $1.7 million in final expenses.

C&C ranks as the world's largest producer and marketer of fruits and vegetables. It is first in world production of pineapple and second in bananas. The company markets fresh vegetables under the Bud of California brand and is a supplier of apples, grapes and citrus fruits as well as packaged pineapple and fozen desserts. In Central America, it operates a beer and soft drink business, and in Hawaii it produces cane sugar which it supplies to the California & Hawaii Sugar Co., of which it owns 9%.

Flexi-Van, based in New York, leases shipping containers and chassis for moving them between marine vessels and truck or rail terminals. Almost all of its business is at U.S. ports.

The third unit of the company is Oceanic Properties, a real estate developer in Hawaii and California. Together with C&C, itself owner of 150,000 acres in Hawaii, they rank as the second largest private landowner in the Islands.

In a series of moves early in 1985, C&C sold off its Bumble Bee Seafoods division to a group, including four of that unit's managers; sold its west coast mushroom business to Mushroom King Inc. of Santa Rosa, Cal., and sold all its interest in Honolulu's C&C office tower.

Girding itself for heavy emphasis on international marketing, particularly in the Pacific basin, the company in March, 1986, created a separate subsidiary, Dole Food Co. Noting that U.S. trade in the Pacific has now exceeded trade with Europe and that Asian trade in 1984, alone, was more than $33 billion, C&C points to its expertise in the area—such as marketing $150 million in fresh fruit to Japan in 1985. The Flexi-Van shipping capability also is a key to potential gains in overseas growth.

The company's 11-media measured advertising for 1985 was up 25% over 1984, to $30.5 million. Spending was heavy for the new Dole Frozen Fruit Sorbet, totaling $6.9 million. Major backing also was given to Dole Fruit 'n Juice bars, rising 37.5% to $8.4 million. In 1985 ad support for the sorbet was heavy on both network tv, where it received $4.4 million, and spot tv, at $1.6 million, but for the Fruit 'n Juice Bars there was a shift in 1985 from spot tv, which received only $33,900, to network radio, where 1985 spending totaled $2.3 million, triple the $716,300 in 1984. Fruit 'n Juice Bar

network tv backing, however, did increase in 1985, jumping to $4.2 million from $1.7 million in 1984.

Advertising support for both the Dole canned fruit line and canned pineapple line more than doubled, the fruit products rising to $3.6 million from $1.7 million in 1984, and the pineapple rising to $3.6 million from $1.7 million a year earlier.

C&C made a major agency shift earlier this year by awarding to William Esty, New York, the Dole advertising that had been placed with two San Francisco agencies, J. Walter Thompson, San Francisco, and Allen & Dorward. Products now in the Esty camp are Dole packaged foods, frozen desserts and fresh foods. And the agency also is responsible for new product work.

Other	111	80	38.8

A drive for new products and a strong push for promotion characterized the marketing activities in 1985 of the advertising-driven units of Chesapeake Financial Corp., Royal Crown Cola Co. and Arby's Inc.

In 1985 Chesapeake Financial had total sales estimated at $1.58 billion for its component companies, including the two biggest players, Arby's, the roast beef fast food chain based in Atlanta, Ga., and Royal Crown Cola, with executive offices in Rolling Meadiws, Ill., near Chicago.

Chesapeake Financial, formerly named Royal Crown Cos., is private and reports no revenue or profit figures. While it was still publicly owned in 1985, Royal Crown Cos. reported sales of $491 million and net profits of $15 million. For 1985, Arby's alone reports an 8% sales increase over 1984, to $825 million.

While Royal Crown dates from 1905, when it began in Columbus, Ga., as Union Bottling Works, the present Chesapeake Financial Corp. was born June 29, 1984, in a law suit. That action came as the Victor Posner Group, Miami Beach, Fla., opposed the attempted leveraged buyout of Royal Crown by part of its management and others. Several of the companies controlled by Miami Beach financier Victor Posner, including Chesapeake Financial Corp., had been buying RC stock for several years and by September, 1983, held 26.9% of the common stock shares outstanding, compared to 18.08% held by the RC "management group."

Accusing the RC group of acting against the best interests of the company's stockholders, the Posner Group's legal action brought RC management into negotiation and thwarted the leveraged buyout. On June 29, 1984, for about $345 million, the acquisition of RC was made by Chesapeake Acquisition Corp. acting for the Posner Group. Headquarters were transferred to Mr. Posner's base in Miami Beach. (More recently Victor Posner has been in the news because on Sept. 22, 1986, U.S. District Judge Eugene Spellman in Miami found improper juror conduct in Mr. Posner's trial and conviction, July 18, 1986, on income tax evasion and ordered a new trial.)

The company's biggest source of sales and advertising spending, Arby's, is moving ahead on some big promotion programs backing several new products. New on the menu are the Philly Beef and Swiss Sandwich and the Great American Roast Beef Sandwich. "Both are in keeping with Arby's roast beef approach—back to the basics," according to Frank Belatti, Arby's group vice president.

Arby's had a promotional tie-in in 1986 with Major League baseball, both as awarder of the International Arby's RBI Award and in sponsoring the First National Instant Win game in connection with the World Series. And in community-support programs, Arby's is a national Big Brother and Big Sister sponsor.

The big fast-food chain has 1,600 restaurants, 1,400 of them franchised, and is in all 50 states but with greatest concentration in the Midwest. For 1986, the company says its sales are running about $100 million ahead of last year and is looking for sales of $1 billion in 1987. Arby's expects to announce a major new marketing campaign at about press time.

In the 11-media tabulation in this report, Chesapeake Financial's expenditures totaled $29.3 million in 1985, up 27.3% from 1984. In the seven media monitored by Leading National Advertisers, which tallies brand spending, Arby's total 1985 ad outlay of $16.8 million was 66% of the $25.4 million Chesapeake Financial total. Royal Crown Cola Co's. total 1985 seven-media spending of $8.6 million was 34%, according to LNA. This compares to 56.6% for Arby's in 1984 and 43.4% for Royal Crown. Arby's spending was up 29% in 1985, and Royal Crown ad expenditures were down 14%. These totals do not include unmeasured spending, such as coupons, point of purchase and giveaways.

The company's ad backing for its two product lines continues small in contrast to major competitors. In the fast-food area, LNA reports McDonald's spending for 1985 as $312.3 million; Pillsbury's Burger King, $156 million; and Wendy's, $87.7 million. RC is up against Coca Cola's brand spending of $158.5 million and PepsiCo's $116.7 million.

Against enormous odds Royal Crown has advanced itself over the past three years in the cola wars from a 2.5% to 4.5% of the U.S. market share. Coca-Cola is the marketing leader with a 38.6 share, followed by Pepsi-Cola with 27.4, and the new Dallas-based Hicks & Haas combination of Dr Pepper, Seven Up (U.S. holdings), and

A&W Brands, 13%.

"The past year has been one of upheaval in the soft drink industry, but we feel we are on the move. Diet Rite has been a good performer. The Salt-Free version has shown good growth, too," says Ron Corin, vice president-marketing, Royal Crown Cola Co., which has been running a "Some people will go out of their way to get the taste of RC" campaign created by Dancer Fitzgerald Sample.

Newest product for Royal Crown is its Nehi Froot, reviving the Nehi name, a long-term label for the company. Nehi Froot joins the highly competitive real-juice field, containing 25% of the real thing in its formula, and available in four flavors: Grape, pink grapefruit, orange, and lemon lime. It was introduced in Baltimore this August.

Royal Crown Cola brand advertising of $8.6 million in 1985, up 18%. Of the total, $3.5 million was spent on Diet Rite brands, fell 14.6% from 1984. The caffeine-free RC-100 line, which was backed with spending of $1.5 million in 1984, did not appear in the measured totals for 1985.

Adams Packing, which supplies the food service industry with packaged citrus concentrates, has introduced an all-Florida Valencia orange concentrate in six-packs of 96-ounce bottles —a contrast, Adams says, to the imported Brazilian orange mixture now supplied by major U.S. juice companies. Adams' retail division product lines of white and pink frozen lemonade concentrate will be augmented Jan. 1, 1987, by its new frozen grape concentrate. Adams food service division buys print trade advertising only; the retail division says it spent about $100,000 on tv advertising in 1985.

Other Chesapeake Financial companies are not major advertisers. They include Frederick Cooper Lamps Co., Chicago, maker of free-standing lamps; Athens Furniture Co., Athens, Tenn., markets bedroom and occasional furniture; Hoyne Industries, McDonough, Ga., producer of mirror products, and Couroc Inc., a maker of giftware and ad premium specialties, and Houze Inc., which manufactures decorative mugs.

Strategic repositioning has been in the forefront of Chevron marketing efforts since its acquisition of Gulf Corp. in 1984. Despite internal reorganization of the company and government-mandated divestitures, the merger appears to have paid off.

Chevron had total measured advertising expenditures (including those of Gulf Oil Corp.) of $31.4 million in 1985, up 6.7% from 1984.

The merged companies entered 1986 as a single corporate entity, shifting concentration to locations with economic and population growth and favorable supply capabilities.

Chevron USA Inc. became the principal operating company, mainly made up of domestic petroleum and worldwide chemical operations and the former Gulf foreign petroleum operations. Another major company in the new corporate structure is Chevron Chemical Co., which broadened its product line and internal sources of raw materials. This growth came from Gulf's chemical operations, which nearly doubled the size of Chevron Chemical. Each had sales of more than $1 billion in 1985.

The main thrust of the Chevron gasoline marketing effort in the U.S. continues to be the $600 million remodeling and modernization program for service stations. Gasoline-dispensing facilities have been increased at all renovated units, and average monthly gasoline volumes at these stations are said to be up substantially. Service bays, car washes and/or food marts have been added at some of the stations, depending on local market conditions.

Symbolic of the Chevron/Gulf merger was the co-branded credit card supplied to 4 million customers in "retained" Gulf areas, principally Arkansas, Louisiana, Maryland, Texas, Virgina and Washington, D.C. Issued at year's end, the cards feature Chevron and Gulf hallmarks. No changes were made in the new cards mailed to current Chevron credit customers. The company now has more than 9 million credit accounts. The co-branded card is another sign of the ongoing task of integrating Gulf's marketing practices with Chevron's. The "Gulf's got it all" tv promotion, launched in the fall, embraced important elements of Chevron's successful "Yes. The best" campaign, including cash and credit purchase options.

Chevron puts its main thrust behind its gasolines, both Chevron and Gulf brands. A major study, begun at the end of 1985, is looking into consolidating the Chevron/Gulf product lines, especially motor oils.

Chevron unleaded gasoline containing Techroline continues to be used by all four major U.S. auto makers in the Environmental Protection Agency's 50,000-mile emission system durability tests, a sales point not overlooked in Chevron ads. This patented Chevron additive also is packaged in concentrated form and sold as Techron. Several domestic and foreign auto marketers and their dealers reportedly are stocking and recommending Techron to their customers. The company reports combined sales to these customers, and Chevron/Gulf marketers nationwide shot up more than 500% in 1985.

For 1986, Chevron introduced Aug. 25 a new "Yes, the best" campaign for its Techroline brand in 50 markets, giving the comparable Gulf product equal treatment set to a theme of "Unlock the power" that broke in 15 southwestern markets Aug. 11. Both had the backing of heavy spot tv, radio and full-page newspaper ads that had three insertions during the introduction.

The "Yes, the best" campaign was developed for Chevron by J. Walter Thompson USA, while Gulf's "Unlock the power" effort was produced by Young & Rubicam, both San Francisco-based agencies.

The regional nature of Chevron's gasoline marketing means the company relies on a mix of tv and radio support, dominated in 1985 by a measured outlay of $11.1 million for spot tv and $9.6 million for spot radio, which accounted for about two-thirds of the company's $31.4 million measured ad budget, according to Leading National Advertisers. Chevron's own estimates, however, place spot tv at $20 million and spot radio at $1.6 million. Network tv, measured at $1.4 million for 1985, is bought only when it can be used on a regional basis.

Chevron is heavily into sports programing in all of its key markets, sponsoring 21 professional teams in the National Football League, National Basketball Assn. and Major League Baseball.

To meet Federal Trade Commission requirements for the merger, Chevron sold hundreds of service stations and entered into numerous deals that helped reduce the $13.3 billion cost of the merger and total indebtedness of $15.5 billion—$10.3 billion of it borrowed—to $9.4 billion by year's end.

Among the deals that made the massive debt reduction possible, included the $2.1 billion sale of Gulf Canada Ltd. to Olympia & York, Toronto.

The FTC-mandated actions included the sale of certain Gulf southeast U.S. refining and marketing assets for $582 million, Gulf's interest in Colonial Pipeline and 51% of its interest in the West Texas Gulf Pipe Line for $130 million and $18 million, respectively. The company also sold its interest in two oil producing fields for $360 million and $396 million.

At the time of the acquisition, the largest in U.S. history, both Chevron's new Richmond Lube Oil plant and Gulf's modernized lube oil facility at Port Arthur, Tex., were coming on stream. In less than a year, Chevron shifted from a net purchaser of lube base stocks to a net seller, with the second largest U.S. manufacturing capacity.

By the end of 1985, Chevron's total assets stood at $38.9 billion and it ranked as the fourth largest U.S. petroleum company, based on revenues, and one of the 10 largest U.S. industrial companies.

In the U.S., Chevron ended the year as the fifth largest producer of crude oil, the second largest producer of natural gas, the largest manufacturer of refined products and the largest marketer of petroleum products. Based on revenues, the company's chemical operations rank among the 20 largest in the country.

The year ended with the sale of 500 company-owned Gulf and Chevron service stations in 10 northeastern states. The sale to Cumberland Farms, a convenience store chain based in Canton, Mass., also included supply contracts to 3,400 independently owned Gulf and Chevron stations and 20 distribution terminals in those states.

In 1985, Chevron's Public Affairs Dept. launched a new corporate ad program, initially aimed at California audiences. Created with a "People Do" theme, the tv commercials and print ads, out of J. Walter Thompson USA, San Francisco, demonstrate the company's efforts to protect the environment.

At Chevron Chemical Co., Gulf personnel and resources blended smoothly with essentially no overlap between the two companies. Merger problems there reportedly have been minimal, although the advertising department still is restructuring.

Like its gasoline and oil marketing counterpart, Chevron Chemical also has been repositioning itself in the marketplace by moving away from direct sales of low-value commodity chemicals and toward using those chemicals in high-value specialty products. Aromatics, a family of chemicals derived from crude oil, now are being upgraded into more profitable chemicals such as cumene, used in a variety of consumer products.

Ciba-Geigy in 1985 began rebuilding its advertising budget that dipped with its sale of Airwick in 1984, with the acquisition of a soft contact lens line. The company also continued to develop its transdermal technology, adding a skin patch for menopausal relief to others already used to relief angina and motion sickness symptoms.

The U.S. division, Ciba-Geigy Corp., Ardsley, N.Y., had sales of about $2.4 billion for 1985, making it nearly a third of the parent's business.

The U.S. organization's total measured spending of $25 million in 1985 was up 23% from 1984. The loss of Airwick backing in late 1984, when Ciba-Geigy sold the business, cut $6.6 million from total Ciba-Geigy U.S. measured spending. Softcolors soft contact lens spending was off 72.7%, to $2.04 million from 1984. Spending on Acutrim appetite suppressant eased off just 4% to $9.8 million.

Ciba-Geigy's ad expenditures for agricultural and chemicals increased 6%, to $7.04 million in 1985. For Ciba-Geigy's Agricultural Division, Martin Williams Advertising, Minneapolis, created a series of three 60-second tv commercials headed, "Don't Take Agriculture for Granted," and dealing with farm failures in a positive, sympathetic way.

Contributing to an estimated $25 million in unmeasured advertising in 1985, is the company's promotion of citrus-flavored vitamin C tablets in Sunkist-branded foil packets (under license agreement) through grocery outlets—timed for the 1986-87 winter cold/flu season.

Ciba-Geigy Corp., active in acquisitions, bought the contact lens and lens-care product business from American Optical Corp. in 1985. The business brought American Optical $33 million annually. The company joined with Corning Glass Works, Corning, N.Y., to form a 50/50 joint venture in the diagnostic-preparation market, a field Ciba-Geigy has coveted for some time. Headquarters are in Medfield, Mass.

The Dyestuffs and Chemical division purchased Commonwealth Laboratories, Gloversville, N.Y., supplier of chemicals to the leather industry. In California, the Plastics and Additives division bought Panel Air Corp., Costa Mesa, Cal., which fabricates composite-material aircraft components.

Ciba-Geigy in July became the largest single shareholder in Spectra-Physics, a San Jose, Cal.-based laser company, buying 16% of its shares for $32.2 million and planning to invest another $5 million in its R&D.

Transdermal (through-the-skin) technology at Ciba-Geigy Pharmaceutical added Estraderm as a new prescription product in September, 1986. Under the new technology, Estraderm, a substance to ease menopausal symptoms, is impregnated in an adhesive patch placed on a woman's abdomen.

In early, 1986, Ciba-Geigy's appetite suppressant Acutrim, had a contentious encounter with Thompson Medical's Dexatrim over claims that Acutrim was better therapeutially and also that its line extension, Acutrim II, gave the dieter longer lasting effect, 16 hours, than Thompson's extension, Dexatrim-15, which claimed an hour less. A federal court enjoined both companies from further distribution of their extensions until modifications were made. Ciba-Geigy met the requirements of the order by modifying its labeling. Acutrim II is back on the market.

Worldwide, the company's biggest pharmaceutical seller is Voltaren, an antirheumatic and analgesic for arthritis treatment. Voltaren, said to be one-third of the Pharmaceutical division's international sales, is now up for FDA approval, which the company hopes will come in early 1987.

Major changes in Ciba-Geigy U.S. leadership came in April, 1986, as longtime chairman-ceo Otto Sturzenegger, 60, and president-coo, A.M. MacKinnon, 61, made a planned transition to retirement. Richard Barth, 54, became the new president-ceo, and Charles O'Brien became executive vice-president-coo.

Citicorp, by far the largest U.S. commercial bank with $174 billion in assets, is infusing considerable advertising dollars into expanding its consumer credit card and travel and entertainment card business.

The company suffered a decline in earnings through the first half of 1986, but in the third quarter earnings grew 9% from the year-earlier period paced by its consumer operations, particularly its credit card business, its increased share in the New York branch system, and the writing of new mortgages. Consumer loan write-offs totaling $235 million, however, grew by 51% from the 1985 period.

The first half drop, according to Fred Meinke, vp E.F. Hutton, New York, is largely because Citicorp, criticized for having too small a loan reserve, is building that reserve and taking from monies that would have ended up on the bottom line.

Measured advertising rose accordingly. Expenditures of $61.3 million were up 88.6% from $32.5 million in 1984.

In 1985, Citicorp spent $17.2 million for network tv—its largest single media expenditure—to promote its Citibank-inscribed MasterCard and Visa credit cards. The advertising was part of a strategy to transform Citicorp into a nationwide, and even global, consumer bank.

Citicorp has passed BankAmerica as the leading issuer of bank cards, with 17.5 million Citicorp cardholders worldwide. (Bank credit cards are owned by the issuing bank, not the credit card association, such as MasterCard International or Visa Inc.) BankAmerica has 12 million Visa and MasterCards.

Citibank's credit card tv campaign featured six-week network flights in each quarter of 1985, stressing consumer benefits such as discounted general merchandising connected with its Visa and MasterCard credit cards. Produced by Marschalk Co., Citibank's agency, the 30-second spots featured humor and celebrities to push the cards' CitiDollars merchandising program, with the tag line, "The bank that makes them better." Under the CitiDollar program, cardholders accumulate points based on charge volume that can be applied toward purchase of merchandise every quarter from a catalog.

Citicorp spent $2.4 million in 1985 advertising its Choice credit card—all but $3,500 of it on spot tv—and another $7.5 million in magazine and spot tv advertising for its Diners Club credit card, which it bought in 1981. The big push for Diners Club, however, was more than $25 million in direct marketing expenditures during 1985.

Citicorp's Carte Blanche credit card, purchased in 1978, is trying to get respect this year with a $2 million tv campaign, featuring Rodney Dangerfield, supported by an outdoor ad campaign.

Analysts say Carte Blanche and Diners, known as travel and entertainment cards as opposed to charge cards, have improved their performance and are money makers, but they are distant followers to American Express.

Citicorp's 47-year-old chairman, John S. Reed, took over in the fall of 1984 from his predecessor, Walter B. Wriston, and has kept a low profile, unlike the company he directs. In 1985, Citicorp expanded its assets $23 billion, bought or moved to buy banks in Arizona, Utah and Nevada, and purchased commercial and investment banks in England, France, Chile, Norway, Nigeria, Italy, Canada, Belgium, Japan, Ireland, Thailand, and Australia, as well as obtaining licenses to operate in Sweden, Portugal and Australia. Citibank also has opened a Peking office.

But Citicorp, which is trying to expand its investment in the electronic information field, spent $680 million in acquiring in June, 1986, Quotron Systems, a Los Angeles-based electronic stock quotation service. Merrill Lynch and Dean Witter Reynolds, both Citicorp competitors, balked at leaving Quotron if the merger went through, but didn't follow through.

Despite an over-all good year in 1985, Citicorp had a relatively poor fourth quarter, with profits falling 12% from the fourth quarter of 1984.

Citicorp divides its business into an Institutional Bank, its commercial banking operation; the Investment Bank, which handles securities, foreign exchange and money market activities, and its Individual Bank, the retail banking operation.

Citicorp reorganized those three core businesses in 1985, moving money market and foreign exchange trading activities into the Investment Bank and integrating U.S. branch and card product activities within the Individual Bank.

In 1985 measured advertising, Citicorp spent $5.6 million promoting Citibank and its services, down from $9.5 million in 1984.

Citicorp spent $17.2 million in 1985 on network tv, $11 million on spot tv, $10.7 million in magazines, $2.8 million on spot radio, $416,000 on network cable, $391,000 on newspaper supplements and $50,000 on outdoor ads.

In 1984, expenditures were $3.9 million in network tv, $20.5 million for spot tv, $5.7 million for magazines, $1.6 million for spot radio, $209,000 for outdoor and $175,000 for network cable.

Coleco Industries, dominated by its Cabbage Patch Kids line of adoptable dolls, has been acquiring other toy and games lines in addition to introducing several new products in 1985 and 1986 to combat one-dimensionality and make up for the loss incurred in 1984 with the demise of the company's electronics division.

In 1985, Coleco earnings were $64.2 million, up from a loss of $79.8 million in 1984. Sales, however, remained flat at $776 million, up from $774.9 million. In 1986, the slump in sales of Cabbage Patch Kids has produced companywide six-month sales of $241.2 million, down from $382.1 million, and net income of $6.8 million, down from $52 million.

The company warns that returns for the final six months will be substantially lower than 1985 because of acquisitions, lower Cabbage Patch Kids sales and costs related to building research and development and acquiring licenses and product lines.

No Phoney Baloney.

Telemarketing programs that work boost direct sales as much as 700%.

Produce hundreds of screened and qualified leads.

Create marketing heros.

But let's be frank – there is a flip side to the coin.

A poorly run telemarketing program leads to missed deadlines – runaway costs – offended customers.

Things could get ugly in this scenario.

The $64,000 question – how do you tap the power of telemarketing and still sleep peacefully at night?

The proven answer – call CCI Telemarketing.

Our clients accept nothing less than absolute reliability, courtesy . . . and results. Companies like Citibank, IBM, Polaroid, Consumers Union . . .

No-nonsense professionals who turn to CCI for telemarketing expertise.

We'll do the calling. We'll consult and let you do the calling. Either way, you're going to have to make at least one call – to CCI.

Call us today. We'll send you case histories, brochures – even a reprint of the art from this ad, if you like.

We'll give you straight answers to tough telemarketing questions. You'll learn more about us, and we'll learn more about you.

It'll be fun. Call.

555 West 57 Street, New York, NY 10019

Coleco's consumer electronics division generated sales of $56.2 million for 1985 and incurred an operating loss of $38.5 million, nearly all attributed to ColecoVision. During the course of the year, all Adam and ColecoVision inventory was sold, completing the discontinuation of those product lines.

Cabbage Patch Kids were introduced in June, 1983, and for the past three years have been named the top toy by Toy Manufacturers of America, New York. In 1985, the adoptable dolls' sales increased to $600 million from $540 million in 1984. The doll has generated sales of $1.2 million since 1983.

In 1986, Coleco introduced Cabbage Patch Kids Circus Kids, dressed in brightly colored and fully detailed clown costumes, and Cabbage Patch Kids Baseball All-Stars, outfitted in officially licensed major league baseball uniforms.

Coleco went ahead with its Coleco Cabbage Patch Kids Young Astronauts line and introduced dolls dressed in authentically detailed space suits with helmets, boots and backpacks. The line was developed in cooperation with Coleco's corporate sponsorship of the Young Astronaut's Program—a nationwide school program mandated by President Reagan to intensify children's interest in math, science and the U.S. space program.

In 1986, the Cabbage Patch Kids line also included dolls with new faces, cornsilk hair, dimples, double chins and tongues that stick out. Some of the new dolls also have either a left or a right hand that is capable of holding an accessory. Twelve-inch Cabbage Patch Kids Babies, Cabbage Patch Kids Preemie Twins and Baby Koosas were also added to the line.

Despite their No. 1 status, Cabbage Patch Kids sales have so far dropped in 1986 by 45%, with industry sources predicting sales to be $450 million at the end of the year.

To boost awareness of the dolls, Coleco switched the $14 million Cabbage Patch Kids account in July, 1986, to Bozell, Jacobs, Kenyon & Eckhardt from Richard & Edward's, both New York, citing a need for a fresh approach.

BJK&E at that time picked up an additional $10 million in business from Coleco for the Selchow & Righter (formerly at Jordan, Manning, Case, Taylor & McGrath, New York), Furskins (formerly at Richard & Edward's), Play & Learn Electronics (formerly at Richard & Edward's), ALF and UBI lines.

Richard & Edward's remains Coleco's agency of record, handling $25 million worth of new product assignments and media buying for the company in 1987. In addition to losing the Furskin, Cabbage Patch Kids and electronics lines, however, Richard & Edward's also lost the Rambo and Wrinkles lines to Scott Lancaster Mills Atha, Los Angeles. Estimated billings for these accounts is $25 million, but will jump to a total of $75 million at BJKE, SLMA & R&E's in 1987.

Coleco this July 1 completed the $75 million purchase of privately-owned Selchow & Righter game company, makers of Scrabble and Trivial Pursuit. The division this year will introduce "The World According to UBI" —a trivia game that will send players around the universe in search of answers. BJK&E broke on Nov. 3 a teaser tv campaign in Boston, New York and Philadelphia introducing the game to college-age audiences. A preliminary print campaign broke in Los Angeles at the same time.

Lorimar-Telepictures, Culver City, Cal., in July awarded licensing to Coleco for an ALF line of talking, nontalking and plush dolls. Coleco will also introduce next year board games, ride-on toys and pool accessories based on ALF—an alien from the planet Melmac that Lorimar introduced in September via an NBC-tv prime time sitcom. Tv spots for the plush version of ALF will break in mid-November following a test rollout in New York, Boston, Philadelphia, Washington and Baltimore.

In October, Coleco signed an international marketing, manufacturing and development agreement with Tokyo-based Tomy Kogyo Co., the largest privately-owned toy company in the world. Coleco also purchased the Tomy subsidiaries in the U.S. and Canada and will operate those facilities within the framework of Coleco's current operations in North America. Coleco will market Tomy's products under the Tomy brand name within these markets, but has the right of refusal for the North American market on all products, concepts and developments that Tomy creates or markets.

In 1985, Coleco purchased Leisure Dynamics (now Lakeside Industries Inc.) in order to manufacture Wrinkles plush dogs in the U.S. In addition to Wrinkles, which were named "toy of the year" in Canada in 1985, Lakeside manufactures Tubtown bath toys and board games including Aggravation, Perfection and Perquackey. Coleco in November will introduce an animated version of Wrinkles that is programed to talk when squeezed.

Also in 1986, Coleco introduced the Furskin bear collection, based on characters created by Xavier Roberts. Each of the eight bears wear distinctive country clothing and work boots.

Three Coleco toy lines have inspired animated tv spinoffs so far, Cabbage Patch Kids, Rambo and Sectaurs. "Rambo" is a daily afternoon strip, loosely based on Sylvester Stallone's movie character, while "Sectaurs" was a five-part cartoon "miniseries" last spring, both syndicated via Worldvision Enterprises, New York. The Cabbage Patch Kids cartoon was a yuletide special for the past two years on ABC, which does not list it for the coming Christmas season.

Commodore International entered 1986 with three new computers on the market, a new president and ceo, and a commitment to produce a profit, which it finally got in its fourth quarter of fiscal 1986—its first such gain in a year and a half.

The fourth quarter's $1.2 million in earnings, up from a loss of $124 million for the comparable period in 1985, on $208.6 million in sales, up 58.2%, offers at least a hint of light at the end of a tunnel. For fiscal 1986, ended June 30, Commodore suffered a loss of $127.9 million on sales of $889.3 million, compared with a loss of $113.9 million on sales of $883.1 million the previous year.

Earlier this year, the company's solvency came under question when it defaulted on its loan agreements. By late summer, Commodore still was in discussions with its lenders about restructuring long-term debt.

Commodore has yet to prove its ability to market to the business community. Its long-awaited and much-heralded personal computer, Amiga 1000, finally made it to market in September, 1985. Yet despite a $40 million, six-week campaign, $8.2 million of it in measured media, Amiga continued to be plagued by a lack of software support and a lukewarm response from the business community.

Still, as a number of analysts point out, the Amiga has a great deal going for it: Color graphics capabilities, stereo sound and animation, and other features originally available on equipment costing a great deal more than Amiga. Commodore officials have set their sights on the business and professional markets, as well as on the home computer buyer looking for a versatile personal computer.

"The Amiga is strangely positioned. It's too expensive for the home market, while the business market is not there," says Value Line Investment Survey analyst George A. Niemond.

Since the Amiga's introduction, the software situation has improved. The Amiga 1000 buyer's guide now lists more than 200 software programs, including the support of Microsoft Corp., a software developer. In addition, its 256K RAM (random memory) has a memory expandable to up to 8 megabytes, and Commodore is planning to market a "sidecar" attachment, pending FCC approval, to allow the Amiga to run software available for the IBM PC, although at 60% of IBM's speed. The sidecar is already available in Europe, where Commodore has a good following in the business community.

Although company officials decline to reveal the actual number of units sold, which Commodore had hoped would total 300,000 by September, its various promotions and price cuts may indicate sales are sluggish. In February, Amiga offered a 25% discount to college students and faculty on its $1,985 computer/monitor combination, while in April, a $3 million campaign announced a 40% price cut on the Amiga, paralleling similar moves by IBM and IBM clone manufacturers.

The Amiga was introduced in July, 1985, as "the first personal computer that gives you the creative edge" as well as "an unfair advantage" with ads using such creative notables as pop artist Andy Warhol and singer Deborah Harry.

If Amiga's overtures to the business world prove successful, it would place the computer in a growth area—high-performance personal computers that can be used by business. To reach corporate America, Amiga is distributed to more than 950 computer dealers on an exclusive basis, while Commodore's other computer models, the C-64 and the new C-128, are sold through mass merchandisers. By moving Amiga onto computer dealers' shelves, while keeping its other computers in the mass distribution arena, Commodore established the first two-tiered distribution system in the personal computer industry. Other computer manufacturers, like International Business Machines and Apple Computer, support only specialty retailers.

In spring, 1986, Commodore launched Amiga outside the U.S. and geared the launch toward the business community. Half of Commodore's over-all sales originate overseas. However, the increasing presence of Korean and Japanese IBM PC clones in Europe could hurt Commodore's sales there. In the U.S., Commodore is readying its unveiling of an upgraded line extension to the Amiga, the Amiga 2000, said to be "in advanced stages of development."

Whatever the future for Amiga, the company still needs to maintain dominance of the less-than-$500 home computer market. To that end, it introduced the Commodore-128 in August, 1985, supporting it with $4 million in measured ad spending during the remainder of the calendar year. Containing 128,000 bytes of memory, which is expandable to 512K, the C-128's advertising promises "A higher intelligence at a lower price" and compares the C-128 to Apple Computer's Apple IIc. Selling at between $300 and $700, the C-128 is reported to have done well in the U.S. Worldwide sales topped the 600,000-unit mark by June 1, 1986.

Commodore since has adopted an ad strategy that no longer pits its computers against the competition. The revised approach promotes the array of uses for a home computer, especially in such areas as home finance, education and telecommunications.

The C-128 is reported to be more profitable for retailers such as Sears, Roebuck & Co., K mart Corp. and Toys 'R' Us than the lower-priced models. Radio and print advertising in February promoted the C-128 in conjunction with an $80 offer that provided C-128 buyers with a free modem and a two-month trial subscription to Quantum Link, Commodore's on-line computer network that offers such services as news, at-home shopping and software sampling.

While the C-128 was making headway in the U.S. during 1985, Europeans and Canadians were introduced in April, 1985, to the Commodore PC-10 and PC-20 models. Targeted to the small business community, both are compatible with IBM PC software.

Commodore's home computer flagship product, the Commodore-64, which first appeared in 1983, continues to sell well in the lower end of the market. More than 5 million C-64s have been sold worldwide. An updated version, the C-64C, was introduced in June and is expected to take over the C-64's role as the world's best selling home computer, company officials say. Sales of the C-64 and Victor 20 benefited from $5.5 million in measured spending, down from the $24.2 million spent in 1984. Vic-20 production was stopped in 1984. The company continues to implement new programs to stimulate sales of its older products, even at reduced profitability, in order to generate much-needed cash.

Commodore has augmented its geographical presence and has improved its distribution system. The company now sells its products in 51 countries. In addition to purchasing new technology, such as its acquisition of Amiga Corp. in 1984, Commodore continues to strengthen its research and development budget, which totaled $46.5 million in 1985, up 15.4% from 1984.

Commodore spent $75 million on worldwide advertising in 1985, compared with IBM's budget of $450 million, Apple's $187 million and Tandy Corp.'s $77 million, according to Communications Trends' newsletter, "Computer Publishing & Advertising Report," Larchmont, N.Y.

Distribution has improved as a result of a restructuring of Commodore's sales organization into two divisions —the Consumer Systems division, responsible for the C-64 and the C-128, and the Business Systems division, created to service the new specialty retail store distribution systems for the Amiga 1000.

As of March, 1986, Commodore had only a 7% penetration of the business market, compared with Apple Computer's 27% and IBM's 62%, according to Mr. Niemond of Value Line. In the educational sector, Commodore accounted for 18% of school computer purchases, compared with Tandy's 17% and IBM's 4%. Apple holds the biggest portion of the K-12 audience, with a 54% share of the market.

In the over-all microcomputer market, IBM holds the greatest share, 28%, to Apple's 13.8% and Commodore's 6.7%. The microcomputer industry is suffering from a slowdown in U.S. economic growth, fierce competition and an over-all slump within the industry. Commodore's forte remains the home computer market, but its dreams for marrying Amiga with the business world continue.

The executive in charge of sales and marketing for the Amiga, Thomas J. Rattigan, became Commodore's president-ceo April 1. The former PepsiCo executive succeeded Marshall F. Smith, who remains a director and consultant to the company. Mr. Smith had succeeded the ousted founder of Commodore, Jack Tramiel, now president of rival computer maker Atari.

ConAgra reduced its advertising spending during fiscal 1986, ended May 25, reflecting "a more normal level" of spending, says the company, which poured ad monies into its Banquet and newly acquired Armour processed foods brands the previous year.

ConAgra has three main businesses: Agriculture, commodities trading and processing, and prepared foods. In agricultural products, the company is the leading distributor of crop protection chemicals. It also produces and markets animal healthcare products.

ConAgra derives most of its sales and operating income from its prepared foods segment, which also receives nearly all the company's ad budget. Sales of the segment, which accounted for 55.1% of company sales in fiscal 1986, fell 8.7%, breaking a five-year string of increases. The segment's operating income rose 17.2%, to $180.6 million. The decrease in sales is due primarily to reduced sales in the red meat businesses.

Company brands account for the largest number of frozen prepared foods sold in the U.S. The unit also makes branded processed red meats, cheese and other dairy products and sells steaks and other premium food products through the mail.

To strengthen the division, ConAgra in June, 1986, bought RJR Nabisco's Del Monte frozen food operations for an estimated $65 million, gaining four successful brand names—Morton's, Patio and Award—and a Virginia base from which to tackle East Coast distri-

bution. The company also gained the rights to the Chun King name for use on refrigerated products and frozen products, with an existing line of Chun King frozen products. RJR Nabisco retained those rights for canned and grocery products. All four brands reported 1985 sales of $150 million.

ConAgra has yet to assign an agency to the brands, but the assignment most likely will go to a shop already on its roster, an operating procedure followed by ConAgra in the past. The account is worth an estimated $15 million. RJR Nabisco had fired agency Lowe Marschalk, San Francisco, in March when it began contemplating the sale of the Del Monte line.

Advertising on established Banquet frozen food brands dropped 20% last year, to $6.3 million. Most of that was spent on Light & Elegant reduced-calorie frozen entrees, which received $5.9 million in ad support in its first year of national distribution, up 93%. ConAgra spends heavily on promotions, mostly coupon tie-ins with related brands and in-pack give-aways for its frozen food lines.

Last year, the company added 55 new or restaged products. Among them were the four-item Banquet Mexican Dinners line, Side Dishes for One (a four-item line of single-serve side dishes), Banquet All White Meat Chicken Platters, flavored Chicken Nuggets and variety extensions for the Classic Lights and Dinner Classics lines.

Introduced in February, 1986, was a Banquet Gourmet line, a group of popular-priced dinner entrees aimed at American Gourmet's Budget Gourmet line. Entrees come without the vegetable side dish and dessert.

ConAgra's Armour, Banquet, Light & Elegant and Singleton brands command a 14.9% share of the frozen dinner market segment, No. 3 to Nestle's (Stouffer's and Lean Cuisine) 25% share, and Campbell (Swanson and Le Menu) with 22%. The two leaders back their brands with $30 million each in measured support.

ConAgra continued to turn around its Armour division, purchased from Greyhound Corp. in early 1984. Armour added a number of new products, upgraded quality and improved consistency, according to a Dean Witter Reynolds Equity Research Report. Advertising for the Armour brand, both frozen and processed meats, remained steady at $17.1 million.

ConAgra spent at the national rate of $22.5 million to test a seven-item line of Armour Cafe Classics frozen breakfast meals in six markets. The breakfast line capitalizes on the fast-growing $93 million frozen breakfast category, dominated by Campbell Soup Co.'s Swanson's Great Starts brand.

In prepared meats, Armour added a line of lower-salt ham, luncheon meats, bacon and cheeses with 30% less salt than their regular brands. The line got $10 million in promotional and advertising spending.

Armour also added its first line extension from its Golden Star brand name (the leader in canned hams), testing Golden Star Deli Doubles luncheon meats in three cities in May, 1986. The product, which since has moved into about 10% of the country, was backed by spending equivalent to a $13 million national rate. The eight-slice package is sealed so every two slices are packed together to retain freshness. The company is testing additional items under the Golden Star name in Los Angeles.

ConAgra went retail with its Singleton brand of frozen fish products, until now produced for the foodservice industry. A four-item line of Five Star Restaurant Entrees was introduced into 25% of the country in May, 1986, backed by $300,000 in paid media spending.

ConAgra formed two new divisions last year, ConAgra Deli Co. and ConAgra Turkey Co., to cash in on the trend toward lighter, faster foods. ConAgra Deli introduced the World's Fare Deli brand, a 90-item line of deli case items in a range of meats and cheeses. The company reports another 50 items are in development. ConAgra Turkey Co. was formed by combining operations of ConAgra Poultry and Armour's turkey businesses. The company started with processed fresh and frozen turkeys and turkey parts but will introduce two consumer product lines in fiscal 1987.

In major agency shifts last year, Armour Frozen Foods in September moved the $15 million Dinner Classics, Classic Light and Cafe Classics account to Fallon McElligott, Minneapolis, from Bozell, Jacobs, Kenyon & Eckhardt, Dallas, only to shift the account back to BJK&E in April. The account then moved to D'Arcy Masius Benton & Bowles, St. Louis.

D'Arcy Masius Benton & Bowles, St. Louis, also ConAgra Frozen's lead agency, was given an estimated $17 million in network tv buying responsibility. ConAgra gained volume discounts by consolidating its buying with the estimated $75 million in network tv buying done for various clients by that D'Arcy office.

Campbell-Mithun, Minneapolis, and Foote, Cone & Belding, Chicago, joined the ConAgra agency roster last year. Both received unidentified prepared food new product assignments. Sources say the C-M assignment includes advertising for a new brand of premium frozen dinners and a related line of canned meats. The FCB assignment is for frozen dinners related to the company's new ConAgra Turkey Co., industry sources say. ConAgra declined comment on either assignment.

TUSCALOOSA, ALABAMA

For fiscal 1986, which ended Sept. 30, the company expects $45 million in revenue and $3 million in net income.

The company in 1986 added a pair of new products in regional distribution—York Security Systems' protective window cover, marketed in Philadelphia and New York, and American Aqua's water filtration system, under tests in Florida. Successful tests will lead to national rollout, where they will join Craftmatic/Contour's two nationally distributed products, the Craftmatic adjustable bed and the Contour chair lounge.

Craftmatic/Contour also added a spokesman to its pitches in 1986, with the October debut of Ed McMahon in Craftmatic bed spots.

During the past 12 years, the company has seen its sales soar from about $4 million annually, says Stanley Kraftsow, chairman and president of Craftmatic/Contour and the moving force behind the company.

Since 1966, he has transformed his father's Philadelphia retail distributorship of the Contour lounge chair—with store sales of about $160,000—into a direct response operation that boasted $23.4 million in measured advertising spending last year, according to figures compiled by Leading National Advertisers.

Total ad spending, estimated by Advertising Age, includes such costs as direct mail, toll-free telephone line service for direct response, dealer co-op, premiums and collateral.

Craftmatic/Contour moved into direct selling by changing their retail store in Philadelphia to direct selling in eastern Pennsylvania and expansion to Maryland, Ohio, and western Pennsylvania. In the mid-1970s, Mr. Kraftsow began selling adjustable beds designed for home use, setting up his own distributor network across the U.S. By 1977, bed sales had become so hot he moved out of chair sales. Eventually, he built his own bed manufacturing operation in suburban Philadelphia.

In 1983, Mr. Kraftsow decided to redirect his company's efforts. He sold the factory to concentrate on bed sales (rather than production) and purchased St. Louis-based Contour Chair.

By 1984, sales of the two products had jumped to $20.5 million, from $14.1 the year before.

The high ratio of media spending to net sales indicates the importance Mr. Kraftsow places on advertising. For 1985, the company spent $12.2 million on spot tv for Contour chairs. An additional $10.7 million in spot tv was purchased for Craftmatic beds. The beds also were supported with $17,600 worth of network tv time, $73,000 in newspapers and newspaper supplements, and $231,000 in consumer magazines.

Mr. Kraftsow says his approach to media placement is pragmatic. "We aren't going for Super Bowl prestige buys. We look for the most affordable time, and go by the costs per thousand," he says.

The targeted consumer is someone older than 35 with a bad back, he says. Publications used to reach that group include *Better Homes & Gardens, Good Housekeeping, Modern Maturity* and *Reader's Digest.*

If sales on the four products reach projections, within the next two years, Craftmatic/Contour Industries could top $40 million in advertising spending, Mr. Kraftsow says. "With the graying of America, the demographics are in favor of our success," he says.

Helene Curtis Industries RANK **156**
Chicago

($ in millions)

Worldwide	1986	1985	% chg
Sales	361	329	9.6
Net income	9	1	671.6
U.S. advertising	52	62	(15.9)

Helene Curtis Industries, the nation's No. 2 haircare marketer, retrenched during fiscal 1986, putting most of its marketing emphasis on its Finesse and Suave lines.

The Chicago-based company succeeded in putting behind it its bad marketing experience with Atune, a haircare line formulated for colored, permanent-waved or damaged hair. In doing so, measured ad spending declined 24.2%, to $25 million, largely because of the drastically reduced Atune ad budget and the absence of a major new consumer brand introduction. In total, the company reported to the SEC it spent $43.3 million on advertising and promotions, down 15.9% from $51.5 million in 1984.

Helene Curtis sold its Protective Treatments sealants and adhesive subsidiary for about $12.5 million during fiscal 1986, ended Feb. 28. The sale was "consistent with the focus on long-term growth in the personal-care business," the company says.

Based on fiscal 1986's $8.9 million in earnings, company executives view the previous year's financial debacle, when earnings totaled only $1.2 million, as an aberration in the past five years' steady growth.

However, Atune continues to take its toll on Helene Curtis financial results. For the first quarter of 1987, ended May 31, the company reported a net loss of $800,000 from continuing operations, compared with a net loss of $1 million in the corresponding year-earlier period.

Net sales from continuing operations were $86.8 million, compared with $87.9 million the previous year. Flat sales were attributed to the continued decline in the performance of the Atune line. Although Suave and Finesse continued their strong business during the quarter, the two brands could not compensate fully for the decline in Atune.

The goal at Helene Curtis is to top 1984's record earnings of $10.4 million, when sales doubled to $330 million from the previous year. The company also wants to be large enough to absorb the cost of a new product introduction and still show a return on equity and sales.

By the time Helene Curtis introduced Atune into 1984-85's competitive haircare battles, at least five other major shampoo marketers, including Procter & Gamble, Gillette and Revlon, also had new brands entering the market. Helene Curtis' $18 million ad budget and $30 million promotional budget for Atune could not keep pace with the $25 million to $40 million spent by other companies.

Atune shampoo managed only an 0.8% market share of the $1.3 billion shampoo segment, while the conditioner posted a 1.3% share of the $525 million conditioner segment, as measured in supermarket dollar sales. In contrast, Cincinnati-based P&G's new Ivory shampoo grabbed a 5.7% share, while the conditioner pulled in a 6.4% share.

With its three brands—Atune, Finesse and Suave—Helene Curtis is the second-ranked haircare company with a 12.2% share of the shampoo market and a 20.3% share of the conditioner segment, following P&G, the market leader with a 29% shampoo share and a 10.4% conditioner share.

During the year, Helene Curtis repositioned both Finesse and Suave. Finesse, which holds a 9.7% conditioner share and a 4.2% shampoo share, has been restaged with a cleaner-rinsing formula. In early 1986, the line also was extended with the introduction of Finesse NutriCare, a shampoo, conditioner, glaze and mousse line for active women with heavily styled hair. Finesse Luminescent mousse with highlighters and extra control was introduced, furthering the brand's position as a styling aid.

An estimated $15 million ad campaign, handled by DFS Dorland Worldwide, New York, positioned Finesse NutriCare as the line that "helps protect and replenish hair's own natural moisture level as it restores resilience lost by overstyling."

Helene Curtis has mousse hair styling products under both the Suave and Finesse labels. In all, the company has a 13.4% share of the estimated $200 million market; Finesse mousse has a 5.6% share and Suave, a 7.8% share. In the estimated $530 million hair spray segment, the company in 1985 held a 6.4% share for Atune, Finesse and Suave hair sprays.

Suave, Helene Curtis' low-priced line, held its market position well, with a 7.2% shampoo share and an 8.3% conditioner share. Introduction of Suave Soft Highlights shampoo, conditioner and mousse added incremental sales to the Suave line.

Suave skin lotion, which holds an estimated 4.5% share of the $450 million skin lotion category, also was extended to include Suave Extra Relief formula, a nongreasy, extra-moisturizing lotion.

The company also introduced Post Impressions, a hair permanent for professional sale use, as well as Hair Specifics, a line of shampoo, conditioner, hair spray, mousse and permanent solutions for in-sale use. The line is sold through beauty supply wholesale shops.

Measured media spending for Finesse products in 1985 totaled $13 million, down 36% from 1984. Spending for Suave declined slightly to $7.2 million from $7.6 million in 1984. Atune received $7.8 million in measured media support, up 47%. About 90% of measured media spending on all products went for network and spot tv.

During the year, Helene Curtis rearranged its agency roster, moving Finesse from Backer & Spielvogel, New York, to DFS Dorland Worldwide, New York, which handled the declining Atune brand. Backer & Spielvogel continues to handle the Suave haircare and skin lotion accounts. HBM/Creamer Albert Jay Rosenthal, Chicago, handles advertising for the company's professional division.

Daimler-Benz A.G. RANK **124**
Stuttgart, W. Germany

($ in millions)

Worldwide	1986	1984	% chg
Sales	17,494	14,522	20.5
Net income	582	369	52.4
U.S.	**1986**	**1984**	**% chg**
Sales	3,893	3,629	7.3
Advertising	65	52	24.9

Mercedes-Benz of North America, the U.S. sales and distribution subsidiary of Daimler-Benz A.G., Stuttgart, West Germany, deemphasized its diesel cars in marketing and advertising to meet market conditions in 1985.

The company, celebrating its centennial this year, produced 541,000 cars worldwide in 1985, of which 86,903 were sold in the U.S., an increase of 9.7% over 79,222 in 1984. By comparison, BMW sold a record 87,857 in the U.S. and Volvo sold 104,000.

Consolidated sales for Daimler-Benz rose 20.5%, to $17.5 billion, some $6.24 billion of that in West Germany, representing a 27% increase, the largest year-to-year increase of any geographic region even though over-all car sales in the FDR were down 1%. Worldwide, Daimler-Benz car sales grew 18%, to $9.21 billion, and commercial vehicles grew 7% to $6.54 billion.

Figures are based on an exchange rate of DM1=$.3338.

Exports accounted for 41.3% of Daimler-Benz' sales last year, up from 40% the year earlier. West German sales accounted for 35.8% of total sales, up from 33.7% in 1984, and foreign subsidiaries contributed 23% of sales, down from 26.3% in 1984.

Although the U.S. is Mercedes' largest single foreign market, imports accounted for only about 2% of all U.S. car sales in dollars last year. New car registrations in the U.S. in 1985 rose 6.3%, to 10.9 million, with imports accounting for 2.8 million, or 25.8% of the total—a gain of two percentage points from 1984. German imports—including Mercedes, Audi and BMW—accounted for 439,000 new car registrations, a 23% increase over 1984.

Mercedes puts its unit share of the $25,000-plus European import market at 48.6%; BMW, 19.9%; Porsche, 16.6%, and Jaguar, 12%. North American unit sales of Mercedes rose 2.9%, largely because of continuing heavy demand for S-class and SL-class models and the "Baby Benz" 190 compact series introduced in the U.S. in 1984.

Gasoline-powered car sales were up in 1985, while diesel sales declined 39%; Mercedes' share of the U.S. diesel market declined to 29%, from 49% in 1984. Daimler-Benz diesel car production was 181,357 in 1985, but over-all diesel share of total production dropped to 33.5% last year, from 35.1% in 1984.

As a result, diesels were further deemphasized in 1986 advertising, even though a new larger diesel is now available in the 190 line. Diesel car sales in 1985 were half the 1970s peak of 80% of production, and diesel engines are available in only 25% of this year's models.

Mercedes' biggest selling model in 1985 was its 190E 2.3 model, holding 25.7% of its sales with 22,320 sold. The 300D model was a distant second with 13,681 unit sales, accounting for 15.7% of 1985 sales. In seven media measured by Leading National Advertisers, the 190E received $7 million, down from $13.2 million in 1984, and the 300D got $8.4 million, up from $3 million in 1984. D-B spent $47.4 million in measured media, according to various media measuring services used for this report. However, a Mercedes marketing spokesman says the company spent closer to $42 million in measured media.

The company continued to invest heavily in the North American sales network because of the higher profit margins in the U.S. Even with the changing currency rates, the price of a Mercedes in the U.S. remains about double what it is in Europe, largely because the options available in European models are standard in U.S. models. The price discrepancy has spawned a lucrative gray market for European imports, with U.S. dealers importing European-made models and modifying them to meet U.S. standards. Mercedes estimates about 10,000 gray market Mercedes cars entered the U.S. in 1985.

In December, 1985, McCaffrey & McCall dropped the slogan "Engineered like no other car in the world" in favor of "Mercedes-Benz widens the gap. Again." The new campaign introduced a replacement line of midpriced Mercedes sedans. Ad copy centered on the six bigger, more powerful engines in all but one of 11 models, including a station wagon that rolled out in the U.S. this spring, following an early 1985 European launch. Ad copy also promised top speeds of 125 mph for most models.

In addition to power, Mercedes made standard on its U.S. imports several safety features previously offered as options, such as a driver-side airbag and extended antilock brakes.

To tout its pioneer status in the car industry—the auto was invented by Karl Benz in 1886—the U.S. company greatly increased its pr budget to produce several special events and Mercedes memorabilia to mark the occasion. Although Mercedes declined to disclose the level of spending, the company this year produced two films, one 15-minute and one 30-minute, focusing on Mercedes-Benz' role in the first 100 years of automobile production.

Mercedes-Benz Credit Corp. USA, Norwalk, Conn., a wholly owned subsidiary offering sales financing for all Mercedes sold in North America, expanded its loan and leasing business in 1985 by 46%, to $863 million. The division had no measured ad spending last year.

Mercedes-Benz continues to be the major sponsor of the American Grand Prix Horseshow Jumping circuit. It got involved in the promotion in 1980. Demographic market studies reveal horse owners fit perfectly into Mercedes' target demographics.

Truck sales, once half of Daimler-Benz' business, remained in a worldwide slump last year, exacerbated by a European price war in the truck industry and falling oil prices. Daimler-Benz worldwide sales of heavy-duty trucks dropped 3% last year, to 134,000 units. Medium-heavy truck sales in 1985 were 145,000, up from 1984.

The U.S. is the world's largest commercial vehicle market, with new vehicle registrations up 15% over-all in 1985. Daimler-Benz says the U.S. truck division finally became profitable in 1985, as unit sales climbed 1.8%, to 20,947.

Freightliner, the Portland, Ore.-

based company purchased by D-B in 1981, recorded North American heavy-duty truck unit sales of 20,809 units in 1985, up 1.4%, with market share of 13.5%, up from 12.8% in 1984.

Freightliner reported North American sales of medium-heavy Mercedes-Benz trucks were 4,516 units last year, compared with 4,453 in 1984, raising market share to 2.9% in the category from 2.6% in 1984. Group sales rose 2% on a dollar basis, the company says, although D-B expects the North American truck market to decline in 1986 and increased competition from Japanese commercial truck imports.

Measured ad spending on Freightliner trucks was $304,000 last year, up 90% from the year earlier. Spending remainded stable, with 94% in business and trucking publications, the rest in outdoor advertising. Mercedes medium-weight trucks received $31,400 in measured media spending last year, also mostly in magazines.

Daimler-Benz last year embarked on an acquisition program that got it involved in such high-technology industries as aerospace and aircraft engines. Last October, Daimler-Benz bought a big stake in AEG A.G., a German electronics maker. The company expects this connection to increase its edge in high-technology performance cars. The AEG acquisition made Daimler-Benz West Germany's largest company, with annual sales of $23 billion —surpassing former leader Veba A.G., an energy company, and former No. 2 Volkswagen A.G.

Earlier in 1985, Daimler-Benz bought Motoren und Turbinen Union, Munich-based aircraft engine producer and military contractor, and obtained a controlling interest in the aerospace company Dornier GmbH. The acquisitions follow similar moves by American auto manufacturers, such as General Motors Corp.'s purchases of Hughes Aircraft and Electronic Data Systems, and Chrysler Corp.'s purchase of Gulfstream Aerospace.

Target	3,900	3,550	9.9
Mervyn's	2,500	2,141	16.8
Dept. stores	1,400	1,548	(9.6)
Spec. merch.	900	770	16.9

Dayton-Hudson Corp., the nation's sixth largest nonfood retailer in dollar volume, is focusing its growth on large-scale discount and value-priced operations, Target and Mervyn's and new specialty department store units, as evidenced by its recent move to sell B. Dalton Bookseller.

Target and Mervyn's together accounted for 74% of 1985 revenues and 77% of profits. From 1980-85, 77% of Dayton-Hudson's $1.9 billion in capital spending has been almost equally divided between Target and Mervyn's. Only 9% of capital expenditures have been targeted to the specialty merchandisers unit, which includes B. Dalton. Department store operations received the remaining 14% of capital spending for the period.

The importance of Mervyn's and Target is reflected in Dayton-Hudson's media spending for 1985. Mervyn's measured spending, virtually all in spot tv, rose 14.6% to $17.3 million in 1985 out of the $36.3 million in total spending for the seven media measured by Leading National Advertisers. Similarly, Target received $11.8 million in measured spot tv, down 7% from 1984, accounting for 33% of the seven-media total.

Measured spending for 11 media in 1985 was $39.2 million, up 4% from 1984. Dayton-Hudson reports it spent $212 million for advertising in 1985, up 8.3%, and a figure that includes media, production costs, salaries and other expenses.

Dayton-Hudson operates 226 Target stores in 22 midwestern and western states, 148 Mervyn's stores in 10 southwestern states, 37 Dayton-Hudson Department Stores in seven midwestern states and specialty merchandisers nationwide, including 785 B. Dalton Bookseller stores and 10 Lechmere stores.

Mervyn's is a promotion-oriented department store that sells moderately priced goods, mostly apparel, positioned between upscale department stores and mass merchants. It competes in a nearly identical format as Federated's MainStreet division, with one difference being that MainStreet sells mostly brand-name merchandise while Mervyn's relies heavily on private label. Mervyn's, however, is a much larger operation than MainStreet's dozen or so stores. Mervyn's had $2.5 billion in 1985 revenues and $245 million in operating profits, up 10% from 1984.

In 1986, Dayton-Hudson is spending $600 million to add 27 Mervyn's stores, 21 Target stores and about 70 specialty merchandising stores, including five Lechmere stores. Lechmere is a growing chain specializing in electronics and appliances that competes with superstore chains such as Taylor, Mich.-based Highland Appliance and Detroit-based Fretter Superstores. The company in early October, 1986, announced it was purchasing 54 of the 80 Gemco membership department stores comprising that division of Lucky Stores Inc., Dublin, Cal. The stores will be converted into Target stores, and based on the $18 million average annual sales reported per Target unit, they could generate almost $1 billion in revenue. Purchase price was $374 million. Lucky sold the units in an attempt to fend off a takeover effort by New York investor, Asher B. Edelman.

Dayton-Hudson announced its intention in late September, 1986, to sell the profitable B. Dalton Bookseller unit, the nation's No. 2 bookseller with $538 million in sales compared with No. 1 Waldenbooks' $565 million in sales. In announcing the sale, president Boake A. Sells said, "B. Dalton continues to be a profitable, growing specialty store company. However, the corporation believes B. Dalton does not fit within its current strategic direction."

Richard Nelson, retail analyst with Chicago-based Duff & Phelps, says B. Dalton is on the block because "it just ran out of steam. Bigger stores are what Dayton-Hudson has found they have the most success with." In addition, B. Dalton, which Dayton-Hudson started in 1966, is a mature company with locations in almost every state and with limited expandability. In addition, the retail book market is becoming more price sensitive, he says.

Measured ad spending for B. Dalton fell 12%, to $2.85 million, in 1985 for the LNA seven media, divided 89% magazine and 11% spot tv.

B. Dalton attempted to inject excitement into its retail bookselling format with the startup of the Pickwick Discount Books chain, which offered deep discounts on a limited number of books but no services. The 5-year-old, 37-store Pickwick chain, B. Dalton's answer to discounters such as Crown Books Corp., was closed in June, 1986. Seventeen of the stores were converted into B. Dalton outlets.

A Dayton-Hudson spokesman says Pickwick was unprofitable and served no purpose because B. Dalton regularly sells up to 20% of its own books at discount.

B. Dalton's discounting answers tough competition from the company's chief competitor, the Waldenbooks unit of K mart Corp., with 962 stores nationwide.

Waldenbooks also operates five Reader's Market discount bookstores in New York City and provides books for K mart's discount Book Korner departments.

Dayton-Hudson's reliance on department store formats has been decreasing for many years. The Dayton and Hudson department store chains were consolidated into one operation in 1984, a process which is to be fully implemented in 1986.

Department store sales of $1.4 million accounted for 16% of Dayton-Hudson's revenues in 1985 and 18% of operating profit, compared with 30% of revenues and 33% of operating profit in 1980.

Measured spending for Dayton-Hudson Department Stores increased 4% in 1985, to $1.7 million, divided 88% spot tv, 7% magazine and 5% out-of-home.

Dayton-Hudson is widely regarded by analysts as an exceptionally well-run company, Mr. Nelson says. Net earnings in 1985 were up 9% on revenue growth of 10%. The year marked Dayton-Hudson's 15th consecutive improvement in earnings from retail operations.

Net income for the six-month period ended Aug. 2, 1986, was $75.3 million, up 3% over the same period in 1985. Sales for the period were $4.17 billion, up 10%.

Net More Sales
With more than 1.8-million residents, the St. Petersburg-Tampa-Clearwater metro area is Florida's population leader. These residents lead the state in effective buying income with $21-billion in purchasing power. Suncoast advertisers are reeling in the benefits---retail sales have grown 52 percent in just five years, reaching $11.5-billion last year.
For a detailed look at this expanding, lucrative market, call your St. Petersburg Times and Evening Independent sales representative and ask for Suncoast '87. This comprehensive market guide will give you all the bait you'll need to net record sales on the Suncoast.

DeBeers Consolidated Mines

RANK 189

London

($ in millions)

Worldwide	1986	1984	% chg
Sales	1,823	1,613	13.0
Net income	402	250	61.0
U.S. advertising	36	29	24.9

There is no danger that current or future U.S. sanctions against South Africa will have a significant effect on DeBeers Consolidated Mines Ltd., because DeBeers has a hammerlock on the world diamond trade through its London-based Central Selling Organization, which controls about 90% of the gems produced worldwide each year.

The U.S. Senate voted Oct. 2, 1986 to override a presidential veto on sanctions against South Africa, a day after the House also approved the measure. The sanctions prohibit the import of steel, uranium and agricultural goods from South Africa, suspend U.S. landing rights for South African Airways and bar new U.S. business investments and loans in South Africa.

"But U.S. sanctions will have no important effect on the worldwide supply of diamonds," says Elizabeth Dolan, vp and manager of the Diamond Information Center at New York-based N W Ayer, which has been DeBeer's agency for 47 years. For one, she says South Africa diamond production represents less than a 15% of the world supply, placing it fifth behind Australia, Zaire, Botswana and the USSR.

U.S. imports of polished diamonds in 1985 totaled $2.7 billion, and the retail market for diamond jewelry increased 5.3% to $8.1 billion. The U.S. is the world's largest market for polished diamonds.

DeBeers increased its support of the retail diamond industry, boosting total measured media 25% in 1985 to $29.6 million for the seven media measured by Leading National Advertisers.

By far the greatest emphasis beginning in 1985 was for image ads with 40% of DeBeers' budget devoted to tv to "get people to pay attention to diamonds as gifts," says Judy Lauchren, senior vp-management supervisor for the DeBeers account. In 1985, network tv ads, primarily featuring the theme "Diamonds are the gift of love," accounted for $9.6 million in measured media, 32% of total spending, according to LNA.

About 60% of measured media spending was devoted to print media for specific types of jewelry. The categories and assigned weights in terms of total ad spending for print media included: 20% traditional quality gifts; 13% diamond engagement rings; 12% diamonds for men; 10% diamonds of one carat or more; and 5% diamond anniversary rings, says Ayer.

Print campaign targeted several types of buying situations, focusing on diamonds as gifts. One campaign, called "In her heart," was designed to visually capture vignets of giving and receiving diamonds as gifts. Another, called "Show Her it's Not Lonely at the Top," focuses on larger stones. Men's campaigns, including "The Gift of Success" and "The Man's Diamond," focused on men wearing diamonds as a lifestyle choice. Integrated into all diamond advertising beginning in 1985 is a secondary message about how to judge the character and quality of diamonds. The campaign discusses the four C's of buying diamonds-color, cut, clarity and carats.

A total of 17 million pieces of diamond jewelry were sold in the U.S. in 1985, up 9% over 1984. The biggest category in dollar volume was jewelry for female family heads, selling 6.6 million pieces with retail value of $3 billion, down 1% from 1984. The largest increase was in the men's diamond category, with 1985 sales of 1.9 million pieces valued at $1 billion, up 26% over 1984. Sales in other categories included: Single adult women, 3.5 million pieces valued at $1.1 billion, up 14%; women's diamond engagement rings, 1.6 million pieces valued at $1.5 billion, up 14%.

DeBeers aggressively expanded its cooperative ad program for retailers in 1985. The program jumped to $5.5 million in measured magazine for the year, compared with $176,000 in 1984. The retail coop program, which was tested in six cities in 1981, was rolled out nationally in 1984. DeBeers reimburses for ad lineage rates based on a rooftop investment in each area of dominant influence. DeBeers expanded its coop program to include manufacturers beginning in September, 1986.

DeBeers also continued its parallel ad placement strategy for manufacturers and retailers, where DeBeers buys a left-hand, full-page ad, allowing the manufacturer or retailer to take the right-page position to showcasing their diamond jewelry.

DeBeers had net profits of $452.4 million in 1985, up 25% over 1984. Sales revenue in the U.S. for DeBeers increased 13% in 1985 to $1.8 billion.

Denny's Inc.

RANK 165

La Mirada, Cal.

($ in millions)

Worldwide	1986	1985	% chg
Sales	1,340	1,300	3.1
U.S. advertising	50	44	13.8

Although privately owned Denny's Inc. has cut capital spending for its Denny's Restaurants and Winchell's Donut House divisions to lessen the debt incurred in a leveraged buyout, Denny's continues to expand through its El Pollo Loco charbroiled chicken chain.

The quick-service chicken chain, acquired in October, 1983, has doubled its number of outlets through franchising in the past two years. At the same time, its revenues have increased six-fold, to an estimated $20 million in fiscal 1985. A 1986 figure was not available.

There currently are 54 El Pollo Locos, of which 20 are franchised. Denny's restaurants number 1,124 domestically, 56 of which are franchises. The company also operates 727 doughnut houses under the Winchell's trademark, 13 of which are franchised.

Denny's is owned by a group of investors including 50 officers in Denny's management at the time of the buyout in January, 1985. The management team has remained virtually intact.

The bulk of Denny's 12% increase in measured media spending in 1985 was accounted for by a 55% increase in spot tv, representing a major shift from network tv, which recorded a 31% drop. About 84% of the outlay for spot tv was in support of the Denny's Restaurant division, the remainder to Winchell's Donut Houses. El Pollo Loco advertising in newspapers and other local media in Southern California is not national, so it does not show up in measured media.

The El Pollo Loco chain, now primarily in the Los Angeles and San Diego areas, also has signed franchise agreements for 85 outlets in Denver, Colorado Springs, Hawaii and Orlando, Fla., and plans to sign franchise agreements in five new cities each year.

A new franchise agreement has opened the way to expansion in San Diego and there are plans to open 11 more restaurants (three in Orange County) by the end of 1986.

El Pollo Loco is evolving from a Hispanic-oriented concept to a general consumer chicken restaurant. When the franchise rights were purchased by Denny's for $11.3 million in 1983, 95% of the customers at the chain's 17 outlets were Hispanic, compared with 40% today.

Now each store sells between 2,000 and 3,000 chickens a week, ringing up average annual sales of $750,000, one of the highest volumes per store of any chicken foodservice operator. Kentucky Fried Chicken, for example, averages about $550,000 per store.

Although the division's sales are still a small part of Denny's over-all $1.3 billion annual revenues, company executives say El Pollo Loco probably will be the main force behind the company's growth.

With franchises added in five areas each year, the company expects 300 outlets in five years.

"The fast food habit worth having" is the theme of El Pollo Loco's new spot tv campaign, a yearlong effort that broke in September and runs through the summer of 1987 in the Los Angeles and San Diego markets. The spot campaign is the chain's first sustained use of broadcast, a medium that could not be used efficiently before the chain's recent expansion.

Previous advertising at El Pollo Loco consisted of newspapers, newspaper supplements and direct mail targeted to specific trading areas. These presented the chain as the newest entry in the fast food arena and told how the charbroiled product is prepared.

El Pollo Loco chicken, which is not breaded or fried, is promoted as being low in fats and calories and has earned the recommendation of the American Heart Assn., an endorsement that is carried in the restaurant's advertising.

The Denny's Restaurant division, which accounted for 87.2% of the company's $26.6 million in measured ad expenditures in 1985, up 39.3% from the previous year, continued to use extensive spot tv in its major markets across the U.S. Spot tv accounted for $12.5 million in 1985 spending, compared with network tv spending of $10.5 million.

Advertising focused more on breakfast and dinner entrees to build sales in these dayparts.

A series of tv spots featured a campaign known as Denny's American Kitchen, with individual spots highlighting different regional dishes, such as jambalaya, stuffed trout, fried chicken, chicken and biscuits, and other entrees.

Recent market share data rank Denny's No. 1 among family restaurants and No. 8 among the top 10 restaurant chains with a 2.1% share of industry sales.

The Winchell's division maintained a $2.4 million spot tv campaign in major U.S. markets during 1985, the same as in 1984. The campaign's emphasis is on multiple purchases and special per dozen pricing, the approach taken in previous years. For the balance of 1986 and into 1987, however, Tom Anderson, new marketing vp at Winchell's, promises "significant positioning changes with stronger advertising focus and a lot of exciting product changes."

The first new product was scheduled for introduction in a new spot tv campaign that broke Oct. 8 in Winchell's major markets.

U.S. advertising	30	30	(0.9)

Doubleday & Co., after selling off several of its divisions in 1985 and 1986 in an effort to restore financial strength to the company, itself was acquired by West German publisher, Bertelsmann A.G., this September.

Doubleday & Co. is the eighth-ranked U.S. publisher in terms of sales. Bertelsmann paid $475 million for what remains of Doubleday's publishing division, its 26 bookstores and book clubs.

Bertelsmann has owned Bantam Books since 1980, and recently agreed to acquire for about $300 million the 75% it did not own of RCA/Ariola Records from General Electric. Bertelsmann's stated plans are to continue to acquire U.S. companies involved in publishing. For the year ended April 30, 1986, closely held Doubleday earned $7 million on sales of $472.3 million. This compares with 1985's earnings of $300,000 on sales of $440 million.

Doubleday had measured advertising spending of $22.9 million in 1985, down 0.8% from 1984. The bulk of that money both years was spent by the Book Club and Literary Guild.

Book Club advertising rose 16.4% in 1985 to $8.5 million over 1984. Literary Guild of America experienced a 12.5% decrease in measured spending to $5.6 million. The only other major expenditures were $514,000 for the Mystery Guild, down 44%, and $863,000 for Science Fiction Book Club, down 16.5%.

At the end of 1985, Henry Reath, Doubleday Publishing's division president, resigned, after being named executive vice president a little over two years earlier. Executive vice president Frank Cermak also resigned with Mr. Reath. Richard Malina replaced Mr. Reath as president.

Doubleday was shaken in 1985 when both Dial Press and Anchor Press were closed. Dial, which had a heritage of publishing quality literature, published its fall list but ceased, as of May, to acquire new books. It stopped publishing at the end of last year, even on contracted books.

Anchor, which reissued out-of-print hardcover titles, was consolidated and reorganized into Doubleday.

The publishing division faced other problems in 1985. While other publishing houses began offering its authors favorable 60/40 or 70/30 splits when they negotiated on paperback rights, Doubleday maintained its 50/50 split. Partly in response to that decision, and also because of the editorial and sales changes that were rocking the company, several "name" authors, including Stephen King and Barbara Taylor Bradford, moved to other publishers.

The publishing industry as a whole has had to suffer through several soft years. A decline in the audience for hardcover books, rising prices of paperbacks, competition from videos and discount book outlets have all had adverse impact on the industry.

Doubleday had some successes in 1985 from Bill Cosby's "Fatherhood," and in general from Dell, the paperback division, which reported at the end of fiscal 1985, the best year in its 65-year history. Dell has been part of Doubleday since 1976.

In addition to folding Dial and Anchor last year, Doubleday also sold its radio properties, thus shutting down Doubleday Broadcasting, created in 1967. MS Broadcasting in Indianapolis bought WAPP-FM and WHN both in New York, and WAVA-FM in Arlington-Washington for $53 million on Aug. 13. WMET-FM Chicago was purchased by Southwestern Broadcasting Inc. (SBI Inc.) on April 14, 1986, and the name was changed to WRXR-FM. WLLZ-FM, Detroit, KDWB (am,fm) in Minneapolis and KPKE-FM Denver was purchased by Sillerman/-McGee, New York, on April 29, 1986. Doubleday spent about $1 million in national advertising annually promoting the stations.

The company's international marketing division, Feffer & Simmons Inc., was sold to Paul E. Feffer.

A jewel in Doubleday's crown, the New York Mets, were not sold as part of the Bertlesmann deal. The team was purchased by Nelson Doubleday Jr. and Fred Wilpon, the club president, from Doubleday, which had owned 95% of the club. The Mets had been part of Doubleday since 1980, when Doubleday paid $21.1 million for the team. But the ball club's success has raised that worth to almost $100 million today. In the fiscal year ended April 30 the team had revenues of $43.1 million, up from the $27 million the previous year. Its pretax income was $9.6 million and net income was $5 million.

The current year has become much more hospitable for Dow Jones & Co., whose flagship product, the *Wall Street Journal*, suffered from the general softness in national advertising during 1985.

So far in 1986, circulation at the *Journal*, which dipped slightly in March audited reports, has grown 2.5% to 2,040,000 on Sept. 30, 1986, over the prior year, according to pre-audited reports from the company. Total ad lineage through the nine months has declined 4.6% from the same period in 1985, but that figure factors in a 10% decline recorded in the first quarter, 1986.

The ad lineage decline, however, may be behind the *Journal*, because third quarter results showed a 2.1% increase in ad lineage over the prior year period.

Barron's, Dow Jones' other national publication, showed a dramatic 12% increase in circulation on Sept. 30, 1986, over the prior year, according to unaudited statements from Dow Jones. *Barron's* had been a bright spot in advertising in 1985 with a 6.1% ad gain over the prior year. Latest third quarter figures show Barron's with a 3.3% lineage gain on a per issue basis, although it had a 4% decline for the period because of one less issue for the quarter.

Through the first nine months of 1986, total Dow Jones revenues were $822.9 million, up 8%, and net income was $136.9 million, up 40.1%. Included in the earnings cumulative was a first quarter after-tax gain of $31.4 million from the sale of 2 million shares of common stock of Continental Cablevision Inc. Excluding this gain, earnings for the nine months were $105.5 million, up 8%.

Advertising revenues at the *Journal* in 1985 were up 4.2% and ad volume (lineage) was down 5.2%, meaning all growth came from rate increases. Over-all revenues from Dow Jone's national publications segment in 1985 rose only 5.1% from 1984, while operating income fell 1.7% to $195.3 million.

By mid-year, 1986, circulation at the *Asian Wall Street Journal* hit 31,622, up 11.4%, and 35,379 at the *Wall Street Journal/Europe*, up 10.5%. During 1985, the *Asian Wall Street Journal* posted ad revenue increases of 17.2%, while circulation gained 4.9%; and the *Wall Street Journal/Europe* posted a 16.9% increase in circulation and a 25.4% increase in ad revenue, though it was operating at a loss at yearend 1985.

Despite its circulation and ad volume upswing, the *Journal* has lost its position as the nation's most read newspaper to Gannett Co.'s *USA Today*, according to the 1986 Simmons Market Research Bureau Media and Markets study, released this July. The SMRB report said *Journal* readership fell 16.7% to 4,030,000 between its 1985 study and this year's study, while *USA Today's* readership gained 14.7% to 4,792,000.

Ad agency media execs questioned the magnitude of the *Journal* readership loss because circulation remained relatively stable. However, they reasoned that with the general thinning out of middle management ranks in corporate America, fewer people may be listed on office route slips for the paper.

The media buyers also questioned *USA Today's* gain because a joint promotion with General Mills put some 450,000 free subscriptions into the marketplace at the same time SMRB was sampling for the study. The SMRB numbers caused a fracas between Dow Jones and Gannett when a Gannett ad touting *USA Today's* gain and the *Journal's* loss was refused by the *Journal* on the grounds that the numbers were misleading.

A spokesperson for Dow Jones, however, says that "circulation and readership do not necessarily go hand in hand. The historical experience of the *Journal* shows a continued trend line upward in circulation and great volatility in readership scores. Much has to do with measurement procedures that change from time to time. The *Journal* continues to pursue that methodology with the Simmons organization."

The *Journal* is out from under the publicity created by R. Foster Winans, the former *Journal* reporter who was convicted of securities fraud for leaking in advance the contents of the paper's "Heard on the Street" column, which he wrote. Mr. Winans' book on the incident hit the streets during the summer of 1986.

Dow Jones Community Newspapers segment, comprised mainly of the Ottaway newspaper group, showed an 11.4% increase in revenues to $155.9 million between 1984 and 1985 and a 19.2% increase in operating income to $35.2 million. Through the first nine months of 1986, ad volume in the Ottaway newspapers was up 3.8%.

Revenues at the company's growing Information Services climbed 19% between 1984 and 1985, to $102.2 million, and operating income grew 160.9% to $17.7 million. The group's revenues have grown 23.7% in the first nine months of 1986 over the prior year period. The segment is made up mainly of Dow Jones database publishing operations and its business news wires.

Dow Jones completed the joint acquisition of 52% of Telerate Inc. with Oklahoma Publishing Co. The seller was Exco International in Britain. Dow Jones also sold during 1985 and early 1986 8% of its 25% interest in Continental Cablevision in Boston back to that company. The proceeds showed up in first quarter, 1986, earnings.

In the company's fourth business segment, book publishing, made up mainly of Richard D. Irwin Inc., revenues were up 10%, to $54.5 million, while operating income rose 4.9%, to $7.7 million.

In 1986, two Dow Jones execs rose to prominence in the advertising community. Vice-chairman Donald Macdonald was inducted into the American Advertising Federation's Advertising Hall of Fame, and Bernard Flanagan, vp-marketing for the Journal, assumed the AAF presidency.

Exxon Corp., the world's largest oil company, suffered a $4.4 billion decline in revenue and a $600 million drop in income from the previous year, but still displayed complete optimism.

The year's results, its annual report says, "not only turned out to be better than might have been expected, they were in fact quite good." Without some unexpected expenses, 1985 profits actually would have been almost 4% better than 1984, Exxon says.

Exxon's "relatively rosy" 1985 came as the petroleum industry continued to face a sluggish U.S. economy and a continued decline in oil prices.

In advertising, Exxon kept its spot tv spending relatively stable, dropping only from $16.2 million to $16 million in 1985, but it sliced magazine ad expenditures from $4.8 million in 1984 to $686,000.

Virtually all of Exxon's measured advertising is for its gasoline and motor oil products. Exxon spent $12.7 million to advertise its gasoline, up 8.5% from $11.7 million in 1984. Of that total, $12.5 million was for spot tv.

Exxon backed its motor oil with $3.4 million, down 43.3% from $6 million in 1984, when it introduced Uni-Flo 10w-30, a high-performance product. Some $3 million of the 1985 expenditure went into spot tv. Spot tv suffered the biggest dollar volume cut in motor oil advertising of any media, down 29%.

Other Exxon advertising expenditures in 1985 were $468,000 for Exxon petroleum dealers' promotion, $183,000 to advertise Exxon-sponsored tv programs and $111,000 for general corporate advertising.

Retrenchment remained the operative word for Exxon in 1985. The company continued to reduce its refining capacity. It cut the number of gasoline service stations by 2,800, to 47,000, pulling out of such areas as northern New England, upstate New York, Kentucky and Ohio. It began modernizing and automating remaining stations, adding convenience products to some.

In 1985, Exxon completed the sale of its money-losing office systems division, a line that had seemed promising in the 1970s. The division suffered losses of between $30 million and $100 million.

More cutbacks took place in 1986, as Exxon restructured, trimming its 16 departments into three divisions. In a move that shocked the industry, Exxon offered early retirement to virtually all its 40,000 U.S.-based workers (another 120,000 work abroad). The corporate 15% reduction goal was achieved when 6,200 employes took early retirement voluntarily and another 800 were fired.

In March, Exxon announced its 1986 exploration and production capital budget of $10 billion would be cut to $8 billion. A month later, a planned $3 billion joint project by Exxon and Royal Dutch/Shell Group for a North Sea oil and natural gas production facility was abandoned.

Exxon even leased a substantial amount of office space in the 13 floors it occupies in the 53-story Exxon building in Manhattan.

The cutbacks are more than a temporary fix. Chairman and ceo C.C. Garvin Jr. told stockholders at the May annual meeting, "Technically, there is no good reason to believe that oil prices will recover substantially in the very short run." Analysts say Exxon appears to be positioning itself for an economy that remains relatively stagnant well into the 1990s. Mr. Garvin, who reaches mandatory retirement age in December, will relinquish his titles Jan. 1 to Lawrence G. Rawl. Mr. Rawl has been president since May, 1985, and will be replaced by Lee R. Raymond, a senior vp and director since 1986.

As the most financially secure U.S. oil company, Exxon is not running scared, and its retrenchment seems to be taking hold. Its first-quarter, 1986, profits were $1.7 billion, up from $1.3 billion in the first quarter of 1985; second-quarter profits showed a similar increase, $1.1 billion compared with $745 million in 1985.

Had it not been for three budget items, Exxon would have had a net income of $5.604 billion in 1985, up 1.4% from $5.528 billion in 1984. Those items include $2 million for foreign exchange debt losses and a $187 million writeoff for selling or discontinuing outmoded or inefficient facilities.

The third item was a $545 million payment to the federal government resulting from a Department of Energy suit charging Exxon with overpricing crude oil from a Texas field. Exxon lost the suit and the appeal in federal court, and the company failed to get a U.S. Supreme Court review. Exxon

Division sales	**1986**	**1985**	**% chg**
Delivery	2,573	2,016	27.6
Zap Mail	33	15	120.0

Express delivery services were not without their troubles in 1985. Growing volume has led to capacity crunches requiring couriers to expand and improve services. While others are struggling to do so, Federal Express, the leader in U.S. express delivery service with a 45% share of an estimated $4 billion market, has kept up through vigorous improvement and expansion in the U.S. and overseas.

Putting all its concentration and dollars into these changes in 1985, Federal Express decreased its measured ad spending by 14.4% from 1984, according to the 11 media monitored in this issue. But 1986 could be a turnaround in advertising as the company begins to advertise its improved services. However, the bottom line for fiscal 1986, ended May 31, got squeezed by the closing of ZapMail in mid-November, 1985. The one-time cost to Federal Express was $190 million.

For the first quarter of fiscal 1987, ended Aug. 31, the company reported a drop in net income of 21.5%, to $24.8 million, on sales of $733.1 million, up 24.4%. The drop in net income is primarily because of the losses from ZapMail and the increase in sales is due to a continuing growth in volume.

Federal Express announced Sept. 29 it would discontinue ZapMail, its facsimile transmission service, as well as its plans to sell and lease facsimile equipment. The announcement came just as Federal Express had planned to remarket the service and initiate a major ad campaign via its new agency, Fallon McElligott, Minneapolis. A Federal Express advertising spokesman says Fallon McElligott probably will be retained for another assignment.

The company says ZapMail had losses of $317 million since its 1984 introduction, and it had been unable to generate the volume needed to make ZapMail profitable. Fallon McElligott obtained the account in 1985 from Ally & Gargano, New York.

Although Federal Express holds a healthy lead in the U.S. market for overnight delivery service, it faces competition that has emphasized the importance of advertising prices. A $3 million campaign begun in 1985 lauds the company's discount prices available for overnight delivery rates for packages dropped off at one of its walk-in retail centers or drop boxes. Charging $11 (slightly more than the U.S. Postal Service's $10.75 for Express Mail) Federal Express asks, "If money were no object, which would you use?" In test ad campaigns, there was a 14% to 17% increase in dropoff volume.

Another new campaign begun in September via its agency of record, Ally & Gargano, supports the company's reliability claim. Mixing humor, which has come to be expected of Federal Express commercials, and facts about new high-tech capabilities, the commercials tell customers why they should trust Federal Express more. The campaign, estimated at $20 million, consists of eight tv commercials.

Federal Express operations overseas continue to grow in an estimated $2 billion market that is expected to reach $5 billion by 1989. With its international headquarters in Brussels, Federal Express service now extends to 85 countries.

Federal Express spent $156,000 to introduce its overseas service to the U.S., according to Leading National Advertisers, including a tv spot featuring actors who have appeared in previous Federal Express commercials during the past nine years. The spot uses the new tag line, "Now that you know Federal Express is going to Europe, why fool around with anyone else?"

Federal Express has become strong competition to the international delivery service leader DHL, which holds 66% of the market. Federal Express is aiming at a 15% to 17% share by 1988. Other competitors overseas include Airbourne International and Emery Worldwide.

In January, Federal Express purchased Lex Wilkinson, one of the biggest U.K. parcel distribution networks, to be used as a foundation for growth thoughout the U.K.

In February, 1986, Federal Express became a sponsor of the 1988 Winter and Summer Olympics via a marketing agreement with the International Olympic Committee.

Federated Department Stores, which is consolidating a number of its operating units to achieve economies of scale, continues to expand major operating units such as Bloomingdale's, Ralph's, MainStreet and Filene's into new markets in 1985-86.

"But Federated's strategy has not been to build a lot of new stores in 1986, but to focus on enhancing the performance of stores in the markets it already has," a spokesman says, citing the company's merger in January, 1986, of its 17-store, Columbus, O.-based Lazarus and 14-store Shillito Rike's, Cincinnati, into a single, 31-store division operating under the Lazarus name.

The Cincinnati-based division had fiscal 1985 sales of more than $856 million. Measured ad spending for the two divisions in 1985 included $600,000 for Lazarus, down 52%, and $1.2 million for Shillito Rike's, up 84%. The spending was mostly for spot tv.

Also in January, 1986, Federated merged its 45-store Gold Circle and 31-store Richway units into a single mass merchandising division under the Gold Circle name based in Columbus, O. The new division, with $1.1 billion in fiscal 1985 sales had combined measured ad spending of $2.1 million in spot tv during 1985, down 11%.

In each consolidation, Federated was able to save substantially on duplication of effort in buying operations and administration, and to plow the savings into an extensive store remodeling program, the spokesman says.

Federated is the nation's fifth largest nonfood retailer, operating 635 stores, including 224 department stores, 76 mass merchandising outlets, 197 specialty stores and 138 grocery stores. Net income fell 13% to $286.6 million in fiscal 1985, which ended Feb. 1. The giant retailer had revenues of $9.9 million, up 3.2%.

For the first six months of fiscal 1986 ending Aug. 1, Federated had net earnings of $81.9 million, up 19.7% over the same period in 1985. Sales were $4.6 billion, up 4%.

Federated's measured spending for seven media in 1985 fell 1% to $30.3 million, according to Leading National Advertisers. Spot radio, not part of the LNA measurement, had expenditures of $1 million in 1985, down 16% from 1984.

Federated reported to the SEC "advertising costs" for the fiscal year ending Feb. 1, 1986, of $303.3 million, up 5.5% over 1984. In addition to media spending, the Federated figure includes all overhead costs of in-house agencies in each division, including spending for direct mail, catalog operations, salaries and other expenses.

Federated's Los Angeles-based Ralph's grocery stores unit had measured ad spending in 1985 of $5.7 million in spot tv, unchanged from 1984. The Ralph's unit also repositioned its marketing strategy in 1985 from promotional pricing to everyday low pricing. The chain engaged in heavy comparative advertising with national grocery retailers such as Safeway Stores, Lucky Stores and American Stores Co.'s Alpha Beta division. Ralph's 138 stores accounted for 18% of Federated's 1985 sales.

In February, 1986, Federated announced an agreement to buy the real estate of 14 Zodys general merchandise stores in southern California from the Los Angeles-based Sterik Co. for undisclosed terms. Federated began converting one store a month into Ralph's Supermarkets, beginning in August, 1986. The new Ralph's stores feature warehouse style display for package goods and special sections for seafood, baked goods and deli.

Federated's 16-store Bloomingdale's unit had the largest measured ad spending of the 11 department store divisions with $5.8 million in media, up 18% over 1984. The spending was divided 40% magazine, 38% spot tv, and 22% newspaper supplement. Bloomingdale's continued its gradual expansion in 1986 with the October opening of its second Florida location in Boca Raton. Bloomingdale's is planning its next opening for 1988 in Chicago.

Brooklyn-based Abraham & Straus, a 16-store chain in the New York City area, was the second largest department store spender—$4.5 million in 1985, up 2%, almost entirely for spot tv.

Measured media spending was down for most of Federated's major department store divisions in 1985, including Miami-based Burdine's with 29 stores, down 24% to $2.1 million; Houston-based Foley's with 17 stores, down 24% to $3.2 million; and Dallas-based Sanger Harris with 20 stores, down 53% to $991,000. Measured spot tv dominated each unit's spending totals.

Bucking the trend toward reduced spending was Atlanta-based Rich's with 20 stores, where measured spending increased 39% to $1.4 million in the strong southeastern market.

MainStreet, a moderately priced soft-goods department store chain, began its long-awaited national expansion in 1986. The chain, which debuted in October, 1984, now has 12 stores in the Chicago area and recently opened three in Detroit as the first phase of a national expansion. Three more stores are planned for 1986.

Bannockburn, Ill.-based MainStreet parted ways with Chicago-based Wagner & Associates, in May, 1986. The account, which had measured spending of $714,000 in spot tv in 1985, ended up at W.B. Doner & Co., Southfield, Mich.

Also slated for national expansion is Filene's Basement, an off-price specialty store, which has added four stores in the northeast since the beginning of 1985, bringing its total to 20 stores. Other specialty stores undergoing rapid expansion include Pine Brook, N.J.-based The Children's Place, which grew to 162 stores in 1986 from 139 at the start of 1985. Federated also divested its Boston Store division in January, 1985, to Peoria, Ill.-based P.A. Bergner & Co. for $80 million. A spokesman says the eight-store division logistically did not fit into Federated's plans.

Diversified prod.	432	432	0.0

Firestone Tire & Rubber Co., which continues to funnel advertising dollars into its expanding MasterCare tire and service outlets, is joining other industry members in restructuring its manufacturing end by planning to sell off its Firestone Steel Products Co., a leading supplier of truck wheels and rims.

The restructuring is expected to produce a loss for the final quarter of the 1986 fiscal year ended Oct. 31. Proceeds from the sale will help fund a stock repurchase of 5 million of its 39 million shares outstanding.

Firestone's push in the past few years has been on its MasterCare tire and service outlets. There currently are about 1,500 such company-operated stores in the U.S. Combined with the resale of automotive replacement parts to independent dealers, this accounted for about 17% of the company's consolidated net sales in 1985.

Firestone is one of the five largest tire manufacturers in the world. It also produces truck wheels and rims in North America, synthetic rubber, rubber roofing systems and air springs.

Firestone explains its poor net income performance in 1985 by a $57 million restructuring provision ($105 million pretax) that resulted in closing a plant in Albany, Ga., and curtailing or ending passenger car and truck tire production at the Des Moines, Ia., plant.

Firestone also showed itself elsewhere in 1985 to be a good corporate citizen. A subscriber to the Sullivan principles, the company decided to dedicate about 25% of its dividend income and trademark fees from its South Africa operations to education and training for blacks in South Africa. The board authorized chairman and ceo John Nevin to make up to $500,000 a year available to help blacks in the apartheid nation through 1987.

The company also announced it will offer free medical examinations at its tire plants across the U.S. to reassure current and former workers they have not been exposed to asbestos. The cancer-causing substance is used in the plants as an insulation material.

Firestone is struggling to increase its shares of the original equipment (OE) and replacement tire market. It trails Goodyear in both categories. According to estimates by *Modern Tire Dealer* magazine, Firestone holds 9.5% of the replacement passenger tire market, compared with Goodyear's 15.5%. In the domestic OE market, Firestone has an estimated 21.5% share, compared with Uniroyal's 22% and Goodyear's 32%.

Firestone supplies 21% of General Motors' original equipment tires; 39.5% of Ford's; 1% of Chrysler's and none of American Motors', Volkswagen of America's or American Honda Motor Co.'s.

Firestone does not report on advertising figures to the Securities & Exchange Commission. But the Advertising Age 11-media breakout for 1985 estimated measured advertising costs for the company at $25.5 million, an increase of nearly 22% over $21 million estimated in 1984.

The BAR/LNA seven-media total for 1985 was $24.2 million. The vast bulk of this, or $22.2 million, was spent in network tv. Magazines received $1.3 million, down 66%. Most of this went to promote the Firestone MasterCare auto centers. Spending on MasterCare amounted to $17.8 million, according to BAR/LNA seven-media totals.

The BAR/LNA measured media figures for 1984 show the company spent $19.6 million on advertising, making 1985 spending nearly 24% higher than the year before. Again, nearly 75% of the 1984 spending went for the retail auto maintenance and service stores.

Firestone also is touting a new product, the high-performance Firehawk GT, chosen as original equipment on the 1986 Pontiac Firebird. Ads by Brubaker, Cole & Associates are running in auto buff magazines. The Firehawk designation will be used as an umbrella name for all the company's high-performance tires.

Firestone also is adding high-performance auto service centers to its group of MasterCare centers. The company hopes to open 450 Performance Pro Shops by 1989, making it the largest performance tire and wheel distributor in the U.S. The company opened its first 85 stores April 1 and plans 50 more by the beginning of November.

Mr. Nevin set three goals for his tenure: profitability for tires in North America, getting the balance sheet in line and finding a company that would be a good fit.

According to Mr. Millis, the speculation is that no company wants to buy Firestone, regarded as a marginal player in the tire industry with a profitability below the industry average. He says the company will either be sold or will have to make a major acquisition in the next few years. Otherwise, he says, there is little in the way of long-term growth potential.

Firestone spokesman Jim Strandberg, however, points out that the purchase or lease of J.C. Penney Co. auto service stores for Firestone's MasterCare system is an "internal diversification" that's almost like buying another company.

State of Florida

RANK 190

Tallahassee

($ in millions)

U.S.	1986	1984	% chg
Advertising	35	31	12.4

Advertising by the State of Florida is virtually weatherbound, especially evident in 1984-85 when the orange crop was decimated by a winter kill. And while it lauds its home-grown product outside the state, Florida heavily pushes its vacation climate—all of which add up to more ad spending controlled by that state government than any other.

The state alone spent $22.2 million in 11 measured advertising media for its citrus, tourism and economic divisions, up 61% from 1984. Citrus products grabbed $19.7 million of the spending, and vacationing $2.2 million, according to Leading National Advertisers, which measures seven major media.

The state, according to its own estimates, spent $20.1 million on frozen orange juice, $200,000 on grapefruit juice and $1.7 million on all fresh citrus products. Most of the orange juice advertising was on tv, but print and radio were also used for all the advertising campaigns.

Florida also spent $9.9 million in 1985 on its Brand Advertising Rebate Program, which offers citrus brand owners and label owners an advertising rebate if they follow the "rules" established by the Florida Citrus Commission, says Don Farmer, the commission's deputy director. In 1986, it's estimated that $10.8 million will be

BIG GAME HUNTERS

...bag big profits with the PROFIT TICKETS!

Now big game hunters can confidently set their marketing sights on potent game promotions which will dramatically increase traffic and sales.

You can turn to Chicago Lithographing Company. We've earned our big game reputation with game, sweepstake and lottery programs exclusively. We have successfully helped promotional firms with the development and production of big games for major supermarkets, oil companies, state lotteries and fast food chains.

Chicago Litho has printed billions and billions of Profit Tickets, including scratch-off and punch-out style, for satisfied customers throughout the world.

Chicago Litho is a single source supplier for your big game promotions. There is no second handling, second guessing nor costly delays due to additional suppliers.

Our extensive facilities offer you everything from high speed multi-color presses to sophisticated numbering, perforating, die-cutting and collating equipment. We have the controls to help you produce secure hidden image games. You can have us compute the odds for pay-offs and handle the dispersion of prizes. Added to each job are strict security, controlled distribution, and on-time delivery.

So if you're a big game hunter stalking a successful promotion, talk to the single source professionals who know the territory. Contact us for complete information.

spent on this program.

The citrus program is run by the Florida Citrus Commission, an extension of the State of Florida, and funded by an exise tax on every box of fruit from brand and label owners. In 1985, the tax on a 90-pound box of fresh oranges was 18¢, while the tax on a box of fresh grapefruit was 25¢, says Don Farmer, deputy director of the citrus division.

The exise tax in 1985 was less than the tax in 1984 because of the freeze that traumatized Florida's citrus industry near the end of January, 1985. U.S. grocery store sales for 1985, show that 817 million equivalent gallons of orange juice were sold, with a majority of it being produced in Brazil because of freezing problems in previous years.

In 1986, it is estimated that 886 million gallons of orange juice will be sold domestically—132.4 million gallons of those gallons being produced in Florida compared with 292.4 million gallons now being produced in Brazil, according to Mark Brown, acting economic research director for Florida's Department of Citrus, Gainesville.

Also in 1985, the state launched a Florida Seal of Approval campaign, which tells the consumer that the product, usually fruit, is packaged to Florida's approval. The program already is being used by 80% of the brand and label owners in Florida, Mr. Farmer says.

For the grapefruit section of the citrus market, Florida uses advertising that specifically reaches out to the health- and weight-conscious consumer. This grapefruit campaign in 1985 ran under the theme, "Florida is Citrus."

Florida's advertising budget of $2.2 million for tourism in 1985 remained about the same as in 1984, according to LNA. However, the influx of tourists increased. In 1985, Florida was visited by 30.1 million visitors from the U.S. and Canada, a total that was 7% higher than 1984. The increase was attributed to the Florida's use of promotions and advertising, decreased airfares and decreased gas prices.

Florida reported to Ad Age that it spent $4.3 million in 1985 on tourism promotion, 70% of which was on tv and 30% in print advertising for an out-of-state campaign aimed at vacationers, says Chuck Roedema, senior vice president at Miami-based Beber, Silverstein & Partners, which focused in 1985 on Florida's diversified vacation destinations and activities.

The tourism division also used the public service markets for in-state messages, which told Floridians to stay in Florida for their vacations. This unmeasured advertising included tv and a four-color insert in all of Florida's papers' Sunday sections on June 1. It's estimated that between May and September, 1986, Florida's tourism department received almost $2 million in free media exposure due to public service messages.

The 1985 campaign (winter) also had a different emphasis than the 1984 campaign (spring). The winter campaign focused on couples and highlighted the southern Florida markets, while the spring campaign concentrated on families and spotlighted the central and northern Florida vacation spots, including Walt DisneyWorld, Sea World and other family-oriented tourist stops.

The 1985 spring campaign was geared to the mid-Atlantic and southern states, or those within driving distance for families. The 1985 winter campaign, bearing the theme, "Florida ....we've got it!" was targeted at 21 northern markets mostly east of the Mississippi.

Florida also has discovered that Canada is a great tourist market to tap. The Florida Commerce Department estimates that slightly more than 8% of Canada's population travelled to Florida during the height of the 1985 winter.

Florida's local markets, like Orlando, Miami, Palm Beach, do their own advertising. They have their own themes and campaigns, and collectively, they by far outspend the tourism division's budget. In 1985, local communities together spent about $30 million on individual advertising, Mr. Roedema says.

Last month, Florida released its newest ad campaign, which moves away from the diversification strategy used in 1985.

The campaign focuses on the benefits of any vacation. The ads promise an easy, relaxing, memorable vacation experience in Florida. The state will be spending an additional $500,000 on the new campaign.

Florida's Economic Development Division spent $700,000 in 1985 to draw new business including the motion picture and music video industry, international companies and the export industry. The $700,000 was spent entirely on magazine advertising.

Franklin Mint Corp. RANK 171
Franklin Center, Pa.

($ in millions)

Worldwide	1986	1985	% chg
Sales	350	290	20.7
U.S. advertising	46	44	6.5

A glittering 1986 campaign may signify the intent of the new owners of the Franklin Mint Corp. to renew interest in the company's original product, commemorative coins. Today, minting and sales of coins and medals account for only 7% of the company's business. But that may change with the newest product, jewelry featuring gold coins.

During 1985, the privately held manufacturer and marketer of collectibles, jewelry, books and records had estimated sales of $290 million. Franklin Mint's customers, reached through direct mail, magazine, newspaper and tv pitches or retail stores, are expected to spend $350 million in 1986.

In March, 1985, Warner Communications sold a majority interest in Franklin Mint to American Protection Industries, a private company owned by Stewart and Lynda Resnick, for $100 million in cash and $67.5 million in seven-year, 9% notes.

Los Angeles-based American Protection Industries' holdings include American Protection Alarms and Tele-Flora, the second largest floral delivery network in the U.S.

In addition to maintaining a 15% interest in Franklin Mint, Warner has the option to buy another 15%. Warner also retained ownership of the company's headquarters, which it leases to Franklin Mint, according to Susan Mahon, manager of the database for *Mergers & Acquisitions* magazine.

Warner paid $225 million for the company in 1981, which then had revenues of $360 million. The Franklin Mint was founded in 1966 by Joseph Segel as the National Commemorative Society. The company went public in the early 1970s.

Renewed interest in the company's minted products is attributed to Ms. Resnick. The co-owner, who also is an exec vp-marketing, anticipated an emerging fashion trend will be the coin jewelry. To promote the line, Franklin Mint employed model Paulina Porizkova, a cover model in *Sports Illustrated's* swimsuit issue.

Current items included a sterling silver coin electroplated with 22 karat gold selling for $250, a $150 necklace of Caribbean coins and a $975 Egyptian coin watch for men.

Other recent products marketed by Franklin Mint include a Civil War chess set, pewter model trains, a series of "Gone with the Wind" dolls, a coin continuity program aimed at children, limited edition books and a variety of porcelain items. Porcelain, which is used in several of the mint's lines, is the biggest selling item.

All advertising and marketing activity is conducted in-house. All minted items are produced at the mint's headquarters, while other products may be produced as far away as China, France or Malaysia. Franklin also mints coins for various foreign governments.

Direct marketing insiders estimate Franklin Mint's sales are as much as five times larger than those of its nearest competitors, such as the Danbury Mint, the Bradford Exchange or Lenox Collections.

Much of the company's sales growth depends on the strength of its mailing list. Franklin Mint's house list, which may contain as many as 3 million names, is closely guarded. "They won't rent their names to anyone because of the list's value," says Shell Alpert, chairman of Alpert, O'Neil, Tigre & Co., a Philadelphia-area direct response consultancy and service. To succeed in the collectible market, Mr. Alpert says, a company must reach an audience of hard-core buyers, which he estimates at only about 750,000.

According to a company spokesman, Franklin Mint collectors are between 35 and 50 years old and have above-average education and income. More than 28% have household incomes of more than $50,000.

To reach this group, in 1985, the company spent $29.4 million in six measured media, according to Leading National Advertisers. The bulk of Franklin Mint advertising, or $16.3 million, was placed in magazines, down 6.9% from $17.5 million in 1984.

An additional $15.7 million was spent in newspapers and newspaper supplements, up 21.7%. Spending includes $2.8 million in spot tv, down from $3.7 million in 1984, and only $13,000 in network tv, up from $6,000.

Among individual product lines, porcelain received the bulk of ad spending, with a six-media total of $10.7 million, up 138% from $4.5 million in 1984. Spending declined 18.2% on Franklin Library Books to $4.5 million, and dropped 7.9% for Franklin Mint Collections, to $13.9 million.

Franklin Mint Record Society spending dropped from $863,800 to $73,300 in 1985, while all money was pulled out of measured media for Franklin Jewelry, which spent only $52,000 in 1984.

Subaru of America, the U.S. distributor for Fuji Heavy Industries Ltd. of Japan, introduced almost a full, new line of products in 1985 and could have sold more had it not been for the Voluntary Restraint Agreement restrictions limiting Japanese auto sales in the U.S., says the company.

Ranked No. 1 in 1985 automotive profitability and growth by Forbes magazine, Subaru increased its 1985 measured advertising spending to $34.7, up 33% from 1984. It also entered into an agreement with Isuzu Motors to build a U.S. assembly plant with a startup date of 1990. U.S.-assembled cars do not fall under restrictions facing Japanese imports.

During the year, Subaru, the Pennsauken, N.J.-based sales and distribution center for Tokyo-based Fuji, introduced the Subaru Wagon, the Subaru 4-door and the Subaru XT Coupe.

The company in 1986 is citing the "difference" it has been touting in its

ad themes the past two years. That 1985 theme, "Inexpensive and Built to Stay That Way," centers around Subaru's newest product, the Subaru 3-door, introduced in the beginning of 1986. The theme is an evolution of the 1985 theme, "The greater difference," and the 1984 theme, "the Subaru difference."

Subaru's future growth depends greatly on import restraints, says Syd Havely, the company's national corporate affairs manager. The restraints, which regulate how many cars Subaru and other Japanese manufacturers can sell in the U.S. under the VOA, were supposed to be lifted in March, 1985, but instead have been extended until March, 1987. They are industry self-imposed restraints.

In 1985, Subaru's vehicle quota was about 175,000 vehicles. With selling from its 1984 inventory and its allotted quota, Subaru sold 178,175 vehicles in 1985. "We can sell every car we can get our hands on," Mr. Havely says. Subaru's estimated growth for the next few years is projected to be 10% annually.

Because of restraints, Subaru's market share of all import sales remained relatively the same as in 1984, or about 7%. According to Detroit-based *Ward's Automotive Magazine*, Subaru is fifth on the list of top imported cars, behind Toyota, Nissan Imports, Honda and Mazda.

Of the 2.3 million Japanese imports sold in the U.S. in 1985, Subaru's 178,175 accounted for 8% of Japanese imports, Mr. Havely pointed out.

Subaru continues to target its market strategy at specific segments, including passenger cars and trucks with four-wheel drive and front wheel/four-wheel drive. Subaru also directs its advertising at specific consumers, concentrating on men and women 25 to 49, with a $30,000 plus annual income.

The theme for Subaru's 1985 campaign was, "Subaru, Inexpensive. And built to stay that way." The theme was used to introduce 1985's new line, with almost half of the ad dollars devoted to the new Subaru Wagon. In 1985, passenger cars received about $29.3 million, or 84%, of the company's measured advertising budget, according to Leading National Advertisers, which measures seven media.

Subaru continued to focus on enhancing its use of network tv for advertising. In 1985, it spent 36% of its measured total on that medium, followed by 25% on spot tv, 19% magazines, and 15% newspapers. That compares with a mix in 1984 of 54% network tv, 22.5% spot tv and 19.5% magazines. No monitored spending was counted for newspapers in 1984.

To increase the number of vehicles that Subaru can sell in the U.S., the company signed a joint effort agreement with Isuzu in 1985 to build a domestic plant. Fuji is still searching for a site. The U.S.-assembled units are expected to add an additional 60,000 vehicles to the market when the plant opens for its first year in 1990.

During 1985, customers were lured by the quality, durability, performance and driveability Subaru touted in its advertising. According to a 1985 survey by J.D. Power and Associates, measuring customer satisfaction levels of 30 imported and domestic cars, Subaru ranked second only to Mercedes Benz.

But in the 1986 survey, Subaru dropped to No. 7. Analysts attribute the drop to the birthing pains that accompany any new product's introduction into the market. With the new line of automobiles introduced in 1985, customers were bound to find problems. "In typical Subaru style, the bugs will soon be worked out and they'll work their way to the top again," says an analyst.

E&J Gallo Winery

Modesto, Cal.

($ in millions)

Worldwide	1986	1984	% chg
Sales	650	585	11.1
U.S. advertising	83	49	27.7

Riding the crest of the booming wine cooler market, E&J Gallo Winery transformed its 1985 advertising schedule as it made major shifts in advertising weight behind its products.

During 1985, Gallo entered the growing wine cooler market at mid-year with Bartles & Jaymes, rising to the No. 2 position in that category behind Brown-Forman's California Cooler by year end, and passing California Cooler in early 1986. A highly popular tv campaign created by Hal Riney & Partners, San Francisco, helped put B&J on top of the increasingly crowded cooler heap.

According to the 1986 edition of "American Wine Market Review and Forecast" (a publication of *Impact*, the wine and spirits newsletter), B&J will grab 22% of the 72.4 million, 9-liter cases expected to be sold by all producers in 1986. California Cooler will take about 18%.

Privately held Gallo had 1985 sales estimated by *Impact* at $650 million, up from $585 million in 1984. It held 26% of the total U.S. wine market in 1985 and its Gallo brand remained the No. 1 brand in the wine and distilled spirits field.

Bartles & Jaymes in its half-year on the market in 1985, drew $17.2 million in ad spending—$13.3 million in network tv and the rest in spot tv. The multi-spot tv campaign features the mythical creators of the cooler, the always silent Ed Jaymes and slow-talking Frank Bartles whose aphorisms and home-spun charm engage the viewer.

Wine coolers sold some 15 million cases in 1984; 38 million in 1985, and sales of 72.4 million cases worth about $1.4 billion are expected this year, *Impact* predicts.

While B&J was basking in its large ad budget in 1985, Gallo's Polo Brindisi was languishing. A Lambrusco-style wine introduced in 1983 and still struggling against such brands as Riunite, it had received $8.6 million in ad support in 1984, but not a penny in 1985, according to LNA. "But that's normal in the wine industry," an *Impact* spokesman says. "Wineries put their advertising dollars where it's hot." Despite getting the ad ax, Polo sales increased slightly in 1985.

Gallo's Andre brand, which includes Andre champagne, the No. 1 domestic seller, received $4.6 million in ad spending in 1985, down 33%. Likewise, advertising for E&J brandy, the leading domestic brand in sales, was pared to $66,000 from $960,000 in 1984. Carlo Rossi, Gallo's lower-priced label, however, had expenditures of $2.7 million, up from $78,000 in 1984, all on network tv. Rossi was the nation's No. 2 selling wine in 1985, with 17.1 million cases, second only to Gallo-label wines, which sold 18.4 million cases.

Including expenditures for other Gallo wine products such as Boone's Farm and Thunderbird, Gallo spent $17.8 million in 1985 advertising its label wines, up from $16.4 million. Gallo-label wines in 1984 were advertised exclusively on tv; 1985 expenditures included almost $4 million in magazines and newspaper supplements.

Rivaling the Bartles & Jaymes spots in popularity was another Riney hit for Gallo Winery, a series of festive, family-oriented spots that contain background music by Vangelis, the Academy Award-winning composer of "Chariots of Fire." A Gallo spokesman says the winery receives about 10 calls a day from viewers asking where they could buy the score. The tune, the spokesman says, is virtually the same as a number called "Hymne" on Vangelis' album "OperaSauvage."

U.S. advertising	42	68	(38.6)

Hallmark Cards showed virtually no growth in 1985 as it recorded in excess of $1.5 billion in revenues to defend its No. 1 position in the greeting card market against American Greetings Corp., Cleveland, which recorded revenues of $1.03 billion.

Privately owned Hallmark and Ambassador control 40% of the $3.4 billion U.S. greeting card market, followed by American Greetings and Gibson Greetings, Cincinnati. More than 22,000 retail outlets carry Hallmark cards. Half are gift and stationery shops and the rest department and drug stores. Hallmark owns 250 outlets.

Ambassador Cards was founded in 1959 and the products are sold through 15,000 chain groceries and other mass-market outlets. A separate staff produces and markets the Ambassador line, which Hallmark describes as the third biggest greeting card seller with annual sales this year of $310 million.

There was a shift in moods from conventional to nontraditional this year as Hallmark introduced its Shoebox Greetings line of 800 contemporary cards to compete against smaller companies like California Dreamers and Maine Line. The line, which resembles the merchandise offered by Chicago-based Recycled Paper Products, is the company's first step toward attracting younger consumers.

California Dreamers says the risque segment, which it claims to have pioneered, is growing at a rate of 25%, compared with 5% for the industry. It's that difference that has brought Hallmark, which the stationery industry cites as being a "conservative" company, into the adult market.

The Shoebox Greetings cards feature bold graphics and expressions. One card, for example, says, "Mother, I finally found a birthday card that you'll really like and always treasure . . . happy birthday from your daughter, the virgin."

Concerned that stores will drop its card line in favor of the Shoebox cards, California Dreamers mailed in May a "Declaration of Independence to all Hallmark retailers" to inform them of Hallmark's "wrongdoing." Recycled Paper Products got into the act by running its own protest ad in July issues of paper goods trade journals; Sandra Boynton, creator of RPP's Boynton Bear, filed a separate lawsuit against Hallmark for copyright infringement. It is pending.

Hallmark has no plans to advertise its Shoebox line on tv, but the company ran a national print ad promoting the line in October issues of *Cosmopolitan, Glamour, People* and *Rolling Stone*. An actual card accompanied the ad, which encouraged consumers to either "swipe it" from the issue or go to a Hallmark store to buy one.

Hallmark added the phrase "go to Hallmark" to the end of its "When you

A great grocery innovator

The Great Western Tea Co., founded in Cincinnati in 1883 as a coffee, tea and sugar dry goods store, had four stores two years later, expanding that number to 40 by 1902, when it changed its name to Kroger Grocery & Baking Co. National expansion came in 1912 with the purchase of a St. Louis-based grocery chain. Kroger was the first grocery chain to operate its own bakeries, the first to put in meat departments and the first to own its truck fleet.

WHY BE A LITTLE FISH IN A BIG POND?

FOOD SALES ARE COOKING IN YUMA-EL CENTRO.

Yuma-El Centro has a big appetite. In just five years, food sales per household increased 45.2%, outperforming the state by 21%, region by 20% and entire United States by 28%. Effective Buying Income increased 42.6% and is expected to increase 61.3% by 1989. So if you're hungry for greater sales, KYEL-TV in Yuma-El Centro has the appetite to satisfy your craving.

KYEL-TV DOMINATES THE MARKET.

We've got the facts, figures and programming, including the #1 News, to help your sales do some cooking of their own.

care enough to send the very best" tag line in December, 1985, to add more force to its traditional theme. Tv spots featuring a storyteller offer a "gentle call to action" to consumers wishing to correspond with loved ones.

Network tv continues to attract most of Hallmark's ad dollars in the 11 measured media. In 1985, network tv's share of the 11-media spending total was 90%, up from 68.5% in 1984. The main loser in the media mix shift in 1985 was magazines, from 11% of the total measured in 1984 to 3.8% in 1985.

Total measured spending dropped 38% for the 11 media to $24.9 million as Hallmark cut advertising on cards, virtually all on tv, from $27.6 million in 1984 to $16.9 million in 1985. Crayola crayons and toys support fell from $2.5 million to $1.7 million, and multiproduct advertising as a category fell from $6 million in 1984 to $2.8 million in 1985.

In April, Hallmark introduced A la Mode as its first cooperative effort. A la Mode is a series of 16 birthday and friendship cards with ice cream designs on the cover that offer coupons for free Baskin-Robbins ice cream on the back.

In June, the company debuted its 1986 picnic collection featuring Summer Stripes tablewear. A consumer promotion, called the Hallmark Summer Stripe Games, also began then. Two separate games with a total of $50,000 in prize money and 5,000 second prize Weber barbecue grills, generated increased store traffic for Hallmark's 22,000 retail outlets nationwide.

A new line of Halloween products aimed at the growing adult costuming market debuted in October. Included in this "Boo Bazaar" are monster tails, spider headbands, dragon-shaped neckties, creature beanies and "ghoul jewels."

Christmas, 1986, will bring the most comprehensive retail promotion ever offered by Hallmark to its retailers. The package includes open house products, special retailer discounts and a drawing for a free Christmas tree. Hallmark will break new national tv holiday spots at this time.

The holidays also will set the stage for Ambassador's introduction of Home-Sweet-Homemade food wraps. The 12-item line of decorative food packaging includes pie boxes, bottle bags, jar topper kits, recipe cards and baking labels.

Hallmark Properties in 1985 created and marketed The Hugga Bunch in conjunction with Kenner Products, Cincinnati.

"Zoobilee Zoo," a children's daily tv series produced in cooperation with DIC Enterprises and BRB Productions, debuted in September, 1986.

In 1987, Hallmark Properties will introduce "Auntie Em"—its first line of coordinated home furnishings licensed to outside manufacturers. American Country designs decorate the items, which include Anchor Hocking beverage and dinnerware, Wamsutta fabric and Barth and Dreyfuss of California kitchen and bathroom towels.

Hallmark in July, 1986, purchased 50% of five full-power and five low-power tv stations from Spanish International Communications Corp., New York, for $150 million. As prospective buyer, Hallmark said it is committed to continuing the stations' Spanish-language programing beyond the minimum two-year period stipulated as a condition of the sale. The five full-power uhf stations are: WXTV in Paterson, N.J.; KMEX in Los Angeles; WLTV in Miami; KWEX in San Antonio, Tex., and KFTV in Fresno, Cal. First Chicago Venture Capital purchased the other 50%.

Tokyo
RANK **144**

($ in millions)

Worldwide	1985	1984	% chg
Sales	1,906	2,061	(7.1)
U.S. advertising	57	38	51.2

Private, family-owned Hattori-Seiko Co. Ltd. of Japan, parent company of Hattori Corp. of America, boosted measured ad spending by 51% in 1985 over the previous year and in 1986 has been expanding that major advertising push with major campaigns promoting its Seiko, Lassale, Jean Lasalle, Pulsar and Lorus brand names.

The company dominates the world watch market, its main area of business. The company markets watches and clocks in the U.S. through its various subsidiaries under Seiko, Pulsar and Lorus brands and through its Special Products Division, which manufactures Jaz watches and private label brands. Other areas of business include computer peripherals and consumer electronics.

Estimates of the parent company's 1985 worldwide sales are $1.91 billion, down 6.8% from $2.05 billion in 1984, according to Joe Thompson, editor of *Modern Jeweler*.

Seiko, whose sales exceeded those of its closest two competitors combined, sold more than 3.3 million watches in the U.S. in 1985.

Since Seiko began marketing watches in this country in 1968, it has sold an estimated 35 million timepieces, according to the company. It is the best-selling watch brand in the middle market category ($50 to $300 price range), Mr. Thompson says. The second biggest seller in the category is sister company Pulsar, which sold 2.1 million units in 1985. Other competitors include Citizen Watch Co., based in Japan and the second largest watch company in the world, and U.S.-based Bulova.

Advertising for Seiko brands is concentrated on tv, with $4.7 million spent on network tv and $3.4 million on spot tv last year. All in all, Seiko received the most advertising support, $11.2 million, of all Hattori's U.S. lines.

A new campaign from Seiko's agency, AC&R Advertising, New York, which features the testimonials of happy Seiko owners, will break in late November. Scheduled to run until Christmas on the top 20 prime-time shows, the campaign is expected to reach 97% of all U.S. households nine times during the four weeks, according to David Strousse, vp-advertising and promotion for Seiko.

But the area where Seiko is making the most impact in product terms is in the clock business. According to Mr. Strousse, clocks are the highest growth area of the company's business, as sales have exceeded expectations and catapulted Seiko into the leading position in the market.

Seiko has launched such designs as the Avant Gray line to prompt impulse buying in this increasingly important category that feeds into the home and office decor market.

Seiko subsidiary Jean Lassale, the company that produces solid 18-karat gold watches for the upper end of the market ($2,000 to $8,000 average price), is still not a significant factor in the company's sales, even after five years with Seiko, according to an industry source. However, Mr. Strousse points to the 18-karat gold, porthole-designed Thalassa line ("The Sea" in Greek) as a success and the backbone of the Jean Lassale name.

Thalassa watches are being promoted in upscale magazines, newspapers and city magazines. In 1985, measured spending for Jean Lassale watches totaled $6 million.

This fall, Lassale will embark on its biggest magazine campaign to date with appearances in such higher demographic books as *The New Yorker, Town and Country* and *Vanity Fair*. Having abandoned spokeswoman Catherine Deneuve in favor of a poster-technique approach in the current campaign, AC&R promotes Lassale watches as "*La Masculine, La Gorgeous.*" The largely print campaign will be supported by tv in major markets.

Pulsar watches, promoted with the theme "The world knows a great watch when it sees one," received $7.7 million in advertising in 1985. A new campaign from Ammirati & Puris, New York, is aimed at repositioning the brand to appeal to fashion seekers. Advertising consisted primarily of tv, mainly network.

Spot tv remains Hattori's largest recipient of advertising spending for watch products, although the total spent for spot tv decreased by 21% from 1984. Network tv received a dramatic boost, from $427,000 in 1984 to more than $10 million in 1985. Newspapers, which were not used in 1984, received $5.6 million in media allotment from Hattori in 1985.

Lorus watches, with more than $3.5 million in media backing, were billed as "more watch than humanly possible" as Lorus tackled the lower end of the watch market in which it sold 3 million units in 1985. That segment is dominated by Timex, which sold 15 million units in 1985, while the second largest player is Japanese-based electronics giant Casio, according to Mr. Thompson.

Swiss-based ETA is becoming a big factor in the market. It sold 3 million watches through its Swatch Watch USA unit in 1985.

In personnel, Robert Pliskin, president of Seiko Time Corp., assumed the additional role as head of marketing for all Hattori watch brands in the U.S.

Hearst Corp.

New York

($ in millions)

Worldwide	1986	1984	% chg
Sales	1,540	1,400	10.0
U.S. advertising	38	23	59.9

The continuing slump in national magazine advertising became a painful reality at Hearst Corp. this summer when it folded *Science Digest*, its struggling general interest science magazine.

The nation's No. 1 publisher of monthly magazines, however, had generally satisfactory results companywide. The broadcasting group experienced a downturn, but this followed a record 1984 highlighted by the Winter and Summer Olympics on its four ABC-affiliated tv stations.

The broadcasting segment has extended its market coverage with the acquisition in 1986 of WCVB-TV, the ABC affiliate in Boston, the nation's sixth largest tv market. Hearst paid $450 million for the station owned by Metromedia Inc., Secaucus, N.J., which sold the rest (six) of its tv stations to Rupert Murdoch's News America Publishing.

The Hearst purchase brought to six the number of tv stations owned by the company and made it the second largest operator of network-affiliated stations. Westinghouse Electric Corp. is the largest. Hearst's other stations include WTAE-TV, Pittsburgh; KMBC-TV, Kansas City, Mo.; WISN-TV, Milwaukee; WDTN-TV, Dayton, O., and WBAL-TV, Baltimore, a CBS affiliate.

Hearst Corp., ranked No. 11 in 1985 revenues from media operations among the top 100 media companies monitored by Advertising Age, spent $27.5 million in measured media in 1985, up 60% over the previous year. The big differences in spending according to LNA included $4.5 million for Hearst Magazines miscellaneous specialty publications, up 45.5% from 1984; $2.6 million for Hearst Corp. general promotion, a category that received no spending in 1984; $1.9 million for Morrow Books, up from $804,000; and $518,300 for the *Los Angeles Herald-Examiner*, up from $78,900 in 1984. Advertising increased only slightly for Good Housekeeping needlecraft kits, with $2.09 million in spending, and *Cosmopolitan* boutique mail order promotions, $1.1 million.

Hearst spends from $50,000 to $200,000 on its various national magazines. Virtually all the magazines received from 20% to 50% increases in measured spending during 1985 over 1984. Spending dropped 35% for Avon Books to $1 million.

Major media shifts included a 63.2% increase in national newspaper advertising to $5.5 million and a 57% growth in ad spending in magazines to $15.2 million.

The demise of *Science Digest*, which received only $31,200 in measured spending in 1985 against no spending in 1984, and sale of its subscriber list to Time Inc. ended a costly three-year battle that flourished between *Science Digest*, *Science 86* (published by the nonprofit American Assn. for the Advancement of Science) and Time Inc.'s *Discover*, the lone survivor.

On a corporate level, Hearst Corp. launched a national print campaign, featuring employes from Hearst's more than 135 businesses. The effort, from Laurence, Charles, Free & Lawson, New York, ran in leading newspapers and magazines, paying tribute to the people who helped make Hearst one of the world's leading communications companies.

Revamped sales packages may have contributed to the healthy performances of Hearst's other magazines. The packages were offered to advertisers in response to rate-breaking said to be occurring in the women's service magazine category. Offerings were narrower, but advertisers needed to buy fewer pages to qualify for package benefits.

Discounts ranged from 5% for buying three pages in each of three magazines in two magazine groups to 16% in a group called Woman Power Plus, made up of *Cosmopolitan*, *Good Housekeeping*, *Redbook*, *Country Living* and *Harper's Bazaar*. For the discounts, Hearst got upfront commitments of ad dollars, an exchange that seems to have worked.

Good Housekeeping turned 100 in 1985 while boosting ad revenues 6.8% to $142 million and producing two record-setting issues of 454 and 376 pages in May and December. *Cosmopolitan* marked Helen Gurley Brown's 20th year as editor with a special 480-page November issue with 305 pages of advertising.

Redbook ended the year with circulation up 3.2% to 4,129,000. Advertising grew 7.7% to $57.2 million, although did it on rate increases as ad pages declined 0.9% to 1,165.

Refocusing its position in the intensely competitive shelter-magazine category, Hearst's *House Beautiful* began calling itself "the magazine of home fashion." The magazine continues to lead the category in newsstand sales. Ad pages were off 14.6% to 973 in 1985 from 1984 and advertising revenue dropped 7.2% to $24.2 million.

Another notable publication loss occurred in the Hearst newspaper division when the company's 213-year-old *Baltimore News American*, one of the oldest newspapers in the U.S., published its last edition this May. Chronic financial losses and lack of advertising support were cited as reasons for the folding. Hearst, owner of the paper since 1923, had searched unsuccessfully for six months for a buyer before reaching a decision to fold the paper.

In Los Angeles, the departure of Mary Anne Dolan as editor of the *Herald Examiner*, one of a string of staff defections, was taken as a sign of further turmoil at the paper. Nevertheless, the paper posted its second consecutive half of minor circulation increases, which reversed a long-term slide. Morning circulation of the paper was up 3.3%, to 245,291, for the six-month period ended March 31, 1986, according to the Audit Bureau of Circulations. Circulation executives say another 3% rise in reader numbers will be reflected in Sept. 30 figures over those reported for the same period in 1985.

One step toward trimming Hearst's losses in Los Angeles was the sale of a substantial number of its Hearst Community Newspapers in Southern California to Cincinnati-based Scripps Howard. Hearst bought those papers in 1981 to help the ailing metropolitan paper attract advertising by offering discounts through combination buys with the local papers. The combined circulation, at its peak, was 723,000 for a one-day buy, about 470,000 of which came from the weeklies.

In San Francisco, Hearst's *Examiner* used a series of print and broadcast ads to convey the excitement at the paper since 37-year-old William Randolph Hearst III, grandson of the late W.R. Hearst, took over as publisher in October, 1984. In one of a series of new tv spots, filmed in the stark black and white style of "Citizen Kane," Mr. Hearst discusses changes at the paper with the ghost of his grandfather. The spots also highlight some of the new talent at the paper, including authors Hunter S. Thompson and Cyra McFadden.

Bye, bye bourbon

National Distillers no longer is going to dance with the party that "brung it." Founded as a liquor company in 1924, National Distillers has put its Liquor & Wine division on the block and plans to concentrate on chemicals and energy. The division's labels include DeKuyper cordials and liqueurs, Gilbey's gin, Kamchatka vodka, Windsor Supreme whisky, Old Grand-Dad bourbon and Almaden wines. The division accounts for virtually all National Distillers national advertising spending.

Ever more intense price competition, expansion of product lines by competitors and leveling of consumption continued to blow the head off brewing company profits, and G. Heileman, a second tier competitor, was hit harder than most.

In 1985, earnings continued a slide begun in 1984, dropping 5.5% and sales, which had posted a slight increase from 1983-1984, finally succumbed to the industry doldrums, slipping 1.2%—with little prospect for improvement in sight.

In the process, Heileman dropped from a 9.4 share of market to 9.1, ranking it fourth in the market behind Anheuser-Busch (38.1), Miller Brewing (20.8) and Stroh Brewery (13.1) in 1985, according to *Impact*, a Shanken Communications trade publication.

Late last year, however, Heileman responded to the slippage with a new marketing strategy that included an emphasis on regional marketing of its 30 separate beverage brands using regional advertising agencies and diversification and expansion of product lines, including several beer line extensions and expansion of its bakery and snack food lines.

So far in 1986, the strategy seems to be paying off. In the first six months, sales set a new record at $684.4 million.

Excluding revenues under a new production contract with Pabst Brewing Co., sales increased 3% over the same period last year as net income grew 14% to $27.3 million.

The key to the rebound, according to

There's no business like the mature market business!

25% of our readers own 3 television sets, 38% own a 35mm camera, and 54% own an electric food processor.

Heileman president Russell G. Cleary, was closer marketing attention to distributors and a greater regional marketing emphasis, taking advantage of the strong midwestern position of the flagship brand Old Style, which retained its No. 1 position in Chicago, and Rainier, which is positioned as the best seller in the Northwest. Old Style received more than $3.4 million in measured spending in 1985, down from $5.9 million in 1984, and Rainier got $1.9 million, up from $1.4 million, according to Leading National Advertisers, which tracks seven media.

Heileman played with the media mix by hiking the network tv ante to $7 million from $3.8 million in 1984 while dropped spot tv spending to $9 million from $11.2 million in 1984. Spending on a year-to-year basis in other media remained largely stable.

"Our philosophy is to be a full-service provider to our beer distributors," Mr. Cleary says, "and that means a strong commitment to products and marketing they can use." And while the company continues to look at new regions of the country for development, late 1985 and 1986 marketing focused on a "back to basics" marketing in traditional strongholds. Heileman also startled the industry by announcing plans for an automated brewery in Milwaukee, the beer city that other brewers have been slowly abandoning over the past several years.

Diversification became part of the marketing plan as Heileman placed new emphasis on less mainstream segments of the beverage industry, including its three low alcohol line extensions under the Old Style, Blatz and Black Label labels; four no-alcohol products, Kingsbury, Schmidt Select, Zing and Black Label No Alcohol, and its LaCroix mineral waters.

"The brewing is moving steadily into greater segmentation," Mr. Cleary says, "and we need to enter any segment that seems to have growth potential—low alcohol, no-alcohol and coolers, whatever."

Heileman followed that philosophy in 1984 with its Old Style Low Alcohol entry and was somewhat disappointed by the results, but in late 1985 and so far in 1986, the segment seems to be catching on and shipments are over 1 million bbls, Mr. Cleary says. "It started slow, plateaued and now it seems to be growing again," he remarks.

New products introduced in 1985 included Special Export Light and Dark, LaCroix sparkling coolers, Country Coolers, Black Label 11-11 malt liquor, Milwaukee 1851 regular and Light, Lone Star 150 Private Stock, Blatz Old Heidelburg Private Stock and two lines of German imports Hacker-Pschorr and Moravia.

Supporting these product entries, the company increased ad spending from $41 million to $55 million overall, increasing its emphasis on unmeasured spending. Included in the unmeasured spending was greater coop advertising and point-of-purchase spending accounting for about 20% of the total, according to Mr. Cleary. Measured spending in the 11 media monitored for this report actually dropped from $24.3 million in 1984 to $23.1 million in 1985.

Nearly all of the individual brands underwent some change in their marketing plans in the last 18 months, but the biggest single shake-up occurred with Old Style. Faced with the loss of its front-line agency Hal Riney & Partners to Anheuser-Busch in May, 1986, Heileman solicited four Chicago agencies to handle the $17 million in billings, finally settling on Young & Rubicam. Y&R's campaign, to be released this November, will again emphasize Old Style's Midwestern roots and artesian spring water, Cleary says. Y&R also handles Old Style's low-alcohol entry and Special Export, but the Henry Weinhard line moved to W.B. Doner, Baltimore, which also has the Blatz account. As part of the regionalization, however, Doner lost Lone Star to a San Antonio agency, Adkins & Associates.

Several of the regional brands, including the mineral waters and wine coolers were consolidated under Ruhr/Paragon, Minneapolis and Rainer stayed with Borders, Perrin & Norrander, Seattle.

The bakery division was corporate standout, growing 30% to $174 million in 1985 and Heileman expanded operations with the acquisition of New Process Baking Co., Chicago; Oswald Jaeger Baking Co. in Milwaukee and Willemar Cooker Co. with Johnson Nut Co. in Willemar, Minn. Mr. Cleary says that snack foods, especially nuts, were a natural expansion area for the company, since the products are distributed by the company's present network of regional beer distributors.

Hewlett-Packard Co. is curbing spending and hiring, initiating a program for employes to take time off without pay, and putting into effect in the fourth quarter of fiscal 1986 an early retirement and severance program as it battens down to weather out the economic slowdown besetting the company and its Silicon Valley neighbors.

As if the economic conditions weren't bad enough, the company has had to delay the introduction of its long-awaited HP3000 Series 930 computer from year-end 1986 until mid-1987.

The move, based on software operating problems, will mean a loss of $200 million in potential sales in 1987.

Advertising charted the same austerity course which began to take effect in late 1985.

The company reported to the SEC "advertising costs" of $148 million in 1985, down from $153 million in 1984. Those costs includes more than media and promotional spending tracked only in this report.

Measured spending for 11 media, increased, but only slightly, to $23.1 million in calendar 1985, from $22.4 million the previous year.

However, H-P made major shifts in its media mix, a reflection largely of new product support in 1984 that trickled to maintenance spending in 1985 and poor results in the advertised personal and business computer lines.

H-P sales for 1987 could be reduced by as much as $200 million based on the company's delay of six months in introducing the HP3000 Series 930 business minicomputer that uses the vaunted Spectrum technology, that reportedly will make the computer twice as powerful as existing minicomputers. The delay came because H-P was having difficulty fitting the operating system into the computer. The software controls the flow of data into and out of the computer.

The estimated sales reduction is based on the fact that two-thirds of H-P's $100 million in orders for new Spectrum-technology computers, is for the 930.

The Spectrum hardware, under five years of development at a cost of $250 million, is ready for market. In fact, it is installed in the Model 840, made for engineering and manufacturing functions, to be shipped in late 1986, and the 950, a more powerful machine than the 930, to be available in the second half of 1987. The 840, offered at a base price of $113,000 and a speed rating of 4.5 million instruction per second (mips), will enhance H-P's position in the engineering computer market against long-time rival, Digital Equipment Corp. The Series 930 and 950 represent H-P's attempt to compete with IBM in the crucial market for large computer systems sold to businesses.

H-P is not expected to experience a fall-off in orders from clients, tiring of waiting for the new 930, who might switch to hardware marketed by competitors. The cost for a system change is too expensive.

H-P in the first six months of its fiscal 1986 reported revenues of $1.63 billion, up 1% from the year-earlier period.

The year turned progressively worse domestically. Following a first quarter domestic orders increase of 10% from the previous year to $897 million, they dropped 6% to $894 million in the second quarter compared with the year-earlier period.

However, the international market kept H-P at least static over-all for the period. International orders increased 21% to $795 million in the first period and 12% to $736 million in the second over the comparable periods in fiscal 1985. Order growth was only 1% in fiscal 1985, compared with 29% in fiscal 1984.

Results only degenerated further in the third quarter, influencing poor nine-month figures ended July 31 of $359 million in net income, compared with $489 million a year ago, and sales of $5.17 billion, compared with $6.51 billion in the year-earlier period.

The fourth quarter ended Oct. 31, 1986, will reflect the impact of payments made to 1,515 employes entering the company's early retirement and severence plan.

The liberal plan offers retirement at 55 with full pension benefits. This is the first "layoff" at the company since it was founded in 1947.

The advertising media mix ebb and flow for the comparable years resulted in a shift toward magazines and network tv in 1985 away from newspapers and spot tv in 1984. Business press, always a strong medium at H-P, received $9.2 million, up from $7.7 million in 1984.

The shifts to network tv from spot tv was credited to $7 million in advertising backing general corporate promotion, including the entire $4.4 million spending in network tv reported for H-P.

The media shift also reflected a market strategy to push general corporate promotion instead of continuing to back specific computer series for personal or business use because both areas are experiencing flat sales.

The corporate campaign created by Leo Burnett, Chicago, bears a "we sell solutions" theme. General corporate promotion was only $1.9 million in 1984.

H-P, whose LNA total dropped from $19.1 million in 1984 to $13.6 million in 1985 for the seven LNA media, also spent $1.5 million in spot tv out of a total of $1.9 million for its personal computer system in 1984. The category received only $2,100 backing in 1985.

The business computer system faced a similar cut in ad spending to only $200,000 in 1985 from $3.1 million spent in 1984.

The company decreased magazine spending in 1985 as spending for the business-oriented 3000 computer system dropped from $3.4 million in 1984, all in magazines, to $82,100, all magazines in 1985.

Household International continued a move to refocus its business on consumer finance, manufacturing and travel industries with the divestiture last December of Household Merchandising Group which accounted for 61% of total 1985 revenues.

The $700 million sale, to an investor group led by one of the unit's executives, will significantly reduce Household's 1986 ad spending.

The largest advertising units within Household are National Car Rental System, Minneapolis, which spent $12.6 million on measured media in 1985, and Vons Supermarkets, Los Angeles, which spent $6 million on measured media and is one of the units divested. Over-all, the company spent an estimated $29.8 million in measured advertising, a 4.3% decline from the $31.1 million in 1984.

Spending-by-media comparisons with 1984 show the entire Household conglomerate cut magazine spending by more than half during 1985, while newspaper spending was up 48%. Network tv spending dropped 20%, while network cable and outdoor spending was up.

In the first quarter of 1986, Leading National Advertisers estimates Household spent $6.1 million in measured media, including $3.9 million from National Car Rental.

Excluding the Household Merchandising operations for both 1985 and 1984, the company earned net income of $210.9 million, a 10% decline, on net sales and revenues of $3.38 billion, up 16%. (U.S. sales were $3.02 billion, or 89.3% of the total).

Household's financial services units accounted for nearly half of those restated revenues; National Car and other transportation revenues were 24% of the total and manufacturing businesses represented 27%.

The merchandising unit, which the company reported as a discontinued operation in 1985, earned income of $43 million, a 13.3% drop, on net sales of $5.3 billion, down 1.8%.

In the first half of 1986, the restructured Household earned net income of $97.3 million, down 11.5%, on revenues of $1.87 billion, up 9.9%.

The Dec. 31 divestiture included Vons, a major California supermarket chain; TG&Y, a general merchandise "dime-store" chain; and two franchised store operations, Coast to Coast Hardware and Ben Franklin variety stores.

Together, the retailing operations last year made the group the nation's 11th largest retailer, with revenues of $5.3 billion. Roger Stangeland, Vons' ceo, led the $700 million buyout that included the FoxMeyer Corp., a Denver wholesaler, and Donaldson Lufkin Jenrette Securities Corp., New York.

Shortly before completion of Household Merchandising's sale, Rapid-American Corp., New York, bought the TG&Y operations for more than $300 million and consolidated the operation with its McCrory Corp. unit. Separately, FoxMeyer—a partner in the earlier sale—bought the Ben Franklin business for an unspecified sum.

Much of the retailers' advertising was ROP newspaper display ads, unmeasured by LNA. Vons increased measured spending 7%; TG&Y lowered measured spending 25%, to $618,000, and Coast to Coast spent $253,000, primarily on spot tv.

The company's corporate advertising account, awarded to BBDO, Chicago, in 1985, will remain dormant at least through mid-1987, a Household spokesman says. The $1.5 million to $2 million account resulted in an earlier campaign but no further corporate advertising is immediately planned.

The major expansion effort for Household in 1986 has been in the financial services sector, where the company has defined four key marketing areas: consumer finance, consumer banking, commercial financial services and insurance. The division earned $142.8 million in 1985, down 7%, on revenues of $1.7 billion, up 26%. The consumer segment accounted for $1 billion of those revenues, and were up 10%.

In April, Household began operating six consumer "family banks" in the Baltimore area, chartered as federal savings banks under the Household Banks banner. Household Financial Services president Edward Harshfield says he planned to expand the so-called "nonbank bank" in other states, where small clusters of outlets will serve personal banking needs without making commercial loans.

Household Bank and another HI-owned bank, Valley National Bank in California, now operate 50 locations in six states: California, Colorado, Illinois, Kansas, Maryland and Ohio. The Ohio, Colorado and Kansas banks were acquired during 1985. Tatham-Laird & Kudner, Chicago, won the initially small, $2 million Household Bank assignment from Needham Harper Worldwide (now DDB Needham Worldwide). Household Bank also is developing a proposed MasterCard that would be "co-branded" by National Car Rental System.

Household Finance Corp. (HFC), perhaps the most visible financial services unit nationally, spent $4.1 million on spot tv in markets where it operates consumer lending businesses. DDB Needham, Chicago, handles the division, which this year continued a rollout of its "Check Credit" program, enabling customers to use home equity as collateral on low-interest loans accessed through a special checking account."

Combined, Household's consumer finance divisions had 1,594 outlets at yearend, compared with 1,665 at yearend 1984.

Commercial finance revenues grew 39%, to $127.1 million, while income rose 58%, to $37.6 million. The Detroit-based Alexander Hamilton Life Insurance unit, which sells insurance products primarily through HFC and Household Banks, does no media advertising. The increasingly popular Universal Life product, which offers investment returns before death, accounted for 61% of the unit's life insurance policies, up from 56% in 1984.

National Car Rental System, based in Minneapolis, remained the third-largest car-rental firm nationally with a 21% share of airport rentals. (UAL's Hertz Corp. remains the largest carrenter, followed by Avis Rent a Car. Budget Rent a Car Corp. trails National.)

Responding to stagnant growth in the business-rental sector, National has continued to segment the leisure market, benefitting from increased domestic tourism because of terrorist threats abroad in 1985-86. "The business renters will continue to be important," says vp-advertising and marketing Joseph Sullivan, "but the dramatic growth is going to be in the leisure segment."

Using the ad theme, "You deserve National attention," developed by Campbell-Ewald Co., National has highlighted service quality; it also has targeted specific traveler segments with separate one-way, weekday and weekend rental rates. Various print and tv campaigns have concentrated on individual car models—mainly from General Motors Corp.—in a departure from previous years.

The National unit posted sharply lower net income of $15 million in 1985, down nearly 60%, on revenues of $810.4 million, up 16%. The company blamed the lowered earnings on intense intense industrywide pricing competition during 1985—which has since eased somewhat—as well as skyrocketing insurance costs. Strong new-car sales incentives, resulting in a weak used-car market, have prevented many in the car-rental industry from unloading older cars.

National reported 6.9 million reservations made for 1985, a 15.4% increase from a year earlier, and gained 4% more company-owned cars in its fleet, which now numbers 77,000. Worldwide, National's fleet numbers 164,000 vehicles rented or leased at 3,000 outlets in 113 countries. Affiliations with Tilden Rent-a-Car in Canada and Europcar in Europe, Africa and the Middle East are included in those totals. Additionally, National operates a car leasing and truck rental and leasing business under the Lend Lease brand.

Household Manufacturing, the third major business segment, earned $50.1 million in net income, up 52.3%, on sales of $899.8 million, a 0.2% gain. The division, under president Gary Dillon, operates several companies in five core areas: Power components, building products, tools, consumer products and specialty products.

Consumer products sales rose 21% in 1985 to $177.8 million, while income grew 139%, to $11.7 million. Principal products in this sector are Thermos Co., the Norwalk, Conn.-based marketer of plastic insulated products, and Structo, a maker of gas barbecue grills. Structo sales increased 53% last year, while unit sales have doubled since 1983. Thermos' new Coffee Butler product, introduced last year, has exceeded the company's sales expectations.

The specialty products sector includes Scotsman, makers of commercial and consumer ice-making machines; King-Seeley, which makes cooking appliance controls; and two other industrial products firms. Its income increased 6%, to $16.5 million, on slightly higher revenues of $143.6 million.

The tool segment includes GC Electronics (accessories for home entertainment equipment); Thorsen (hand tools); and Simonds (industrial cutting tools). Sales dropped 15%, to $113.5 million, while income declined 27%, to $2.4 million; the company blamed the decline on soft demand in the industrial tool market and to the divestiture of its Atrax/Newcarb unit in March, 1985.

Building products and power components businesses do little advertising. The building products sector includes well-known names such as Halsey Taylor (water coolers and drinking fountains) and U.S. Brass; other units make chimneys, gas vents and plumbing fixtures. Sales were up 2%, to $334.3 million, while income rose 66% to $19.7 million. Higher housing starts were a primary factor in the gains.

The power components sector, comprised of Gear Products and Schwitzer N.A. units, reported a 10% sales decline, to $130.6 million, and posted the company's only 1985 net loss—$200,000—compared with $7.2 million in 1984.

Imasco Ltd., represented in the U.S. largely by Hardee's restaurants and Peoples Drug Stores, continues into 1986 to build its operations through acquisition.

The $6.4 billion conglomerate, whose roots are in Canada's Imperial Tobacco Co., made one of the bigger corporate acquisitions of the year in the purchase in mid-April, 1986, of San Francisco-based Genstar Corp. whose interests are largely in Canada.

Since the $1.84 billion acquisition, Imasco has deconglomerated Genstar as it said it would do, to raise funds to lessen its own debt, although moves related to the piecemeal divestiture of Genstar brought Imasco into confrontation with the Canadian government. Within a month of the Genstar purchase, Imasco had pledges to sell off five Genstar units for $1.04 billion. Genstar largely was involved in building products and financial and real estate services.

B.A.T. Industries plc, the big British combine, in Canada owns Shoppers Drug Mart, UCS (United Cigar Stores) and manufactures and markets Imperial Tobacco brands that command 52.5% of the Canadian cigaret market and 90.5% of the cigar market. Its U.S. operation, Imasco USA Inc., Rocky Mount, N.C., is a multi-branded restaurant organization operating about 2,690 restaurants in 40 states: 2,664 Hardee's (883 company-owned units and 1,745 U.S. franchised) and 36 international franchised. There were 21 Burger Chef's at the end of the fiscal year, March 31, 1986, although some are converting to Hardee's.

Growth has marked the year for Peoples Drug Stores, Alexandria, Va. Peoples bought the 134-store Rea & Derrick chain in Pennsylvania in early 1985, and has converted 55 so far to Peoples. Peoples operates in 150 markets in 15 states of the Southeast, Middle Atlantic, and Midwest regions. Store brands include Peoples, Lane, Reed, Lee, Health Mart, Rea & Derrick, Bud's and Smiles. It opened in September, 1985, a new distribution center in Fredericksburg, Va.

Also during 1985, in a new corporate synergy five Peoples Drug Stores were converted to Hardee's in the Washington, D.C., metro area, an all the Florida stores of the Toronto-based Shoppers Drug Mart chain owned by Imasco were shifted to the Peoples chain.

In the Genstar purchase, Imasco had its eyes set only on Canada Trustco, that nation's largest trust company (similar to an American s&l) and its sixth largest financial institution. Imasco's stated intention in acquiring Genstar was to sell its units, except for Trustco, and use the expected net to repay corporate indebtedness.

But when when concerns were voiced about the possibility of Imasco using its acquisition as an "in-house bank," the House of Commons and Canada's minister of state for finance took up the matter. Imasco gave its pledge to refrain from any such inside operation and to refrain from acquiring any more financial organizations.

Imasco's advertising support for its U.S. units was up 20% in 1985, to $37.3 million from $31 million in 1984, according to Leading National Advertisers. Network tv spending, all for Hardee's, rose 27.7%, to $8.9 million in 1985 from 1984. Spot tv spending totaled $27.3 million, up 14.6% and apportioned about 88% to Hardee's and 12% to Peoples. At $33.6 million, Hardee's ad backing was 90% of the Imasco Ltd. total U.S. measured ad spending in 1985, compared with 85% of $26.5 million in 1984. The total Peoples Drug Stores budget of $3.3 million in 1985 was down 8%.

Hardees spending was heaviest, by far, for spot tv, up 26% in 1985 to $23.3 million. Similarly increased was network tv spending, up 28% to $8.9 million. Magazine spending for Hardee's also rose 28%, to $17,500.

Most of Peoples advertising spending went to spot tv, down 8.4% to $3.1 million in 1985.

Imasco announced in June, 1986, a significant change in company leadership, with the succession of Purdy Crawford, then president and chief operating officer, to the chief executive officership then held by Paul Pare. Mr. Pare, 64, who is anticipating retirement, remains as chairman. No successor was named for Mr. Purdy.

Its Long John Silver's Seafood Shoppes remain by far the nation's largest "fast fish" restaurant chain, and Jerrico Inc. is continuing to buttress the chain's leadership position through physical remodeling, menu additions and increased ad spending.

The 1,360-store chain, which had sales of $564.3 million in fiscal 1986, ended June 30, accounts for more than 60% of the fast food industry's estimated $1.1 billion fish category. Shoney's Captain D's chain and Skipper's, two regional chains, represent 25% and 7% of the market, respectively.

Although the restaurant industry has been sluggish, Jerrico has shown steady growth in recent years. Jerrico's performance, which in fiscal 1986 included growth in sales of 8.9%, compared with 4.4% for the prior year, and profit of $27.3 million, up 22.1%, has made Jerrico a persistent target of takeover speculation. Despite company-instituted "poison pill" measures, many analysts continue to believe the company soon will be swallowed by a conglomerate.

Its commanding market share in the seafood segment has made Jerrico a favorite on Wall Street, but Jerrico is reexamining all elements of operation with an eye to change under the tutelage of John Tobe, the former chief financial officer who took over as president in 1984.

The primary goal has been to increase average per-unit sales volumes at LJS stores. In fiscal 1986, that average for company operated stores was $515,000, a 7.3% increase over the 1985 average, but still far behind per-store averages for other fast food concepts. The average McDonald's, for example, had annual sales of $1.1 million during the same period.

A major building redesign program adopted in 1985 is intended to increase those per-store sales. In addition to presenting a more modern and appealing exterior, the new design's interior changes include additional seating and back-of-house changes that allow for faster food preparation and the ability to handle additional menu items. According to the company, units converted to the new design (at an average cost of $200,000 per store) had a 30% increase in sales.

The LJS menu, somewhat of a double-edged marketing sword, has been scrutinized. Consumer interest in fish as an alternative to red meat continues to increase, fanned by medical reports lauding fish's benefits, but until recently LJS fish products have been deep fried, and those same medical authorities have cautioned against consuming fried foods.

Citing the continuing popularity of french-fried potatoes, Jerrico execs believe fried fish will continue to be the most popular and it will continue to anchor the LJS menu. But the chain also has been exploring alternatives.

Kitchen-Breaded fish, introduced in 1985, replaces the heavy batter coating on its regular fish product with a lighter breading. Backed by a heavy introductory ad campaign, this product has gained a considerable share of sales. Catfish fillets, tested during 1985 and expanded throughout the system in 1986, are a lighter alternative.

This year, LJS has revamped its fish fillet sandwich, redubbed the "Fish Fish sandwich" to signal its inclusion of two Kitchen-Breaded fish fillets on a multigrain bun.

Baked and broiled fish entrees continue to be tested. These require additional preparation and cooking equipment and are expected to be rolled out through the system as physical plants are remodeled.

Cold fish and seafood salads under the "Chillers" name have been added to the LJS menu. The line includes a seafood salad, boiled-shrimp salad and Ocean Chef salad, which combines shrimp, crab meat and whitefish.

Given the concurrent rise in consumer demand for chicken, LJS also has expanded its chicken offerings. In April, 1985, it jumped on the chicken nugget bandwagon, removing its chicken Peg Legs product to make room. This year it has revamped its Chicken Plank product by using breast fillets.

Those menu changes have been the focus of LJS' advertising. The "Sounds good to me" theme introduced by creative agency Foote, Cone & Belding, Chicago, in 1985 continues.

The style of that advertising has not changed in the 18 months it has aired, but the ad budget has. Operators' advertising contributions were increased to 5% from 4.5% of sales in January, 1985, and that has led to increased tv ad spending.

Of the chain's $27.2 million in measured media spending, $26.3 million went to spot tv in 1985, a 34% increase over the $19.6 million spent in 1984. Spending continues to grow. During the first half of 1986, the chain purchased its first network tv time during the Lenten season. In addition to the network foray, LJS spent $12.9 million on spot tv during the first six months of 1986, up 21% from the year-earlier period.

In addition to Long John Silver's, Jerrico also operates the 60-unit Jerry's coffee-shop chain. Unlike LJS, Jerry's has encountered significant sales and growth problems, but Jerrico is committed to keeping and reviving the chain. As with LJS, the Jerry's decor and menu have been revamped. Ad expenditures, however, remain limited: The chain received only $350,000 in measured media support in 1985, according to Leading National Advertisers.

The company has high hopes for Florenz, a prototype northern Italian dinner house it opened in July, 1986, in Blue Ash, O., a Cincinnati suburb. The menu emphasizes light pasta dishes and grilled poultry and seafood. The 12,500-sq.-ft. building seats 260 in its dining room and 120 in its bar.

Jerrico for several years had sought an Italian chain. Plans call for additional Florenz units to open next year in Kentucky. Jerrico plans to develop the concept into a national chain. The popularity of Italian food is growing and no national, "branded" Italian restaurant chain has been established, the company says.

Kimberly-Clark Corp. spent less in measured media advertising in 1985 than in 1984, but paper industry analysts say K-C more than made up the difference in unmeasured promotional spending as the company continued its strong sales and earnings gains, primarily on the strength of its Huggies premium disposable diapers.

Diaper sales rose to 26% of total sales in 1985 from 21% in 1984 and 16% in 1983. Sales of household and other tissue-based products, while increasing in dollar amounts, declined to 29% of sales in 1985 from 30% in 1984 and 1983.

More than 80% of K-C's net sales increase during the three years through 1985 is because of volume growth from Huggies diapers. U.S. volume for feminine care products fell during the same three-year period but rose in 1985.

In the $2.8 billion U.S. disposable diaper market, K-C late in the year lost much of the market share it gained in 1984, as Cincinnati-based rival Procter & Gamble began introducing its new generation of diapers, Ultra Pampers, Blue Ribbon Pampers and Luvs Baby Pants.

In 1984, K-C's Huggies had a 32% share, rising to 34% in mid-1985, compared with P&G's 50%, split between Pampers and Luvs. However, by mid-1986, K-C's share dropped to 25% while P&G rose to 58.8%, with Pampers climbing to 39.5%, according to Sherman Chao, paper products analyst with Salomon Brothers, New York.

K-C's strong showing through the end of 1985 surprised industry analysts because the company had restricted Huggies' allocation to the retail trade for much of 1985's fourth quarter while retooling machines to handle Huggies Extra Absorbent Medium 40s, a thicker, extra-absorbent diaper with an elasticized waistband and legbands.

K-C began distributing the thicker diaper in mid-1985, positioning it for overnight use in advertising from Ogilvy & Mather, New York.

Much of the measured media spending on Huggies went to network tv, with magazine and spot tv support, according to Leading National Advertisers, which monitors seven media. Analysts say media spending would have been higher if K-C had been able to expand Huggies production capacity faster. For part of 1985, K-C put Huggies advertising on hold, as consumer demand exceeded production capabilities.

K-C made up for the lack of media advertising with several promotions, including one offering consumers a free Polaroid camera with 36 proof-of-purchase seals via a print campaign handled by Ogilvy & Mather.

K-C in August, 1986, finally responded to P&G's "thin" diaper challenge with the national introduction of Ultra Trim Huggies, a thinner Huggies with a narrower crotch, wider waistband and wider elastic legbands.

K-C also concentrated on carving new niches in the disposable diaper category, which is growing by 11% annually and is expected to reach $5 billion by 1990. K-C in July, 1986, introduced extra-large Huggies, meant for toddlers weighing 33 lbs. and more who are not toilet trained. K-C also is testing disposable baby bibs and is said to be testing thin, diaper-like disposable training pants.

Meanwhile, P&G carried its diaper supremacy battle with K-C into federal court, alleging that K-C infringed on a patent for elasticized waistbands. The lawsuit is pending in Dallas.

"Kimberly is looking at its diaper business as one that's experiencing very fast growth. Because of that growth, there are opportunities for new, niched diaper products like the extra large Huggies and the training pants," Mr. Chao says.

For feminine hygiene products, K-C dropped its measured media spending for New Freedom to $3.1 million, down 81.9% from $17.1 million in 1984. At the same time, support for the Kotex value-priced line dropped 53.1%, to $3.1 million, during the same period.

During 1985, K-C continued facing intense competition from P&G and Johnson & Johnson, which spent heavily in the $1.5 billion category. P&G spent an estimated $100 million to introduce its Always line, while J&J (Assure, Carefree, OB tampons, Stayfree pads, Sure & Natural) is believed to have spent more than $50 million defending its leadership position in the category.

"K-C apparently made a management decision not to compete dollar for dollar with J&J and P&G," says Jay Freedman, household products analyst with Kidder Peabody & Co., New York. Now that P&G has ended its introductory cycle for Always, analysts expect advertising levels to drop.

K-C's New Freedom and Kotex hold 25% of the category; J&J's Sure & Natural, Assure & Natural and Stayfree lines have 45%; P&G has 13% to 16% for Always, and Lake Success, N.Y.-based Tambrand's Maxi-Thins, 11%.

Ad spending measured for K-C's Kleenex facial tissues totaled $15 million, up 41.5% from 1984. Kleenex Softique tissues continued to receive the most measured media spending, $7.7 million, up 54% from 1984. "Runny Nose," an animated character introduced in 1984 via Foote, Cone & Belding, Chicago, continued his quest during 1985 for a softer tissue. K-C execs trademarked the Runny Nose theme, "For softness that's right on the nose."

K-C also began airing new creative for its trademark Kleenex brand tissues, the first since the estimated $6 million account returned in 1983 to FCB.

In mid-1985, K-C withdrew Avert virucidal tissues, which were in two upstate New York test markets for 10 months. K-C supported the test with $169,000 in measured media spending. The three-layer tissue was treated with citric acid, sorbic acid and sodium lauryl sulfate, a formulation K-C says kills many common cold and flu viruses. K-C says the tissues were withdrawn for further research and development, and the company is expected to eventually reintroduce the

tissue.

With all its Kleenex brand tissues, K-C controls 45% to 50% of the $1 billion facial tissue category. Philadelphia-based Scott Paper Co.'s Scotties is the No. 2 brand, while P&G's Puffs is No. 3.

K-C's economy-priced and little advertised Hi Dri paper towels and Kleenex brand towels together hold an estimated 7.3% of the $1.3 billion U.S. paper towel market. Scott's four brands—Job Squad, ScotTowels, Viva and Waldorf—command a 23.1% share; P&G's Bounty, 18.8%, and James River Corp., Richmond, Va., marketer of Brawny and Northern, has a 9.7% share.

In February, 1985, in Denver, K-C began testing Clout, a heavy-duty paper cloth. A print and tv campaign, themed "For heavy-duty cleanups, now you've got Clout," was handled by Campbell-Mithun, Minneapolis. Clout received $190,500 in measured media spending. K-C withdrew Clout from the test in early 1986.

Measured media support for K-C's Depend line of incontinence products fell 17%, to $4.8 million, all spent on spot, network and cable tv.

Competition comes mainly from P&G's Attends line of shields and briefs. When introduced, P&G concentrated on winning the institutional incontinence market, but recently has moved into the general consumer market. K-C, which already positioned Depend for the general market, began running a tv, print and radio campaign in August, 1985, featuring movie star June Allyson as spokeswoman. The campaign, themed "Get back into life with Depend," is handled by Campbell-Mithun, Minneapolis. Depend holds a 13% share of the estimated $300 million ambulatory incontinence category, to P&G's 55% share, according to paper industry analysts.

K-C spent an additional $305,500 on network and spot tv for unspecified paper product advertising, although sources say the spending went toward Huggies.

K-C's fledgling business class airline, Midwest Express, began nonstop services from Milwaukee to Atlanta and added service from Milwaukee to Washington in 1985's fourth quarter. The airline continued growing despite a setback in the third-quarter when one of its three planes crashed Sept. 6 in Milwaukee, killing all 31 people aboard.

The airline reported carrying 65,111 passengers through June, 1986. Sports commentator Al McGuire promoted the airline in 60-second spots airing primarily in Wisconsin markets. Mr. McGuire, former Marquette University basketball coach, was chosen as spokesman because of "his Milwaukee ties and all the business traveling he does," says William Krueger, spokesman for the airline.

In March, 1985, K-C moved its world headquarters to Irving, Tex., one of the communities between Dallas and Fort Worth, from Neenah, Wis., although the company's marketing divisions remain in Neenah. K-C says about 50 employes transferred to Irving, including the office of the chairman and senior corporate, financial and legal administration executives.

In February, 1986, K-C announced that its three vice-chairmen—Robert C. Ernest, 62, senior officer at the company's Neenah headquarters; Marvin F. Gade, senior officer at the Roswell, Ga., headquarters, and Donald R. Hibbert, 60, chief financial officer—will retire Jan. 1, 1987, but remain as consultants to the company until 1988. The three execs along with company chairman Darwin Smith make up the company's new office of the chairman. It is not clear who will be named to fill the vacant positions, although exec vps Peter Larson and Dick Sonnentag are believed to have the inside track.

Also, K-C named Brendan M. O'Neill a senior vp. He had been vp-finance at Northwest Industries. O. George Everback was named to the new position of senior vp-general counsel, from vp-secretary and general counsel. Donald M. Crook succeeds Mr. Everback as secretary and also was named a vp, from chief counsel-corporate affairs. W. Anthony Gamcon, formerly assistant treasurer, was named vp-treasurer, succeeding Mr. Hibbert.

Convenience	404	311	29.9

Kroger Co., the second largest U.S. food and drug retailer after Safeway Stores, is pulling virtually every stop to continue its healthy growth performance of 1985, including the acquisition of drug, grocery membership warehouse and convenience store units and expansion of Kroger units throughout the country.

In 1985, 91% of Kroger's total sales were from food stores, 7% from drugstores. Total sales of $17.1 billion were up 7.5% from 1984, and two of those percentage point increases were credited to 1985 acquisitions. For the first half of 1986, sales were up 8%, to $8.4 billion from $7.8 billion in the corresponding period in 1985, and net income was 7% higher, rising to $83.8 million.

Kroger leads in the number of grocery outlets in the continental 48 states, with 1,367 supermarkets, although Safeway has more grocery outlets in all 50 states. The total, however, is changing as the company carries on an intensive program of acquisitions, closings and new store construction. At the end of 1985, there were 643 convenience stores and 872 drugstores in addition to 1,367 supermarkets.

Kroger spent more than $31.2 million for national advertising in 1985, according to the 11 media monitored for this issue. Local advertising from its vast outlets, which is not included in total advertising for this issue, ran $197 million in 1985, according to the company. Much of this was for couponing and point-of-purchase displays. That compares with $24 million in national measured media in 1984 and local ad contribution of an additional $152.8 million.

Sale of meat has been a top priority at Kroger ever since 1904-05 when the company became the first grocery chain to install meat departments. Today meat is the first theme of Kroger's major advertising.

Kroger has an umbrella theme for its marketing program, the "Meat Excellence," which began in early 1986 and focuses on the consumer benefits of buying meat at Kroger. The program is two-pronged. It announces that Kroger leads the country in trimming all red meats to ¼-in. of fat, and states that all Kroger meat is guaranteed with double-your-money-back if not completely satisfied.

Kroger also is advertising its private label brands. The labels are being promoted almost entirely on tv via 30-second spots that run in one or two-week flights. Campbell-Mithun is the agency.

Spot tv took 86.3% of Kroger's 1985 ad spending, or $26.9 million, compared with 98.2%, or $23.7 million, in 1984. Spot radio exploded to $3.5 million in 1985 from just $11,000 in 1984. Outdoor advertising expanded to $737,000 in 1985 from $259,000 the preceding year. Magazine spending grew tenfold, to $61,000 in 1985.

Acquisitions in 1985 caused some of the increase in advertising outlays, particularly Hook Drugs, which received $1.04 million, all of it in spot tv. But the biggest part of the increase was nearly $5 million more for Kroger Food Stores. The 1985 Kroger total, $25 million, was up 21% from $20.7 million in 1984. Of that 1985 total, $24.4 million went for spot tv, just $8,300 went for network; the total for magazines was up about tenfold to $56,100, and outdoor spending for Kroger Food Stores more than doubled, going to $532,800 from $222,100 a year earlier.

In other categories, spending for Fry's Food Stores in the southwestern U.S., part of the Dillon Stores group, moved up 18.5%, to $459,100, in 1985, all for spot tv; spending for the Dillon-labeled food store chain dropped sharply to $92,400 from $647,100 in 1984, also all spot tv, and SupeRx Drug Stores backing increased 13.5%, to $962,000.

Acquisitions are an important tactic in Kroger's general competitive strategy, and in 1985 the company added substantially to its forces, spending $268.4 million for three major additions.

On May 28, 1985, Kroger merged the 328-store Hook Drug chain into a subsidiary, paying $161 million for the company. Hook has stores in Indiana, Illinois, Ohio and Kentucky, and its acquisition, in combination with the company's 544 SupeRx drugstores, makes Kroger the fifth largest drug chain in the U.S.

Kroger, on Aug. 4, 1985, entered a new grocery area, the $4.1 billion membership warehouse business, when it acquired the five 100,000-sq.-ft. warehouse stores of Price Savers Wholesale, Salt Lake City. The stores are in the western states and Alaska.

The Kroger subsidiary, Dillon Cos., acquired the convenience store operations Aug. 19, 1985, of Farmland Industries, Lancaster, Pa. Included in the purchase were 170 Turkey Hill Minit Market convenience stores and the Turkey Hill Dairy, Conestoga, Pa.

On Dec. 16, 1985, Kroger bought the 11-store supermarket chain operated by M&M Super Markets in the Savannah, Ga., area.

Through a corporate asset redeployment program, Kroger is putting its assets where the best money is. It also is selling poorly performing stores. In 1985, Kroger opened and acquired 68 supermarkets, 331 drugstores and 220 convenience stores; closed 63 supermarkets, 33 drugstores and 20 convenience stores, and remodeled 125 supermarkets and 45 drugstores.

During 1986, Kroger is spending $350 million to build 55 food stores, 41 drugstores, 10 convalescent aid centers (an adjunct to its drugstore business), and 45 convenience stores plus remodeling 114 supermarkets and 42 drugstores.

Kroger is seeking to be as flexible as possible in responding to market trends and conditions. Its purchase of

Price Savers puts it in the growing grocery membership market segment, and its link with the third biggest U.S. grocery wholesaler, Wetterau Co., St. Louis, enables Kroger to remain in the highly competitive Michigan retail food market. With the big wholesaler, Kroger formed a new entity, Foodland Distributors, to supply food and other merchandise to independent stores, Kroger supermarkets and other chains in Michigan.

Kroger, besides operating in the Midwest, South and Southwest, has many Kroger-owned regional chains: M&M Super Markets in Southern Georgia; Sav-More in Arkansas, Missouri and Oklahoma; SupeRx Food & Drug stores in Florida; Price Savers membership warehouses in Utah, Washington, and Alaska, and the large group of Dillon Cos. stores—Dillon Food Stores in Kansas, Missouri, Arkansas and Oklahoma; King Soopers in Colorado; Fry's Food Stores in Northern California and Arizona; City Market in Western Colorado, and Gerbes Supermarkets in Missouri.

Kroger's drugstore group includes SupeRx Drug Stores in the Midwest, Hook's Drug Stores in Indiana, Ohio, Kentucky, Illinois and Michigan, and Hook Convalescent Aid Centers in Indiana, Illinois, Tennessee, Kentucky and Ohio. In late 1986, it reported it was selling 54 food stores in the St. Louis area as well as its distribution center, despite capital investments of nearly $25 million in the stores the past five years.

The convenience store group consists of Time Saver in Louisiana; Quik Stop Markets in Northern California; Kwik Shop in Kansas, Nebraska and Iowa; Tom Thumb Food stores in Florida and Alabama, and Turkey Hill Mini Markets in Pennsylvania.

Competitiveness in the market also has led to incorporating bookstores, branch banks, dental offices, insurance agents, eyewear shops and restaurants in Kroger units.

But heavy competition and high wage levels have forced Kroger to exit Chicago, Cleveland and Detroit. It has waged heavy competitive battles in Minneapolis, Kansas City, Atlanta, Nashville and Washington. In Memphis and Indianapolis it fought hard and won its place in the market. The company has a reputation as a hard negotiator with unions, and in Michigan, it closed 40 stores until the United Food & Commercial Workers local made concessions.

Joseph A. Pichler, president-chief executive officer of Kroger's Dillon Cos., was elected exec vp of Kroger in July, 1985, while continuing his responsibilities at Dillon. In March, 1985, Kroger moved to block any attempted hostile takeover attempt by instituting a warrant dividend plan for protection of its shareholders.

U.S.	**1986**	**1984**	**% chg**
Sales	750	625	20.0
Advertising	63	56	11.4

As baby boomers turn 40, New York-based Estee Lauder Inc. turned its attention to the care of mature complexions, introducing skincare formulas for middle-aged woman, skincare for men and sunblock products in 1985, all with strong ad support.

Estee Lauder, however, continued to save its biggest ad outlays for fragrances, multiproduct promotions and Estee Lauder Night Repair lotion.

Estee Lauder generated about $400 million in sales from its Estee Lauder, Clinique and Prescriptives skincare lines based on its leading 35% share of facial skincare sales in department stores. Department stores represent about 59% of the $1.9 billion sales in the category, according to Allan Mottus, a leading cosmetics industry analyst and president of Mottus & Associates, New York.

Estee Lauder, which is growing about 20% a year in sales, holds an 11.7% share of the $5.5 billion U.S. beauty products business and 35% of department store sales, the only outlet for Estee products. Mr. Mottus pegs privately held Estee Lauder's worldwide sales at $1.25 billion, with U.S. sales accounting for about $750 million, or 60% of the company's business. Among competitors, only Avon is believed to have generated more sales in the U.S. than Estee Lauder, whose pre-tax earnings are estimated at $200 million, according to Mr. Mottus.

Estee Lauder Night Repair lotion received nearly $5 million in ad support in 1985, down from $5.9 million in 1984. The product also was featured in much of the company's $6.9 million spot tv buys for multiproduct advertising. Estee Lauder spent $1.3 million, mostly in magazines, promoting its facial lotions last year.

In 1985, Estee Lauder literally changed its face. Ford agency model Karen Graham, the woman who appeared exclusively in Estee Lauder ads for 14 years, now shares billing with 20-year-old Willow Bay, another Ford model who "conveys the American sense of classic beauty," the company says.

In other developments, the company spent several months in 1985 negotiating to buy the $110 million fragrance division of Giorgio, but failed to come to terms. Also, the company inadvertently got some attention at the end of 1985 when two books on company founder and namesake Estee Lauder—one an autobiography, the other an unauthorized biography—hit bookstore shelves.

Estee Lauder's Clinique subsidiary, with sales of $200 million, according to the company, spent $8.3 million on advertising in 1985, all in print. Skin supplies for men received $955,900 in ad support, compared with $215,000 for new in-house competitor Estee Lauder skincare products for men. In 1985, Clinique introduced several male-targeted products: Hair Trainer cream rinse, Therapy shampoo and Antidandruff Control, and a stick antiperspirant. In addition, Body Scrub was added to the Skin Supplies for Men line and Anti-Acne Control Formula was added in 1986.

Clinique Advanced Cream, geared to middle-aged women, was launched in 1985 with $194,000 in print ads. In addition, the company introduced Eye-Zone sunblock; Touch-base for eyes, an eye shadow line; the Perfect Nude Mouth, a package of two lip pencils and two lip glosses; After-sun Balm with Aloe, and Be Brilliant, a new line of nail colors. The company spent $718,200 advertising Clinique eye makeups in 1985, up 49%.

In 1986, Clinique continued its emphasis on tanning and sunblock products by introducing Pre-Tan Enhancer, Face-Zone sunblock and Suntan Polisher. The company has added an alcohol-free clarifier to its skincare line to complement Advanced Cream. Other recent introductions include Rinse-Off eye makeup solvent.

Estee Lauder's Aramis division spent $5.9 million in advertising last year, up slightly from 1984. Aramis fragrances and toiletries received the bulk of that budget with $3.5 million in spot tv. The company introduced the Aramis 900 herbal cologne spray in 3.25-oz. size last April, along with the Aramis 900 Traveling Team combo with small sizes of herbal cologne, aftershave, deodorant and shave cream. Aramis 900 got $1.2 million in ad support last year, up from $300,000.

In September, 1985, Aramis spent $134,300 in print ads to launch a new fragrance for men, Tuscany. The line includes eau de toilette, Brisk Body Splash, an aftershave as well as several gift packages such as a travertine shaving set and leather-boxed combos.

This year, Aramis already has introduced a full line of tan-care products to add to the estimated $270 million suntan product market. The Aramis Sun Series line includes Pre-Tan Activator, Deep Bronzing oil, three levels of sunscreen, scalp protector, lip protector and a post-tan maintenance product. WETPLEXX hair styling glaze is expected to debut this fall.

Despite numerous line extensions and new product introductions, last year Estee Lauder spent most of its ad dollars on fragrances. The company introduced Beautiful in the fall of 1985 with $3.9 million in advertising. Spot tv accounted for $2.4 million of that budget; magazines and newspaper supplements filled out the buy.

Support for White Linen dropped slightly from $5 million in 1984, although it continued to be one of Estee Lauder's most advertised products with $4.6 million in spot tv and magazine advertising. Private Collection perfume got $557,300 in print support, down 36% from 1984, when spot tv was included in the mix.

Lucky Stores Inc., which completed a long-term restructuring program in 1985 by disposing of 550 unprofitable stores and the closure of two distribution food centers, is divesting its entire Gemco division in late 1986 and buying back stock in an attempt to ward off a bid to take over the company by New York investor Asher B. Edelman.

Lucky's restructuring—prior to the Edelman offer—involved mostly unprofitable stores in the Chicago, Houston and Seattle markets. The two food distribution centers that were closed served those markets in Westville, Ind., and Houston. Lucky built or acquired 520 new stores in the same period, in its target growth areas of Arizona, Florida, California and Nevada. Lucky is the nation's fourth largest food retailer in sales behind Safeway, Kroger and American Stores in that order.

The company's advertising budget during the period of readjustment grew to $90.1 million in over-all advertising in 1985, up 22% from $73.6 million in 1984. That included measured spending of $24.8 million in 1985, up from $23.1 million in 1984. Major medium for both years was spot tv, claiming $20 million of the total in 1985 and $20.2 million in 1984. That places the unmeasured media spending, mostly local newspaper advertising for Lucky's 1,465 food and specialty stores, at $65.3 million, up 29% from 1984. Ad Age just monitors national media spending for this issue so its total ad spending figure is less than Lucky's ad budget.

Lucky continues to push its Five Star Meats ad program chainwide with spot radio and tv, with a new emphasis on product quality and service rather than only low prices, as in the past.

In Southern California, where Lucky Stores moved from third place to first in market share earlier this year, the company is likely to be facing some new competition from The Giant, a new concept being introduced by Federated Department Stores' Ralph's chain.

Lucky's first half of its current fiscal year has been a disappointment for the company. While its food stores turned in flat results and its specialty stores inched forward, these results were overshadowed by the lackluster results from its Gemco membership department store division.

The company's 80 Gemco stores, located in California, Nevada and Arizona, posted two consecutive quarterly losses. For the first six months ended in August, Gemco recorded pretax losses of $28.1 million, compared to a pretax income of $6.5 million in the comparable period a year earlier.

The company attributed the Gemco losses to two factors: A major (and expensive) remodelling effort and two marketing programs that fell short of the mark. Lucky began its remodelling effort in late 1985 in an effort to bring the stores up to date. The remodel tended both to disorient customers and detract from the employes' ability to offer service. Meanwhile, despite heavy promotional spending around Easter, sales failed to meet projections. An experiment with marriage mail in Southern California and newspaper inserts in Northern California proved expensive and unproductive.

The impact on the company's overall bottom line from the lack of profits from Gemco encouraged the takeover bid from Mr. Edelman, despite a stockholder purchase-rights plan, or "poison pill," adopted by the company one month before the bid. Gemco also has been hurt by strikes for two years running.

Lucky rejected Mr. Edelman's offer of $35 a share, in early October, opting instead to announce the closure a few days later of its Gemco discount store operation and the sale of 54 of the 80 units to Minneapolis-based Dayton Hudson for $374 million, which will convert the locations into Target stores. A buyer had not surfaced by mid-October for the remaining 26 units, which could bring the total sale of the division to $700 million.

The board at the time it rejected the Edelman offer said it was looking at options to enhance shareholder value in the near term. The sale of the unprofitable Gemco unit would do that. The company may also shed three more specialty units. A day after the announced sale, Lucky said it would buy up to 11.25 million, or about 22% of its common shares for $40 each in a two-phased tender valued at $450 million. Mr. Edelman responded by raising his bid from $35 a share, for a total of $1.79 billion, to $37 a share, or $1.88 billion, and threatened a cash tender offer or a proxy contest if rebuffed further.

Two-thirds of Lucky's revenues come from its supermarkets, about 580 stores under the Lucky, Eagle, Kash N' Karry and Food Basket banners. These low-margin operations improved their profitability in the first half of this year, particularly in the second quarter, but investors still believe the value of the food stores is in the real estate. For the first six months of this fiscal year, the food stores saw a slight 0.5% decline in sales to $3.1 billion with an 18.7% gain in pretax earnings to $64.2 million.

In 1985, the supermarkets attracted $13 million in measured national media in 1985, up 8% from $11.9 million in 1984.

Lucky's specialty retail operations—which may be the next operation to be sold to ward off Mr. Edelman—includes small department stores, automotive stores and fabric stores. The group showed modest gains, but remain the most profitable segment in terms of profit margins. Lucky's properties include: 376 automotive stores under the Kragen and Checker names; 320 fabric stores under the Hancock, Minnesota Fabrics and Fabric Warehouse names; and 1,224 Yellow Front general stores. Representing just over 8% of Lucky's total sales, the specialty operation contributed about 42% of the company's total pretax profit for the first six months of this year.

Measured media spending for automotive stores increased 13% to $2.9 million over 1984. Fabric stores attracted $393,000 in measured spending, up 11%.

A number of ad agency changes occurred in 1985. The Phoenix-based auto division switched its account to Shelly Berman Communicators, Columbus, O., from Bernstein-Rein Advertising, Kansas City, Mo. Buena Park, Cal.-based Gemco named DYR, Los Angeles, as its first agency, to work with in-house agency LuGem Advertising. The Southern California food division, based in Buena Park, moved its account from in-house to Cochrane Chase, Livingston & Co., Newport Beach, Cal.

Restaurants	757	820	(7.7)

Marriott Corp. built on its strength in lodging, foodservice, restaurants, lifecare retirement and related business in 1985 and 1986 with key acquisitions of leading marketers including Saga Corp. and Howard Johnson Co.

That acquisition activity is showing up in returns at Marriott which through the first nine months of 1986 had sales of $3.42 billion, up 20.1%, and net income of $135.5 million, up 17.2%—figures of which included only about two months of the Saga foodservice results.

In the process of expanding its business lines in 1985, Marriott boosted its measured media advertising 27% over 1984. Most ad expenditures went for two restaurant chains, Bob's Big Boy and Roy Rogers Family Restaurants. Roy Rogers received $8.3 million, down from $8.4 million in 1984, and Bob's Big Boy got $4.1 million, up 5.1%. Virtually all advertising for the two chains was in spot tv.

Restaurant operations, which include Big Boy, Roy Rogers and Hot Shoppes cafeterias and service restaurants, accounted for 18% of Marriott's total sales in 1985. The division underwent substantial transitions in 1985, including the gain of 350 company-operated Howard Johnson Co. restaurants when it acquired in November, 1985, the company from Britain's Imperial Group.

When converted, the restaurants will permit expansion of Big Boy highway restaurants in the East, where Big Boy has lacked a major presence, Marriott says.

The Howard Johnson name was changed to Marriott Family Restaurants, which retained 350 company-operated restaurants, 60 highway units and related service operations.

The purchase price for Howard Johnson was $531 million, including assumed liabilities of about $222 million. All Howard Johnson hotels, lodges and motor lodges and restaurant franchise systems were sold for $235 million to Prime Motor Inns soon after the acquisition.

Already 25 of Howard Johnson conversions have been made, with plans calling for more than 200 conversions to Big Boy concepts over three years. The units will continue to operate under the Howard Johnson name until converted to Big Boy or sold.

In 1985, Earle Palmer Brown Cos., Bethesda, Md., ran a successful campaign that asked customers to vote on whether Big Boy should remain the chain's symbol. Sales got a 10% boost during the campaign. But 1986 saw a more serious approach. A $10 million tv and newspaper campaign went with the theme "Nobody takes care of you like Big Boy," focusing on the food and service consumers can expect at Big Boy. The unified campaign approach was meant to give presence to a larger Big Boy franchise with the addition of new Howard Johnson units.

Roy Rogers made an agency move in 1985 from Smith Burke & Azzam, consolidating with the rest of Marriott's restaurants at Earle Palmer Brown.

Marriott also acquired the outstanding common stock of Service Systems Corp. and Gladieux Corp., diversified food service companies, for $66.2 million. The acquisitions nearly tripled Marriott's foodservice management operations.

Marriott gained control of Saga Corp. this fall in a tender offer worth $502 million. Saga, a foodservice and restaurant concern, helped make Marriott the No. 1 provider of foodservices in the nation. Shortly after, the company divested the Saga restaurants.

Saga's chairman and chief executive officer, Charles A. Lynch, resigned at the beginning of the summer. Saga's present management continues to run the unit but reports to Francis W. Cash, a Marriott exec vp at the company's Bethesda headquarters.

The sale of Marriott's dinner house and Mexican restaurant businesses for about $104 million was completed in 1985. The operations did not fit in with Marriott's long-term strategy of concentrating on fast food and family restaurant segments. The Essex House Hotel in New York also was divested for $170.5 million, along with three additional hotels.

Lodging, the largest line of Marriott's business in 1985, accounted for 45% of sales, up 16% from 1984, and 49% of operating income. In February, 1986, Marriott returned to network tv for the first time in almost 30 years with a three-week campaign touting weekend discounts via Lewis, Gilman & Keynett. Ad spending on hotels ran $2.4 million in 1985, down 22.6%.

The lodging business includes Marriott Hotels, Courtyard (a new moderate priced lodging operation), Resorts and Sun Line cruise ships and related business developments (lifecare and retirement communities). Marriott in September bowed out of direct ownership of Courtyard, although it will continue to operate the units under contract. The company created Marriott Limited Partnership by selling 1,150 units at $100,000 each, a sale substantially oversubscribed. The limited partnership covers the 50 Courtyards that are either open or slated to be open through 1987. Marriott has identified 125 sites for Courtyards and expects the number of hotels to grow to 300 by the early 1990s.

The largest operator of hotel rooms in the U.S., Marriott added more than 7,400 rooms in 1985. The company continued to broaden its product range with the expansion of Courtyard and groundbreaking for its first all-suite hotel.

In April, 1985, Marriott announced plans to operate 12 Marriott Suites by early 1988. Construction for the first Marriott Suites hotel, designed for business travelers seeking extra space and comfort, began in Atlanta in 1985. Marriott also expects 40 Courtyard hotels to open by early 1987 and more than 300 by the early 1990s.

Active, older people are the target for Marriott's Retirement Inns, which offer senior citizen apartments and healthcare facilities for an investment of up to $100,000 to enter the community.

The less visible operations of Marriott's airport operations and airline catering division represented 37% of the company's total sales, up 48% for 1985.

Jeffrey Martin Inc.

Union, N.J.

($ in millions)

Worldwide	1985	1984	% chg
Sales	68	56	12.0
Net income	4	6	(29.4)
U.S. advertising	37	40	(7.6)

Jeffrey Martin Inc., which is seeking a buyer for the company, began 1985 with an intense advertising blitz for its oral care and personal products, but by 1986 it had dropped all advertising for one brand and had four major brands unassigned to ad agencies.

Jeffrey Martin, known for revitalizing brands dropped by other marketers, hired its first ad agency of record—D'Arcy Masius Benton & Bowles—in February, 1985, for its Compoz, Ayds and Porcelana brands, billing an estimated $8.2 million.

Saatchi & Saatchi Compton was signed on as the second agency of record in September, 1985, for Topol smoker's tooth polish, for which Jeffrey Martin spent $10.1 million in measured media in 1985. Previous advertising had been handled by its in-house agency, Dunnan & Jeffrey, which still handles media buying.

The company, which says it spent $37.4 million on advertising and distribution in 1985, a 21.6% increase from the previous year, had a gain of 12% in sales but a 29% drop in net income for the fiscal year ended July 31, 1985.

In the first nine months of its 1986 fiscal year, sales have fallen 18.5%, to $40.6 million, and earnings have taken a dive from $3.9 million to a net loss of $234,000.

Most of the losses in the period were attributed to declines in sales of Topol tooth polish, affected by the large number of new product entries from major toothpaste marketers, and Ayds appetite suppressant, a nonfiber product in a market being stimulated by the fiber sector.

In early 1986, the company parted with DMB&B and in October the brands were still unassigned. Only Topol and Lavoris remain active accounts, both at Saatchi & Saatchi.

In June, 1986, the company contacted Morgan Stanley & Co. to seek a buyer for all or part of the company, but to date no buyer has been found.

Jeffrey Martin faced the sharpest competition in its oral care division, where its Topol tooth polish, despite a decline in sales during the year, eked out a 4% share of the dentrifice category. In that category, it is pitted against Procter & Gamble's Crest and Colgate-Palmolive's Colgate, as well as Carter-Wallace's Pearl Drops tooth polish. Jeffrey Martin's Lavoris, acquired in 1984 from Richardson-Vicks (now owned by P&G) where it received virtually no advertising support, was infused with $7.4 million in measured spending during the year, and dollar sales increased nearly 50% in 1985.

In February, 1985, the company successfully defended its copyright of the Topol name against Markland Laboratories, which was restrained by court order from marketing Topal Smoker's Shampoo Plus under that name.

Lavoris, battling with market leaders P&G's Scope and Warner-Lambert's Listerine, carved out a 2.5% share in the $400 million mouthwash category. During the year, Jeffrey Martin rolled national with Topol smoker's mouthwash, which in August broke a campaign via Sudler & Hennessey Consumer Group. Although the company spent $2.5 million on Topol mouthwash in 1985, according to Leading National Advertisers, in 1986 it succumbed to competition and no longer is advertised.

The company established an oral care product group in December, 1985, naming Eugene Marotta, former marketing manager-oral hygiene at Lever Bros., New York, to vp-marketing for the group. In the personal care product sector, Patrick Dwyer was named vp-marketing, from vp-marketing and advertising. Sidney Lawrence senior vp-advertising and marketing with overall responsibility for both product groups, left in 1986 and his post was discontinued.

Also, Charles Rhyne, former vp-Latin America for Beecham Group's Western Hemisphere international division, took the new post of vp-international operations and corporate development for the parent company.

In the personal products sector, the company acquired the Canadian trademark rights to Doan's Pills from G.T. Fulford & Co. Ltd., Toronto. A Food & Drug Administration policy on pain relievers that supported claims for over-all relief rather than for a specific body part, such as the back, was limited to product labeling and did not affect Doan's advertising strategy, which targeted back pain sufferers. The company spent $5.4 million in measured media for the brand during 1985.

The fate of Jeffrey Martin's Bantron, a smoking deterrent accounting for 2.2% of the company's domestic sales during 1985, is still undecided by the FDA, which is seeking proof of the efficacy of the product's active ingredient.

If the FDA rules against the product, Jeffrey Martin will be required to remove it from retail shelves by the second half of 1987. The company spent only $512,000 in measured media on Bantron, according to LNA.

New creative and media strategies, since abandoned in 1986, were designed for Compoz, Cuticura and Porcelana in 1985. Compoz and Porcelana, previously advertised only on radio, were backed by tv campaigns. Cuticura, experiencing sales declines during the year, was revitalized with a strategy positioning for skin that is part oily and part dry. Ayds, the diet suppressant, was backed with $4.8 million in measured spending, down 33%, and broke a campaign last spring.

Advertising strategy changes extended into media, where Gerald Baldwin was named vp-media, from director, in August. Jeffrey Martin increased its use of 15-second spots and is editing 30-second spots for use as 15s. The company stepped up its usage of network and spot tv, partially by spending $5 million less for network radio in 1985 than the previous year. The company also used print on a test basis for the first time during the year and considered increasing its media reach to target blacks and Hispanics.

Jeffrey Martin, in an active acquisition search for new brands, in January, 1986, bought the worldwide rights to Zizanie, a men's fragrance and skin treatment line owned by Parfumerie Fragonard, from Beecham Cosmetics, which will continue to produce the line for Jeffrey Martin.

Cost of sales during 1985, representing the cost of manufacturing the company's products, decreased as a percentage of net sales to 21.9% in 1985 from 22.2% in 1984.

MasterCard International

New York

($ in millions)

Worldwide	1985	1984	% chg
Sales	73,300	62,600	17.1
U.S. advertising	39	39	0.3

MasterCard International, which experienced a growth of 10% in new cardholders in 1985, has been playing the corporate travel and entertainment market for new card opportunities in 1986.

The company, which is facing increased competition from third-party general purpose card issuers, also ditched the status-oriented ad theme, "So Worldly So Welcome," early this year for a more down to earth "Master the possibilities" theme that gets to the point on why consumers should select MasterCard-it's practical.

Measured media spending in 1985 fell 3% to $26.6 million, mainly as a result of a 38% drop in measured spot tv spending to $2.9 million for the "So Worldly" campaign. Measured network tv for the campaign fell 4% to $16.3 million in 1985. Another major spending category was MasterCard Travelers Cheques with $4.1 million in measured media, divided 55% network tv, 37% magazine, and 4% each for spot tv and newspaper supplement.

In a major repositioning from the glitz and frivolity of its previous theme, MasterCard are now using actress Angela Lansbury and actor Robert Duvall as no-nonsense spokespersons in explaining the benefits of the red and ochre card in terms of real value, individual responsibility, personal choice and new possibilities.

A new print campaign for the gold MasterCard features director John Huston, conductor Andre Previn and dancer Twyla Tharp. Print media for the gold card jumped 22% in 1985 to $2.6 million.

MasterCard's new campaign is an effort to gain market share in the hotly competitive bank card business from bank card rival San Francisco-based Visa USA and from third-party and general purpose charge cards such as Discover card by Sears, Roebuck & Co.

A key area is the lucrative business travel and entertainment market. MasterCard is giving banks access to this market with introduction of the MasterCard BusinessCard in 1986. Master-

Card reports that corporations spent $124 billion on employes' travel and lodging in 1984, with more than half being paid by check or cash, and 40% charged to personal cards, including about 7% to American Express. The BusinessCard would allow banks to forge new relationships with important corporate customers, in addition to helping them track and control employe spending.

There were 73 million MasterCard subscribers in the U.S. as of June 30, 1986, up 10% over the same date in 1985, compared with Visa's 97 million U.S. cardholders, also up 10%. American Express had 17 million U.S. subscribers at the close of 1985.

MasterCard's 16,000 member institutions in the U.S. had dollar volume of $51.1 billion in 1985, up 21% over 1984. MasterCard had 41% and Visa 59% of the $126.3 billion 1985 dollar volume spent on bank cards in the U.S. MasterCard's U.S. volume represented 68% of the $75.3 billion worldwide dollar volume it generated through 29,000 member financial institutions.

The 17,000 financial institutions authorizing Visa cards had U.S. dollar volume of $61.2 billion in 1985, up 23% for the year. That figure represented 70% of Visa's $108 billion in worldwide volume through 18,000 financial institutions in 1985.

American Express, which by far is the world's largest credit system, unlike Visa and MasterCard which are authorized by individual banks, handled U.S. card volume of $44.5 billion in 1985. American Express's worldwide dollar volume of $55.4 billion was up 16% over 1984.

Sears' Discover card, introduced late in 1985, by August, 1986, had 4.7 million cardholders.Sears has a base of 380,000 merchants accepting the card. However, analysts say Discover has a major problem in its limited access to automated teller machines (ATMs) and to bank processing systems.

For comparison, MasterCard has worldwide access to 112,000 cash advance locations and 13,400 MasterTeller ATMs. Visa has access to 200,000 banking offices in 160 countries and 11,000 ATMs in 16 countries.

Venture	1,004	882	13.8
Volume Shoe	697	543	28.4
Real estate	52	18	188.9

May Department Stores Co., which has been expanding rapidly its low-price Venture and Volume Shoe operations the past few years, got an infusion across the retail price spectrum Oct. 3, 1986, when shareholders approved the merger of Associated Dry Goods Corp. into May.

The merger, amounting to a $2.47 billion stock swap, combines two chains that both operate upscale department stores and discount stores. Associated offers a strong national franchise in its Lord & Taylor division as well as geographic strength in the northeast through its Caldor discount stores. This complements May's strengths in the rust belt with its Venture discount stores and with important department store divisions such as Washington-based Hecht's, Famous-Barr in St. Louis and Kaufmann's in Pittsburgh, and on the West Coast where it operates May Co. California, its biggest department store division.

Combined 1986 sales for the two retailers is expected to reach about $10 billion, which would push May ahead of Cincinnati-based Federated Department Stores Co. to become the fourth largest nonfood retailer in the nation. In the first six months of their current fiscal years, May reported earnings up 20.9% over the corresponding period in 1985 to $86.1 million on sales of $2.4 billion, up 11.1%. Associated had net earnings of only $8.4 million, down 64.9%, on net sales of $2.03 billion, up 5.8%.

Associated, which becomes a wholly owned subsidiary of May, will merge its New York corporate office into May's St. Louis headquarters over the next several months. Its New York buying office will be folded into May's New York facility, a May spokesman says. Associated chairman Joseph H. Johnson, who plans to retire at the end of 1986, will remain on May's board of directors. Associated president David Williams will not join May, nor will Joseph E. Brooks, chairman and chief executive of Associated's Lord & Taylor division. Mr. Brooks announced his resignation in mid-October saying he had expected for many years to become the ceo of Associated, but now there is no more Associated. He was replaced by Marshall Hilsberg, president and chief executive of G. Fox & Co., Hartford, a May unit.

May operates 145 department stores in 15 states, including May Co., Famous-Barr, Hecht's and Kaufmann's; 62 Venture discount stores, and 2,084 Volume Shoe stores, mostly under the Payless ShoeSource trade name. Associated operates 158 department stores in 20 states, including 45 Lord & Taylor, J.W. Robinson's and L.S. Ayres; 112 Caldor discount stores; 87 Loehmann's off-price stores, and 108 Sycamore specialty stores.

The acquisition and merger caps an aggressive period of internal growth in which May rapidly expanded the base of its Volume Shoe and Venture divisions. Volume Shoe is the nation's leading self-service discount shoe chain with stores in 39 states and the District of Columbia.

Volume Shoe and Payless ShoeSource accounted for 49% of May's $25.5 million in 1985 spending for seven media measured by Leading National Advertisers, compared with 40% of May's $21.2 million in 1984. May's measured total for 11 media was $31.5 million in 1985, up 45% over 1984 mainly on the strength of an additional $5.6 million in 1985 measured newspaper spending for all divisions.

May significantly boosted measured tv spending for the Volume Shoe division in 1985 to $3.9 million, up 40% from 1984, divided 90% network and 10% spot. Payless ShoeSource stores received $8.7 million in measured spot tv, up 50% from 1984. Venture received $3.5 million in spot tv in 1985, unchanged from 1984. The total represented 14% of May's spending for seven media.

Department store operations have become less critical to May's over-all performance since 1980 as the company has focused on more profitable discount operations, analysts say. In 1985, department store sales represented 65% of May's sales revenues; Venture, 20%; Volume Shoe, 14%, and real estate, 1%. In 1980, department stores claimed 74% of revenues; Venture, 17%; Volume Shoe, 8%, and real estate 1%.

Although the Associated acquisition will dilute May's earnings modestly in 1987, the combination produces a company as big as Federated, but growing twice as fast. It also gives May an opportunity to sharply increase its growth rate by providing important new franchises that are ready for expansion, according to a report by New York-based Donaldson, Lufkin & Jenrette.

The merger also will have significant operational advantages, analysts say. Consolidating buying and data processing operations alone could save the combined company $60 million a year, says Monroe H. Greenstein, senior analyst at Bear Stearns & Co., New York.

May long has been regarded as one of the best run major department store chains and one that frequently has been mentioned as a potential acquisition player or target. May's net earnings increased 10% in fiscal 1985 on an increase in net sales of 9.4%. A key measure of May's performance is its return on equity per common share of 18% in 1985 and 18.4% in 1984, both among the highest in retail.

In the current fiscal year, May's net income its first six months, ended Aug. 19, was $86.1 million, up 20.8% from the same period in 1985, on sales of $2.4 billion, up 11%. Associated's net income in its first half, ended Aug. 2, was $8.4 million, down from $23.9 million in 1985, on sales of $2.03 billion, up 5.7%.

Mr. Farrell, May chairman, told a shareholders meeting that the merger will not affect plans to add seven department stores, five discount stores and more than 330 discount shoe stores in 1986. In 1985, the company added three new department stores and five new Venture stores. Volume Shoe opened 205 new Payless ShoeSource stores in 1985 with emphasis on western, midwestern and southeastern locations. In the Northeast, 29 new stores were added.

May's 1985-89 expansion and remodeling plans call for 26 new department stores, 20 new Venture stores and 1,100 net new stores in the Volume Shoe division at a cost of $1.3 billion.

Ad spending for May's department store division was $8 million in 1985 for seven media, up 8% from the previous year. The biggest gainer was May Co. California, which is locked in a highly competitive market, receiving a measured $3.4 million, divided about 98% spot tv, 2% magazine, and a fraction for out-of-home. Measured spending for Famous-Barr fell 38%, to $1.2 million for spot tv.

Measured spending at Associated was up 55%, to $10.4 million, in 1985 for seven media, mostly on the strength of an additional $4 million in measured spot tv spending for the Caldor division. However, measured spending for the Robinson's division fell 16.7%, to $3.2 million, in 1985, divided 68% spot tv, 21% magazine and 11% out-of-home.

MCI Communications RANK **136**

Washington

($ in millions)

Worldwide	1986	1984	% chg
Sales	2,540	1,960	29.6
Net income	206	175	17.7
U.S. advertising	61	59	3.7

Now that Washington-based MCI Communications Corp. is firmly established with consumers as the nation's No. 2 long-distance carrier, the company in 1986 again is taking on American Telephone & Telegraph Co. on a new battleground—the business market.

This is expected to be MCI's toughest challenge yet, one that is dramatically altering its advertising and marketing strategy.

MCI shifted nearly all of its corporate ad spending into network tv to promote business service when its contracts with Burt Lancaster and Joan Rivers, spokespersons for consumer long-distance services, ended May 30, 1986, says Gary Tobin, director of public communications.

MCI's measured spot tv spending for consumer advertising was $25.7 million in 1985, down 3% from 1984. The spending represented 62% of MCI's $41.4 million measured total for 11 media. The 11-media total was up 4% in 1985 as a result of a 110% increase in newspaper spending, to $7.8 million.

MCI also spent a measured $4.6 million in general long-distance promotion in 1985, down 21% from the year earlier.

MCI stressed low cost, convenience and quality of transmission as the Sept. 1, 1986, deadline approached for consumers to select a long-distance carrier. Some 50 million residential telephone customers had been asked to select a "Dial-1" equal access carrier under a federally mandated balloting process by that date. About 30% of the U.S. remains to be converted to equal access, analysts say.

MCI's market share in long-distance service grew to 6.6% in 1985 on revenues of $2.5 billion, up from 5.5% in 1984 when revenues were about $2 billion. AT&T's market share fell to 83% in 1985 on revenues of about $37.7 billion, down from 85% in 1984 on revenues of $35 billion, according to the "U.S. Telecommunications Market Report" issued by New York-based Northern Business Information. MCI estimates that it has an 9% market share over-all.

U.S. Sprint gained slightly in market share, reaching 3% in 1985 on revenues of $1.36 billion, up from 2.9% in 1984 on revenues of $1.2 billion.

The marketing position of the smaller long-distance carriers was radically strengthened by a June, 1985, FCC decision to strike down the advantage AT&T had in gaining equal access connections by default for consumers who expressed no preference. The FCC ruled that customers who fail to select a long-distance carrier would have one assigned for them at random. Previously, those failing to indicate a choice were assigned to AT&T.

With MCI's new focus in building commercial accounts, the company consolidated corporate advertising at New York-based D'Arcy Masius Benton & Bowles, which had been MCI's agency for business-oriented advertising since 1984. MCI business long lines received a measured $1.3 million in 1985 magazine spending, accounting for 3% of MCI's 11-media total. There was no measured spending for business long lines in 1984.

Until mid-1986, the bulk of MCI's agency spending resided at New York-based Ally & Gargano, which handled consumer long lines. MCI's account for MCI (electronic) Mail also was handled by Wells, Rich, Greene, New York. MCI Mail received $500,000 in measured media in 1985, down 83% from 1984. Neither agency now works on the MCI account.

MCI's revenues were up 30% in 1985 and net profits were up 91% for the year, prompting William G. McGowan, chairman and ceo, to comment in his annual report to stockholders, "1985 was a hell of a year!" Results for the first nine months of 1986, however, were not as impressive. Net income fell 48.5%, to $54.1 million, even though gross revenue increased 46.7%, to $2.67 billion.

The reason for MCI's declining profitability is that its costs of operation are rising to match those of AT&T, now that both are paying the same price for access to local telephone networks, analysts say, who note results also include a price cut on July 1. An MCI spokesman says network access costs represented about 34% of MCI's gross revenue in 1985.

MCI's reason for stepping up its pitch to the business community is clear: Businesses generate only about 40% of the call traffic, but account for 60% of the dollar volume of the $50 billion telecommunications industry, MCI's Mr. Tobin says. Businesses use long-distance service during the day-

time at peak rate periods, which produces higher profits for the long-distance carrier and proportionally lower access charges than consumer accounts, he says.

MCI is making inroads in the business sector, but the effort ultimately will cut deeply into its profit margins, says Amy Francis, senior telecommunications analyst for The Yankee Group, Boston.

"They will have to dump a lot of money into marketing and advertising to lure away corporate customers from AT&T," she says. MCI's hotly competitive approach is reflected in its ad campaigns that show athletes competing in sports such as basketball, crew and cycling, drawing a parallel between competition between MCI and AT&T.

U.S. Sprint is taking a more conservative approach, stressing the quality of transmission of optic fibers.

But smaller carriers such as MCI and U.S. Sprint do have some advantages of flexibility over AT&T. Adds Ms. Francis, "You can't leverage AT&T, but you can really leverage these guys [to make deals] right now. They're so hungry for corporate accounts." In June 1986, MCI had slightly more than 850,000 commercial customers, up 40% from 1985, compared with 3.6 million residential customers, up 26%.

MCI has been developing a broad array of services and price promotions to meet the needs of business customers. An example is MCI Prism, a family of services tailored to business users that competes with AT&T WATS.

Prism customers are charged a flat per-mile rate based on the distance of a call, which removes two penalties of AT&T WATS pricing: higher charges for decreased line usage and overflow to more costly lines. MCI also offers MCI WATS with service to 45 countries. The company offers a Corporate Account service allowing multi-site companies to receive volume discounts for all locations. During 1985, MCI also introduced MCI Vnet, or virtual network service; MCI Private Line service, which features voice and data transmission service among 150 U.S. cities, among products and packages.

MCI also announced in September, 1986, that it soon will enter the growing market for toll-free 800-service, which until recently had been offered nationally only by AT&T. The long-distance unit of Western Union Corp., Upper Saddle River, N.J., has said it would provide a similar service, beginning in October, 1986. U.S. Sprint plans to enter the 800-service market early in 1987.

MCI's marketing position was strengthened by its purchase of Satellite Business Systems in February, 1986, from IBM in exchange for 47 million shares (16.6%) of MCI's common stock and an IBM option to buy up to 30%. The deal also gave MCI access to a line of $400 million in cash on demand from IBM in exchange for convertible securities. The acquisition of SBS gives MCI three domestic satellites.

Mennen Co. RANK **159**

Morristown, N.J.

($ in millions)

Worldwide	1985	1984	% chg
Sales	225	150	50.0
U.S. advertising	51	47	8.6

Mennen Co., after five years of relatively few product debuts, made gutsy introductions in the deodorant, liquid detergent and skincare categories in 1985 and rolled national with a new roll-on deodorant in 1986.

To support new offerings and to maintain share in existing products, Mennen increased ad spending, particularly in network cable tv, network tv and spot radio. The use of network cable in 1985, for example, soared 183% from 1984, according to Leading National Advertisers.

Mennen also raised its unmeasured spending by using more couponing. The debut of Real smooth-on antiperspirant, for example, was supported with 47 million $1-off coupons and 3.5 million $2.50 rebates. Additionally, more than 100 million coupons will be distributed this year in support of Real.

During 1985, Mennen test marketed Real on the West Coast, where it snared as much as a 30% share. That impressive performance, coupled with the revolutionary, patented application of Real—a waterless roll-on—boosted retailers' welcome of the new line, which was unleashed nationally in May, 1986. Spending will be at the rate of $14 million, says a source close to the account. Campbell-Ewald handles. According to LNA figures, $43,300 was spent in 1985 to support the test of Real.

It is no surprise Mennen is putting its efforts into the $1.2 billion antiperspirant/deodorant arena; its share has more than doubled in that category since 1980, according to Diana Temple, an analyst with Salomon Brothers, New York.

Mennen's dollar share with Speed Stick and Real jumped from 5.8% in 1980 to 12.3% in 1985 and to 13.4% in the first quarter of 1986. The company believes that share will double again as Real hits its stride. Real, however, did not have an easy entry into the market. The product was kept in tests for two years, and the launch was postponed once because of packaging component supply problems. But despite initial enthusiasm, retailers say Real has been "slow out of the gates."

Regardless of Real's shaky debut, Mennen's burgeoning share has put it third in the deodorant race behind Procter & Gamble (Sure and Secret) with a 22.7% share and Gillette (Right Guard, Soft & Dri, Dry Idea and Body Flowers) with an 18.6% share. Bristol-Myers Co. (Ban, Ultra Ban and Tickle) has a 10% share and Shulton (Old Spice and Lady's Choice) a 10% share.

Marketers are not letting the healthy 11.8% sales gains in the category pass them by. New products are entering the market at a rapid pace, including P&G's new wide solid Secret, Gillette's new aerosol and solid form of Dry Idea and a shower-fresh scent for Soft & Dri. Retailers say they expect to see even more entries into the "wide" sector of the stick business. Stick forms are the fastest growing application with a 41.4% of sales. Roll-ons and aerosols continue to lose share, commanding 27.9% and 28.2%, respectively.

Mennen kept its brands competitive with a measured advertising budget behind Speed Stick of $19.5 million, a 4.8% increase from 1984.

While industry observers believe Mennen's greater charge into deodorants is smart, they are questioning other new items in test markets. Banking on its Baby Magic line, Mennen is trying a Baby Magic laundry detergent. Now in test in the upper Midwest, Baby Magic laundry detergent was supported in 1985 with $81,000 in measured spending. It would compete in the over-all $3.5 billion detergent business against other liquids targeted at the baby market such as P&G's Dreft (0.6% share) and Ivory Snow (1.2% share).

The entire Baby Magic line was allocated a budget of $2.8 million last year, up 30.8% from $2.14 million in 1984. Almost $1.7 million of that supported Baby Magic lotion.

Although Mennen's Hawk and Millionaire—two men's scents—were not very successful, Mennen has made another move into the men's market with the test of a men's hand and skincare lotion called Compete. Compete was supported with $108,400 in 1985 in tests in Texas, New Mexico and Arizona. According to Ms. Temple, Mennen is considering a national launch this fall. Campbell-Ewald handles.

Although mass retailers say the market for men's skincare is about ready to take off, no manufacturer has been able to crack it. P&G through its Richardson-Vicks subsidiary tried with only moderate success with Saxon, which has undergone three package changes. Mennen points to research showing the portion of men using hand and body lotions is 50%, up from 35% five years ago, and escalating.

Mennen has a decent showing in the men's area with Afta aftershave and Skin Bracer. Spending in 1985 was increased for both of these brands, which are touted primarily via tv. The budget for Afta aftershave was $4.3 million in 1985, up 16.2% from $3.7 million in 1984. Skin Bracer received $6.6 million last year, up 20% from $5.5 million in 1984. The company is expected to renew these lines and continue to put more money into revving up sales.

Afta is handled by McCann-Erickson and Skin Bracer by Campbell-Ewald. After juggling shops in 1984, with Grey Advertising the biggest loser, Mennen kept its business divided between McCann and Campbell-Ewald in 1985.

Although privately held Mennen once openly touted its new offerings, the company is now tight-lipped concerning its fiscal position and its new product plans.

Mennen also owns Paper Art Co., an Indianapolis-based paper products company. No measured spending was reported in 1985 for this division, which was acquired in 1984.

Merrill Lynch & Co. celebrated its 100th year in business in 1985 with strong financial results including a growth in revenues of 18% and accelerated earnings of 135% over 1984. The company took further steps in 1986 to concentrate on its core financial services operation by proposing to sell off its real estate group.

In the first half of 1986, Merrill Lynch's revenues were $4.5 billion, a 35% increase over the corresponding period in 1985. Income rose 44% in the half, to $178 million from $123 million in 1985.

The company's return on stockholders' equity recovered to 10.2% in 1985 from 5.0% in 1984; but the company believes that return is still unacceptable. Total assets in 1985 increased to $48 billion from $31 billion in 1984.

In 1985, income was not alone in its meteoric rise. (Income included a $140 million provision for income tax expenses compared with 1984's $25 million tax benefits). Merrill Lynch increased spending in the 11 media monitored in this issue to $22 million, up from $8 million in 1984.

Virtually the entire increase in measured advertising was credited to the Merrill Lynch stockbrokers category, which received ad backing of $17.7 million, up from $4.4 million in 1984. The only other category to receive a major increase in ad spending was general promotion, up to $1.4 million from $171,400 in 1984, according to Leading National Advertisers, which monitors seven of the 11 media tracked in this issue.

Some 87% of the stockbroker category spending was in network tv, boosting that medium from 48% of total measured spending in 1984, to 70% in 1985.

In 1985, magazines accounted for 13.1% of the total measured ad spend and spot tv, 10.8%.

The company moved its $40 million-plus account to Bozell, Jacobs, Kenyon & Eckhardt in March, 1986, from Young & Rubicam. On the day the switch was announced it also was announced that William Appelman, a major player in trying to retain Merrill Lynch's business at Y&R, also was moving to BJK&E.

In 1985, Y&R made some changes in Merrill Lynch's advertising, including retiring the famous bull that had graced its ads for 15 years.

This year's new agency appointment follows some key internal appointments at Merrill Lynch in 1985. Among those appointments, Daniel Tully was elected president and chief operating officer; John L. Steffens succeeded him as president of consumer markets, and Stephen Hammerman was elected exec vp and chief administrative officer while continuing as general counsel. Early this year, Michael von Clemm, former chairman of Credit Suisse First Boston, was named chairman of Merrill Lynch Capital Markets.

In 1985, Merrill Lynch established a new "mission statement," which called for the company to meet the needs of the savvy new investor and the global marketplace. But this September the company took a step back from being all things to all people when it announced it was selling several of its real estate operations.

The company plans to sell Merrill Lynch Realty Associates, a national network of residential brokerage offices; Merrill Lynch Relocation Management, and its residential mortgage banking business.

All its real estate divisions accounted for $575 million in revenue in 1985. Realty Associates handled $13.7 billion in home sales in 1985, a 16.2% increase from 1984.

The sale of the three units is expected to raise at least $500 million of new capital. In 1985, according to the Securities Industry Assn., Merrill Lynch led the pack of 15 major securities firms in capital position with $2.6 billion in funds.

In June, 1986, in another move to raise capital, Merrill Lynch's retail brokerage unit raised commissions an average 5% on stock and option trades of less than $10,000.

Small investors are handled by the company's consumer markets division. In 1985, the division's account execs were renamed financial consultants to better reflect the array of services the consultants offer.

Several new accounts were introduced by the consumer market division in 1985.

The Flexible Credit Account is a personal/business secured loan that allows for the collateralization of a wide range of assets. The Capital Builder Account was test marketed last year. Its target is the emerging investor and has lower minimum entry requirements than the company's popular Cash Management Account.

Merrill Lynch Hubbard, the real estate investment and equity financing subsidiary, raised $1.3 billion in real estate partnerships, a 30% increase over 1984.

Merrill Lynch's Business Financial Services unit, which provides financial services to corporations with sales of $1 million to $125 million, had a record year in 1985.

Revenues grew 30% over 1984, to about $400 million. In the fourth quarter, the Working Capital Management Account was introduced to further meet the financial needs of growing businesses.

Also late in 1985 the Direct Marketing Business Unit was formed, aimed at increasing the company's share of the corporate employe benefit market.

In 1985, Merrill Lynch's increasingly important capital market sector provided $114 billion in financing to corporate, institutional and government clients, more than any other securities firm in history.

The company's presence abroad continued to grow in 1985. In February, 1986, Merrill Lynch became the first foreign company to gain a seat on the Tokyo Stock Exchange. The company expects to become a full member of the Stock Exchange in London later this year.

The company's merger and acquisitions business grew, and a $400 million partnership was created for the purpose of investing in the equity portion of leveraged buyouts.

In 1985, Merrill Lynch acquired a 29.9% interest in Giles & Cresswell, a primary dealer in Gilts, or the U.K. equivalent of U.S. Treasuries. The company now has 100% ownership.

Last year the company also paid $4 million for a majority interest in Data-Cast, a financial videotex service that is jointly owned by the Financial News Network and Biotech Capital Corp.

To better meet its occupancy needs, Merrill Lynch expects to move its executive offices and capital markets operations to the World Financial Center by mid-1987.

In 1985 it moved its training, asset management and some other consumer market operations to a new corporate campus in Princeton, N.J., and some operations functions were moved to Somerset, N.J.

MGM/UA Communications Co. started fiscal 1987 this Sept. 1 with a new name, a new home and what owner Kirk Kerkorian hopes will be new box-office fortunes.

Since 1982, the film company has had the worst box-office record of any major studio, and its dismal performances have carried into 1986. Of its latest batch of films—excluding "Rocky" sequels or James Bond pictures—only "Poltergeist II: The Other Side" and "Running Scared" proved to be modest hits with U.S. box office grosses of $39.6 million and $36 million, respectively. "Rocky IV" grossed more than $125 million after its November, 1985, release, but not even Rocky Balboa can carry an entire studio.

Films like "Wise Guys," "Ginger and Fred" and the recent "Shanghai Surprise" bombed this year, leaving MGM/UA's box-office market share for 1986, as of Sept. 1, at 6.2%. This ranks ninth behind Paramount, Warner Bros., Columbia, Universal, The Walt Disney Co., 20th Century-Fox, Orion Pictures Corp. and Tri-Star Pictures.

Even so, the company's financial outlook is bright thanks to Mr. Kerkorian's sale and repurchase of the studio from Ted Turner. While the same transactions left personnel on tenterhooks and stalled attempts to improve company performance for more than a year, as of Aug. 26, 1986, the deals were final and the new MGM/UA Communications Co. expects to move forward.

MGM/UA no longer has a production facility or a film lab—both were sold by Mr. Turner to Lorimar-Telepictures—but as new MGM/UA chairman and ceo Lee Rich said after his April appointment, "It's a young, aggressive, debt-free company with interests in all areas of the entertainment business and a library of approximately 950 films."

Before its sale, however, MGM/UA had problems. Its fourth-quarter fiscal 1985 losses totaled $49.5 million compared with a $2 million profit in 1984. MGM/UA then-chairman Frank Rothman discounted the losses, blaming them on payments of $32.5 million to settle a court case with Rainbow over cable tv rights to MGM films. But at the same time, total operating revenues for 1985 had dropped nearly $52 million, a 7.3% decrease from 1984, following a pattern of steady decline since Mr. Kerkorian merged MGM with UA in late 1981.

Despite the problems, Mr. Turner agreed to buy the ailing studio in August, 1985, for about $1.5 billion. As part of the complicated deal, Mr. Kerkorian agreed to buy back UA for $480 million. Then between mid-August and late November, 1985, MGM/UA's string of bombs continued. "Year of the Dragon," "Code Name Emerald," "Marie," "Fever Pitch," "Dream Lover" and "9½ Weeks" flopped. Cumulatively, the films cost $75 million to make, not including the $15 million spent on prints and advertising. Together the six films earned less than $5 million in rentals.

As a result of writedowns, MGM/UA reported a $26.9 million loss in its first quarter of fiscal 1986, which ended Nov. 30. This compared with a $1.6 million profit the previous year. The poor performance damaged Mr. Turner's attempts to raise the money to buy the studio. Then Mr. Kerkorian agreed to restructure the deal while the purchase price remained at $1.5 billion.

When the deal closed March 25, 1986, MGM became a subsidiary of Turner Broadcasting System, while Mr. Kerkorian, who owned 50.1% of MGM/UA, now owned 80% of the spun-off UA. In June, Mr. Turner sold everything except MGM's 3,600-film library, which includes old RKO Pictures and Warner Bros. movies. "The theatrical motion picture business is not really a sound financial business," he said at the time.

Mr. Kerkorian bought back MGM Entertainment Co.'s motion picture and tv production and distribution businesses and the Home Entertainment Group for $300 million. As part of the deal, MGM/UA will distribute up to three new TBS motion pictures a year, and it agreed to a 15-year home video distribution deal for the film library retained by TBS.

The restructured company under Mr. Rich will have two separate film production units—Metro-Goldwyn-Mayer Pictures under ceo Alan Ladd Jr. and United Artists Pictures under Anthony Thomopoulos. David Gerber will run the combined MGM/UA Television Group, while Richard Graff heads the MGM/UA Distribution Co. Both film production divisions will retain their own worldwide marketing entities. Gregory Morrison is president-marketing, MGM, while Andrew Fogelson is president-marketing, United Artists.

Despite the past years of turmoil, all are pushing forward. UA, which suspended production pending the studio sale, now has three films starting in October and another 26 projects at various stages of development.

In the future, both MGM and UA could make eight to 12 films each per year, nearly doubling the former MGM/UA Entertainment Co.'s output. When and if this happens, MGM/UA Communications Co. could double its annual ad spending.

In 1985, most MGM/UA films received between $1.5 million and $3 million in measured media. The lone exception was "Rocky IV" which received almost $5.5 million in measured backing.

The company reduced its network tv spending in 1985 by 34%, but nearly doubled spot tv buys and increased cable network advertising tenfold to more than $3 million. Most of the increased cable ad spending, however, can be attributed to MGM/UA Home Video, which spent $1.2 million on the medium.

Home video advertising nearly quadrupled to $1.67 million in 1985, compared with $450,000 in 1984. This year MGM/UA Home Video could double its ad spending again.

The Home Entertainment Group had been the only bright spot in 1985 with revenues of $203 million, a 25% increase over 1984's $162 million. Sales of "Gone with the Wind," which reached 300,000 units in 1985, paced the company's slate of 85 new video titles in fiscal 1985. Another 38 films were released on video during the first quarter of fiscal 1986.

Revenue generated from sales and rentals of videocassettes in 1986 include $6 million for the "Wizard of Oz," over $3 million each for "Motown 25—Today and Forever," "Frank Sinatra-Portrait," and "Singin in the Rain," and over $1 million each for "Death Wish," "Year of the Dragon," and "Youngblood."

The new MGM/UA also is expanding its efforts this year in domestic and international tv syndication to market and sell "Fame," the miniseries "George Washington: The Forging of a Nation" and the new prime-time series "Jack and Mike" for ABC while continuing to develop new tv properties.

Minolta Corp. performed both a technological and a marketing feat in 1985 when it breathed new life into the 35mm single lens reflex (SLR) camera market with the introduction of its Maxxum 7000 series, which bridged the gap between user-friendly lens-shutter cameras and the more complex SLR at a popular price of $500 retail.

The Maxxum line unveiled by Minolta in January, 1985, as the world's first body-integrated, auto-focus 35mm SLR camera, also stimulated ad spending at Minolta by drawing an estimated $15 million to $20 million advertising and promotion campaign, bearing the theme "Only the human eye can focus faster."

During the year, Minolta also rushed into the growing electronic imaging market with the introduction of three video cameras and burrowed further into the business machine market with new product introductions, reflecting its goal to continue to broaden its business activities, while stressing identification with its name and symbol.

The Osaka, Japan-based parent company derived 80% of its business from markets outside Japan in 1985. Besides promoting a full line of cameras and equipment, the company markets copiers, printers and microfilm equipment and plans to expand its presence in photometry, medical equipment and planetariums.

North America accounts for more than half of the sales in each of Minolta's two product divisions—cameras and accessories, and business machines. North America is Minolta's fastest growing market, with sales up 12.2% over last year, and accounts for 57.5% of Minolta's camera sales.

Minolta has been at the forefront of market innovation the past few years, launching new products including the Freedom line of compact cameras and the new AF-Tele into the fast-growing, lens-shutter camera market.

However, the focus of Minolta's most ambitious and bold camera efforts was aimed at the slower growing, but larger profit-generating 35mm SLRs, including its popular X-700. Even though the Japanese shipped nearly 3 million rangefinder cameras to the U.S. in 1985, compared with 2 million SLRs, the SLRs generate more profit because of their higher price tags, according to Eugene G. Glazer, photomarketing analyst with Dean Witter Reynolds.

Analysts say the Maxxum has given to the SLR market the same boost Canon gave to the lens-shutter market with its AE1 model. Minolta, for example, hopes to boost the 35mm SLR portion of its camera sales to 60% with its Maxxum. Part of this will come through new line extensions. In April, 1986, a standard Maxxum, the 5000, was added to the line, which also includes the Maxxum 9000, a professional model. The company hopes to market more interchangeable lenses for the multifaceted unit, which can take pictures in total darkness with a flash attachment.

In terms of over-all camera sales to the U.S. market in 1985, Canon leads, as it did in 1984, while Minolta is second, also repeating its rank in 1984 share of market, followed by Nikon (Nippon Kogahi), according to Richard Ozaroff, senior international analyst at Value Line, New York.

However, some analysts believe Maxxum could help Minolta wrest the crown from Canon this year. The Minolta Maxxum already has become the best selling camera in the U.S., accounting for about 10% of all U.S. SLR dollar sales. Minolta, with its various products, has taken the top share of the SLR market with more than 30% of dollar sales compared with Canon's 28%, according to a trade industry observer.

Despite the success of the Maxxum, Minolta has not neglected the lens-shutter market. Though Canon continues to lead in that category with a 33% to 34% share in dollar sales last year, Minolta is second with a 15% share, a trade industry monitor says.

In August, 1985, the company introduced the Minolta A-Tele, a 35mm lens-shutter camera equipped with standard telephoto lens selection. By depressing a lever that activates the motorized lens drive, the operator can shift automatically from standard to telephoto lens settings and back.

In April, 1986, Minolta augmented its Freedom line of lens-shutter cameras with the Freedom III ($256 retail), an automatic-focus, 35mm compact with one option, a telephoto-wide angle lens attachment. The 1986 budget for both the new Maxxum and the Freedom III is expected to total $5 million.

Not all of Minolta's recent introductions have met with success. In June, 1983, Minolta unveiled its AF-SV lens-shutter camera, known as "the Talker" because it featured synthesized verbal reminders. Advertising in 1984 totaled nearly $3 million, which dropped to $137,000 in 1985. The company says the Talker eventually will be phased out.

As electronic imaging encroaches on the photographic market, Minolta has ventured into the video market. This past year, the company introduced three new video cameras, a camcorder and three models of videocassette recorders. According to Mr. Glazer at Dean Witter Reynolds, 500,000 video cameras were sold to retailers in 1985. That number is expected to more than double by the end of this year. Minolta, not wanting to be left behind in this increasingly mass-market segment, entered the video market in August, 1984, with the K-500 S. A year later, it introduced an autofocus version, the K-510 S AF, and the CR-1000S, AF camcorder.

With its built-in network of distributors via its camera dealers, Minolta is trying to make inroads into a market dominated heavily by Sony and Matsushita. Minolta's first year on the market gave it a 0.1% share, placing it No. 39. RCA led the market with a 13.75% share of vcr dollar sales in 1985. Panasonic by Matsushita was No. 2 with 12.05%, Fisher was No. 3 with 7.65% and Sony with a 4.75% share was sixth, according to *Video Week*, a publication of *TV Digest* in Washington.

Minolta spent $16.4 million on cameras and accessories in measured media in 1985, up from $8.5 million in 1984 and nearly twice the $8.7 million it spent promoting its business equipment products in 1985, a figure up 34% over the previous year.

As in cameras, North America was the largest business machine market for Minolta, accounting for 56.5% of its overseas business machine sales. The North American sales total of $272.7 million represented an increase of 31.3% over 1984.

Business machine sales at Minolta were led by the company's newly completed lineup of zoom plain paper copiers, which target the small and medium-capacity market. Minolta credits itself with having invented the automatic zoom copier. In December, 1985, the company launched its first personal copier, the EP50. Total copier advertising amounted to $5.7 million during the year, down 13% from 1984. Ads featured actor Tony Randall in a campaign from Bozell, Jacobs, Kenyon & Eckhardt.

A $3 million ad campaign backed Minolta's introduction of its PCW 1 word processor into the U.S. market in July, 1985. The multifunction work station features word processing, electronic typing and personal computing through an exclusive visual-sequence software system.

Net income	13.6	13.5	0.7
U.S. advertising	34	28	18.8

New products and joint ventures aimed at beating the quota system on Japanese cars may be the combination that propels Mitsubishi Motor Sales of America into serious contention as a large volume importer in the U.S. market by 1990.

That's part of the five-year forecast by Mitsubishi, whose plans call for U.S. sales of 250,000 to 300,000 vehicles annually by 1990, up from 76,000 in 1985. A steady outpouring of innovative products will spark consumer demand, the company predicts. An example is the minivan Mitsubishi will introduce later this year to compete with Toyota.

Plans for 1990 also call for doubling the ad budget, estimated at $37 million last year; tripling the number of

dealers from the present 106, and nearly quadrupling the number of markets from the present 35 on the East, West and Gulf coasts to 125 in major markets across the country.

Expansion plans for the next decade appear well within reach of Mitsubishi Motor Sales of America, the U.S. sales arm of Mitsubishi Motors Corp., a wholly owned subsidiary of Mitsubishi Corp., both of Tokyo. Principal shareholders in MMC include Mitsubishi Heavy Industries Ltd. (65%), Chrysler Corp. (25%) and Mitsubishi Corp. (10%).

MMSA began marketing products under the Mitsubishi name in the U.S. in the fall of 1982. For 1983, the company sold 42,072 cars and trucks, the most vehicles ever sold by any importer during its first full year of operation in the U.S., a figure that will be eclipsed this year by Hyundai Motor Corp., the South Korean budget car. The product lineup included three cars (Starion, Cordia and Tredia) and two-wheel-drive and four-wheel-drive trucks. The Mitsubishi Montero four-wheel-drive sport/utility vehicle was introduced as a 1983½ model.

Calendar 1984 saw sales of 56,717 cars and trucks, up 35% over the previous year. The 1985 total stood at 76,473 units—49,734 cars and 26,739 trucks—a 35% increase over year-earlier figures.

In 1985, Mitsubishi sold 13,066 entry-level Mirage models, with prices starting at $5,869 for the two-door. Ad backing was $2.3 million, according to LNA. This vehicle was followed in popularity by the Galant, a four-door luxury sedan with prices starting at $13,899, which sold 12,766 units and received $1.5 million in ad spending; $7,749 four-door Tredia, 10,902 units, and recipient of about $900,000 in ad spending; the little advertised Cordia, a two-door sport hatchback priced at $9,319, 8,159 units; and Starion, LE turbo coupe priced at $15,209, 4,841 units, which received $2.4 million in ad backing, according to LNA.

The total represents a 1.7% share of imported cars in the U.S., far below the 23.4% share held by Toyota and Nissan's 21.3%. Mitsubishi ranks seventh among Japanese auto importers and sixth in trucks in the U.S.

But for 1986, MMSA expects to sell nearly 100,000 cars and trucks, projecting sales of 57,000 cars, 32,000 trucks and 7,000 Monteros. The company projects sales of between 140,000 and 150,000 units in 1987, and all signs point to a company on the move.

Compact trucks, a category not restricted by voluntary import quotas, accounted for about 40%, or $7.63 million, of the company's measured media spending for 1985, the most for any Mitsubishi product. The biggest portion of that expenditure, according to Leading National Advertisers, went into spot tv. Spot tv for all brands represented about 53% of the company's measured media figures for 1985. Other major shares went to newspapers, 20%; magazines, 17.7%, and business publications, 7.1%. Smaller portions were spent on cable tv, $128,000, and spot radio, $213,000.

Much of the estimated $10 million in unmeasured media spending was devoted to a cooperative ad program for dealers. The percentage of the ongoing co-op effort shared by MMSA depends on the emphasis needed for a promotion. Normally the company covers about 30%, although its involvment can go as high as 50% if greater than normal sales incentives are required.

MMSA's plans for expansion, circumventing voluntary import restrictions on cars and gaining a larger share of the market, hinge on reliable production sources of new vehicles. These include Diamond-Star Motors Corp., the joint venture between MMC and Chrysler Corp., and an agreement with Hyundai to provide MMSA with an entry-level car to sell in the U.S. in 1987.

Diamond-Star will produce up to 240,000 cars a year at the Chrysler-Mitsubishi plant in Bloomington-Normal, Ill., and the two companies will share equally in the output. Chrysler has sold Mitsubishi vehicles under Dodge and Plymouth nameplates since 1970. MMSA also expects to import about 30,000 cars built in South Korea by Hyundai Motors Corp. for the 1987 model year. These entry-level cars will be competitively priced with Hyundai's own Excel models and will not be affected by quotas, allowing MMSA to import more higher-priced cars from Japan.

Introduction of the entry-level Mirage subcompact and the midsize luxury Galant helped MMSA broaden its coverage for the 1985 model year. The new entries supplemented a line that had been made up of the compact Tredia, sports specialty Cordia, the luxury sports Starion, plus the Montero compact sports utility and the two-wheel-drive and four-wheel-drive truck categories.

For the 1986 model year, the entire line underwent refinements, most of them exemplified by such top-of-the-line models as the luxury Galant sedan, the econo-sports Mirage Turbo and the intercooled Starion ESI-R, the last introduced late in calendar 1985.

These new offerings in the 1986 line reflected Mitsubishi's decision to pursue the midvolume, upscale market, an area in which MMSA believed it could compete successfully without running head-on into Toyota and Nissan in the large-volume end of the U.S. market at the outset.

Accordingly, Mitsubishi adopted a life-style theme in its opening campaign for the '86 line, an approach that was used for the midyear introduction of the Starion ESI Turbo, the third and fastest model in the sporty car models. The theme also encompassed pickup truck advertising at midyear, a sign that perhaps MMSA had come to see its compact truck market, once driven by rural and commercial users, merging with the passenger car market.

Produced by Cunningham & Walsh, Los Angeles, the campaign positioned the new Mighty Max Sport compact pickup as the perfect companion for a free-and-easy life style, rather than a tough tool for the ranch. Dashboard and passenger compartment styling of the truck resemble passenger car interiors, a departure from the spartan decor of many earlier compact pickup trucks.

Print and tv ads presented the Mighty Max Sport on the beach. One tv spot featured a young surfer-type male showing off his truck to an admiring young woman, ending with the $6,199 price flashed on the screen.

For the Starion ESI Turbo, Mitsubishi's fastest car, the message was high performance. The car was the centerpiece of ads themed "Proof that man was meant to fly."

A six-month campaign for MMSA's high-performance Starion ESI-R broke in car enthusiast magazines in December. It was expanded to tv and general interest publications in January.

With a full auto and truck line in place for the first time since it entered the U.S. market in 1982, MMSA continued the life-style campaign with the introduction of other models in the 1986 line in October. Product shots of a year earlier were replaced by life-style vignettes when the company introduced its top-of-the-line Galant and the subcompact Mirage. The last to be created by C&W, the campaign was backed by an estimated $8 million in fourth-quarter spending and began airing in early October.

MMSA went into the 1987 model year, its fifth in the U.S., with an all-new campaign from a new agency, Grey Advertising, Los Angeles, spearheading its aggressive new five-year marketing plan.

Supporting a new lineup of two-wheel-drive trucks, a new five-speed manual transmission version of the Galant and a four-door Mirage, the current effort aims at creating a national image of "patient craftsmanship."

That campaign is set to the theme of "Mitsubishi: Perfecting the experience," with spots designed to position the company as one that takes pains to perfect the technology used in making the product.

Last year's life-style approach has been abandoned in favor of promoting "the driving experience," with the use of car action shots to illustrate such experiences as the acceleration of a high-performance Starion.

One of six new spots is in behalf of Mitsubishi's line of newly designed trucks, a market segment that once again is accounting for nearly 40% of the company's fourth-quarter budget. MMSA corporate headquarters in Fountain Valley, Cal., a Los Angeles suburb, will be moved to Cypress, Cal., a few miles away, by late 1986 or early next year.

A technical training, service engineering center, parts distribution center and western regional offices already are located at the Cypress complex as are an MMC emissions testing laboratory and design studio.

Spirits, wine	680	649	4.8

National Distillers & Chemical Corp., marketer of Almaden wines and De Kuypers liqueurs among other leading wines and distilled spirts, left no doubt about the direction of the company when it agreed to buy a chemical company and sell off its Spirits & Wine division this October.

Its intention to concentrate on the chemical and energy industry quickly took root with the acquisition of Enron Chemical Corp. for $575 million. The move will make National Distillers the No. 1 producer of polyethylene resins in the U.S.—a key ingredient of plastic wraps and trash bags. The company had purchased propane gas operations over the past three years to become the No. 1 marketer of that commodity.

A buyer has yet to be publicly named for the Spirits and Wines division, although Schenley Imports Co. and Heublein have been mentioned as candidates. The division—consisting of National Distillers Products Co. and Almaden Vineyards—was the No. 3 distiller in the U.S. in 1985 with total case depletions of 13.6 million, behind Jos. E. Seagrams & Sons and Heublein Inc., a division of RJR Nabisco. It accounted for 7.6% of the American spirits market. Analysts estimate that the business will sell for $400-$500 million.

The Spirits & Wines division contributed 30% of the company's revenues and 22% of its operating profit in 1985 with its sales of $680 million on operating profit of $42.6 million. The business has been described as slow growth but highly profitable—sales were up 4.8% and operating profit grew 54.2% in 1985 from 1984.

In the first six months of 1986, Spirits & Wines contributed $333.7 million in sales, up 8.5% over the corresponding period a year earlier, and $122.3 million in operating profit, up 34%. Sales of the division represented 29% of total company sales for the six-month period of $1.16 billion, up 7.4%. Companywide net income for the period was $32.2 million, up 30.4%.

Measured advertising spending, which dropped 8.3% from 1984, is concentrated mostly in magazines (46% of total ad spending) and outdoor (19%) network tv (17%) and net radio (11%). Spot tv was the big year-to-year loser in the media spending, dropping from $1.7 million in 84 to $339,000 in 1985.

National Distillers' biggest growth category has been its DeKuyper cordials line, which has not been its biggest ad category with $1.8 million in spending in 1985, up 50% over 1984. But that category is expected to receive

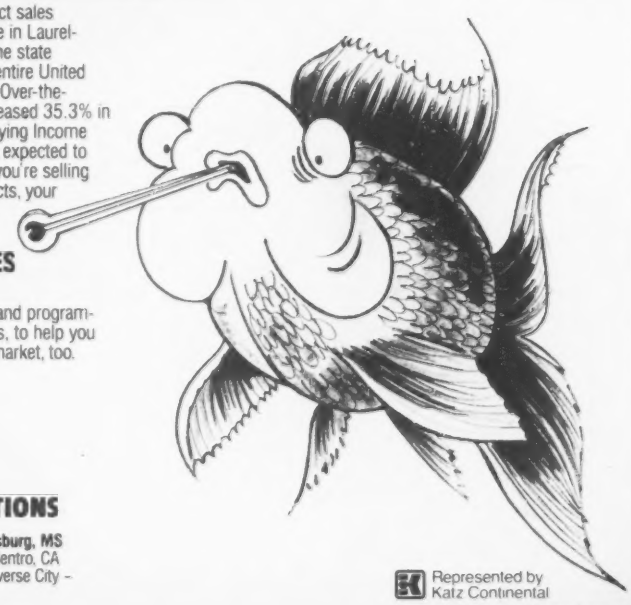
The big guy and the little guy

The battle of David and Goliath, at least on paper, took place this year between Safeway Stores, the Goliath with $19 billion in sales, and the David, Dart Group, a small Landover, Md., company with $97.8 million in sales. Dart collected 5.9% of Safeway shares before Safeway ultimately was consumed by Kohlberg Kravis Roberts & Co. Dart, controlled by the families of Herbert H. Haft and Robert Haft, also owns Trak Auto Corp., Dart Financial and Crown Books Corp.

WHY BE A LITTLE FISH IN A BIG POND?

LAUREL-HATTIESBURG DRUG PRODUCT SALES WILL CURE WHAT AILS YOUR SALES.

Over-the-counter drug product sales per household are on the rise in Laurel-Hattiesburg, outperforming the state by 13%, region by 13% and entire United States by 5% in 1984 alone. Over-the-counter drug sales have increased 35.3% in five short years. Effective Buying Income has increased 70.2%, and is expected to reach 77.5% by 1989. So if you're selling over-the-counter drug products, your sales will be a lot healthier in Laurel-Hattiesburg.



WDAM-TV DOMINATES THE MARKET.

We've got the facts, figures and programming, including the #1 News, to help you dominate this healthy new market, too.

$5 million through 1986.

Case depletion for the DeKuyper line increased 94% from 1984, breaking all sales records for any cordial line in the industry. The success was largely because of DeKuyper Peachtree schnapps, which established a new record as the fastest growing new liquor product with 2.3 million case depletions in 1985.

National Distillers currently has more than a 70% share of the schnapps market with Peachtree alone having more than 50%.

The DeKuyper line consists of Peachtree, Apple Barrel, Mountain Strawberry, Peppermint, Old Tavern Rootbeer, and newly introduced Original Harvest Pear. The line has grown from the 21st best-selling brand in 1984 to the 9th best-selling brand last year. The company attributes increased the growth of sales to an increasing demand for lighter and sweeter tasting drinks. With a 30% increase among consumers of fruit juices, it follows that fruit flavored alcoholic drinks are also becoming more popular.

National Distillers has six other brands besides DeKuyper cordials in the top 50 distilled spirits brands in the country, according to market rankings by John C. Maxwell Jr., analyst at Furman Selz Dietz & Birney, New York. At the top of the company list is Windsor Canadian Supreme moving down from 6th to 7th place with a case depletion of 3.8 million-virtually the same as last year.

Windsor Supreme was bumped out by the fast growing Popov whiskey, distributed by Heublein. Ad spending for Windsor Supreme was down 91% to $3.3 million.

Gilbey's gin dropped another notch this year to No. 14 resulting from a 5% drop in case depletions. Gilbey's was supported with $4.5 million, down 6% from 1984. Kamchatka vodka, No. 15 with a 1.8% increase in case depletion, rose one notch, with ad support of $338,000, up 6%.

Old Grand Dad bourbon fell four ranks to No. 33 after a decrease in case sales of 2.1% and Old Crow dropped four places to No. 36 with a decline in case sales of 8%. Old Grand Dad advertising dropped 15% to $3.4 million, and Old Crow, another bourbon, received no measured spending.

National Distillers placed seventh among the country's leading wine companies with 10.9 million case depletions giving it a 4.4% share of market. Almaden ranked fifth among leading wines, down from No. 3 in 1984, with case depletions down 1.1% to 9.1 million. Ad spending for Almaden wines decreased 13.6% in 1985 to $7.6 million.

Sauza tequila's ad support was up 89% in 1985 to $1.1 million, as sales for the tequila rose 30%, according to National Distillers, which has begun to emphasize marketing of Sauza because of the growing consumption of tequila in the U.S. generally among the more young and affluent. Advertising, appearing in national magazines, is an attempt to change the brand's image from macho to more sophisticated and chic. The company claims that with the introduction of Sauza Grio, a variety of Sauza, the brand is now a close third to No. 1 Cuervo (Heublein) and No. 2 Montezuma (Barton Brands).

In the corporate structure, Drummond C. Bell, chairman and chief executive officer, National Distillers & Chemical Corp., retired in April, 1986. He was replaced by John Hoyt Stookey, formerly president. Mr. Bell will continue as a director and as chairman of the board's executive committee.

Fierce price competition from tv sets and videocassette recorders from the Far East hurt profit margins for North American Philips' consumer electronics lines in 1985. Although sales grew slightly in the year, the softening U.S. economy and pricing pressures from foreign competition caused Philips to post a 37.5% decline in net income compared with record returns in 1984.

This year, the company announced it would take a $10.6 million net loss in the second quarter, following a one-time charge of $21.3 million resulting from plans to withdraw from the manufacture of cable tv equipment and end production of color data displays at the company's Seneca Falls, N.Y., plant. As a result of this and sluggish economic conditions, NAP had net income of only $3.5 million for the first six months of 1986 and operating profit of $24.8 million, down 40% from the year-earlier period. Sales rose 3%, to $2.09 billion.

NAP spent 9.2% more in measured advertising in 1985 compared with 1984. However, advertising and promotional costs—primarily unmeasured spending—dropped about 20%, or $9 million, to $35.9 million in 1985, according to the company.

NAP reduced measured network tv spending by nearly $4 million, about 20%, while shifting $2.3 million into spot tv, $1 million into cable, $310,000 into free-standing inserts and $10,000 into outdoor. NAP eliminated spot radio as an ad medium in 1985, following a sixfold increase in 1984, to $98,500. Network radio, which had no measured spending in 1984, received $569,800 last year.

N.A.P. Consumer Electronics Corp., Knoxville, Tenn., the company's largest and generally most profitable division, was restructured as Philips' worldwide center for consumer electronics products. A new operations group was formed in Knoxville to coordinate worldwide development, engineering and product planning with the parent company, N.V. Philips of Eindhoven, the Netherlands. About 58% of NAP is held by a trust for the benefit of public shareholders of N.V. Philips.

Despite record industry shipments of color tv sets, vcrs and compact disc players last year, NAPCEC, under the Magnavox, Philco and Sylvania brand names, posted a $12.7 million operating loss on stagnant sales of $1.25 billion in 1985. Increased imports of consumer electronics and price pressure competition from Far Eastern manufacturers, together with a softening U.S. economy and stronger U.S. dollar, resulted in sharply lower profit margins.

Electrical consumer products, including the North American Philips Lighting Corp., Norelco and Genie Home Products divisions, accounted for $907 million in sales and operating profits of $73.5 million. Additional consumer products companies, such as Baker, Knapp & Tubbs furniture makers and the Selmer Co. musical instrument maker, contributed $209 million in sales and $18.3 million in operating profits. Professional electronics sales were up, with sharply higher earnings last year, thanks to medical systems and military electronics businesses.

NAPCEC last year introduced 90 tv models under its various labels, as well as a full range of Magnavox computer monitors and a projection tv monitor for educational and industrial uses. In the video category, Magnavox introduced more vcrs and its first single-piece vhs camcorder.

In November, NAPCEC dismissed its agency of 17 years, Doyle Dane Bernbach, New York, saying it wanted to reposition its products during 1986. DDB handled $15 million in billings for the company's Magnavox and Sylvania audio and video products. Backer & Spielvogel, New York, won the Magnavox account in May, 1986, while the Philco/Sylvania account is still in-house.

Already in 1986, Backer & Spielvogel has launched a multi-spot $10 million campaign to build Magnavox sales and image—as the "perfect tv" in the ads. The ads, which broke Oct. 15, tout Magnavox's top-of-the-line tv's 178-channel capability, built-in stereo decoder and an infrared remote control system. The ads are designed to break Magnavox's stodgy "console" image. The creative solution has Magnavox meeting the demands of "videophiles" in the commercials.

Spots share the tagline "Nobody puts it together like Magnavox" and are running during prime time, including "Dynasty," "Hill Street Blues," "Miami Vice" and "Moonlighting." Magazine ads appeared in October, too.

In January the campaign will broaden to feature Magnovox's other lines, including compact disc players and videocassette recorders, according to Mike Keel, vp advertising at the company.

In 1985, the Magnavox line was backed by $6.4 million in measured ad spending last year, up 3% from 1984, according to Leading National Advertisers. Some $3.1 million of that supported Magnavox tv sets, all in magazines. Measured spending dropped 27% for Sylvania to $3.8 million in 1985, 97% of which backed its tv sets, virtually all in spot tv. Philco tv sets had measured spending of less than $10,000 last year, down from $652,000 in 1984.

Philips Home Interactive Systems, a new division of NAPCEC, in November, 1985, introduced its first product, the Magnavox Videowriter, retailing for $800. Billed as "the first complete word-processing system for the home," the Videowriter combines typewriter, video terminal and letter-quality printer in a single portable unit, targeted to consumers who want word processing features without the bother of a computer terminal. The Videowriter is being introduced under the Philips name in Europe this year.

Norelco Consumer Products, a subsidiary of the electrical consumer products division, is the perennial leader of the $276 million electric shaver category, with an estimated 50% share. Norelco measured spending increased 15.5% to $13.4 million, some $9 million of which backed product introductions in the men's and women's shaving categories. Last fall the company launched its men's Rototract electronic shaver, the Delta rechargable shaver, Ladyshave cord and cordless shavers and Lady Schick razors in fashion colors. Some $6.7 million of the $9 million was spent on network tv and $1.1 million on cable tv.

In response to a patent infringement suit brought against Norelco by Windmere Corp., Hialeah, Fla., last December, Norelco said it would withdraw its Ronson electric rotary shavers from the market, but advertised them until its $2 million inventory was sold. Windmere brought suit against Norelco for unfair pricing practices.

Under its new Garment Care division, Norelco launched a line of four Ultra-light irons in June, 1985, and claimed 10% of the 13 million-unit market worth $275 million by December. However, Jim Stevens, editor of *Appliance Magazine*, currently places Norelco's share at 6%, ahead of West Bend with a 3% share, but trailing Black & Decker 43%, Sunbeam 21%, Wear-Ever/Proctor Silex 19% and Hamilton-Beach 7%.

Norelco, which spent $783,000 on irons, all in network tv, joined the pack of consumer appliance marketers hoping to cash in on GE's withdrawal from the market when it sold its housewares division in 1984 to Black & Decker. B&D has aggressively advertised GE's line of lightweight, automatic shut-off irons as it converts many of the GE brands to the B&D logo. NAP says it is aiming for a 20% total market share in the iron category.

The Home Security line, featuring smoke detectors, electronic timers and property identification kits, also was introduced in June, 1985. Other Norelco product entries for 1985 include electric hair setter with flocked rollers, flocked curling iron and flocked curling brush, and a new Man Care beard and moustache trimmer.

Norelco in December, 1985, changed its ad claims for its tabletop Clean Air Machine when the Federal Trade Commission said performance did not meet company claims. Norelco leads the household air cleaner market with 40% share. Ads, via McCaffrey & McCall, stated the Clean Air Machine cleaned "substantially all" or helped clean "a substantial portion" of smoke, dust, pollen or tobacco from the air.

Norelco introduced a rechargeable electric knife, a Tall-Can countertop can opener and an electric corkscrew. Following the highly successful Dustbuster from Black & Decker, the company brought out its own rechargeable Quick Bro hand-held vacuum and the Clean Up Machine 2, a combination rechargeable hand vacuum and spotlight.

Although sales for North American Philips Lighting Corp. were ahead of 1984 levels, growth in the U.S. lighting market dimmed to only 3% in 1985, compared with 19% growth in 1984 and 14% in 1983. Net income for the division was affected by a $15 million advertising and promotional campaign to introduce Philips light bulbs and lamps.

The campaign raised consumer awareness of the brand-name transition from Westinghouse light bulbs and lamps to the Philips name. NAPLC in 1983 purchased the Westinghouse business. Network tv, free-standing inserts and sweepstakes promotions, begun in September, 1985, were handled initially by Gianettino & Meredith, Mountainside, N.J. Earlier this year, NAPLC moved its account to DFS Dorland Worldwide, New York.

Philips Home Products division (formerly Genie Home Products) had total measured spending of $3.2 million last year and backed its Genie remote controls with $1.5 million in spending on network tv. Genie, the leader in the garage door opener market, last year introduced a garage trash compactor called the Beast, a keyless garage door entry system and a microchip powered Stud Detector for do-it-yourself home builders. Measured support of $3.2 million, up 10.3%, was provided for various Genie products, with the remote control system receiving the greatest backing, or $1.6 million. Last January, PHP moved its account to W.B. Doner & Co., Detroit, from Hesselbart & Mitten, Fairlawn, O.

In September, 1986, NAP agreed to sell its furniture subsidiary, Baker, Knapp & Tubbs, to Kohler, Wis.-based Kohler Co., the largest U.S. plumbing fixtures marketer. Earlier in the year, the company had consolidated two Holland, Mich., plants, and combined upholstery facilities in High Point, N.C.

In other operations, Anchor Brush Co. got a boost in sales last year by producing the new Colgate Plus toothbrush line for Colgate-Palmolive and packaging for Maybelline's new Expert Eyes mascara line. Musical instrument manufacturer Selmer Co. had modest sales growth despite a heavy influx of imports and a decline in band and orchestral segments of the musical industry. Philips Medical Systems business showed strong growth in diagnostic product lines.

NWA Inc., parent company of Northwest Airlines, contributed to the merger turbulence of the airline industry with the $884 million acquisition in August, 1986, of Minneapolis-based Republic Airlines.

The two carriers completed consolidation of schedules and other operations Oct. 1, leading to several marketing changes:

- NWA changed the name of its operating unit from Northwest Orient to Northwest, reflecting its broader domestic scope.
- The airline rehired Republic's ad agency, DFS Dorland Worldwide, after an earlier decision to retain Northwest agency Grey Advertising, which was then dumped.
- Former Republic marketing execs who moved to Northwest brought with them the airline's successful "Perks" frequent flier program, renaming it "Worldperks."

Northwest's ad spending in 1985 totaled $45.4 million, a 29.5% increase from 1984, the company says. Measured U.S. spending was $25.4 million; total estimated U.S. spending was $35 million. Republic, which is not represented among 200 leading national advertisers monitored by Advertising Age, spent an estimated $25 million in the U.S., including $19.2 million in measured media; it did not operate extensively internationally.

For 1985, Northwest alone posted operating revenues of $2.66 billion, an 8.6% increase from a year earlier. Net earnings were $73.1 million, a 30.7% gain from 1984, but operating income was down 20%, to $77 million. The company blames the decline on industrywide fare discounting, but says its load factor—or percentage of available seats filled—remained virtually the same at 60.5%.

For the six months ended June 30, 1986, Northwest had net earnings of $7.5 million, a 79% decline from the year-earlier period, on operating revenues of $1.34 million, up 5.6%. It posted an operating loss of $23 million, compared with a $41 million loss in the year-earlier period.

Republic had record 1985 net earnings of $177 million, compared with the $29.5 million posted a year earlier, on operating revenues of $1.73 billion, up 12%.

Pending consummation of other acquisition deals in the industry—including Texas Air Corp.'s pending buyout of Eastern, Frontier and People Express Airlines and Delta's bid for Western Airlines—Northwest will rank fifth among U.S. airline companies with a 9.9% market share, according to Merrill Lynch estimates.

Company estimates for the first six months of 1986 ranked Northwest sixth among the 28 major U.S. airlines with a 6.5% domestic share; Republic ranked ninth with 3.5%, Northwest says.

Together, the combined Northwest and Republic serve 130 U.S. and international cities with 30,341 employes from headquarters in St. Paul and Minneapolis. Northwest's major domestic hub is in Minneapolis/St. Paul, while Republic's major hubs are in Minneapolis/St. Paul, Detroit and Memphis.

Northwest utilizes about 80% of the gates at Minneapolis-St. Paul International Airport, which raised concerns in the Justice Dept. about monopolizing that market. But the Department of Transportation approved the acquisition, saying other carriers provide adequate competition. (The DOT used similar reasoning in its September approval of Trans World Airlines' purchase of Ozark Airlines; both carriers maintain major hubs in St. Louis).

Analysts say the acquisition strengthened Northwest's system by giving it access to "feeder" traffic for its strong international service, in Asia and Europe. Northwest faced increased competition on those routes in February, when United Airlines, Elk Grove Township, Ill., began serving several new Pacific destinations and backed its service with a major ad campaign via Leo Burnett USA, Chicago.

Republic's service had been strongest in the Midwest and South; the 39-year-old airline was created from mergers between North Central Airlines, Southern Airways and Hughes Airwest. DFS Dorland Worldwide, New York and Minneapolis, was the most recent Republic agency, and the transfer of Republic marketing executives to Northwest led to its rehiring on the estimated $55 million to $60 million account resulting from the acquisition.

Initially, Northwest had awarded the consolidated account to its agency, Grey Advertising, Minneapolis. But dissatisfaction with Grey's work on the postmerger advertising led the airline to do an about-face, even after DFS Dorland had shuttered its Minneapolis office. The account now will be split between DFS' New York and Minneapolis offices; the latter since has been reopened.

Also making the crosstown trip from Republic was "Perks," the airline's trade name for its successful frequent flier program. It has been renamed "Worldperks" to reflect the international scope of Northwest's operations. A.B. (Sky) Magary, the former senior vp-marketing at Republic, has been elevated to exec vp-marketing at the new Northwest. He supervises Northwest vp-advertising Bryan Moon and former Republic ad director John Temple, now senior director of marketing programs.

Grey's last work for Northwest included ads created to announce completion of the merger. They were themed, "The biggest airline merger in history means the world to you," although Northwest may not maintain that distinction for long. DFS' first work for the merged entity included ads, themed "Look to us," that broke Oct. 1 to announce schedule consolidation and the new "Worldperks" program. The new ads position the merged airline as a geographic leader in air travel.

Like many in the deregulated airline industry, Northwest and Republic forged marketing links with the growing number of regional carriers to fill seats on its own longer-haul flights. Republic Express and Northwest Airlink were but two of the many short-distance airlines or marketing entities created from smaller carriers using propeller jets to serve smaller markets in cities near its major hubs.

Northwest Airlink, the surviving regional entity, is a combination of six regional airlines. The most recent partner is Express Airlines One, Atlanta, formerly known as Republic Express. It began service Oct. 1 from Milwaukee to Grand Rapids, Mich.; Green Bay and Oshkosh, Wis., and Chicago's Midway Airport. Expess Airlines One also serves several markets from Minneapolis that it previously served for Republic. (Northwest provides service to Midway and the larger O'Hare International Airport from Minneapolis and Detroit).

Other	1,206	1,050	14.9

Nynex Corp. is invading the national office automation market, and analysts say the move is an attempt to quickly establish itself as a leading provider of computer and telecommunications equipment nationwide.

New York-based Nynex acquired 81 International Business Machines Corp. Product Centers in 33 states and the District of Columbia on June 30, 1986, for an undisclosed price, combining these the next day with its 21 Datago Business Centers under the new name of Nynex Business Centers.

Nynex is now tied with Chicago-based Sears, Roebuck & Co. as the largest nonfranchise computer retailer with 102 outlets each. San Jose, Cal.-based Businessland Inc. is third with 95 outlets, according to Alice Brown, president of Dallas-based StoreBoard Inc. IBM continues to sell through authorized dealers, but froze its dealer network at 2,500 outlets in fall, 1985.

Nynex, which entered the retail computer market in December, 1984, is far behind the largest franchise outlets, including Oakland, Cal.-based Computerland, with 578 stores, and Vienna, Cal.-based Entre Computer Centers, with 223 stores.

Nynex is one of the seven Transcommunications companies created by the breakup on Jan. 1, 1984, of American Telephone & Telegraph. It is comprised of two main divisions: New York Telephone and New England Telephone & Telegraph.

The company devoted 79%, or $19 million, of its measured ad spending in 1985 to spot tv, with $11.9 million promoting services of the two telephone companies. Spot tv totaled 73% of measured ad spending in 1984. Another $3.2 million in measured spot tv was spent on corporate advertising and advertising for Nynex Business Systems and Nynex mobile communications divisions in 1985, according to Leading National Advertisers.

Corporate promotion accounted for $2 million in measured magazine spending, with another measured $2 million divided between magazine and newspaper for New York Telephone, according to LNA. In January, 1986, Nynex retained incumbent Young & Rubicam for its corporate account. New York Telephone's current advertising is geared to increasing telephone use in addition to promoting new digital transmission services.

New England Telephone's ad spending jumped 54% in 1985, according to LNA, as the company began positioning itself in December, 1984, for its first local toll-call competition from MCI Communications and U.S. Sprint. New York Telephone spent heavily on brand-awareness ads based on the theme: "New York Lives on New York Telephone." The company also boosted ad spending for Nynex Yellow Pages by 23% to $4 million in 1985 in response to the 1986 entry of New York Yellow Pages by St. Louis-based Southwestern Bell Telephone Co.

Nynex also began extensive promotion in 1985 of the Pathways family of digital network services that fit the specialized needs of residential and business customers. Pathways services are the first step in Nynex's evolution to an integrated services digital network that will carry voice, data and video transmission on the same circuit.

A key to this evolution is installation of fiber-optic cable to carry the ever growing load of digital transmission. Nynex is investing heavily in installing fiber optics in Manhattan, Brooklyn, Boston and other centers of business and technology.

Nynex posted the largest second-quarter 1986 earnings increase of the seven regional Bell holding companies, up 18.4% to $310.8 million over the same period in 1985. First-quarter earnings were $296.5 million, up 15% from the 1985 period. Nynex also recorded strong growth in 1985, its second full year since divestiture. During 1985, the telephone subsidiaries provided 93% of Nynex's operating revenues.

The excess cash that Nynex is generating presents opportunities to diversify into unregulated areas, such as computer retailing, says Neil D. Yelsey, analyst with Salomon Brothers, New York. These unregulated businesses offer strategic opportunities in addition to potentially higher returns than regulated business, he says.

Whether acquisitions such as the IBM Product Centers will be profitable remains to be seen, analysts say. "I can't say I was 100% in favor of this acquisition," says Pat Jurczak, investment analyst and vp-research at E.F. Hutton, New York.

On the positive side, Nynex is attempting to offer one-stop shopping, he says. "When you get right down to it, the customer wants to deal with one provider." But on the negative side, Nynex is pouring money into an industry suffering its worst slump in history, the analyst says.

"If IBM can't make money [in retail] what do you expect Nynex to do?" says Fritz W. Ringling, vp-strategic and telecommunications systems with Gartner Group, Stamford, Conn. There is little synergy between Nynex's basic telephone business and the product centers, he says. "I haven't seen anything that gives me confidence [that Nynex will succeed]."

Douglas J. Mello, president of Nynex Businss Information System, says the acquisition involves more than simply changing the name on the door. "We're re-evaluating their operating philosophy . . For starters, we intend to bring more products on board, giving customers a freedom of choice."

Mr. Mello, formerly an executive with New York Telephone, was appointed president of the division in December, 195. Several IBM executives joined the division in July, 1986, with the acquisition, including James N. Turner, now senior vp, Nynex Business Centers, formerly IBM's vp-retail marketing. Others include J. Robert Chamberlain, vp-sales; David J. Cotcher, vp-operations and marketing support, and Warren L. Pillsbury, vp-marketing.

Analysts say Nynex is making another important move with its planned $10 miliion acquisition of Washington-based Tel-Optik, a venture firm licensed by the FCC to lay a fiber-optic cable between New York and London. Tel-Optik is in partnership with London-based Cable & Wireless plc in the $300 million to $400 million project, planned for completion in June, 1989.

Nynex signed a conditional agreement in August to buyTel-Optik will seek a waiver to participate in the venture from Judge Harold Greene, who supervised the breakup of AT&T. With this acquisition, Mr. Ringling says, Nynex is chipping away at Judge Greene's prohibition against the regional Bell companies entering the long-distance business. This may open the door for their entry into other unregulated businesses.

"The acquisition of Tel-Optik gets you into the long-distance business. There's no other way to slice it," Mr. Ringling says. "The acquisition itself does not involve much money, but it's done to set a precedent."

Mr. Ringling and other analysts say it is these types of actions that are giving the regional companies a reputation for being "pushy." But Delbert C. Staley, Nynex chairman-ceo, responds to such criticism, saying, "My answer is that asking if we're too aggressive at this time is as meaningful as asking if we were too sleepy before."

Pacific Telesis Group is moving quickly to establish itself in its regulated telephone service territory and in the unregulated markets for mobile communications, information services and publishing.

PacTel's two main telephone subsidiaries serve California and Nevada, the former among the largest and the latter among the smallest of the nation's Bell operating companies. The contrast in size is evident in measured media spending for the two units: Nevada Bell spent a measured $16,000 in 1985 entirely on magazines, compared with Pacific Bell's total measured ad spending of $13.1 million, up 6%, according to seven-media brand spending in Leading National Advertisers. Pacific Bell's spending was divided 84% spot tv, 14% magazine, and 2% newspaper supplement.

Pacific Bell's spending represented 61% of PacTel's total measured spending of $21.5 million in 1985 for the LNA media. Spot tv claimed 82% and magazines 16% of the total. PacTel's 11-media total monitored grew 16.5% to $32.1 million.

Pacific Bell Directory, a subsidiary of Pacific Bell that publishes white and yellow pages directories in areas served by Pacific Bell and Nevada Bell, received $5.4 million in measured media, virtually all in spot tv. The unit introduced several specialized directories in 1985, including the *Business Buyers Guide*, a guide for purchasing agents in northern California, and *Las Paginas Amarillas de Pacific Bell*, a Spanish-language yellow pages for the Los Angeles area.

Pacific Telesis has pursued a conservative course in moving into unregulated markets, says Gerald Mayfield, president-professional services division, DMW Group, a Stamford, Conn.-based consulting company. "They were slower out of the chute than the other regional Bell holding companies. Their first priority was repairing their relationship with the California Public Utilities Commission (CPUC). But we're seeing them move now."

The California commission traditionally had been uncooperative in granting rated increases when Pacific Bell was a subsidiary of AT&T, but that attitude has softened somewhat since PacTel took over, Mr. Mayfield says. PacTel did extract a key ruling by CPUC allowing Pacific Bell to shift a portion of its access charge revenue requirements from interexchange carriers to end-users of telephone service. For many years, charges for business long-distance service have subsidized the cost of residential service, causing businesses to try to find ways to bypass the local network for long-distance calling and thus avoid paying local access charges.

The ruling eliminates some of the economic incentives to bypass the local network.

PacTel was among the most profitable of the Bell holding companies in 1985 with net income of $929.1 million, up 12% over 1984. Revenues in 1985 were $8.5 billion, up 8.6% over 1984. For the first six months of 1986, net income was $556.9 million, a 19.2% gain over the same period in 1985. Revenues for the period were $4.48 billion, up 7.2%.

PacTel is making a bold move in the market for cellular telephone and paging services. On May 25, 1985, it agreed to pay $431 million to acquire Dallas-based Communications Industries, a marketer of paging and cellular communications services with operations in Dallas, Atlanta, Tampa and other markets.

The deal set a precedent when it was approved Feb. 27, 1986, by Judge Harold Greene of the Federal District Court in Washington, who supervised the breakup of AT&T. For the first time a Bell company was allowed to gain a toehold in local communications service outside its area. Other Bell companies have since expanded into similar cellular and paging operations outside their service areas. Southwestern Bell leads in that market followed at a distance by No. 2 Bell Atlantic, and No. 3 Pacific Telesis.

But PacTel is rapidly expanding its cellular service. PacTel took over Communications Industries' 23.5% interest in a cellular system in San Francisco and San Jose, Cal., which began operations in 1986, and opened cellular service in Sacramento, Ventura/Oxnard and San Diego in 1985.

PacTel also agreed in May, 1985, to buy Portland, Ore.-based Byte Shops Northwest for an undisclosed price, incorporating it into its PacTel InfoSystems unit. The computer chain announced plans to open eight retail and demonstration centers in the Los Angeles and San Diego areas, in addition to 15 existing centers located in San Francisco, Portland and Seattle. Analysts speculate that PacTel is consolidating its base on the west coast in reaction to a growing threat from New York-based Nynex Co. Nynex in April, 1985, bought 81 IBM Product Centers, bringing its total retail outlets to more than 100. A PacTel spokesman denies the rumor.

Airline	3,090	3,334	(6.5)
World service	394	381	3.4

Pan American World Airways, the airline subsidiary of Pan Am Corp., New York, is back on the road to profitability in 1986 as a result of a fundamental reshaping of the carrier's route network following the sale of its Pacific division and long-term agreements with labor unions that bring the carrier's operating costs in line with the rest of the industry.

But Pan Am's performance in 1986 is expected to suffer as a result of two incidents in the spring of 1986: the bombing of a TWA jetliner in Athens and the U.S. bombing raid on Libya. Both incidents occurred at the peak of bookings for European vacation travel and will have a major impact on this year's results, says Pamela Hanlon, system director in Pan Am's office of corporate communications. "Clearly, from a timing point of view, the TWA bombing and the Libyan incident could not have happened at a worse time," she says.

The impact was felt immediately on Pan Am's bottom line. Passenger revenues fell to $495 million in the second quarter, ended June 30, 1986, from $666 million for the same period in 1985.

The airline's load factors, a measure of the percentage of occupied seats, fell to 45.7% for the quarter, compared with 66.9% for the same period in 1985.

The terrorist scare had little impact on business travel, which grew during the period and was the main reason Pan Am's systemwide yield increased by 9.3%. Yield is the revenue received for each revenue passenger mile flown. The business travelers stimulate revenue because they are consistent travelers who are not as price-conscious as the general public. Revenue passenger miles in the second quarter—a measure of flying one paying passenger one mile—fell to 4.95 billion, compared with 6.6 billion for the 1985 second quarter.

Pan Am's corporate results for the first six months of 1986 included operating revenues of $1.35 billion, down 12.6% from the same period in 1985. The company had an operating loss of $195.6 million for the period, compared with an operating loss of $151.5 million for the same period in 1985. Net loss for the six-month period in 1986 was $270.8 million, compared with a net loss of $210.8 million for the same period in 1985. The figures include $36 million and $9 million, respectively, in foreign exchange losses. The Pan American World Airways division accounted for 74% of corporate revenues and all of the operating losses.

Pan Am's measured ad spending in 1985 jumped 46.8% to $34.2 million. A near doubling of measured newspaper spending to $21.2 million for retail, route and incentive advertising, or 62% of the measured total, was by far the largest spending category.

Jeffrey Kriendler, vp-corporate communications, says the large increase in newspaper spending resulted from the reshaping of Pan Am's route system after the $750 million sale to United Airlines of Pan Am's Pacific division, completed Feb. 11, 1986. The transaction called for United to take over the Pacific division as an ongoing operation, including the transfer to United of 18 aircraft, all division assets and landing rights.

The $750 million cash infusion enabled Pan Am to pay off $244 million in long-term debt, reduced its capital lease obligations and increased stockholder equity by $341 million.

The aircraft transaction also simplified Pan Am's fleet by transferring to United all of the airline's 11 Boeing 747-SPs, its six Lockheed L1011s and one DC10.

The route structure that Pan Am announced would be created after the United deal was completed would focus on markets with the greatest potential for generating revenues. Trans-Atlantic service to 32 European cities was to account for 66% of the airline's available seat miles in the summer of 1986, up from 52.3% in 1985.

Capacity on Latin American routes was to represent about 16% of the airline's total seats, up from 11% in 1985. Domestic routes were to account for 18%, up from 16%.

But after the TWA and Libyan incidents, Pan Am scaled back plans for increasing capacity to Europe, allowing only 5% growth over summer, 1985, and focused instead on Latin America and the domestic front, Mr. Kriendler says.

The carrier added one extra daily 747 service between New York-Los Angeles, New York-San Francisco and Los Angeles-Miami, for example.

However, Pan Am fought hard for European vacation traffic in mid-1986 by introducing a new, enhanced security profile program in June and two-for-one price incentives in July for vacation travelers.

Because the advertising spending was strategic in nature, "It was felt that it would be more advantageous to use print for our route network," Mr. Kriendler says.

He says vacation traffic to Europe began returning to normal levels in mid-July 1986. Traffic in the peak vacation month of August was off only one-half of 1% at 1.54 billion revenue passenger miles, a Pan Am spokesman says.

Pan Am also made moves in other marketing areas. The company signed an agreement in spring, 1986, with American Airlines to buy reservations and passenger handling services from American. As part of the agreement, Pan Am established a marketing alliance in June, 1986, between its World Pass frequent flier plan and American Airlines's AAdvantage plan, integrating the programs so members of both accrue mileage and awards on either carrier.

Pan Am also purchased Ransome Airlines for an undisclosed price, renaming it Ransome-Pan Am Express. Ransome is a northeastern regional carrier that provides feeder service into Pan Am's long-haul routes at John F. Kennedy International Airport and also from Norfolk, Va., to Washington's Dulles Airport.

On Oct. 1, 1986, Pan Am entered a heated battle with Miami-based Eastern Airlines, now a wholly owned subsidiary of Houston-based Texas Air Corp., to provide shuttle service between New York's LaGuardia Airport and National Airport in Washington and between LaGuardia and Logan Field in Boston. Pan Am paid $62 million to Texas Air for enough landing slots in New York and Washington to operate 15 round-trip flights each day and for several airport gates in New York and Boston, a spokesman for the U.S. Department of Transportation says.

The sale was part of a deal Texas Air struck with the DOT in acquiring Eastern, in which Texas Air agreed to discontinue the shuttle operations of its New York Air unit Oct. 1 in return for allowing Eastern to continue its larger, more profitable shuttle operations as a part of Texas Air.

The northeast corridor shuttle service between New York and Boston is the nation's largest and most profitable airline market, handling 4.7 million travelers per year, analysts say. New York to Washington is the fourth largest market, handling about 3.4 million passengers per year.

Pan Am estimates that 1.8 million passengers will fly between LaGuardia and Washington each year and about 2.1 million between LaGuardia and Boston.

Michael Derchin, airline analyst for New York-based First Boston Corp., says Pan Am's move into the shuttle market, combined with its marketing alliances with American and acquisition of Ransome, in addition to its restructured route system all bode well for a return to profitability in 1987. Barring unforeseen problems, "Pan Am might make some money next year for the first time in many years."

A headlong rush to expand in 1985 sent People Express Airlines into a financial tailspin of plummeting earnings and stock prices, culminating with its agreement in September, 1986, to be acquired by rival Texas Air Corp. for about $125 million.

The deal, which would rescue People from almost certain bankruptcy and which immediately advanced the airline $10 million in sorely needed cash, had received tentative approval from the U.S. Department of Transportation in late October.

People founder and chairman Donald Burr embarked on an aggressive crusade in 1985 to build the discount-priced regional carrier into a major national airline. This led to the purchase of several small regional carriers and the big $100 million purchase of Frontier Airlines in November, 1985.

But the acquisition of Denver-based Frontier, a conventionally managed, unionized carrier catering to business travelers, backfired when People attempted to turn Frontier into a low-price, no-frills carrier. Frontier customers deserted the airline in droves, and the unit lost $10 million a month before People made a desperate—and eventually unsuccessful—attempt to sell it to United Airlines.

People's rapid-fire expansion in 1985 clashed with the airline's former philosophy of growth from within and taxed its customer service level. At the same time, People's bargain-fare niche eroded sharply as larger competitors, including United, Continental Airlines and American Airlines, reduced operating costs and passed the savings on to customers by slashing fares.

Soon after People acquired Frontier, the subsidiary became locked in a costly fare war in Denver with United and Continental. Steep losses from Frontier forced People to raise its fares elsewhere, a move that was not well received by consumers. As a result, People had to rescind its price increases, backed by a heavy schedule of local print and radio ads.

The damaging expansion spree began with adding a host of new markets to the People Express system. Cities added in 1985 included Montreal, Dallas, Atlanta, St. Louis and more than 10 other markets. People also bought two regional commuter carriers, Terre Haute, Ind.-based Britt Airways and Naples, Fla.-based Provincetown-Boston Airline.

Analysts say the Frontier acquisition was a crucial misstep because the buy ended up costing People far more than Frontier was worth.

To support all the activity, People hiked its measured spending for 11 media monitored in this issue from $8.95 million in 1984, all in newspapers, to $39.7 million, still largely dominated by national newspaper spending of $29.2 million. Spot tv accounted for 7.4% of the total, magazines 7%, spot radio 5.9% and outdoor 5.8%.

People in 1985 made moves to go after business travelers in an effort to become less dependent on discretionary travelers, who fly mostly in summer. The airline began installing a computerized system to help it price and sell seats more effectively, and it started to reconfigure its jets to offer first-class service on most flights. First-class had been available only on transcontinental and trans-Atlantic flights served by People's jumbo jets. The effort sought to transform People into a more conventional airline offering standard items like free meals and baggage handling. A magazine campaign pitched People as more than a cut-rate carrier.

People also introduced its first travel packages, bundling rental cars and hotel rooms with seats to vacation markets such as Florida. The packages are an effort to encourage travel agents to book their customers on People. People sold some 10,000 packages in 1985 and wants to sell 200,000 of them in 1986. Travel agents account for up to 80% of bookings for the major full-service airlines, while they only contribute about 20% of People's reservations.

The image revamping strategy to attract higher-paying business customers is a great risk for People, which earned its reputation as the country's first major no-frills discount carrier, catering mostly to the young.

The moves also brought changes to People's once-informal management style. The carrier in 1985 began to set up more elaborate management structures that conventional business sense dictates are needed to run a big airline efficiently and profitably.

The culture change at People had a direct effect on advertising. The carrier introduced an uncharacteristic air of bureaucracy and tighter approvals processes to its informal relationship with longtime agency Plapler Russo & Associates, New York. Agency execs say People's retrenchment effort has meant longer turnaround for implementation of new campaigns, which in the past often swept through approvals in a matter of days.

The Plapler agency had anticipated a windfall from People's acquisition of Frontier. The agency created an extensive print and radio campaign heralding the merged airline as the "People Express Team." But a planned network tv campaign never materialized because of Frontier's financial woes, overcapacity in planes and aggressive fare-cutting by competitors.

People's demise via the planned sale to Texas Air brought the curtain down on Mr. Burr's entrepreneurial crusade to build a national no-frills airline and set up the possibility of the innovative airline exec rejoining forces with ex-partner Frank Lorenzo, Texas Air chairman-ceo. Mr. Burr served as president of Mr. Lorenzo's Texas International in the late 1970s.

The manufacture and sale of instant imaging products continues to be the mainstay of Polaroid Corp.'s business, and it may be the only area that did not undergo upheaval during 1985.

During the past year, Polaroid changed several of its advertising agencies, including its sought-after consumer photography business; introduced a new photographic system; rearranged vital portions of its corporate infrastructure, and nearly settled a 9-year-old Hatfield-and-McCoy-type feud with Eastman Kodak Co. Polaroid seems to have come out none the worse for wear and seems stronger and more optimistic about its future than it's been in a long time.

The unit sales at Polaroid are not so bright, as they continued to decline. In 1985, Polaroid sold 3.5 million consumer cameras, compared with 3.6 million in 1984 and 3.8 million in 1983. While international unit sales remained steady, U.S. sales, which account for 60% of Polaroid's business, declined slightly in unit terms. However, two 1985 events could alter the downward sales trend.

First was the victory Polaroid claimed Oct. 11, 1985, in its nine-year patent infringement suit against Kodak. The U.S. district court for Massachusetts issued a permanent injunction, which took effect Jan. 8, 1986, barring Kodak from the manufacture, use or sale of instant cameras and films.

The instant imaging business is an important one because of its potential commercial and industrial application and its use in electronic imaging systems. Kodak's exodus means that part of the $1 billion instant photography business in the U.S. will pass to Polaroid. Kodak had about 25% of market in 1985, and half of that is expected to go to Polaroid, according to the Value Line Investment Survey. Still to come is the damages involved in the settlement. One analyst predicts damages could run $500 million to $1 billion.

The second impetus to Polaroid's business came in the form of a new instant camera system, Spectra. Spectra was introduced by an extensive $40 million advertising campaign, which kicked off April 21, 1986, on network tv.

The Spectra system includes a camera that focuses and controls exposure automatically. A computer-like circuitry system within the camera can make more than 30 focusing and exposure decisions within 50/1000 of a second. The camera operates on a higher-quality instant color film and has many accessories.

Though some industry observers believe the $130 to $249 retail price for the camera, and a $1 cost per shot could be prohibitive, Spectra appears to be doing well. According to Peter Enderlin, photo-marketing analyst with Smith Barney, Harris Upham & Co., after four months on the market, Polaroid was cranking out cameras and film seven days a week on three shifts to meet demand. Despite such full-capacity production, dealers were complaining initially about distribution delays and forced film rationing.

Polaroid's marketing strategy, which was to tap a more upscale market, seems to have paid off. The ad campaign was supplemented by demonstrations at stadiums, national parks and theme parks.

Five months before Spectra hit the market, Polaroid named a new agency to handle its estimated $45 million consumer photography account. Ally & Gargano, New York, which only 16 months earlier had replaced Doyle Dane Bernbach, New York, Polaroid's agency of record for 30 years, by snapping up Polaroid's consumer business, made a quit-rather-than-be-fired move when Polaroid invited four other agencies to pitch the Spectra system. BBDO was tapped as Ally & Gargano's replacement in November, 1985.

BBDO had been handling Polaroid's sales promotion and direct response activities before taking over the consumer-photography account. Some say the reason for Ally & Gargano's departure was that the agency and Polaroid, a firm believer in consumer recall tests, disagreed on the weight test scores should carry in determining the success of a campaign.

The current Spectra campaign, with the theme "We take your pictures seriously," is BBDO's first effort for Polaroid as its consumer account agency.

DDB, which had held onto the industrial advertising portion of Polaroid's account, resigned its remaining $2 million worth of business when it lost some $20 million worth of Polaroid's Middle Eastern and European advertising to Ogilvy & Mather.

Polaroid's current marketing strategy targets new parents, extended families and young adults. One promotion ties Kimberly-Clark's Huggies disposable diapers with a free Polaroid camera offer. This audience choice seems to be paying off; Mr. Enderlin of Smith Barney estimates sales in 1986 are running 25% ahead of 1985.

Nevertheless, Polaroid wishes to secure its future on several fronts. Polaroid continues to be committed to new technologies, such as electronic photography. Even though research and development expenditures declined to $118.7 million in 1985, down 12% from 1984, the company plans to spend more than $25 million a year in its new microelectronics laboratory.

Analysts applaud Polaroid's recognition of the need to broaden its base from the not-so-robust instant photography business into higher-growth areas. Mr. Enderlin sees Polaroid taking on various aspects of electronic imaging, fiber optics and medical diagnostics to secure long-term growth. Polaroid already comprises three distinct business units—consumer photography, industrial technology and magnetic media.

Polaroid's industrial and professional-type films currently number 45, including seven film introductions in 1985. Also in the past year, Polaroid introduced an instant video film recorder that produces high-quality instant prints on slides from video images. Polaroid spends about $2-$3 million annually advertising its industrial and technical products.

Though U.S. unit sales of consumer cameras were down in 1985, over-all U.S. sales increased 5% in dollar terms, which company officials attribute to the sale of magnetic products. Polaroid's magnetic media business is a little more than two years old, and its videocassettes account for a 10% share of the about $1 billion U.S. videocassette category, Mr. Enderlin says. Competitors include 3M, TDK and Sony, which Mr. Enderlin estimates each holds between a 15% and 20% market share.

"The Polaroid name has translated well into the videocassette category," Mr. Enderlin says, adding that the quality of the tapes, manufactured by JVC (vhs format) and Sony (Beta format) to Polaroid specifications, is also good. Polaroid also carries a complete line of tapes in 8mm format, which are manufactured by Toshiba. With Polaroid apparently relying on name and package recognition, advertising support for videocassette tapes fell from $870,000 in 1984 to just $54,000 in 1985.

One new area that has not done so well for Polaroid is its negligible showing in the $600 million to $700 million U.S. floppy disc market, where it is up against the same competitors as in the videocassette category. During 1985, two additional disc products were added, and a separate sales force was set up to market the discs to retail and end-user accounts, distributors and through catalogs. Polaroid established a proprietary Data Rescue Service, which recovers data lost by Polaroid disc users. During the year, Polaroid purchased a major portion of Verbatim Corp.'s Data Encore division, which includes disc duplication systems and proprietary data protection systems.

On Jan. 1, 1986, I.M. Booth, 54, president of Polaroid, also became ceo. Mr. Booth succeeds William J. McCune Jr., 70, as ceo, while Mr. McCune continues as chairman of the board. Peter O. Kliem, senior vp and assistant director of research, was named director of research to succeed Howard G. Rogers, who retired.

Company earnings are expected to rise sharply in 1986 because of a reduction in payroll costs, a weaker U.S. dollar and vigorous marketing. Spectra sales could reach 10% to 15% of company sales, according to the *Wall Street Journal*, which quotes Mr. Booth. International markets accounted for 40% of Polaroid's product sales and 60% of its operating profits in 1985. Ad spending in 1986 is expected to parallel that of 1985. During 1985, Polaroid decreased its spending in newspapers (down 57%), magazines (down 47%), and cable tv (down by 57%). At the same time, spending in the business press nearly doubled.

Capital gains	1,879	395	375.7

A new chairman-chief exec officer, Robert C. Winters, is taking the helm of Prudential Insurance Co. of America, but the company is expected to chart much the same course set by retiring Robert A. Beck, who announced his resignation in September.

That course has seen a broadening of the company's services from insurance to real estate, to a range of financial services, including the purchase of Bache Group (now Prudential-Bache Securities) and the creation of a variety of innovative "interest sensitive insurance products."

Prudential has supported this activity with a growing budget in measured media, which was $42.9 million in 1985, a 51% increase over 1984. And so far, Prudential's activity in 1986 suggests even more aggressive advertising.

Prudential was major supporter of the July 4 Liberty celebration, running more than 20 commercials during ABC-TV's coverage of the event. The company declined to say how much was spent on the sponsorship, however Prudential reported it received positive response from both employes and consumers, and was pleased with the broadcast's ratings. In a more recent tv sponsorship, Prudential introduced a special drug abuse related commercial

as part of its half sponsorship of a CBS two-hour special on Sept. 28, "Under the Influence," a show about substance abuse. Prudential's participation in the program was part of an ongoing campaign to support programs for substance and alcohol abuse.

All this activity proved to be healthy for Prudential's financial picture. The company's total consolidated assets grew 19% to $115.7 billion. Net income, before dividends to policyholders, was $2.3 billion, with most of Prudential's businesses reporting revenue and earnings gains. In the insurance area, premiums from new business sales of life and health insurance and annuities grew 93% in 1985 to $10.6 billion from $5.5 billion.

Total life insurance sales were $80.2 billion in 1985, up 20%; total premium income rose 26% to nearly $15 billion, while its net investment income was up 14% to almost $7 billion. Life insurance continues to account for the bulk of Prudential's revenues: In 1985 new business premiums from sales of individual life insurance rose 39% to $716 million. The sales were from traditonal life insurance products as well as several new offerings introduced in 1985 that offer flexible premium rates and benefits. Appreciable Life and Life Builder offer variable premium payments, higher or lower death benefits, and guaranteed cash values. Discovery Life and Discovery Life Plus, introduced early this year, are interest sensitive, single-premium policies that tie in a tax deferred accumulation provision.

Life insurance was the most heavily supported category of Prudential's advertised products, with the bulk of the $10.8 million budget going to network tv. Ad spending on life insurance rose by 6.5%. Last year, Prudential supported its Variable Life program with $649,700 in magazine advertising, nearly eight times more than it spent on Variable Life in 1984.

Advertising for business insurance products, spent entirely in magazines, increased 23% to $461,500 in 1985. Auto insurance advertising grew 24% to $2.3 million last year, and all went to network and spot tv.

PruCare, Prudential's Health Care Plan, which is a health maintenance organization operator, added 526 employers to the membership roster in the HMO, bringing to 3,400 the number of employer subscribers offering healthcare services to more than 430,000 customers in 1985. PruCare will be entering the recently deregulated New York City market in early 1987 in pursuit of its share of the nearly 15 million people in that market.

PruCare will be competing with a number of other HMOs in addition to the long-time established not-for-profit providers. The product offered by PruCare of New York will not be an HMO, but instead will be an array of health insurance products, which means it will not necessarily be competing head-to-head with HMOs in the market. Advertising plans have not been set, but ads will be created by Prudential's agency, Ted Bates.

Last year, PruCare, which operates in 11 states, spent $197,000 in measured media advertising, nearly evenly divided between outdoor advertising and spot tv. Two new products were introduced last year under the PruCare banner, PRUscription, a medical care plan aimed at groups of 50 or fewer that includes cost containment features, and PruCare Plus, a "blended" PPO/HMO plan for larger groups.

Prudential plans to offer PruCare Plus in 90 major markets in the U.S. by the end of the decade. PRUscription is advertised on a local market basis currently. PRUscription and PruCare Plus helped build new business premiums by $91 million in 1985, a 77% increase over 1984 and the best year in that category since 1981.

Prudential-Bache Securities showed a profit of $42 million from its securities business, a turnaround from the division's $85 million loss the year before. A total of $8.7 million, almost all in network and spot tv, was spent on Prudential-Bache, a 32% increase over 1984 spending.

Prudential, the nation's largest real estate developer, this October reported it planned to sell interests in four major commercial properties for a total of more than $500 million and seek out joint venture partners for real estate projects. The company is tightening its purse strings on real estate ventures because of the depressed condition of that industry in most of the major markets.

Mr. Winters, an actuary, has spent his entire career with Prudential, rising most recently to become one of two vice chairmen of the company. As vice chairman, he was in charge of central corporate and financial operations.

Rapid-American Corp. shored up its bottom line in 1985 through consolidation of retail operations, divestitures and acquisitions. Sales increases in all business segments except for heavily advertised Schenley Import Co. contributed to the gain.

For the first six months of fiscal 1987, Rapid American returned net sales of $923 million, up 111% from same period in the prior year—largely the result of the inclusion of newly acquired TG&Y stores. The company reported a net loss of $23.7 million.

Spurred by the reputation of the company and president-ceo Meshulam Riklis toward acquisition and diversification, particularly in the retail sector, rumors emerged in early 1985 that Rapid would make a takeover bid for New York-based F.W. Woolworth Co. A bid, however, never materialized.

Mr. Riklis did sell Rapid's Lerner Stores in April, 1985, for $297 million to Limited Inc., and then paid Household International $360 million for TG&Y Stores in January, 1986.

In the retail segment, Rapid closed down HRT Stores operations in April, 1986.

A streamlining of operations within the segment involved trimming TG&Y by 200 stores and repositioning 500 stores with a merchandising mix similar to McCrory's.

Sales at Schenley dropped 3.6% to $401 million for the year ended January, 1986.

Operating profit was $60.5 million, up 36%, a growth attributed to an increase in investment income and a reduction in ad expenditures.

Schenley's most prominent brand, Dewar's White Label scotch whisky, was the 13th largest selling liquor brand in 1985, up from 15th in 1984. Case sales rose to 2.37 million, a 3% increase from 1984, according to John C. Maxwell Jr. of Furman Selz Mager Dietz & Birney, New York.

Dewar's Blended scotch whisky, which accounts for a leading 22% of the scotch market, remains one of Rapid's most heavily supported brands, with $7.1 million spent in 1985, according to Leading National Advertisers.

The brand accounts for more than half of the Schenley division's profits. Leo Burnett USA, Chicago, handles Dewar's. J&B, Johnnie Walker Red and Cutty Sark trail Dewar's in market share in that order.

Scotch whiskies accounted for 33.2% of Schenley's total case sales for the year, followed by 17.3% for straight whiskies, 12.2% wines, 11.1% Canadian whiskies, 7.4% gins and vodkas, and 2.5% blended whiskies. Rums, brandies, cordials and the like accounted for 16.3%.

Sales of McGregor, a portion of the company's consumer products sector, were $190 million for the year ended January, 1986, up 7.8%. McGregor received only $64,000 in measured national advertising in 1985.

The company's Faberge unit, acquired by Rapid in 1984 for $100 million but included in full-year sales figures for the first time, posted sales of $45 million. Advertising for Brut cologne for men tallied $4.8 million during 1985, up from $1.8 million in 1984, according to LNA, making it the highest ad expenditure in the Faberge unit during the year. The Faberge conditioning and styling mousse and Organics shampoo and conditioner lines were backed by a combined $3.7 million in spending, up 8.8%. Bozell, Jacobs, Kenyon & Eckhardt, New York, handles.

Non-aluminum	278	263	5.7

The 100th anniversary of the birth of aluminum processing in February came on the heels of another poor year for the industry and for Reynolds Metals Co. in particular.

The nation's second leading producer of aluminum—behind Aluminum Co. of America (Alcoa)—had a decline of 8.4% in sales in 1985. Net income was $24.5 million before a $300 million-plus writeoff resulted in a net loss of $291.6 million in 1985. That compares to profits of $137.3 million in 1984.

National advertising in 1985 took its lumps correspondingly, as Reynolds reduced measured advertising 18.4%, from $26.1 million to $21.3 million, including cuts of more than $3.5 million each for two of the company's three most heavily advertised products, Reynolds Plastic Wrap and Reynolds Wrap household aluminum foil.

Although aluminum consumption worldwide rose slightly in 1985, the metal was in oversupply, and foreign producers solidified their 20% share of the U.S. market.

Nevertheless, market analysts who in June, 1984, were recommending the sale of aluminum stocks now are taking a more optimistic view. "We're not yet recommending the purchase of aluminum companies' stock," says Mary C. Jennings, an analyst at Paine Webber, New York, "but the market is turning more positive."

Reynolds reported first-quarter 1986 profits of $14.3 million, up from $7 million in 1985, and second-quarter profits of $28.8 million, compared with $4.9 million the previous year. Ms. Jennings predicts net income of about $121 million for Reynolds this year, including an estimated $70 million for the expected sale of the company's 41% share of Robertshaw Controls Co., a Richmond, Va.-based manufacturer of temperature controls and energy management systems.

Reynolds avoided a strike by two unions against Alcoa, although the unions' contracts with Reynolds also had expired. The five-week strike ended early this July. The two leading aluminum producers, which had negotiated jointly with the unions, had proposed a $2.90-an-hour cut in wages and benefits, while the unions had countered with a 40-cent increase proposal. The final settlement froze wages and cut benefits.

Faced with the worldwide oversupply of primary aluminum—per-pound prices dropped between mid-1984 and late 1985 from 76 cents to 46 cents—Reynolds continued to shift its marketing emphasis to fabricated aluminum and related products. In the past year, the company introduced several new lines of aluminum and vinyl siding; a new flexible lidding system, featuring coated aluminum foil and composite foil/plastic film material, and a new dispenser for Reynolds foodservice film.

This June, Reynolds announced the purchase for an undisclosed price of Cut-Rite brand wax paper from Scott Paper. Paine Webber's Ms. Jennings says the product mix of wax paper, in which Cut-Rite is far and away the leading seller, with Reynolds aluminum and plastic wraps should make a natural advertising and promotional tie-in. Scott only backed Cut-Rite with a minimal $453,000 in advertising in 1985. The product did not show up in measured media in 1984.

In 1985 and earlier this year, Reynolds closed primary aluminum production plants in Arkansas and Alabama, leaving it with primary plants in Washington, Oregon and New York, as well as a Canadian facility at which production capacity was increased by 125,000 tons. The 1985 writeoffs were caused by the plant closings. Reynolds has closed plants in each of the past three years.

The company fabricates aluminum products and other consumer commodities at 40 domestic and 12 foreign plants. The U.S. was responsible for $3.1 billion of the companywide $3.4 billion in sales in 1985, with Canada accounting for $65 million and foreign markets $299 million.

For the first time since it was founded in 1919, Reynolds Metals Co. does not have a chief executive officer named Reynolds. William O. Bourke, a former Ford Motor Co. executive who joined Reynolds in 1981, succeeded David P. Reynolds this April as ceo. Mr. Bourke was chief operating officer.

Along with administrative cutbacks and reduction of its 27,700-member work force by 750, Reynolds trimmed advertising expenditures. Big cuts came out of the ad budget of Reynolds Plastic Wrap—second nationally behind Dow Chemical's Saran Wrap in sales—from $8.3 million to $4.5 million, all in spot tv. Advertising for Reynolds Wrap aluminum foil, the industry leader, dropped from $11.2 million in 1984—$9.9 million of that in spot tv—to $8.5 million in 1985, of which $6.1 million was in spot tv and $2.4 million in magazines.

Reynolds increased ad expenditures for its line of oven cooking bags from $3.1 million in 1984 to $4.7 million in 1985; $2.8 million of the 1984 expenditures were for spot tv and the rest in magazines, while all of the 1985 advertising was spot tv.

Among other 1985 ad expenditures were $561,000 for Eskimo Pie ice cream bars (Reynolds owns 83.5% of the producer); $590,000 for commercial foil/plastic wrap, and $419,000 for a sweepstakes offer.

A.H. Robins, which is seeking protection under the federal bankruptcy law because of more than 300,000 claims brought against the company for producing and marketing the Dalkon Shield intrauterine birth control device, nonetheless carried on profitable operations in 1985.

However, during the first six months of fiscal 1986, Robins' returns have slipped from the pace set in 1985, a year in which earnings returned from a loss in 1984.

Returns for the six months were $30.7 million in net earnings, down 13%, on sales of $364 million, up 10% in 1985.

Dalkon Shield litigation expenses reduced earnings by $2.4 million for the first half, compared with a charge of $8.7 million against earnings in the prior year period. Suits against Robins allege that defects in the IUD device led to pregnancy, pelvic infection, sterility, involuntary abortion, hysterectomy or death.

In 1985, ad spending for 11 measured media dropped only slightly from $36.8 million to $35.3 million. Biggest outlay backed the o-t-c introduction of previously prescription-only Dimetapp Allergy and Decongestant Tablets.

Spending in seven media for Dimetapp was $9.3 million, including $5 million in network and $3.7 million in spot tv, according to Leading National Advertisers.

The Robitussin family of cough preparations, the second largest brand advertised at Robins, remained a market leader, splitting a 50% market share with Richardson-Vicks' Formula 44. Measured spending was only slightly less than in 1984. Robitussin cough syrup and Robitussin Night Relief, received $7.9 million and $2.6 million, respectively, according to LNA.

Robitussin cough syrup concentrated on network and spot tv, $1.6 million and $6.2 million, respectively. Robitussin Night Relief spending, all on spot tv, dropped 36.6% to $2.6 million.

A new flea and tick control collar for dogs and cats, featuring powder that vaporizes insecticides, led to a 13% sales increase in the Sergeant's pet care product line. Brand spending grew 7.5%, to $5.7 million in 1985.

Measured spending on Parfums Caron, which introduced Le 3e Homme de Caron for men, jumped from $99,000 in 1984 to $700,000 in 1985, all in magazines.

This June, a federal judge appointed an examiner to monitor the company's actions after the company had been cited for civil contempt for making $15 million in unauthorized payments. Earlier in the year, Robins had paid nearly $7 million to former executives and others without the required court approval. The judge declined to go so far as to appoint a trustee, citing the possible adverse effect a trustee might have on company profitability and bankruptcy-law reorganization. Deadline for filing the bankruptcy law reorganization plan has been extended to Feb. 5, 1987.

In September, 1986, the company and a committee of claimants agreed to cuts in pay and bonuses for top officials that included forcing chairman, E. Claiborne Robins, to receive a $1-a-year token salary.

Robins reported in August, 1986, it would sell Robins Communications. The company had been criticized by creditors for "subsidizing" the unprofitable unit consisting of two Greensboro, N.C., radio stations.

In October, 1985, creative for its healthcare lines moved to Scali, McCabe, Sloves, New York, from Popofsky Advertising, New York. Media buying remained with Mil-Mor Media, Richmond, Va..

Growth at Shell Oil Co., the U.S. subsidiary of Royal Dutch/Shell Group of Cos., stagnated in 1985, as oil prices dropped in a generally declining economy. The 1986 results so far are proving to be even more worrisome.

Shell's earnings in the first quarter of 1986 fell 6.8% from the corresponding period in 1985 to $276 million on revenues of $4.92 billion, down 0.8%. In the second quarter, earnings dipped 35% to $219 million on sales of $4.16 billion, down 18.4%.

This follows a year in which net income dropped to $1.65 billion, down from a record $1.77 billion in 1984, but still the second highest in corporate history. Earnings were capped by the fourth-quarter 1985 total of $652 million, a quarterly record for Shell. Sales were $20.48 billion, down from $20.9 billion in 1984.

Financial data reported in the text is for Houston-based Shell Oil, whose operations are largely in the U.S. Data in the accompanying box is for Royal Dutch/Shell Group of Cos. Shell Oil in June, 1985, became a wholly owned subsidiary of SPNV Holdings, completing a phased acquisition begun in January, 1984. SPNV, a Delaware corporation, is a subsidiary of Shell Petroleum NV, a Netherlands company, whose voting shares are owned 60% by Royal Dutch Petroleum Co., the Hague, and 40% by Shell Transport & Trading Co., London.

Shell dramatically increased its advertising in 1985, measured spending alone rising 27.7% to $40.3 million. The biggest increase in 1985 ad expenditures came in spot radio, from $9.9 million in 1984 to $17.3 million—more than Shell spent on both network and spot tv. "After all," says Deb McDonald, account supervisor at Ogilvy & Mather, Houston, which handles the Shell gasoline and oil accounts, "people are in their cars, listening to their radios, when they need to buy gas."

During the uncertain business climate in 1985 and 1986, Shell has remained aggressive. It purchased half the Colombian oil holdings of Occidental Petroleum Corp. for $1 billion in June, 1985. It prepared to build a major coal gasification demonstration plant at its Deer Park, Tex., manufacturing complex. Shell and E.I. du Pont de Nemours & Co. signed a letter of intent this May under which Shell will sell Shell Agricultural Chemical Co., a wholly owned subsidiary, to DuPont. Sale price was not disclosed.

Shell continues to stress its gasoline service station business, dropping older, outmoded stations and acquiring new ones—383 last year in the Northeast, Atlanta and Chicago—and modernizing another 4,500, including automating stations and introducing convenience products.

Shell's SU2000 super unleaded gasoline, introduced in 1984, continued its strong performance in 1985. Company gasoline sales increased 8% last year, compared with an industry average of 1.6%, Shell officials say.

As it is with other oil companies, oil and gas exploration and production is the big money maker for Shell, with 1985 earnings of $1.43 billion, up from $1.38 billion in 1984. Oil products, its second biggest division, earned $269 million in 1985, up from $233 million. The company's chemical operations dropped from $132 million in 1984 earnings to $96 million, primarily because of a depressed market in commodity chemicals such as olefins. Shell's other operations—mainly energy, mineral and agricultural commodities—lost $11 million in 1985.

Shell continued its active exploration program in 1985, spending $3.5 billion to find and develop new oil and gas reserves, compared with $3.2 billion in 1984. The expenditures paid off, as Shell in 1985 more than replaced its annual oil and gas production with new reserves.

Most of the company's measured advertising in 1985, or $35 million, backed Shell's gasoline products, almost totally the SU2000 brand. Some $17 million of that was for spot radio, $13.2 million for spot tv, and $4.1 million in magazines, with small amounts in network tv, cable and farm publications. Shell's second largest advertising expenditure for a single product in 1985 was $459,300 for its Blade X herbicide, part of the agricultural chemical division it is selling to Du Pont.

A coordinated radio, tv and print ad campaign began Aug. 15 for SU2000 gasoline, including a computer-animated, 30-second tv spot that stresses, as do the ads in the other media, the high-performance qualities of the brand. The ad campaign, using the theme "Unstoppable," came in part as a response to auto manufacturers' requests that gasoline manufacturers inform the public which of their brands meet the special needs of high-performance, fuel-injected cars.

Safeway Stores Inc., the giant grocery business that began in the wheat-farming country of Idaho before World War I, on Aug. 29, 1986, passed into the hands of a private New York holding company, SSI, created by investment bankers, Kohlberg Kravis Roberts & Co., New York.

The change in control of Safeway, the country's largest grocery retailer, began to emerge in May, 1986, when offshoots of Dart Group Corp., Landover, Md., began buying Safeway stock, eventually totaling 5.9% of outstanding shares. The Dart Group is controlled by the family of Herbert H. Haft, chairman, and Robert Haft, president. Safeway, citing the Hafts' "manipulative activities," sued Dart and the Hafts in federal court in mid-June to stop their accumulation of Safeway stock.

Dart continued what was regarded as a hostile bid, but on July 31, ceased that attempt. Safeway had agreed earlier in July to a friendly purchase by KKR, leveraged buyout specialists, which last year took control of Beatrice Cos. in a leveraged buyout totaling $6.2 billion.

Safeway was marked by major changes in 1985, including significant restructuring both at home and overseas and a major new national advertising program which bore the theme, "You work an honest day, you get an honest deal at Safeway." Throughout its many sales regions during 1985, Safeway emphasized closing unprofitable or marginal operations. By early 1986 it was operating 206 fewer stores than a year earlier.

Today Safeway has stores in more than 2,300 communities in the U.S., Canada and the U.K. and interest in a western Mexico chain. Over-all, it operates 2,365 supermarkets, 50 warehouses, a fleet of 5,000 vehicles, 19 dairy plants, 16 bakeries, five meat plants, five soft drink bottlers, 15 ice cream plants and 27 other processing facilities for eggs, fruits and vegetables, cheese, jam and jelly, household cleaning products, and other grocery items. Safeway is the largest retail florist in the world and the second largest supermarket drugstore operator.

For a total of $49 million, Safeway sold 23 Safeways in Toronto; the 36-store Germany division, and the 20-year-old Australian operating subsidiary. In addition, the company closed 125 older stores in 1985, all with the same goal of freeing assets in underperforming activities.

During 1985, Safeway opened 100 stores worldwide and projects another 90 during 1986. The chain faces stiff competition from Kroger Co. and Lucky Stores on a national basis and regionally from many tough local chains such as Giant Stores in the East, Jewel Co. in the Midwest and Ralph's and Von's in California.

While Safeway is now widespread in the U.S., its drive for efficiency has removed it from such combative markets as the Northeast and the upper Midwest. In the 1940s, the company had a major presence along the Atlantic Coast and carried both Washington, D.C., and Oakland, Cal., addresses on many of its products. But in the late 1950s it sold about 180 stores in its former New York, New Jersey, Connecticut division, leaving just the Washington and Richmond divisions in the East.

During 1986 it consolidated four of its 17 retail divisions into two, the former Sacramento and San Francisco divisions becoming Northern California, and Spokane and Seattle divisions becoming Seattle.

Of the 1,986 stores now in the U.S., 1,752, or 88% are in 21 of the 24 states west of the Mississippi. Also, the company now has 258 stores in Canada and 121 in the U.K. Safeway now owns 49% of Casa Ley, S.A., a merchandising company in the western sections of Mexico with 11 food and variety stores, two clothing stores, six wholesale outlets and two more large outlets planned for 1986. Worldwide there are 2,365 Safeways.

Before its newest ad campaign, Safeway sailed under the banner "America's Favorite Food Store." a status the company wants to keep. Its current flat sales performance, Safeway says, results from the smaller store total caused by store closings and sales, the lower rate of inflation, drops in foreign currency value and a long labor dispute since settled in Southern California.

To combat these problems, Safeway is adding in-store specialty departments. In 1985, it opened 2,170 new seafood counters, bakeries, soup bars and so on. It also is merchandising to meet the needs of local consumers, providing ethnic foods, later shopping hours, automatic teller machines and better parking. Safeway is upgrading merchandise, meeting price competition, preventing out-of-stocks and installing the latest checkout stations for faster customer service.

Ketchum Advertising, San Francisco, Safeway's corporate agency for the past seven years, was reaffirmed for the job in May, 1985, when asked to make a presentation along with several other agencies. The pitches focused on tv, and Ketchum won with its "You work an honest day" theme. The theme debuted Oct. 9, 1985, in a campaign that includes commercials aimed at particular groups such as females, parents, single males and seniors.

In placing advertising, Safeway's 15 retail divisions act with liberal helpings of autonomy. Each can choose the cor-

porate commercials to run in their divisions and can use different mixes within the division.

Local divisions often develop their own ad compaigns, "but we want them to relate to the national campaign," says Ron Giglio, vp-ad manager.

Safeway's national advertising office in Oakland produces graphic materials that are distributed to the divisional ad offices, avoiding duplication in the production of product art, heads, photography and special holiday materials such as Christmas graphics.

For 1985, Safeway's 11-media spending was down 9%, dropping to $22.3 million. Over-all advertising is estimated at $200 million by Safeway for a range of promotional costs including point of purchase, couponing and other incentives, much of it on a local basis. Ad Age only includes national media or in-kind participation from the corporate headquarters in its measured and unmeasured advertising totals.

Spot tv, the biggest category, fell 6.5%, to $19 million, in 1985 from $20.4 million in 1984. Spot radio was down 49.4%, magazines fell 10%. Outdoor jumped almost fivefold, to $677,000. Spot tv spending of $19 million was 91% of the 1985 budget, a drop from 93% in 1984.

National advertising of the regular Safeway supermarkets continued as the major product category in 1985, amounting to $20.1 million, off 7% from 1984. Food Barn Warehouse Store spending tripled in 1985, climbing to $693,200.

Agency changes include the April, 1985, resignation of Ralph Kent Cooke Inc. as Los Angeles division agency and the merging of that work under Phillips-Ramsey, Los Angeles. Also, the Salt Lake City division awarded its $1.2 million media-buying account to Thomas Phillips Clawson Advertising, Salt Lake City.

Sandoz consolidated its otc pharmaceutical companies into a single group, brought its scattered nutrition companies into one location and boosted spending on marketing and advertising largely in support of the reintroduction of the ageless Ovaltine brand and cold remedies.

Sandoz Corp., the New York-based arm of Sandoz Ltd., and which supplies 31% or $1.04 billion of $3.4 billion worldwide Sandoz sales, boosted measured spending 20% to $29.8 million in 11 measured media, including $5 million for four months worth of new Ovaltine advertising, according to Leading National Advertisers.

The new ad campaign was launched in September, 1985, by Sandoz Nutrition Corp., which is reportedly spending $15 million via Needham Harper Worldwide, New York, up from only $630,600 measured in 1984.

Ovaltine, which has maintained a steady 10% share of the slow-growth $509 million milk-additive category (Nestle dominates with Quik, Carnation and Hills Bros. brands), came out hardly looking like Ovaltine. The new product now has powdered milk, a sugar-free strawberry extension, its first strawberry offering, and a sugar-free chocolate flavor. NutraSweet is the sweetening agent for both. Ovaltine plays up its traditional market presence with the theme: "I can't get over Ovaltine," but is latching onto the health kick by spotlighting its nutritious ingredients.

Sandoz linked up with General Mills to place 20¢-off coupons on the back of 20 million boxes of cereal aimed at the children's market, and 20¢-off freestanding inserts for Ovaltine were placed in October and January.

While Ovaltine advertising took off, advertising for Ex-Lax dropped 12%, to $6 million in 1985, and 66% for Denclenz, to $1.24 million. But Gas-X tablets climbed 15% to $2.4 million, and the big budget for four Triaminic cold remedies grew 9% to $9.7 million.

Ovaltine, which restricted its 1984 spending to spot tv, spread its spending over three media in 1985, with $3.1 million in network tv, $197,900 in spot tv, and $1.7 million in network radio. Gas-X was limited to tv, boosting its spending 17% on network, to $2.2 million. Its spot tv spending eased off 5%, to $187,300. Ex-Lax dropped 30% in print spending, to $372,400, slipped slightly 1.4% in network tv, to $5.1 million, and fell 49% in spot tv, to $533,900.

Triaminic cold preparations reduced magazine spending to just $428,900, from $4.3 million a year earlier. Network tv backing jumped to $8.3 million from $3.8 million in 1984, and spot tv rose to $886,500 from $312,500.

Sandoz Corp. is the U.S. umbrella organization tying together the four Sandoz business groups, with their 10 companies spread across the country. Biggest group is Pharmaceutical, based in East Hanover, N.J., also home of Sandoz Consumer Health Care Group, formed by consolidating Dorsey Laboratories, Lincoln, Neb., maker of cough, cold and allergy products (Triaminic) and Ex-Lax Pharmaceutical Co., New York (Ex-Lax, Gas-X and Denclenz).

Consolidated in Minneapolis are various units of Sandoz Nutrition Corp. (Ovaltine, PDQ milk additive, and Featherlight dietary foods).

Sandoz acquired Master Builders, Cleveland, in April, 1986, from Martin Marietta Corp. for $190 million. The company produces specialty construction materials. That same month, it bought for $225 million Velsicol Chemicals Co., from Farley Northwest Industries.

In a major pharmaceutical development, Schering-Plough and Sandoz in May, 1986, agreed to develop jointly Spirapril for treating high blood pressure and congestive heart failure. It is one of a promising new class of hypertension medications called angiotensin converting enzyme (ACE) inhibitors. The ACE medications avoid many of the problems caused by beta blockers and diuretics now used for hypertension. Schering will have comarketing rights with Sandoz.

Scott Paper Co. in 1986 is trying to get a leg up on competitors in the hotly contested paper-products business by introducing Kachoos facial tissues for children and Helping Hand, a multiproduct line.

Scott, which also added more sections to its paper towel rolls in 1986 as others were down-sizing, continued to build on earnings and sales in 1985, both of which grew by 7% over 1984 returns. In the first half of 1986, the company had a 0.2% increase in net income, to $95.4 million, and sales of $1.63 billion, up 11.9%.

Earnings for the half were held back by an early retirement program implemented during the second quarter, by poor returns in Mexico and reduced earnings from S.D. Warren, Scott's printing and publishing paper subsidiary. The subsidiary's large Mobile, Ala., paper mill suffered from a three-month strike.

In 1985, sanitary paper products accounted for 67% of company sales vs. 64% in 1984.

The U.S. tissue business is a slow-growth area over-all, but cost reductions and strong marketing buttressed Scott's profits in 1985. Measured media spending for ScotTissues declined from $6 million in 1984 to $4.4 million in 1985. Scott recently introduced Kachoos, a children's facial tissue product, to the Midwest and Northeast. Kachoos has been assigned to J. Walter Thompson USA.

The company that invented the paper towel remains the volume leader in U.S. consumer and commercial paper towel markets through four brands that address distinct market segments.

Viva, the quality towel segment entry, received $2.6 million in advertising support, just about matching 1984's $2.7 million in spending. An improved version of Viva was introduced into the western U.S. Super quality entry Job Squad received no advertising support in 1985 and only minimal support in 1984, while budget brand Waldorf also went unadvertised.

The largest backing in Scott's paper towel lineup went to ScotTowels and its narrower version, ScotTowels Jr., which together received $6.4 million in measured media. ScotTowels Jr. relies on the premise that a smaller towel can perform about as well as a regular size towel at less cost. ScotTowels Jr. have been introduced into the South and West, and company spokespersons say they plan to roll the product out nationally later.

Regular-sized ScotTowels enhanced market presence by adding extra sheets to each roll. This summer, ScotTowels began offering the largest sheet-count per roll on the market, as heralded by the advertising theme, "The towel that doesn't run out as often." The enhanced product bears the same price, same quality and same sized sheets.

The $1.4 billion paper towel segment is led by Scott's paper towel trio—ScotTowels, 13% market share; Viva, 8%, and Job Squad, 2%, according to George Adler, paper products analyst for Smith Barney, Harris Upham & Co., New York, who bases his figures on manufacturers' sale prices. The largest selling single brand is Procter & Gamble's Bounty, which garnered a 19% share in 1985, dropping slightly in share from 1984, Mr. Adler says. At the same time Scott edged forward. Kimberly-Clark's value-priced Hi-Dri towels followed Bounty and ScotTowels with a 9% share, while James River Corp.'s Brawny and Georgia-Pacific's Coronet each had a 6% share.

As the fastest growing section of the country, the West was the site of the summer introduction of Scott's seven-item line of household paper products, Helping Hand. Helping Hand products, which include a paper towel, bathroom and facial tissues, and napkins, address the middle quality segment.

Magazines, newspapers and tv spots began in August. To encourage consumer acceptance, the BBDO campaign links the product name to six national children's charities, which receive a five-cent donation from Scott for every consumer purchase of a Helping Hand product. Scott expects to contribute at least $1 million to the charities by year's end.

Scott's four brands of bathroom tissue amassed a combined 23% share of the market, based on unit sales to grocery chains. Manufacturer sale prices make this a $2 billion segment, according to Mr. Adler. Ten of those share points went to ScotTissue, while Cottonelle, Scott's premium brand, and Waldorf, for the budget-conscious, each accounted for a 6% share. Premium brand Soft 'n Pretty, with limited geographic distribution, garnered a 1% share.

On the competitive front, P&G's Charmin, with a 16% market share, outsold Cottonelle, while P&G's White Cloud slipped in market share from 7.8% to 7%, thus failing to catch up to ScotTissue, although ScotTissue also lost 4.3 points during 1985. Advertising for Scott's bathroom tissue lines exceeded $10 million, with half that going to Cottonelle, and the least support, $772,300, backing Soft 'n Pretty.

Baby Fresh Baby Wipes led the $209 million premoistened towelette category in 1985, a category up 12% over 1984, according to William McNair, manager of marketing communications at A.C. Nielsen Co. Supported by $3.8 million in advertising, Baby Fresh controlled 25.5% of the market, according to estimates by Pipeline Research, which measures manufacturers' sales to drugstores. Pipeline indicates drugstores sales in the category essentially are the same for all retail outlets.

Wash A-Bye Baby, Scott's value-priced pop-up baby wipes, garnered a 6.9% share, bringing Scott's total market share in baby wipes to 32.4%, a figure echoed by Sterling Drug's Lehn & Fink and Glenbrook Laboratories divisions, which together have four baby wipe products on the market, according to Pipeline. Though Johnson & Johnson's Baby Washcloths would hold a third place with a 9.6% share in the brand name arena, private label baby wipes account for 18% of this fast-growing market, according to Pipeline's analysis.

Scott also is testing an adult premoistened towelette called Sofkins in New England, particularly in the Boston area and upstate New York.

To concentrate on long-term growth objectives, Scott sold its Cut-Rite brand of wax paper products to Reynolds Metals Co. of Richmond, Va., in June, 1986, for an undisclosed price. It acquired in mid-1985 Hoffmaster Co., an Oshkosh, Wis.-based manufacturer

of napkins, placemats and tablecovers. Hoffmaster had sales of close to $50 million in 1984.

Scott officials refused to disclose the purchase price.

Scott chairman and ceo Philip E. Lippincott calls Europe "Scott's No. 1 growth opportunity at this time." Value Line analysts agree. Besides investing $40 million to replace its Belgian paper machine, Scott increased its ownership to 100% of Bowater-Scott, the U.K.'s leading sanitary paper products marketer, whose products include the market's leading bathroom tissue, Andrex.

SmithKline Beckman Corp. weathered a product-tampering episode in early 1986 affecting its popular Contac cold remedy, a product withdrawn with others from the shelves and reintroduced in safer form by mid-year, as it experienced continued growth during the year from its Tagamet and Dyazide prescription drugs.

The legacy of the company's voluntary product removal still lives on in financial returns at SmithKline, which took a charg of $8 million against first quarter earnings in 1986 for the removal of Contac, Teldrin and Dietac from the market and a charge of $10 million against second quarter results for the reintroduction of Contac and Teldrin. SmithKline took a third quarter charge of $30 million against earnings for advertising and promotional expenses to reintroduce Contac.

The company reported net earnings of $373.7 million for the nine months, down 2.9% from the prior year period.

SmithKline does not expect additional pre-tax charges for the year. Over-all, the company during the nine months took pretax charges of $57.8 million for an early retirement program and the withdrawal of the three products, and a $40 million pretax charge for reintroducing Contac.

SmithKline during 1985 cut back measured advertising by 16.3% from 1984, to $24.7 million, according to the 11-media monitored for this report. The company reported a drop of 1.7%, to $176 million, in total "advertising costs" reported to the SEC—a figure inflated by nonadvertising and promotion activity.

Measured advertising largely backs the company's SmithKline Consumer Products group, the new name as of May, 1986, for its Menley & James unit. The division went through some upheaval on March 21, 1986, with the voluntary withdrawal of Contac, Teldrin and Dietac from the market following the tampering incident.

The three products together account for about 3% of SmithKline's $3.3 billion in sales.

The company in June reintroduced Contac in two tamper-resistant, 12-hour forms: New caplets and new, see-through, banded capsules. Teldrin, an allergy treatment, also was reintroduced. The two were relaunched this summer as "new" products with an estimated $30 million backing in advertising.

SmithKline has discontinued Dietac, an appetite suppressant, for lack of success.

A shareholder pleaded guilty this August to lacing capsules of the three products with rat poison. He had special stock options on SmithKline that would have allowed him to make a six-figure profit when it lost value, prosecutors said. No deaths occurred from the incident. The tainted capsules were discovered only in Houston and Orlando.

Contac in early 1986 held an 8% share of market in the flat $1.1 billion cold and cough remedies market, tying it with Schering-Plough's Drixoral, a former prescription drug that does no consumer advertising, for fourth place behind Richardson-Vick's Nyquil (12%), and Burroughs Wellcome's Actifed (10%) and Sudafed (9%), the latter two being former prescription drugs.

The Contac share dropped from 10% in the 1984-1985 cold season. During the decline it had tried upbeat advertising from BBDO Inc. themed, "Contact keeps you on your feet." That strategy changed in 1986 to a lighthearted approach from BBDO in which comedian Steve Landesberg said Contac beats the competition, even Mom's chicken soup.

Contac, the most advertised product at SmithKline, received $12.6 million in measured spending in 1985, down 12% from 1984, according to brand spending in seven major media tracked by Leading National Advertisers.

SmithKline products receiving sizable measured media outlays included Congetac tablets, $3.8 million, up 41% from 1984; $4.5 million on Sine-Off sinus remedy, up from $2.4 million in 1984; and $912,000 on the Ecotrin aspirin line, down from $5.2 million in 1984.

The company did not advertise in LNA measured media Teldrin in 1985 after supporting it with $963,000 in 1984.

In support of its big Tagamet franchise, the company introduced an 800 mg once-nightly dosage in the U.S. in April, 1986, for the anti-ulcer drug. Tagamet is the No. 1 best-selling prescription anti-ulcer drug worldwide with a 56% world market share, ahead of fast-closing Glaxo Holdings' Zantac, with a 43% share in the $1.57 billion anti-ulcer world drug market which is expected to grow to $3.13 billion by 1990, according to Kidder, Peabody & Co.

Kidder predicts Zantac will emerge as the leader then with a 56% share, followed by Tagamet with 33% and others with 11%.

However, some analysts believe Tagamet's one-a-day application will stall if not block the Zantac charge. The traditional ulcer drug application is four times a day.

Zantac's growth is traced partially to its reported edge over Tagamet as a maintenance drug in preventing the recurrence of ulcers, a benefit the FDA will have to pass judgment on before it can be incorporated in advertising.

Tagamet makes up 30% of SmithKline's sales, or about $890 million. Dyazide, for treatment of hypertension, dominates the company's cardiovascular segment which reported sales of $311 million in 1985. Dyazide is the most widely prescribed drug in the U.S.

Dyazide is awaiting approval from the FDA for a reformulated version that will enhance the amount of the drug entering the bloodstream, the company says.

Among its new products, SmithKline's Norden Laboratories introduced Leukocell, the world's first vaccine to prevent feline leukemia, in January, 1985. Smith Kline & French Laboratories introduced Ridaura, a new prescription drug for the management of adult rheumatoid arthritis, in May, 1985.

In January, 1986, the company took a 72.5% ownership position in a joint venture to form the nation's largest clinical laboratory network, SmithKline Bio-Science Laboratories. Joint venture partner is Bio-Science Laboratories of American Hospital Supply. The joint venture then acquired Lufkin Medical Laboratories, a clinical testing lab in Minneapolis/St. Paul, in March, 1986.

SmithKline dedicated its new, 300-acre, $200 million pharmaceutical research complex in Upper Merion, Pa., in April, 1986.

Sony Corp. of America is throwing its ad support behind its expanding lines of compact disc players and 8mm video camcorders as hopes and sales declined for the Beta video format the company pioneered in the early 1980s.

Returns for 1985 showed signs of the worldwide slump in consumer goods as earnings grew only 2.2% on a 12.6% increase in sales. The continued strength of the Japanese yen, following a sharp appreciation at the end of 1985, together with continued intense price competition in world markets and trade friction with the U.S. is hampering earnings for Sony in 1986. In the nine months (ended July 31, 1986) of its current fiscal year, earnings have declined 24%, to $273.2 million, on a 2.7% decrease in sales, to $6.48 billion.

U.S. ad spending for the company fell 17% in measured spending last year, as the company cut most of its major media spending. Measured newspaper ad spending fell 68.3% in 1985, followed by a 40% drop in spot tv, 21% decrease in outdoor spending and a 3% decline in network tv spending. Magazines (not including business publications) increased 60%, although the added spending did not equal levels cut from other media. Cable tv spending also doubled, although spending did not reach $500,000 in 1985.

The company says it will promote overseas production and adjust its prices according to local market pressures. Sony has one of the highest export ratios of any Japanese electronics company: 70% of its sales come from outside Japan, and about half of its total exports go to the U.S. Some 20% of Sony's U.S. sales come from products made in the U.S.—chiefly color tvs and videotape. In 1985, U.S. sales accounted for 33.6% of Sony's net sales, up 11.5% from 1984.

Sales of video equipment, including industrial videocassette recorders and videotapes, accounted for 36.3% of net sales, or $2.43 billion, up 0.7% from 1984. The company attributed the slight gain to sales of 8mm video recorders and cameras, which offset the decline in sales of its Betamax video products.

In August, 1986, the Electronics Industry Assn., Washington, reported year-to-date shipments of color tv sets at an all-time high, up 6%, to 10.7 million this year. Black-and-white tv sales jumped 44% in the first eight months of 1986, and projection tv sets rose 22% for the year to date. Some 7.4 million vcrs were sold to dealers in the first eight months of this year, up 14% from 1985, and camcorder sales rose 328% for the year to date, shipping 573,767 units.

Hoping to stimulate consumer interest in the format, Sony in August, 1986, introduced the SuperBeta HF1000, its most sophisticated Betamax vcr, to replace the HF900 introduced last year.

Sony put its heaviest media spending behind its Handycam, introduced last year, with $7.4 million, 70% of which was in network tv with 21% in magazines and the remainder in spot tv. Sony's Betamax vcrs received the second highest backing, with $3.6 million, although that figure represents a 60% drop in measured ad support from 1984 levels. The media mix was shared almost evenly by network tv, spot tv and magazines in 1984, with 1985 expenditures in those media dropping from 50% to 70%. Betamax camcorder ad spending fell 51%, to only $200,000.

The 8mm format still has an uphill fight in the $7 billion vcr market, faced with heavy consumer saturation of the VHS format and burgeoning sales of the smaller VHS-C camcorders. Wall Street analysts expect 8mm to account for 30% of the vcr market by 1995. Michael Meltzer, Sony's vp-consumer video products, predicts the company will hold 22% to 25% of the camcorder market by yearend with sales of 1 million to 1.3 million units, and 1.5 million unit sales next year.

In June, Sony launched a trade-oriented campaign against JVC Co.'s comparative ad campaign for its own VHS-C camcorder, via SSC&B, New York. A Sony pamphlet circulated at the summer Consumer Electronics Show listed 11 points of comparison between the rival formats, with the headline, "Before you buy into the VHS-C story, read the fine print." A multimedia consumer campaign, begun in June, takes a different approach, depicting the Handycam as a "Moving Snapshots" camera. Sony says the "Moving Snapshots" campaign is its largest ever.

Analysts have tied 8mm's potential success to consumer availability of prerecorded movies on 8mm cassettes. To bolster the underdog 8mm format, Sony and rival Eastman Kodak last April signed agreements with Paramount Pictures and Embassy Home Entertainment, respectively, to distribute popular movies. Currently, 8mm tapes account for only 4% of the $2.7 billion prerecorded videotape market.

In August, Sony introduced a new, top-of-the-line 8mm camcorder, the CCD-V110, with near-professional recording and editing functions, as part of its Video 8 Pro line. The CCD-V110 will roll out this fall with a suggested retail price of $1,995. The Marine-Pack camcorder, a water-resistant version of the Handycam, was introduced last April. The technology was used by the French-American exploration team this summer in recording pictures of the sunken Titantic.

Sales of tv sets rose 22.8%, to $1.72 billion, because of Sony's expansion into the People's Republic of China last year, a similar route that provided growth for competitor Matsushita Electric Industries Co. Sales of tvs worldwide accounted for 25.7% of net sales last year, up from 24% in 1984. Despite the sales increase, Sony decreased its ad spending on color tv sets in 1985 by about 40%, to $3.5 million. Sony's Trinitron sales were up because of increased demand for large-screen monitors. Sony introduced the Black Trinitron tv in Japan in March, 1985, and in the U.S. in April.

Anticipating growing demand for stereo tv sets, 90% of Sony's larger tv sets are equipped to receive stereo broadcasts. Last year stereo tvs accounted for only 5% of all tv sales in the U.S., but are expected to hit 20% by yearend.

Similarly, despite a 50% cut in advertising support to only $520,000, sales of Sony's hand-held Watchman pocket tv sets increased last year, keeping it in the lead of the hand-held tv category. Sony faces increasing competition in the category from Citizens Electronics and Casio, which currently market liquid crystal display tvs. The LCD technology is expected to fuel miniature tv sales to 1.5 million units this year. Sony has said it is testing LCD technology, but is not satisfied with the picture quality.

Audio equipment sales, including Sony compact disc players, Walkman personal stereos and Sony audio tape, rose 24.6% to $1.6 billion last year, and accounted for about 24% of Sony's net sales in 1985. Ad spending on compact discs rose 33% in 1985 and was the only category besides 8mm camcorders to receive increased ad spending from Sony last year.

Sony holds nearly 40% of the booming compact disc market with its portable, tabletop and car stereo cd players. However, as more companies entered the cd market—more than 50 companies now have cd players on store shelves—price pressure dominated name-brand buying. The wide availability of Sony products has left some dealers disenchanted, saying the Sony name-brand leverage they used to have has disappeared.

The company continued to introduce Walkman personal stereos featuring combinations of am and fm radio, tv sound reception, water-resistant construction and auto-reverse functions. In October, 1985, Sony introduced the Super Walkman in Japan, with rechargeable nickel cadmium batteries, the same size as an audio cassette tape.

Sony entered the telephone market this year with the introduction of two answering machines at the winter Consumer Electronics Show.

In February, 1986, Sony consolidated its consumer advertising account at McCann-Erickson, New York, only three days after 8mm-rival Eastman Kodak dropped McCann-Erickson and consolidated $40 million in billings with its two other agencies, Young & Rubicam and J. Walter Thompson USA. Sony's professional broadcast and audio account was moved to Lord, Geller, Federico, Einstein, New York, in August, from Waring & LaRosa.

Southland Corp., the nation's leading convenience store operator and the nation's largest independent gasoline retailer, developed a more finely targeted, localized media plan for its 7-Eleven stores division in 1985 reflected in its increased spending for spot radio.

During the year, Southland boosted its measured ad spending by 32% over 1984 to $35.9 million, more than half of which was spent in spot radio, representing a 60% increase over 1984 spending in that medium.

By contrast, Southland's measured expenditures for network tv fell by 71% to $1.3 million in 1985, but measured spending for spot tv rose 19% to $11.4 million in 1985. The new emphasis on local media also boosted outdoor advertising to $2.9 million, a nine-fold increase from 1984. Southland's $19.9 million expenditure on spot radio was four-fifths of total convenience store advertising in the nation in that medium.

Southland, which had used a "Freedom" theme leading up to and after the 1984 Olympic games, abandoned it in early 1985 for "No one keeps you revvin' like 7-Eleven" only to switch a year later to "7-Eleven . . . Oh thank heaven!" The latest theme is derived from Southland's long-running 1969 ad theme, "Oh thank heaven for 7-Eleven."

In the fall of 1985, Southland ended its relationship with Young & Rubicam, New York, which had handled creative for 7-Eleven's broadcast efforts. The company named Hill, Holliday, Connors, Cosmopulos, New York, to succeed Y&R, following an extensive review. The company continued to handle its own radio and print efforts in-house. Camelot Communications, Dallas, continued to handle 7-Eleven's spot tv buys.

The strong earnings picture—up 32.6% in 1985 over 1984—was stimulated in part by improvements in the operation of Southland's Citgo subsidiary. However, in the first half of 1986 the rapid decline in crude oil prices resulted in writedowns of its crude and refined oil products of $153.8 million against earnings resulting in a net loss for the period of $6.9 million compared with a gain of $89.7 million in the corresponding period in 1985 (the company took a writedown of $38 million for the same reasons in the fourth quarter, 1985). Sales for the first half were $6.018 billion, down from $6.1 billion in the 1985 period.

The company's 7-Eleven stores unit achieved sales gains of 8.8% in 1985 over 1984 levels, a gain the company attributed to an 8% increase in merchandise sales and 11.5% higher gasoline sales. The volume of self-serve gasoline, available at 3,213 7-Eleven stores, rose 10% in 1985 to 1.6 billion gallons.

Southland broadened its fresh food concept for 7-Eleven stores in May, 1986, with a major test of branded fast food products. Each concept was installed in markets where the particular brand of fast food is already well known. For example, ten 7-Eleven stores in St. Louis and Kansas City are included in a test with Hardee's, which includes hamburgers and breakfast biscuits served inside the stores. A test with Church's Fried Chicken includes twelve 7-Eleven store in New Orleans and Tampa. A test with Rocky's Pizza includes about 10 stores in Los Angeles and Detroit. Plans are to continue the tests at least through the summer or fall of 1987.

Some analysts raised concerns that the branded fast foods would cannibalize sales of 7-Eleven's own fresh deli sandwiches, hot dogs and nachos. Initial reports from the Hardee's test, however, indicated the test was stimulating sales of all fast food items. Food-service in 1985 contributed $900 million to sales at 7-Eleven stores.

Southland expanded its concept of convenience with a new videocassette rental program, MovieQuik—set for at least 3,000 stores by the end of 1986, and all stores by the end of 1987. The strategy behind MovieQuik, which offers movie cassette rentals for 99-cents a 24-hour period weekdays and $1.99 weekends and holidays, is to bring customers into the store twice per rental—two trips past hot dogs, Big Gulps, candy and chip racks.

Southland became embroiled in a controversy in mid-1986 when the company ordered the removal of *Playboy* and *Penthouse* magazines from the shelves of 4,500 company-owned 7-Eleven stores. The company had long defended its sales of the adult magazines (in covered racks) as a business decision based on customer demand. Southland changed its tune in early 1986, basing its switch on testimony reported in hearings of the U.S. Attorney General's Commission on Pornography that there was a possible connection between adult magazines and

crime, violence and child abuse. The company said its decision was not made in response to long-standing objections and demonstrations against Southland and its adult magazine policy by the Mississippi-based National Federation for Decency.

Southland is testing an unmanned automatic gasoline payment system in which gas purchases at 7-Eleven stores may be paid for at the pump with a debit card or with cash.

And to reduce its direct exposure to the dramatic and costly margin swings in the refining and the wholesale marketing of refined gasoline products, Southland sold 50% of its Citgo Petroleum Corp. subsidiary to Petroleos de Venezuela S.A., the Venezuelan state-owned oil company for about $300 million.

Southland extended Automated Teller Machines (ATMs) into more than half the 7-Eleven stores and plans to equip most stores by 1987. Southland and MoneyMaker, the subsidiary of First Texas Savings Assn., Dallas, which operates 650 ATMs in Texas 7-Eleven stores, have used several promotions to drive consumers to use the ATMs, which increased by 30% during a May "Sure Thing" game. In that game, ATM users received prizes in the store and also won $100 to $1,000 when the ATM number of their transaction tickets matched the serial number read over the air at Dallas' KVIL-FM.

Southland promoted president Jere W. Thompson to the added post of chief executive officer in May of 1986. He succeeds his brother John P. Thompson, who continues as chairman.

Merrill Lynch and who?

Merrill Lynch & Co. grew out of the friendship between Charles Merrill and Edmund Lynch. Both reached New York in 1907, with Mr. Merrill, the son of a Florida doctor, coming by way of Amherst College and the University of Michigan law school, and Mr. Lynch, coming from Johns Hopkins University. They met while exercising at the 23rd Street YMCA, where Mr. Lynch had come to find someone to share his boardinghouse room. The two worked at different jobs over the next seven years before Mr. Merrill founded his own company and pursuaded Mr. Lynch to become a partner. There was a comma between the names in the corporate logo until Mr. Lynch died in 1938. Mr. Merrill died in 1956. The company has carried up to five names in its nameplate over the years (Merrill, Lynch, Pierce, Fenner & Beane in 1941), before paring back to those of the founders in 1973.

Southwestern Bell Corp. is plunging into national markets for publishing and cellular radio in an effort to diversify beyond its regional telephone operations. Southwestern Bell, one of seven regional holding companies created in 1984 by the breakup of American Telephone & Telegraph, also announced a corporate restructure that took effect Oct. 1, 1986.

In a preemptive move, Southwestern Bell agreed to purchase Secaucus, N.J.-based Metromedia Inc. and other smaller companies' paging and cellular telephone operations for a total of $1.2 billion. The offer was designed to prevent Metromedia from splitting up its assets, which would allow other companies to bolster their positions in the cellular market, says Don Lottmann, vp-corporate communications for Southwestern Bell.

The company hopes to complete the acquisitions by the end of 1986, although it may take longer to obtain judicial and regulatory approval, he says. The acquisitions would vault Southwestern Bell into the lead in the national personal communications market with ownership interest in six cellular systems and paging operations in 19 metropolitan areas.

Southwestern Bell now ranks 11th among cellular companies, serving population of 7.2 million, which is an adjusted figure based on multiplying the company's ownership percentage times the population covered in the franchise.

Southwest Bell will be the largest cellular company, serving an adjusted population of 24.5 million. Next is Bell Atlantic, serving an adjusted 16.1 million, and Pacific Telesis, serving an adjusted 15.9 million. Metromedia also is the largest paging company, with 506,000 pagers, compared with second-place Graphic Scanning, Englewood, N.J., with 300,000 pagers, all according to studies by Arthur D. Little and Frost & Sullivan.

Analysts say the acquisition expands the company beyond its regional market characterized by sagging oil and agricultural industries. "It helps them out of the oil patch," says Pat Jurczak, investment analyst and vp-research at E.F. Hutton & Co., New York.

Southwestern Bell's performance has lagged behind the other regional Bell companies. In the first nine months of 1986, Southwestern's revenues were $5.89 billion, virtually unchanged from the same period in 1985, and net income was $741.5 million, down 3% from 1985.

Southwestern Bell is pinning a portion of its new strategy on its growing publications unit, the main directory publishing arm of the Bell System before the breakup. The company redirected most of its measured media spending in 1985 to the publishing unit, increasing measured spot tv 127% to $14.8 million. Measured spot tv for Southwestern Bell Telephone, the main operating subsidiary serving a five-state area, fell to $2.3 million in 1985, 18% of its 1984 level. Southwestern Bell shifted $1.4 million in measured media for the telephone unit and corporate promotion to magazines. Over-all, measured magazine spending jumped 190% to $2.3 million.

The publications unit is competing with Southwestern's former siblings, the regional Bell companies, as it starts new ventures and grows through acquisitions. In an aggressive move, the unit announced plans to publish Yellow Pages for Manhattan, Baltimore, Washington D.C., and North Chicago beginning next year. The company published Yellow Pages for Pinellas County, Fla. in September, 1986.

Southwestern's New York book, scheduled for January, 1987, publication, is an outgrowth of the 1985 acquisition of New York Yellow Pages, a series of neighborhood directories formerly known as Blue Books. It competes directly with Nynex Yellow Pages, published by New York Telephone Co.'s Nynex Information Resources, and is the focus of an advertising battle between the two regional companies. Nynex labeled Southwestern "The Clone Book."

Neil D. Yelsey, an analyst with Salomon Brothers, New York, says it will take time to determine whether Southwestern can penetrate the New York market. "Let's face it, the typical kitchen only needs one Yellow Pages, he said, "Will New Yorkers distrust a Yellow Pages with Southwestern Bell in its name?"

Southwestern's publishing unit also acquired Overland Park, Kan.-based Mast Advertising & Publishing in July, 1985, for $120 million from Continental Telecom, Atlanta. The acquisition gives the publishing unit Mast's in-house national sales unit in addition to 523 directories published by Mast.

In September, 1985, the publications unit also acquired J.C. Blake Co., an El Cajon, Cal.-based directory and map publisher for an undisclosed price, bringing the number of directories published by Southwestern to more than 1,000. The publishing unit also plans to add another 45 Silver Pages senior citizens discount directories by the end of 1986, bringing the total to more than 90 markets.

Southwestern Bell is the last regional Bell company to restructure. Its officers have served dual roles as officers of the corporation and of the telephone subsidiary.

In the internal restructure, John E. Hayes Jr., formerly executive vice-president and chief financial officer, was named president and ceo, Southwestern Bell Telephone, a title formerly held by Zane E. Barnes, who remains president and chief executive officer, Southwestern Bell Corp. An office of the chairman was created to oversee Southwestern's growing level of activities in operations not related to the telephone subsidiary. Three vice-chairmen were named: Gerald D. Blatherwick, human resources and corporate communications; Robert G. Pope, corporate development, and Edward E. Whitacre Jr., cfo.

ing.

The big ad spender at Squibb is its Personal Care Group, alias Charles of the Ritz Group Ltd., one of Squibb's three industry segments. The New York-based subsidiary boosted measured ad spending for the fragrance and beauty care line 30% in 1985 to $18.9 million.

In October, 1985, CRG moved its business from Advertising to Women, New York, to Rosenfeld, Sirowitz & Lawson, New York.

CRG pushed advertising spending notably higher for several brands: the Krystal line of bath products, perfume and cologne, soared to $4.2 million in 1985 from $1.7 million in 1984; the varied Jean Nate line rose 67%, to $4.23 million; Bain de Soleil sun-care items rose 39% to $4.1 million. Enjoli perfume fell 38% to $2.04 million, and Yves St. Laurent line dropped 69%, to $87,000; Opium perfume was flat at $718,300, as was Kouros cologne for men, at $401,900.

The balance of Squibb measured advertising has gone primarily for vitamins, with Theragran tablets claiming $4 million, up from $596,500 in 1984 when ET Vitamins received $2.3 million. ET was not advertised in 1985. Theragran and other Squibb Mark division products were moved this October from Ogilvy & Mather to DFS Dorland Worldwide.

In unmeasured advertising, Squibbed in the summer 1985 tucked a 50¢-off coupon for either Theragran, Theragran-M or Stress Formula vitamins inside each of 4 million No Nonsense pantyhose packages.

In July, 1985, the FDA approved the U.S. sale of its Capoten brand of capotril for treating high blood pressure and congestive heart failure, a compound that had $295 million in international sales in 1985. Capoten opens up a new class of blood pressure treatment with its so-called ACE inhibitor (angiotensin-converting enzyme) that avoids problems of dizziness, depression and impotence caused by diuretics and the side affects on blood chemistry that can be caused by beta-blockers. ACE inhibitors reduce the constriction of blood vessels.

Squibb, encouraging entrepreneurship, in April, 1986, divided its big Pharmaceutical group into four separate businesses responsible for prescription drugs, marketing of otc and patent-expired products, the sale of diagnostic lines, and the use of computer communications as a sales service to physicians. By year's end, Squibb will spin off its three medical electronics units—Advanced Technology Laboratories, Spacelabs Inc. and Squibb Medical Systems onto a new company, Westmark International Inc., to be 10% owned by Squibb.

Restructuring and selling many of its U.S. and international operations has created a leaner Levi Strauss & Co. in 1986—one with a sharper focus on jeans, its strong suit—since the company went private in a $1.45 million leveraged buyout in August, 1985.

And a hard and lean profile may be exactly what it takes to maintain a leadership position in the competitive $6 billion domestic jeans industry.

Levi's once dominant lead in the market shrank dramatically this summer when rival VF Corp. (Lee jeans), the nation's third-largest marketer of jeans, acquired Blue Bell Holdings (Wrangler), second largest, for about $378 million. The merger gives VF an estimated 30% share of the market.

Industry statistics generally place Levi's share in the 30% range, although some analysts point out that some erosion may have occurred.

Levi's leads the measured spending in the seven media monitored by Leading National Advertisers, with $25 million, followed by competitors in the jeans and sportswear category: VF (Lee) $15.8 million; Jordache $13.9 million; Blue Bell (Wrangler) $6.8 million; Henry I. Siegel (Chic) $5.6 million; MGA French Boutique (Guess) $5 million; Calvin Klein $3.3 million.

Reflecting the impact of cutbacks and the paring of many of its U.S. and international operations in 1985, the worldwide advertising expenditures of Levi Strauss experienced sharp reductions, particularly in the sportswear lines.

Ad spending for jeans and closely related separates, the company's main focus, dropped 13.8% to $20.7 million in 1985 from 1984, according to LNA. The decline was less than the over-all cutback of 31% from a record $122 million spent in 1984 on U.S. advertising to $84 million in 1985. Levi Strauss had an extraordinary promotional year in 1984 that included the company's major sponsorship of the Olympic Games. An estimated $30 million spending in the international market elevated that figure to $152 million. Ad spending for 1985 totaled an estimated $84 million, including $55 million of unmeasured media expenditures. The unmeasured costs included a substantial amount of cooperative advertising with retail distributors. The extent of the company's massive involvement in the co-op effort varies from product to product and season to season, but its participation with retailers ranges from 50/50 to as much as 65% and represents a major share of Levi Strauss advertising.

At The Jeans Co., producer and marketer of jeans and jeans-related products under the Levi's label in the U.S., the "501 Blues" spots continued to stimulate consumer demand for Levi's basic products, pushing sales of men's jeans over the $1 billion mark for the first time. The 501 marketing campaign increased dollar sales in the 501 family of products by 50% over 1984, bettering the 20% jump recorded in 1984 over 1983, the first year of the "501 Blues" tv commercials by Foote, Cone & Belding, San Francisco.

The Jeans Co. had sales of $1.5 billion in 1985, up 5% from 1984. Profits were up substantially from 1984 because of sales of more profitable products, lower fabric costs and lower operating expenses. Men's jeans sales hit a record high of $1 billion, while both women's jeans and youthwear had sales declines. All three units, however, showed an improvement in profit over 1984.

The company focused on the strength of the Levi's brand by emphasizing basic products. Product lines were trimmed and creative steps were taken with core items, such as marketing 501s in black, white and gray, improving youthwear's Hardwear jeans and introducing Special Reserve jeans for more mature customers. In short, the company got back to its main business of making jeans and closely related separates.

All three of Levi's divisions marked gains for the first half of 1986, with The Jeans Co. posting a 10.7% gain on sales of $675.1 million. Battery Street Enterprises had sales of $266.7 million for a 2.6% gain and Levi Strauss International registered sales of $324.6 million, up 23.5%. The privately held company does not release earnings figures.

Reorganization during the past year is set to eliminate Battery Street Enterprises, which had been created to handle small licensed designer business, outside of the company's traditional jeans and jeans-related clothing. Men's and women's sportswear were transferred into a new division known as Levi Strauss Sportswear, headed by Thomas Kasten, a 20-year veteran at Levi Strauss.

Since becoming a private company, Levi Strauss has announced plans to sell Koret women's separates and entered into a preliminary agreement to sell the Oxford men's clothing operations. The company has sold its Resistol hat business and reported the license for Perry Ellis America will be transferred to Manhattan Industries, currently manufacturing the Ellis Portfolio collection. Battery Street Enterprises and designer Andrew Fezza also agreed to discontinue marketing sportswear under the Andrew Fezza label.

Levi Strauss International, which sells products in 70 countries, embarked on a new strategy in 1985 stressing the marketing of traditional jeans products. International managers have redesigned their organizations, shed unprofitable products and built up share of their individual jeans market.

The moves resulted in the closure of 16 facilities worldwide and a 2,850-person reduction in the work force.

The 501 family of jeans, direct descendant of the original over-alls designed by the company's founder, continued to get the lion's share of the slimmed-down 1985 ad budget. Measured media figures for 1985 show the family jeans category received $8.3 million in ad spending, up almost $1 million from the previous year.

Otherwise, measured ad spending was down across the board. Men's jeans accounted for about $7 million, down 27%, and women's jeans received $5 million, down 26.5%.

The biggest budget reductions occurred in the Levi's sportswear categories, with the family group measured at just $2.6 million, on the heels of a $19 million expenditure in 1984. Men's and women's sportswear shrank to a combined total of $1.2 million in 1985, from $4.7 million.

Network tv was the big loser, dropping to $11.4 million, from $20.5 million in 1984. About 82% of the network tv spending in 1985 was for jeans.

Midsummer, 1985, saw the kickoff of a $20 million campaign in print, radio and tv for the 501 jeans line. The eight new tv spots were a favorite with the buying public. At the same time, the company kicked off a $500,000 Spanish-language tv campaign in key markets, for the first time going after the Hispanic market, the fastest growing segment of the U.S. population.

One of the Hispanic spots promoted the pants' appeal in the blue-collar work place by following a Mexican-American through a typical day as a welder. Original Latin rock music, titled "Making It," accompanied the spot, which ran on Spanish-language stations in Phoenix and Tucson, Ariz.; Los Angeles, Sacramento and Stockton, Cal., and Dallas-Fort Worth, El Paso, San Antonio, McAllen and Brownsville, Tex.

In 1986, the same "501 Blues" format was used in the 501 jeans commercials, this time in 11 new spots. The company also made several 60-second network buys in prime time for the first time. Once again, the spots were supported by extensive in-store promotions, including video, posters, clerk buttons and fit guides, as well as a retail incentive program and product publicity.

This opening salvo for jeans was followed in August by a $4 million multimedia effort for Hardwear jeans, a new knee-reinforced jean for children.

Tambrands Inc., a leading marketer of feminine hygiene products, continues to broaden its interest in new areas. In 1985, it introduced home diagnostic kits for women under the First Response brand name and purchased a regional cosmetics company.

Tambrands, which is celebrating its 50th anniversary this year, spent 45 of those years marketing a single product, Tampax tampons. But five years ago it began to diversify with the introduction of Maxithins pads for feminine protection.

Although the company continues to hold a comfortable 54% share in unit sales of its flagship product, Tampax tampons, the toxic shock syndrome scare of the early 1980s taught Tambrands the folly of leaning on a single product and the importance of developing or purchasing new ones.

That scare led Tambrands to fund laboratory work to uncover the cause and cure of toxic shock syndrome. Findings in 1985 led the company to replace tampon products made with polyacrylate fiber; this replacement resulted in a one-time cost of $4.3 million. The cost lowered net earnings to $57.9 million, down 1.7% from 1984, as revenues grew 7.8%. Through the first six months of 1986, Tambrands reports net income of $36.1 million, up 9%, and net sales of $242 million, up 22% from the corresponding period in 1985.

Following a test run in the spring of 1985 in California, Tambrands rolled out nationally in July, two home diagnostic kits for women, under the First Response name. The products, an ovulation predictor and a pregnancy test, are based on monoclonal antibody technology, which provides fast, accurate and easy-to-read results.

Company officials estimate the combined markets to be small, $75 million to $100 million at retail for the new products, but analysts say the markets are growing 20% a year. Tambrands officials say the company already has a problem keeping up with demand for First Response kits. The ovulation predictor test was the first test of its kind to enter the market.

The company anticipates growing competition from other companies, such as Ortho, which recently launched its own ovulation predictor, Ovutime. For the six months ended July, 1986, First Response ovulation predictor held a 56.4% share for its kit and refill products, compared with Ovutime's 43.6% share, according to Joseph Candrevo, special projects coordinator for Pipeline Research, New York, which tracks manufacturers' sales to drugstores.

Tambrands' other First Response product, which can determine pregnancy as early as the first day after a missed menstrual period, topped $45 million in test market in 1985, up from $35 million in 1984. Tambrands' pregnancy test joins a competitive market that already includes Johnson & Johnson's Daisy 2, Advance and Fact products, which account for a combined market share of 42.6%, according to Pipeline Research, and Warner-Lambert's e.p.t. and e.p.t. Plus tests, which hold 37% of the category in sales to drugstores.

While Warner-Lambert spent $3 million advertising its pregnancy tests last year, Tambrands spent more than $2 million for its two-product introduction of First Response to garner a 4.4% market share for the three-month period it was on drugstore shelves nationally. Advertising was concentrated mainly in women's magazines and some tv.

Highly competitive, the home diagnostic market is growth oriented, boding well for the future of First Response, according to analysts. Tambrands' licensing agreement with various biotechnology companies ensures that additional home diagnostic tests are sure to appear in the $400 million home diagnostics market, which is expected to top $1 billion by 1990.

Acquisition aided Tambrands' most recent diversification effort. It bought Physicians Formula Cosmetics for $8 million at the end of 1985. The small Southern California company produces a line of hypo-allergenic cosmetics that have been sold in a limited number of stores in western markets for the past 48 years. The $10 million regional brand is said to appeal to women who believe they have sensitive skin, a growing market segment.

Now that Tambrands has entered into the highly competitive $6 billion cosmetics category, company spokespersons refuse to speculate on expansion plans for the brand, opting for a wait-and-see attitude. In the meantime, the cosmetics company has hired an advertising agency for the first time —Torrance, Cal.-based DFS Dorland. If Tambrands decides to push Physicians Formula Cosmetics into new markets, Tambrands' distribution channels and marketing techniques are a natural fit.

Acquisition and diversification efforts currently serve to complement Tambrands' mainstay, its successful tampon business. Despite a spring price hike and reduced spending on its Petal Soft plastic-applicator tampon, Tambrands grabbed a first-quarter market share of 53.6% in the $505 million tampon market. That was far ahead of the 32.3% share for Playtex of International Playtex, Stamford, Conn., and 8.4% for O.B. tampons marketed by Johnson & Johnson, according to Salomon Brothers analyst Diana Temple, who tracks supermarket sales.

But while New Brunswick, N.J.-based J&J spent $5 million advertising O.B. in 1985, Tambrands increased measured media spending to $12.3 million, compared with $10.8 million the year before. A younger 15-to-22-year-old segment is being tapped by all three competitors as Tambrands promotes its Petal-Soft plastic applicator version of Tampax and Playtex its Slender Regular product.

Although Tambrands is the undisputed leader in tampon sales, its external pad product, Maxithins, faces a barrage of competitors from which it has wrested a 9.1% share in the $1.03 billion sanitary pad category in the first quarter of this year, according to Ms. Temple. Maxithins entered the black for the first time in 1986, despite aggressive pricing and promotion by its rivals.

Tambrands even spent $15 million promoting Maxithins in 1985, 28% less than in 1984. Four new line extension promotions had inflated the 1984 advertising budget. J&J holds the largest single product share, 24.5% for its Stayfree product, and it is followed by Kimberly-Clark's combined 26.9% share for its New Freedon and Kotex lines. Newcomer P&G's Always, with a 15.3% share, also outpaced Maxithins' share of the market.

In total U.S. unit sales of feminine protection products, J&J, Kimberly-Clark and Tambrands each account for 20% to 30%, while Playtex International and P&G account for most of the remainder, according to Tambrands.

Tambrands is strengthening its presence in overseas markets. Because of the weaker dollar, the company could get a boost in foreign sales in 1986 by as much as 30% over current levels, according to Value Line analyst Marilyn M. Royce. Tambrands markets its products in more than 135 countries, from which it garnered over one-fourth of company sales last year, 15% from Europe. Tambrands holds a 25% share of the sanitary protection market in the U.K.

But expansion efforts are directed toward fledgling markets. In May, 1985, Tambrands acquired a 95% interest in Pro-Hygiene, S.A., a privately owned Brazilian manufacturer of sanitary pads and disposable diapers, said to be the second largest company of its kind in Brazil, with a self-claimed 15% share of the $85 million Brazilian feminine-protection markets. Tambrands will compete with J&J in that country, where only 40% of the women rely on commercial products for feminine protection.

During the third quarter, Tambrands began a 50/50 joint venture in Turkey with that country's largest external pad and disposable diaper manufacturer to introduce an improved sanitary pad product.

Another joint venture sure to become an adventure is Tambrand's signing of an agreement in September, 1985, with two Chinese companies to manufacture and distribute Tambrands' tampons and sanitary products in the People's Republic of China. Tambrands' stake amounts to 60%.

Texas Air Corp. went on an acquisition binge in 1986, swallowing Miami-based Eastern Airlines, formerly the nation's No. 3 carrier, and laying the groundwork for a takeover of Newark, N.J.-based People Express, including its Frontier Airlines unit. The company also made major agency shifts in late 1985 and in 1986.

When the $600 million acquisition of Eastern, which became a wholly owned subsidiary, was approved Oct. 1, 1986, by the U.S. Department of Transportation, Texas Air became the nation's largest air carrier holding company with a 15.9% market share. The United Airlines unit of Elk Grove Village-based UAL is second with a 15.85% share, and the American Airlines unit of Dallas-based AMR Corp. is third with a 13.58% share, according to *Aviation Daily*, New York.

The acquisitions of People Express and Frontier, which received tentative approval from the DOT in mid-October, would add another 3.29% market share to Texas Air's holdings. Only Aeroflot, the Soviet flag carrier, then would be larger.

People Express has asked for speedy approval of its merger with Texas Air, saying on Oct. 7 that it may default on more than $13 million in interest payments unless DOT rushes approval. *Aviation Week & Space Technology* reports People Express also owes $20.1 million in back taxes to the federal goverment and to two states. In addition, several creditors are threatening to halt vital maintenance and computer services as a result of slow payments. The People Express acquisition is valued at about $125 million in Texas Air common and preferred stock.

The key to the People Express acquisition is acquiring the assets of the Frontier unit in a separate transaction valued at $25 million cash and assumption of $151 million in notes. People's Denver-based Frontier unit already is grounded, and its assets are in bankruptcy court.

Bruce Hicks, a spokesman for Texas Air, says Texas Air already has made agreements with People to buy up to 12 Boeing 727-200 aircraft, valued at $49.5 million, through the acquisition process. By October, Texas Air had transferred $30 million to People Express, but was unwilling to infuse additional cash beyond its agreement until it received final DOT approval, he says.

Mr. Hicks says Texas Air would proceed with the acquisition of People Express if it also is permitted to acquire Frontier's aircraft and gates. "But we would not proceed with People Express without Frontier," he says. Texas Air wants Frontier's holdings because its Continental Airlines unit is a major Frontier competitor at Denver's Stapleton International Airport. Frontier's assets will become part of Continental, giving Texas Air 35% of the flights and gates at that hub, equal to United Airline's share at Denver, Mr. Hicks says. People Express initially will be operated as a wholly owned subsidiary, and possibly merged into one of Texas Air's other subsidiaries, he says.

The DOT delayed Texas Air's acquisition of Eastern for several weeks in September until Texas Air sold off gates and landing slots at New York's LaGuardia, Washington's National and Boston's Logan Field airports to New York-based Pan Am for $65 million. The gates and landing slots are in the nation's most lucrative shuttle service market. Texas Air would have had a near monopoly on the shuttle service between its Eastern and New York Air subsidiaries if not for the sale. New York Air discontinued shuttle service Oct. 1.

Texas Air's total 11-media measured spending in 1985 for its chief subsidiaries—Continental Air Lines and New York Air—was $23.1 million in 1985, down 9% from 1984. (A profile listing People Express spending appears elsewhere in this issue.) The spending drop was primarily a result of a 14.5% drop in newspaper spending to $15 million.

The $15 million was an aggregate spending for Continental and New York Air. Aside from that expenditure, Continental's total measured spending for the seven media (excluding newspapers) monitored by Leading National Advertisers, declined 54% to $934,000 in 1985, including a 71% drop in spot tv to $454,000, and 15% drop in out-of-home to $402,000. New York Air's total measured spending for the seven LNA media fell 30% in 1985 to $525,000, including a 17% drop in spot tv to $465,000, and a 79% drop in out-of-home to $35,000.

Texas Air was solidly profitable in 1985 with $1.9 billion in consolidated operating revenues, up 41% over 1984. Net income in 1985 was $90.9 million, up 80% over 1984. Revenues for the first six months of 1986 were $1.1 billion, up 21% over the same period in 1985.

In the current year, Texas Air took a net loss of $51.3 million in the first half as a result of $64.2 million in claims against the Continental unit relating to its bankruptcy, which was filed Sept. 24, 1983.

Texas Air's consolidated net income was $19.4 million prior to the unusual item.

In August, 1985, New York Air dropped Bloom Cos. in New York for Levine, Huntley, Schmidt & Beaver. Continental Air at the end of October, 1986, dropped Scali, McCabe, Sloves, New York, for N W Ayer, New York.

Thompson Medical Co. RANK **183**

New York

($ in millions)

Worldwide	1986	1984	% chg
Sales	137	197	(30.6)
Net income	11	21	(47.5)
U.S.	**1986**	**1984**	**% chg**
Sales	133	190	(29.9)
Operating profits	19	40	(52.5)
Advertising	40	48	(15.9)
Division sales	**1986**	**1984**	**% chg**
Meal replacements	35	84	(58.3)
Appetite suppress.	70	84	(16.7)
Other health prod.	32	28	14.3

Thompson Medical Co. experienced declines of 30.6% in sales and 47.6% in net income in 1985 largely as a result of poor performances in two big product lines—Slim-Fast nutritional products and Dexatrim appetite suppressant—which also are the most heavily advertised products at Thompson.

Very little has changed in 1986 on the financial front primarily because of the lagging performance of the two brands. For the nine months of fiscal 1986, ended May 31, Thompson had sales of $96.1 million, down 13.4% compared with the prior year period, and net income of $6.9 million, down 27.4% from 1985.

During 1985, Thompson Medical spent $33.2 million in 11 measured media, down 19% from the previous year.

Heading the brand spending in 1985 recorded by Leading National Advertisers, which monitors seven major

media, was Dexatrim reducing capsules, with $17.3 million, up 36.4% from 1984. Dexatrim media concentrates on network tv with a $12.7 million expenditure. Network cable, spot tv and magazines each received $1-$2 million in spending for Dexatrim.

Thompson pulled its diet-aid Dexatrim line extension, Dexatrim-15, off the market in early 1986 after less than a year. Shipments of both Dexatrim-15 and competitor Ciba-Geigy's Acutrim II were suspended from the market under court order in January, 1986. Thompson had brought suit against Ciba-Geigy, alleging the competitor's advertising with being false and misleading and causing a decline in sales of Dexatrim. Both companies had to withdraw their products until adequate substantiation of ad claims could be provided. Ciba-Geigy has since resumed shipments of Acutrim II, although Thompson has not reintroduced Dexatrim-15.

Sales of Dexatrim and other appetite suppressants of the company decreased approximately 19% during the year. Part of the problem was the retailers' reluctance to maintain inventory or promote any capsule product. To combat this, Thompson introduced the Dexatrim line to the market in 1986 in caplet form, which also was marketed for pre-meal consumption.

During 1985, Dexatrim claimed a 53% share of the $160 million category with other Thompson brands taking another 10%. The growth product in the category is Schering-Plough's Fibre Trim, which has expanded the market 50% and taken a one-third share.

Dexatrim advertising, largely network tv, appeals to the 85% of dieters who do not use appetite suppressants: "You'll lose 50% more weight if you add Dexatrim to your diet."

The Slim-Fast protein powder meal-replacement line received $4.8 million, the next strongest support, down from $11.4 million in 1985. Slim-Fast sales grew 150% in 1984 over 1983, however, in 1985 sales dropped 59% below those of 1984. Slim-Fast's market share dropped in 1985 from 64% to 59% as the category itself fell from $150 million to $100 million.

Thompson still is testing its single-serve Slim-Fast Gourmet Weight Loss Meals in major western and midwestern chain stores. The four-entree line, containing less than 300 calories, are retort packaged. This year, another meal-replacement line, Fiber-Full, has been introduced via network tv bearing the theme: "The advanced way to lose weight brought to you by nature." The product did not go through test marketing.

In the external analgesics market, a $220 million category nationally at retail, Aspercreme and Sportscreme together hold a No. 2 market share next to Pfizer's Ben Gay. The company spent $2.9 million on Aspercreme pain reliever creme rub, down 10.5% from 1984, and $2.5 million on Sportscreme pain relieving rub, up from only $298,000 in 1984.

Cortizone-5 is the No. 2 brand in the $50 million cortisone cream category led by Cortaid by Upjohn. Cortizone 5 skin cream drew $2 million in support, up 48% from the prior year.

Encare, the leading contraceptive suppository, is now a distant second to VLI's Today sponge.

Aqua-Ban is the No. 2 premenstrual diuretic, but the category is only about $20 million nationally at retail.

Caffedrine is a distant No. 3 to No-Doz (Bristol-Myers) and Vivarin (Beecham) in a $25 million category.

NP-27, an anti-fungal product bought from P&G in 1984, is No. 4 in the $85 million athlete's foot market.

The company also has introduced in 1986 Decongest in the $750 million cold-remedy market in tablets and capsules.

The company also repackaged and re-introduced the appetite suppressant products, Slim-Mint gum and lozenges, in the spring of 1986. Slim-Mint, the first diet aid marketed by Thompson, was introduced in 1956. The company advertises Slim-Mint only on a regional basis.

For Trans World Airlines, it would appear nothing could be worse than the year it suffered in 1985. Beset with hostile takeover attempts—culminating with a successful one by corporate raider Carl C. Icahn—the much-publicized Middle East hijacking of a TWA jet and fare wars with competing airlines, TWA experienced a loss of $193 million in 1985 after posting a profit of $30 million the previous year.

But 1986 looks considerably brighter. After posting first quarter losses of $169 million and a second quarter deficit of $87 million—a figure less than analysts expected—TWA surprised the industry by posting third quarter profits of $70 million, with the promise of "substantial" profits in the fourth.

The turnaround in the second half is attributed to substantial cuts in costs amounting to about $400 million a year, and redeployment of planes when European travel dropped because of terrorist attacks early in the year. Planes basically were routed to U.S. and Caribbean markets.

Investors, besides being surprised by the quick turnaround by the airline under Mr. Icahn, have gained optimism about the airline because of its $250 million acquisition of Ozark Airlines, eliminating duplicated services. Some positions are also expected to be eliminated as TWA and Ozark staffs are consolidated.

On the cost side, Mr. Icahn's aggressive cost-cutting policies have included extracting $150 million in wage concessions from the pilots and machinists unions, saving another $100 million from job cuts in nonunion ranks and potential savings of perhaps $50 million in lower salaries for new flight attendants, replacing strikers. TWA's 6,000 flight attendants struck in March over a management wage concession proposal and costing the company an estimated $2 million a day.

Mr. Icahn's ax wielding had its effect on advertising. He cut TWA's fourth-quarter 1985 ad budget by 40%, from $10 million to $6 million; fired the company's top marketing and advertising executives, and engaged in a do-si-do with TWA's advertising agency since 1979, Ogilvy & Mather, first dismissing the shop, rehiring it on a sharply reduced commission, and finally placing the company's business with Young & Rubicam this spring.

TWA reported spending $83.6 million worldwide on all aspects of advertising and publicity in 1985, up from $80.7 million in 1984. Industry analysts say the total probably will fall to less than $70 million this year. Of that total, $66.9 million is spent in U.S. advertising and promotion, according to Ad Age estimates. TWA spent an estimated $43.9 million in measured advertising in 1985, a little over half, $20.9 million, on newspapers, down from $21.4 million in 1984. Major media expenditure shifts included a drop from $12.1 million in 1984 to $9.5 million in spot tv, while magazine expenditures rose from $5.2 million in 1984 to $7.5 million, and spot radio increased from $2.9 million to $4.2 million.

Mr. Icahn's acquisition of TWA came after several attempted takeovers, including one by Texas Air Corp., which TWA's board of directors originally had approved. But TWA unions opposed the move, calling Texas Air's Frank Lorenzo a union buster; they offered some $40 million in wage concessions to sweeten the takeover by Mr. Icahn, who became TWA chairman this January. Reportedly, he was prepared to sell quickly at a profit, but instead has stuck with TWA through its difficulties.

The TWA acquisition of Ozark adds some 50 twin-engine jets and profitable feeder routes that serve TWA's St. Louis hub. TWA now operates 167 jets, 104 of them owned by the airline and the rest leased.

TWA also announced an eight-year joint marketing arrangement this February with Piedmont Airlines, hooking up Piedmont-served domestic routes with TWA overseas flights, and merging ticketing functions and frequent-flier bonus plans. Last summer, TWA negotiated a similar arrangement with ResortAir, a St. Louis-based commuter airline, between St. Louis and several Missouri and Illinois cities.

TWA in 1985 was the nation's fifth largest domestic airline, with a 7.7% share, trailing United, American, Eastern and Delta, in that order. For the past three years it has been the largest trans-Atlantic carrier, with 20.4% of that business in 1985.

Although revenue passenger miles increased from 28.3 billion in 1984 to 32 billion in 1985, revenue per passenger mile decreased 8.5%, primarily because of increased competition and fare wars with competing carriers.

During 1985, TWA expanded its overseas operations by extending one of its New York-London flights to serve Copenhagen, a New York-Paris flight to serve Geneva, and a new York-Cairo-Kuwait flight to serve Bombay.

TWA also implemented nonstop service from New York to Munich and from St. Louis to London, Paris and Frankfurt. And in February, 1985, TWA became the first U.S. carrier to fly a two-jet aircraft, a Boeing 767, nonstop between the U.S. and Europe.

With O&M, TWA's advertising strategy positioned it as a full-service, high-quality airline to differentiate it from its cut-rate competitors and during 1985 scrapped its familiar "You're going to like us" campaign for a new theme, "Leading the way."

Young & Rubicam began a new print campaign in June, stressing lower fares both domestically and for international flights.

Growth in units and services has continued through 1985 and 1986 for the three businesses of Transworld Corp.—Canteen Corp., Chicago, Spartan Foods, Spartanburg, S.C., and Hilton International, New York.

Business segments were four until October, 1985, when Transworld sold its Century 21 real estate unit. And with the Century 21 deal went most of Transworld's advertising budget. Century 21 accounted for $21.1 million in measured spending out of $23.7 million the company placed in 11 media monitored for this issue. Transworld reported to the SEC $45.1 million worldwide in advertising costs in 1985.

With measured spending off 7% in the 11 media, only network tv climbed, by 43%, to $17.9 million, all for heavy Century 21 Real Estate promotion.

Spending for Quincy Family Steak House restaurants, a Spartan chain, fell 24% to $1.2 million, weighted toward outdoor and with lesser amounts in spot tv.

Several major unit changes altered the Transworld organization landscape during the year: Transworld sold Century 21 Real Estate to Metropolitan Life Insurance Co. for $251.2 million. The company says it divested Century 21 because Century's best growth potential was in financial services, a field already well populated with highly competitive firms, that are solidly established and much larger than Century 21.

In September, 1985, the company acquired for $93.5 million the food-service company, Interstate United Corp. Interstate was merged into Canteen, making Canteen a $1.4 billion company, pushing ARA Services Inc., Philadelphia, for the top spot among U.S. food service management companies.

In 1986, Hilton International is opening new units in Pittsburgh, Osaka, Japan, and Brisbane, Australia, and for 1987 it is planning an 800-room, 40-story hotel in Shanghai.

During 1986, Spartan Foods debuted Pryde's Restaurants, which are small combination sit-down and drive-through restaurants designed for the sparser customer populations of small towns. So far, seven are operating in the Carolinas.

Spartan Food Systems' 590 restaurants is represented by 365 Hardee's franchises and 218 Quincy Family Steak Houses and the seven Pryde's.

In 1985, Hardee's introduced Cinammon n' Raisin biscuits; the Kid's Combo Box, a packed "lunch" concept and Hash Rounds potato puffs. New in 1986 are Bacon Egg & Cheese Biscuits. New offering for 1985 at Quincy were homestyle Chicken Filets and the Kid's Club Children's Menu, and new in 1986 are Clearwater Catfish Filets, yeast rolls, and the Country Side Board, a buffet with meat entree, salad and dessert.

Spartan now accounts for 22% of Transworld's total sales and 35% of its operating income.

Canteen Corp., with more than 56 years in the vending machine business, now has 181,000 of the units plus a broad reach into many types of food-service—schools, hospitals, corporate offices and many other locations. A brand new Canteen customer, signed in October, 1986, is Cook County Jail in Chicago, one of the nation's larger prisons.

In 1983, Canteen moved into the school-lunch business by acquiring Preferred Meal Systems, the biggest supplier of pre-packaged lunches to primary and secondary schools. And in 1985, Canteen bought 45 delicatessen units in office buildings, although the occupancy lag in new offices has slowed that business.

Canteen produces 46% of Transworld's sales and 24% of its operating income.

Hilton International now operates 90 hotels under the Hilton International in 44 countries. In the U.S., it has the Vista International chain which includes hotels operating under other names, such as the patrician Drake Hotel in Chicago.

Other Vista units are Kansas City and Oklahoma City hotels opened in 1985 and Vista is located in Washington and the World Trade Center in New York. Hilton accounts for 32% of sales for Transworld and 41% of operating income.

Changes have come rapidly to this company and its predecessor in recent years.

Expanding beyond its transportation business, Transworld consisted of Trans World Airlines, Canteen and HI when incorporated in 1978; Spartan and Century 21 came in 1979.

TWA, a drain on earnings, was spun off in 1983.

The company today is guided by a board with notably blue ribbon names including Jack Valenti, president of Motion Picture Assn. of America; Lester Crown, ceo of Materials Service Corp., and Robert McNamara, former General Motors chairman, U.S. Secretary of Defense, and retired World Bank president.

Triangle Publications

RANK 168

Radnor, Pa.

($ in millions)

Worldwide	1985	1984	% chg
Sales	720	657	9.6
U.S. advertising	49	39	23.9

Triangle Publications, whose *TV Guide* and *Seventeen* have felt the malaise in the national magazine market in 1985, took a bold step in February, 1986, to relaunch *Good Food* after a 12-year hiatus.

Good Food made its debut with weaker advertising and circulation than the original, while *TV Guide* trimmed its rate base to less than 17 million, still retaining the crown of the top circulation magazine in the U.S.

The company had an over-all net revenue growth of 4.3% in 1985, largely the result of increased rates, according to Advertising Age estimates. The privately held company, owned by Walter Annenberg, does not reveal revenues and earnings figures for its media properties. During the year, Mr. Annenberg assumed the role of chairman, while relinquishing his title of president to William Henrich.

Triangle did not spare the ad dollars in 1985, increasing its spending in the 11 media measured for this issue by 58.6%, to $38.7 million. The company is putting $3 million behind the launch of *Good Food* in 1986. The magazine, attempting to forge a place in the crowded food and gourmet magazine arena, underwent a logo change for the September issue, coming on the heels of a $1 million summer tv spending blitz. The supermarket checkout counter-distributed digest is seeking to build its circulation to its 750,000 rate base, as well as gain advertiser confidence.

The magazine's introduction has been rocky. Display racks in supermarkets obscured the book, leading to the shortfall in circulation, says Frank G. Wolf, group publisher of *Good Food* and *Seventeen*. Potential advertisers, who recall the abrupt cancellation of the original after only eight issues between 1973 and 1974, are waiting to test the magazine's staying power.

The original *Good Food* averaged 40 ad pages, while the first six issues of the relaunch have averaged 12. To spur ad sales, by mid-1986, the company had recruited Bob Young from the *New Yorker* to be associate publisher-advertising, while shifting other *Good Food* and *Seventeen* executives to new advertising positions.

However, company officials say strong circulation is crucial to the magazine's longevity. The new red banner logo is designed to visually pop out at the checkout counter and boost sales, Mr. Wolf says. He also notes that direct mail is being used to build a subscription base. The magazine hit its guaranteed minimum in July, 1986.

The majority of Triangle's advertising is aimed at promoting *TV Guide* subscriptions. An intensified effort in 1985 accounted for a spending increase of 35%, to $35.2 million, according to Leading National Advertisers. The bulk of this money was spent on electronic media: $24.4 million on spot tv, $1.5 million on network tv and $7.5 on network radio.

Other *TV Guide* promotional money is directed at advertisers, accounting for $1.8 million in business publication spending, according to the Rome Reports.

For the year, *TV Guide's* gross advertising revenue rose 3.2%, to $314 million, according to Publishers Information Bureau, despite a 3.4% drop in ad pages to 3,670. In July, 1986, ad rates rose 1.3%, to $94,700 for a one-time, four-color insertion.

The weekly *TV Guide* continues to have the largest magazine circulation, despite its rate base cut from 17 million to 16.4 million. *Reader's Digest*, which had topped *TV Guide* with monthly circulation of 17.75 million, dropped its guarantee to 16.25 million. Through 1986, *TV Guide* has averaged 16.8 million circulation, according to company officials.

Seventeen had a gross revenue increase of 5.9%, to $34.2 million, according to PIB, although advertising pages were down 4%, to 1,437. Circulation stood at 1.75 million, according to Audit Bureau of Circulations.

Measured spending for *Seventeen* included $18,200 in newspaper supplements in 1985. No measured spending was recorded in 1984. Through calendar 1986, Mr. Wolf estimates $650,000 will be spent advertising and promoting *Seventeen*.

Rebounding from a net loss of $79 million in 1985 which followed a net loss of $89 million in 1984, 20th Century-Fox Film Corp. has found 1986 more hospitable, with net earnings of $19.6 million for the first three quarters of the fiscal year ended Aug. 31, 1986, up from a loss of nearly $80 million for the year-earlier period.

The dramatic turnaround occurred concurrently with a restructuring of the company and a severe pruning of operating costs. Also contributing to the upswing was the success of fall-Christmas 1985 theatrical releases, "Commando" and "Jewel of the Nile," continued success of its summer 1985 release, "Cocoon," and revenues from worldwide syndication of its movie and tv products. "Aliens," a summer, 1986, release, also is doing very well, a sign Fox may be on the rebound.

The company is now one of three operating divisions of Fox Inc., the umbrella organization formed in October, 1985, by Rupert Murdoch's News America Holdings and TCF Holdings, jointly owned by Mr. Murdoch and Marvin Davis. They merged six tv stations purchased from Metromedia in 1985 into the film company. Other divisions include Fox Station Group and Fox Television Network. Financial results reported in this profile and advertising figures, however, are just for 20th Century-Fox Film Corp.

The Fox restructuring program was under the stewardship of chairman-ceo Barry Diller, a former Paramount executive who took over as head of the company in late 1984.

Fox continued its affiliate negotiations with independent tv stations in the top 30 markets. These stations, added to Fox's six own tv stations, could reach nearly 60% of the nation's 85.9 million tv households, creating the long-awaited fourth network. Fox began airing a late-night talk show starring comedienne Joan Rivers this fall.

The company's 1985 advertising and promotion budget was hard hit by cutbacks in operating expenses. The 11 media measured in this issue dropped 29.6%, to $23.5 million, from a year earlier.

Tv advertising claimed 78.7%, or $18.5 million, of the company's measured media spending for 1985, although network and spot did a flip flop in spending. Network tv spending plummeted 70% to $6.6 million in 1985, while spot tv grew 38% to $12 million. The only other major medium to show growth in 1985 over 1984 was spot radio, which grew from $442,000 to $1.9 million in 1985.

Measured expenditures of $1 million-plus went for the promotion of "Enemy Mine," "Man with One Red Shoe," "Moving Violations," "Porky's Revenge" and the rerelease of "Return of the Jedi." Larger amounts were devoted to "Cocoon," $3 million; "Commando," $2.6 million; "Prizzi's Honor," $2 million, and "Jewel of the Nile," $2.1 million. In all, the company backed 20 movies in 1985 with measured spending, compared with 25 movies in 1984, according to LNA.

Eighteen movies are scheduled for release in the current fiscal year. Several summer, 1986, theatrical releases already have drawn big bucks by mid-October: "Aliens" drew $100 million at box office receipts, and the "The Fly," $75 million. An earlier release, "Jewel of the Nile," had drawn $75 million. Less successful offerings were "Lucas" with $10 million and "Big Trouble in Little China, just over $5 million. Early 1987 will see the release of "Wisdom," "Black Widow," "Raising Arizona" and "Mannequin."

CBS-Fox Videocassettes sold more than $6 million worth of videocassettes for each of eight movies in 1986: "Jewel of the Nile," "Return of the Jedi," "Commando," "Rocky IV," "African Queen," "West Side Story," "Patton" and "King and I." The latter four propelled unit sales when prices were cut from $69.95 to $29.95.

The tv division entered the fall of 1986 with the renewal of the half-hour comedy "Mr. Belvedere" on ABC and the introduction of Steven Bochco's "L.A. Law," a one-hour series on NBC, and the "Wizard of Elm Street" on CBS, "Cold Steel and Neon" on NBC.

The tv distribution division continued to make a substantial contribution to over-all profits through the successful syndication of such programs as "Dance Fever," "9 to 5," long-running "M*A*S*H" and various feature film packages.

Acquisition of Metromedia Producers Corp., a tv production and distribution company with a library of more than 350 titles filling 1,500 hours of programing, gave 20th Century-Fox Film's domestic and international tv sales departments a greatly expanded body of product to sell. MPC also gave Fox production and distribution of "Small Wonder," said to be the most successful syndicated first-run, half-hour comedy currently on tv.

DeLuxe Laboratories, 20th Century-Fox Film's film processing subsidiary, also reported significant growth three quarters into fiscal 1986, with possibilities for a record year for the division. DeLuxe reportedly has achieved a greater market share by broadening its customer base through increased emphasis on sales and servicing, another reflection of Mr. Diller's tenure at the helm of 20th Century-Fox Film.

Key executive and marketing changes at 20th Century-Fox included the resignation of Alan Horn, former head of Embassy Communications, as president and ceo, Sept. 1, 1986. His duties have been assumed by Mr. Diller.

Other recent changes at the company include the appointment of Scott Rudin as president-motion picture production and the assignment of additional marketing duties to Tom Sherak as president-distribution. He replaces former marketing chief David Weitzner, who resigned in July, 1986.

United Biscuits Holdings plc, the U.K.-based conglomerate that is the largest cookie and cracker producer and marketer outside the U.S., continues to expand that business line in the U.S. with new entries at subsidiary Keebler Co.

UB, which also operates a specialty food division stateside that in 1985 added to its growth by purchasing the No. 1 black olive marketer in the U.S., drew 40% of its worldwide revenue from Keebler, which had a 7.2% growth in sales over 1984 and operating income of $37.5 million, up 6.5%. Keebler, however, took a one-time charge of $25 million for closing its Philadelphia bakery, a victim of heavy 1985 cookie competition, reducing income to $12.5 million.

Total U.S. sales were up 8%, to $1.07 billion, and operating profit grew 3%, to $52.3 million, when adding UB's other U.S. units, Specialty Brands and Schaffer, Clarke & Co., to Keebler totals. UB in October announced it would combine its U.S. units under the banner of UB Foods-US, also headed by Keebler's Thomas M. Garvin, who will have the same title as at Keebler, president-chief executive officer.

Specialty Brands, a spice and salad foods house, had an increase in sales of 2% and operating profit of $9.23 million, up 4% from 1984. Shaffer, Clarke & Co., food importers and marketers, was down 8% in sales, but operating profits rose 131%, to $2.91 million.

UB worldwide sales grew 9% and profit before tax increased 17%, to $129.3 million.

Keebler Co. continues to claim by far the biggest bite of UB's U.S. advertising expenditures—87.6% of the U.S. measured ad total in 1985, down from 91% in 1984. Unmeasured advertising spending for UB's U.S. divisions, most of it for Keebler, was an estimated $29 million, giving UB total U.S. advertising of $46.4 million.

Seven-media measured ad support was down in 1985 at Keebler to $23.15 million, from $28 million, according to Leading National Advertisers. Keebler, the second biggest U.S. cookie and cracker producer, made a significant flip-flop in its marketing strategy for 1985. Keebler spent 42%, or $12.9 million, of its media budget in 1984 on cookie advertising, but reduced that to just 21%, or $5.6 million, in 1985. Meanwhile, it put 25%, or $7.64 million, into its salty snack media advertising in 1984, but boosted that sharply to 47%, or $12.4 million, in 1985.

Included in its salty snack category are Keebler Cheeblers, reformulated from earlier ancestry as Butter Pretzels and then Hearty Krunch Twists, and the company's new patented Tato Skins snacks, made from potato skins processed into a two-layer fried crisp product. Launched regionally in the second quarter of 1985, Keebler says the Tato Skins in three flavors were a success by the end of the year and are now going into the South, East and Midwest. Sales are ahead of the expected $40 million to $50 million and may go to $70 million to $80 million, an industry source reports.

Other new Keebler products for the year included Crispy Lights, a snack cracker in four flavors; Puddin' Cremes, called the "first cookie with pudding" in three versions, and Stone Creek Butter Thins, a line extension of the Stone Creek brand, a "natural" style cracker.

Keebler's major achievement in 1985 was its growth at a time when U.S. cookie and cracker production was stagnant—cracker output fell 0.8% in 1985, to 1.47 billion lbs., and cookies totaled 2.02 billion lbs. in 1985, up 0.2%—according to the Biscuit & Cracker Manufacturers Assn., Washington.

Against this trend, Keebler grew 2% in biscuit volume—the only major biscuit maker to increase in 1985—gaining market share in the process. In 1986, the association shows over-all cookie production up 7.1% and crackers down 1.9% for a combined increase of 3.5% through June.

RJR Nabisco had about 40% of the U.S cookie market; American Brand's Sunshine, 8%; Procter & Gamble's Duncan Hines, 5.4%, and PepsiCo's Frito-Lay, with its GrandMa's brand, from 2.5% to 7% in 1985. UB placed Keebler's share at 13.5% of the U.S. cookie market, its biggest chunk ever and representing its fourth consecutive year of share gain.

In the soft cookie market, UB puts Keebler's share at nearly 30%, while another industry research source breaks down the $500 million soft cookie market into Nabisco with 37.4%; Duncan Hines, 28.4%; Keebler, 27.6%; Frito-Lay, 5.8%, and Sunshine, 0.8%.

Two years ago it was predicted that soft cookies would become 30% to 35% of the cookie market by now. However, the category has reached only 10% to 15%. The result is industry dislocations such as Keebler's closing of its Philadelphia bakery, the oldest and least cost efficient of its plants. The cost was $25 million, mostly for severance pay and benefits payouts, but the shutdown greatly improved Keebler's profitability.

Even with its steady growth in the cookie market, Keebler is said to regard salty snacks now as its growth area. As a national market, salted snacks are worth $6 billion. They are a subcategory in the $29.5 billion snack foods market (candy nuts, snack cakes, cookies and crackers).

Keebler has spent about $14 million adding 60,000 sq. ft. to its snack food production facilities at Bluffton, Ind., and additional salty snack production capacity is now on line at Raleigh, N.C., for output of new and reformulated products such as Tato Skins and Cheeblers.

Keebler is battling the giants and

lesser giants on virtually the entire snack turf and merchandising, package design and distribution are becoming more critical in setting it apart. Some of the cookie/cracker competitors, faced with the mighty obstacles presented by RJR Nabisco, Keebler and Sunshine Co. in the big grocery outlets, are doing an end-run and popping up in smaller outlets, vending machines and convenience stores.

Keebler, seeking to be aggressive in these markets as well, finds itself head to head with Frito-Lay and Duncan Hines in these retail outlets. Packaging plays a new role in the smaller retail operations where marketers are putting four to six cookies or crackers in a tray and wrapping it in a package the size (and price) of a candy bar—a kind of biscuit in candy clothing.

Frito-Lay, with its GrandMa's and other brands, is taking smaller packaging into the small groceries and coin machines. Duncan Hines, working through brokers, doesn't go into convenience stores, so it's taking the candy route through candy and tobacco wholesalers. By contrast, Keebler, doesn't have the distribution system for candy, but does have a convenience store stratagem, including smaller packages delivered by smaller trucks.

In measured advertising, Keebler continued placing heavy emphasis on tv with 75% of its spending, $19.8 million, going to network and 12%, $3.2 million, for spot. But print had new importance for UB's three U.S. divisions in 1985, as spending for magazines space jumped to 13%, or $3.4 million, of the total budget from just 3.5% in 1984.

Keebler's cookie advertising decline in 1985 from 1984 also involved a shift in tv advertising. In 1984, $7.6 million, or 59%, of the tv total was spent on network and $5.3 million, or 41%, spot tv, but network got 89%, or $4.96 million, in 1985 and spot only $592,900.

Keebler's biggest expenditure for a product was $9.4 million for Tato Skins, the preponderance of which went to network tv, $8.42 million, with $976,500 to spot tv. Support for Town House, Keebler's popular oval-shaped dinner butter cracker, fell 46%, to $1.9 million, in 1985. Spot tv took 37%, or $513,400, of the budget from network, which had the entire budget in 1984.

Advertising for Keebler's formed pie crust, Ready Crust, was about 5% ahead of the previous year, going to $957,500, all in magazines.

Measured ad support fell 12.4% at Specialty Brands, to $2.1 million, according to the seven media monitored by LNA. Specialty Brands, San Francisco, markets Spice Islands spices, herbs and seasonings; Marie's Salad Dressings, a refrigerated line, and its new acquisition, the Early California brand green and ripe (black) olives. The company grows its own herbs in California and olives in Spain and has production plants in California, Nevada, Illinois and Spain.

Ad support for Marie's dressings was up 5.5% for 1985, to $2.03 million. All of it was shifted to magazines in 1985 from spot tv in 1984. Spice Island magazine schedule dropped to $75,000 in 1985 from about $190,000 the previous year.

Overnight, Keebler picked up 28% of the U.S. black olive market with the $70 million purchase of the olive business of Early California Foods, Los Angeles, from its parent, Erly Industries, also Los Angeles. Purchase price was $70 million.

Shaffer, Clarke & Co., a new entry in media advertising, spent $1.73 million in 1985 after no measured expenditures in preceding years.

Shaffer, Clarke, based in Old Greenwich Conn., is the U.S. importer and distributor of UB Biscuits products from Britain; Wasa, Ideal and Finn crisp breads from Scandinavia; Apollinaris mineral water from Germany; KA-ME (ka-may) oriental foods; a line of frozen game meat, and confectionery products from Holland, Britain and Switzerland.

More than half the Shaffer, Clark 1985 spending backed Wasa crisp bread, supported by a spot tv campaign, costing $846,500 and including 30-second vignettes reminiscent of Woody Allen's "Annie Hall" movie characters and ending with the line, "Some people may never be ready for Wasa bread." Saatchi & Saatchi Compton, New York, handles.

Britain's Imperial Group tried to purchase UB in late 1985 for $1.7 billion. But UB countered with a bid of its own for Imperial in February, 1986. Neither succeeded.

U.S. West, which provides telephone service to 14 western states, boosted its measured ad spending 53% in 1985 as it pushed its new theme: "The Spirit of the West is Working," for its three telephone subsidiaries and nonregulated enterprises.

U.S. West is one of the seven regional Bell holding companies created Jan. 1, 1984, by the breakup of New York-based AT&T. U.S. West continued its modest growth performance in 1985 into 1986, recording for the nine-month period ending Sept. 30, 1986, net income of $718 million, up 4% over the same period in 1985. Revenues were $6.2 billion, up 7%.

Measured media spending for the 11 media monitored for this issue was $27.3 million, up 53% over 1984 on the strength of $5.4 million in measured spot radio, up from no measured spending on the medium in 1984, and $5.7 million in 1985 measured newspaper spending, up 15.3%.

The bulk of U.S. West's measured media in 1985 was spent by its three telephone subsidiaries: Mountain Bell had $3.5 million in spot tv, down 4% from 1984; Northwestern Bell's spending grew 19% to $2.2 million, and Pacific Northwest Bell spending grew 20% to $3.2 million. Spot tv accounts for at least 90% of the media spending by each unit.

The three telephone subsidiaries also had combined yellow pages measured spot tv spending of $2 million in 1985, up 40% over 1984. General corporate promotion for U.S. West was up 39% in 1985 to $2.3 million, almost entirely in magazines.

U.S. West signaled its intention to become a major player in the business communciations market early in 1985 with the formation of U.S. West Information Systems, a subsidiary that consolidates the marketing and sales efforts of all U.S. West units in unregulated businesses.

The unit was formed by merging FirsTel, a regional business communications marketing organization, and Interline, a telecommunications system installation and maintenance company in some 36 states. In spring, 1986, the new unit paid $120 million to acquire Omaha, Neb.-based Applied Communications, a leading manufacturer of computerized transaction process software used in automated teller machines (ATMs).

Concerning the move into unregulated areas that typically attract corporate customers, analyst Gerald Mayfield, president of the professional services division of DMW Group, Stamford, Conn., says "the size of U.S. West's regional markets versus the rest of the country means it is naturally looking west and east. They want to build a natural presence. They're looking for big corporate accounts."

U.S. West also is looking beyond its territory in the publishing field. Its Landmark publishing unit purchased a dozen small white and yellow pages directory publishers in 1985, the largest being San Diego-based Trans Western Publishing Co. early in 1985, and Lomar/Johnson/Directory Publishing Co., Loveland, Colo., late in the year. The Landmark unit publishes over 800 directories in 42 states.

U.S. West's NewVector cellular telephone unit is expanding aggressively. In the second quarter of 1986, the unit paid $56 million for the cellular service franchise in San Diego. In 1985, the unit received approval for a joint venture to build a system serving the Gulf of Mexico, and completed plans to build a system in Costa Rica. NewVector now has cellular systems in 12 cities and the Gulf of Mexico, making it the 14th largest cellular system in the U.S.

Villa Banfi, U.S.A.

Old Brookville, N.Y.

RANK **198**

($ in millions)

U.S.	1985	1984	% chg
Sales	185	195	(5.1)
Advertising	31	24	31.2

Villa Banfi USA, rebounding after two unfounded wine-tainting scandals hurt sales of its wine products, is repositioning its wine line in response to changing consumer tastes.

The company, marketer of classic wines under the Villa Banfi label and the Riunite line—the nation's largest imported wine brand—devoted most of its increased ad spending in 1985 to network tv. Network tv increased 30% from 1984 to $19.5 million.

Measured advertising over-all rose to $21.4 million, up from $16.8 million in 1984. Network tv accounts for most of Riunite advertising, and Riunite advertising accounts for virtually all of Villa Banfi advertising.

Banfi expects total ad spending to be unchanged or slightly down in 1986, primarily because of the wine scandals that led the company to pull ads for its Riunite line. Compounding the problem was the timing of the scandals—in late October, 1985, and April and May, 1986—key wine-selling periods.

In October, 1985, Banfi voluntarily recalled 1.2 million cases of Riunite after the Bureau of Alcohol, Tobacco & Firearms said a new test had detected minimal traces of toxic diethylene glycol in the wines. In April, 1986, Villa Banfi, as well as other leading Italian wine importers, pulled ads after methanol, or wood alcohol, was found in some table wines in Italy.

Widespread reports of the problems caused Riunite sales to plummet temporarily. The October recall showed that the DEG levels in Riunite, present because of a production accident, were not harmful. Riunite, the nation's leading imported wine, saw case depletions drop 8.6% in 1985, to 10.29 million cases, according to M. Shanken Communication's *Impact*, an industry newsletter. Its case depletions makes Riunite the No. 4 largest wine marketer stateside. The Gallo brand is No. 1 with 18.4 million cases, followed by Gallo's Carlo Rossi, 17.1, and Brown-Forman's California Cooler. Riunite, based on expected case depletion estimates in 1986, could drop to No. 6 as Gallo's Bartles & Jaymes, and possibly Sun Country from Canandaigua Wine Co. leap it in share of market.

The April methanol problem that resulted in several deaths in Italy was isolated to that country. The tainted Italian wines involved in the scandal were inexpensive local varieties that were never imported to the U.S. Despite this finding, the entire Italian table wine segment suffered sales declines, as retailers pulled the product off shelves and consumers shied away from Italian wine consumption. From January to July, Italian table wine shipments imported to the U.S. dropped 26%, to an estimated 24 million gals., according to the National Assn. of Beverage Importers.

Banfi is unsure whether total case sales of all brands in 1986 will reach the 1985 level of 10.8 million cases which generated revenues of an estimated $185 million, according to *Impact*. Frank Gentile, senior vp-sales & marketing, says peach Riunite, introduced in July, has done very well and may make up for sales lost during the April-May-June down period.

Hurt, but not defeated, Villa Banfi is responding to the crisis with a three-pronged attack. The popular-priced Riunite line—long marketed as a beverage, as opposed to a wine—is being repositioned with a more classic, upscale image. Banfi is doing away with its old "Riunite so nice, Riunite on ice" ad theme and is airing a spot developed in late 1985 positioning the Riunite line as an award-winner and Italy's best-loved brand.

The line—which includes Lambrusco, Rosario, D'Oro and Bianco varieties—outsells its nearest competitor, Jos. Garneau Co.'s Cella, nearly 5-to-1. Cella last year sold 2.5 million cases, according to *Impact*.

The repositioning of Riunite reflects the company's sensitivity to the scandals by reinforcing the wine's traditional heritage. Riunite in 1985 received 95% of the total measured budget at Villa Banfi, the same as in 1984, according to Leading National Advertisers. The line got $19.5 million in network tv, $675,000 in spot tv and $563,000 in magazines.

A second, new line of fruit-flavored Riunite is being promoted in much the same way the original Riunite line was advertised. The new line, capitalizing on the $1 billion burgeoning cooler segment, features a peach Riunite, introduced in July, and a raspberry Riunite, which rolled out in mid-October. Mr. Gentile says other fruit flavors are planned.

The fruit-flavored Riunite varieties are being positioned in the beverage category as popular, contemporary drinks to be consumed at any time with any meal. Banfi promotes the line with colorful, video-like spots themed "Peachy, peachy Riunite" targeting younger consumers. These spots will carry tags promoting the raspberry flavor, and next year the new flavor will get its own campaign.

Like coolers, fruit-flavored Riunite has a low alcohol content, about 6% alcohol, and is offered in a variety of sizes, including the traditional cooler four-packs. Mr. Gentile, however, notes that fruit Riunites differ from coolers in that water is not added to the product. He says the new products are creating a new segment in the market.

Banfi's third line, its classic wines, also are getting more marketing support. The Banfi wine line, which includes high-test wines ranging from $5 to $28 a bottle, received its first print ad support this year in upscale magazines such as *Gourmet* and *Bon Appetit*.

In 1985, Banfi also moved into the growing sparkling wine segment with its Riunite Spumante. Although the brand was introduced when popular priced bubbly is flattening in favor of more expensive brands, Mr. Gentile says Spumante finished 1985 with 300,000 case sales—"a very good start." He says last year's tv spots, themed "More taste than champagne," will air again this year during the peak holiday season.

Villa Banfi is privately held by the Mariani family. The company declines to disclose sales and profits.

Visa International

San Francisco

($ in millions)

Worldwide	1986	1984	% chg
Volume	107,200	85,500	25.4
U.S. advertising	42	30	38.6

Visa USA took on American Express in 1985 with a hard hitting comparative campaign that tries to convince the U.S. public to start "leaving home without it." Visa, no longer content with its image as a "shoppers card," launched the first round of its assault in October, 1985, with tv spots using the new theme, "Visa. It's everywhere you want to be."

Visa's pitch to gain a larger share of the lucrative travel and entertainment dollar comes at the same time that American Express is advertising its potential as a shoppers card.

Visa's commercials were the first offerings of New York-based BBDO since taking over the Visa USA account in April, 1985. Previously, Visa relied on an in-house agency. Visa USA is one of five regional units of Visa International, each of which is controlled autonomously. The other regions groups include Canada, Latin America, Europe-Middle East-Africa, and Asia-Pacific. More than 160 countries are served.

The tv spots show how widely accepted the Visa card is—from a boat rental yard in Bermuda to a family restaurant in Boston—and places were where American Express cards are not accepted. The spots play up the 5 million establishments worldwide that accept Visa, compared with 1.4 million for American Express.

Visa USA spent $15 million in measured media for Visa charge card ads in 1985, up 7% over 1984. The spending was divided 71% network tv, 10% spot tv, 12% magazine, 5% network radio, 1.5% cable tv, and 0.5% out-of-home.

Spending for the Visa card accounted for 57% of Visa's $26.4 million in measured spending for seven media, up 27% over 1984, according to Leading National Advertisers. Visa had total measured spending for 11-media of $29.8 million, up 39% over 1984. The difference between the LNA and 11-media largely was $3.1 million in measured spot radio spending. As part of its spending totals, Visa USA had a measured $8.1 million in 1985 for the Visa charge card and travelers checks, divided 71% network tv, 21% network radio and 5% magazine.

Visa took off the gloves in 1985 as part of the fight to protect its leadership position in the bank card business from growing competition in the form of third-party and general purpose charge cards. The 17,000 financial institutions authorizing Visa cards in the U.S. had 59%, or $75.2 billion, of the $126.3 billion dollar volume spent on bank cards in 1985. Visa's U.S. dollar volume increased 23% for the year, and represented 70% of Visa's $108 billion in international volume in 1985.

For comparison, MasterCard's 16,000 member institutions in the U.S. had dollar volume of $51.1 billion, up 21% over 1984 and representing 41% of the U.S. bank card total. MasterCard's U.S. volume represented 68% of its $75.3 billion international dollar volume.

American Express, which by far is the world's largest credit system, unlike Visa and MasterCard, which are authorized by individual banks, handled U.S. card volume of $44.5 billion in 1985. American Express's worldwide dollar volume of $55.4 billion was up 16% over 1984.

There were 97 million Visa card subscribers as of June 30, 1986, up 10% over the same date in 1985. MasterCard had 73 million. American Express had 17 million U.S. cardholders at the close of 1985. But coming on strong is Sears, Roebuck & Co.'s Discover card, introduced late in 1985, which by August, 1986, had 4.7 million cardholders. In an effort to gain market share, Sears is offering Discover cards to its 60-million credit customers with no annual fee.

By August, 1986, Sears had a base of 380,000 merchants accepting the card, which is accepted even by rival Montgomery Ward Co. An important disadvantage is that Discover has limited access to automated teller machines (ATMs) and bank processing systems. Merchants also cannot get immediate electronic credit for purchases, but must mail drafts to Ohio, which takes about five days, says John C. Pollock, editor of "Bank Credit Card Observer," Iselin, N.J. For comparison, Visa has access to 200,000 banking offices in 160 countries and 11,000 ATMs in 16 countries.

Spencer Nilson, publisher of the Los Angeles-based "Nilson Report," says Sears is at best a minor annoyance to Visa and American Express. "Sears is not a competitor to anybody. It doesn't have anywhere near the same number of merchants, cardholders or anything else. Sears isn't going to make it. It won't succeed," Mr. Nilson says.

Visa USA boosted ad spending by 11% for the Visa Premier charge card in 1985. Premier, which was introduced in 1984, received $3 million in measured magazine spending. Visa also announced focus group testing of two prototype "Super Smart" cards in late 1986. The card contains a keypad and built-in computer chip allowing users to calculate and record banking and credit transactions.

Visa announced in April, 1986, that it would be splitting the credit card exclusivity category on ABC's coverage of the 1988 Winter Olympics in Calgary, Canada, with American Express. Neither Visa nor American Express would reveal the price paid for the media buy. Visa also plans to participate in NBC-TV's coverage of the summer Olympics in Seoul, Korea, a spokesman says.

Volvo Cars N.A., the car marketing division of Volvo North America Corp., both of Rockleigh, N.J., increased its sales in the U.S. for the ninth year in a row and in 1985 became the first European import to crack the 100,000-unit sales mark.

Formerly called Volvo of America, the company was reorganized as Volvo N.A. on April 30, 1985, with all U.S. and Canadian Volvo subsidiaries becoming operating divisions. The move separated car, truck, bus, industrial equipment and marine divisions. The car division accounted for more than 90% of measured media spending by Volvo N.A. in 1985.

Volvo reported sales of 102,300 cars in the U.S. and 8,100 in Canada. Total North American market sales of 110,400 were up 3.8% from 1984, and represented 28% of worldwide car sales of 392,600 by parent company A.B. Volvo, Goteborg, Sweden. U.S. sales continued to climb in 1986, with the totals for the first eight months showing an increase of more than 10% from the previous year's levels.

The sales growth affirmed Volvo's decision to broaden its appeal beyond its traditional market of family-type buyers. The company brought out its performance-oriented 740 sedan and 760 station wagon in March, 1985, the first Volvo models to be introduced in the U.S. before going on sale in Sweden.

Pehr Gyllenhammer, chairman and ceo of A.B. Volvo, said in a Detroit press conference in November, 1985, that the company's North American strategy was to boost revenues faster than unit sales. The 700 series cars moved the company in that direction. While Volvo's long-running 240 model was priced a little more than $14,000 at the beginning of the 1986 model year, base price on the 740 sedan was more than $18,000 and the 760 wagon nearly $25,000.

The 700 series accounted for 49,454 U.S. unit sales in 1985, including 12,290 station wagon sales. Volvo says it spent 35% of its 1985 car ad budget on the station wagon, a vehicle that differentiated the company from other European performance cars.

The 24% growth in 1985 in the seven media monitored by Leading National Advertisers was primarily because of the 700 series, which got about $9.7 million of the $20.3 million LNA total. The series also was heavily supported in non-LNA measured national newspapers and spot tv, totaling $12.9 million for all Volvo lines.

"Everything a station wagon was intended not to be" was the theme in advertising from Scali, McCabe, Sloves, New York. One ad took on the clumsy image carried by station wagons with the line, "At last, a wagon meant to be enjoyed, not just endured." Tv spots built on Volvo's traditional image of strength and safety by stacking seven wagons atop one another, duplicating a popular 1974 Volvo commercial.

A print ad that showed the back of a 740 sedan attempted to establish a European performance image for the car with a headline, "The Volvo Turbo as most commonly viewed from a BMW 318i."

In November, 1985, Volvo expanded its tennis ties with the Volvo Tennis Card. In 1984, Volvo began sponsoring a mixture of professional, college and recreational tennis matches after being supplanted by RJR Nabisco in the Grand Prix and Masters men's pro tour. The new card, offered for $25, allowed the bearer to get discounts and special offers on tennis-related merchandise, publications, vacations and lessons. The company spent $3 million on Volvo Tennis in 1985, 50% more than 1984, with about half being spent on pro events.

Volvo introduced a road service program, similar to one first offered by Mercedes-Benz of North America three years earlier, with a multi-million-dollar ad campaign that broke May 1, 1986.

Dubbed the "Volvo On Call" plan, the program was offered in conjunction with Amoco Motor Club, which administered it. It offered a traditional road assistance program plus free service 24 hours a day during the three-year, unlimited mileage warranty.

The plan covered free roadside assistance and towing, reimbursements for food and lodging in case an accident or mechanical failure caused an overnight stay, plus amenities such as free maps and trip routing.

One print ad for the service pictured a phone receiver below a headline, "With Volvo roadside assistance, this is the only tool you'll ever need."

The program was aimed at enhancing Volvo's reputation for quality, safety, reliability and price value. It also signaled a shift in emphasis, in favor of advertising the full brand instead of individual models. That was reflected in a change of theme line, as "A car you can believe in" became "A car company you can believe in."

Volvo is planning to further broaden its product lineup with new entries in the next two years. The 780, a two-door coupe with $20,000-plus price tag, will be available in 1987. The body is being designed and built by Carozzeria Bertone S.p.A. of Turin, Italy. The DAF/Volvo 480ES, a two-door sports coupe with front-wheel-drive produced by Volvo Cars B.V., a Dutch subsidiary, is expected to be priced from $13,000 to $16,000 when it is introduced in the U.S. in 1988.

Volvo's truck manufacturing and marketing group, Volvo White Truck Corp., Greensboro, N.C., in August, 1986, announced plans to form a joint venture company with General Motors Corp.'s Truck & Bus Group, Detroit, to produce and market heavy-duty trucks for distribution in North America. The company, to be named Volvo GM Heavy Truck Corp., will be based in Greensboro.

Nat'l resources	482	451	6.9
Gas utility	1,767	1,777	(0.6)

The last year and a half has been a period of turmoil for Hiram Walker Resources, the giant Canadian holding company with divisions in oil and gas exploration, gas utilities and distilled spirits that has been beset with takeover bids by TransCanada and Gulf Canada.

The financial machinations, however, did little to affect the company's performance, which, with small exception, moved forward at a steady pace. In its 1985 fiscal year ended Sept. 30, sales increased in two of three divisions and despite a terrible year for the Canadian economy, net income increased 30.2%. The U.S. contributed 32.6% of total sales and 24.8% of total earnings from operations.

In the first three quarters of fiscal 1986, the company posted total worldwide sales of nearly $3.1 billion, up from $3 billion for the same period in 1985, and net income of $267 million, up 20.8%.

The source of the company's advertising expenditure, is its distilled spirits division, Hiram Walker, Goerham & Worts Ltd., which operates in Canada as Hiram Walker Ltd. and in the U.S. primarily as Hiram Walker Inc. in Detroit but also includes Makers Mark Distillery in Louisville, Ky., Frederick Wildman & Sons Ltd., New York, Maidstone Wine & Spirits, Universal City, Cal., and Callaway Vineyard & Winery, Temecula, Cal.

In an industry panicking over sinking sales and shrinking consumer trial (as consumers turn to lighter beverages such as wine coolers), the division grew 4.7% over-all in sales in 1985. For the first three quarters of fiscal 1986, sales grew 4.9% to just under $1.2 billion compared with about $1.1 billion for the same period in fiscal 1985.

Five key brands and the line of liqueurs marketed in the U.S. accounted for 75% of earnings in 1985 from distilled spirits operation, according to the company.

Canadian Club, marketed primarily in the U.S., Canada, U.K. and Japan, ranked 12th in the U.S. in 1985 with case depletions of 2.75 million, down 6.5% from 1984, continuing the decline of several years, according to *Impact*, a newsletter for the beer, wine and distilled spirits industry. Canadian Club has a 12% share of category.

Ballantine's Scotch, the company's largest selling brand with market strength in western Europe and Japan, increased sales by 5% with particularly strong gains in France, Holland and Greece, says the company. Ballantine does not make *Impact's* top 25 in case depletions in the U.S.

Building on redesigned packaging and line extensions of new premium levels, Courvoisier cognac also held its competitve position, as did Kahula, which improved sales and held its position as the leading imported liqueur in the U.S. Tia Maria, another import to the U.S., also performed well, the company says. Hiram Walker cordials as a group ranked 23rd in case depletions in 1985 in the U.S., according to *Impact*, with case depletions of 1.6 million, up 7.4% from 1984. The cordials have an 8% share of category.

Meanwhile, media spending in the division remained static as measured media fell to $28.8 million, from just over $29 million. Media concentration is magazines and outdoor.

As part of this seven-media total in Leading National Advertisers, the division increased advertising of its flagship brand, Canadian Club, to $8.2 million, up 6.5%, but eliminated a $900,000-plus budget supporting its 1984 sweepstakes promotion, reducing slightly its over-all support for the brand. The division began a Courvoisier Sweepstakes promotion and diverted about $200,000 to support it, reducing Courvoisier image advertising spending by 3% to $3.5 million.

Secondary brands, including Makers Mark, Royal Canadian Whiskey, Haagen-Dazs Cream Liqueur and Lauder's Scotch all showed reduced spending in 1985.

The single biggest percentage increase went to a new product introduced in 1984, Canadian Club Classic, a 12-year-old blended whisky which was not heavily marketed until last year. The company increased measured spending from about $23,000 to

$931,000. To handle the national rollout, Hiram Walker spurned its main agency, McCaffrey & McCall, New York, which last year introduced a new, contemporary look campaign themed "Be a Part of It," for the main Canadian Club brand. Instead, it assigned the new accout to USAdvertising, New York.

Wellcome Foundation, whose U.S. subsidiary, Burroughs Wellcome Co., is preparing to market an anti-AIDS drug called AZT that will prolong the life and ease the suffering of patients stricken with acquired immune deficiency, showed substantial improvement in fiscal 1985 results over the prior year and continued strength in its new year.

The impressive growth at Wellcome in the fiscal year ended Aug. 31, 1985—24.5% growth in sales and 36.7% increase in profit—is attributed in part to the inclusion of Coopers Animal Health, purchased in October, 1985, and favorable exchange rates which added 6% to sales and 11% to profits before taxes.

For the first six months of fiscal 1986 ended March 1, sales rose to $711.6 million, up 20.9% from $589 million in the 1985 period, and profit after taxation was $42.2 million, up 11.9% from $37.7 million. The prior year figures are based on an average exchange rate of $1.16 while the current year exchange was $1.43 to the pound.

Wellcome, which generates about 45% of its sales in the U.S. (90% comes from outside the U.K.), is adversely affected by such a currency shift in favor of the pound because it takes more dollars to make a pound.

Wellcome Foundation, founded in England in 1880 by two American pharmacists, Silas Burroughs and Henry Wellcome, established Burroughs Wellcome in New York in 1906, whose operations were moved to Research Triangle Park and Greenville, N.C., in 1970.

Burroughs Wellcome's measured advertising increased 41% in 1985 to $23 million, virtually all backing two products—Actifed and Sudafed. Both products were the only two at Wellcome to attract advertising in major media in 1984, according to Leading National Advertisers, which monitors seven media.

Actifed cold tablets and capsules received $15 million in measured spending in 1985, up 34% from 1984. Virtually all spending was in network tv. The company launched immediate release capsules and 12-hour capsules as line extensions in 1985-86.

Advertising for Sudafed cold remedy in liquid and tablet form was up 49%, to $7.8 million, virtually all in network tv.

Actifed and Sudafed shared the No. 1 spot in the U.S. antihistamine/decongestant category in the winter season of 1985-86 based on combined unit sales in food and drug outlets.

Estimates by Advertising Age and market research company, Charles Kline & Co., Fairfield, N.J., gave the two products a combined 19% share based on Actifed's 10% and Sudafed's 9% share in the cold-remedy market. Brand leader at a 12% share was Nyquil by Richardson-Vick's. SmithKline's Contac and Schering-Plough's Drixoral are tied for No. 4 each with an 8% share. The company also markets and produces Neosporin, which got $42,200 in 1985 spending.

The company's new anti-AIDS drug, azidothymidine, or AZT, was assigned to Rolf Werner Rosenthal Inc., already one of its agencies. The agency work will be directed at primary care physicians. AZT is an antiviral agent that is expected to be the first drug of its kind to be marketed in this country.

Wellcome also is advertising Zovirax, a medication for genital herpes. The products did not show up on the major media monitored by LNA in 1985, however. Rolf Werner Rosenthal is handling the professional ad campaign, and Rumrill-Hoyt is conducting a consumer ad campaign for the product which is not mentioned by name. Consumers are told to ask their doctor about the product.

AZT has received much attention after testing indicated health improvements and prolonged lives among patients with AIDS and related disorders.

The drug, being developed at Burroughs Wellcome Co. subsidiary in Research Triangle Park, N.C., is billed as a palliative, or a treatment that may ease symptoms and suffering but stops short of cure. To date, AIDS has struck 24,859 people in the U.S., with 13,689 deaths recorded.

The news of the breakthrough nature of AZT had such impact that Sen. Lowell Weicker, R-Conn., in mid-September got $47 million in funding for AIDS drug testing through the U.S. Senate after telling senators of his personal conviction that AZT extends survival.

Currently, Burroughs Wellcome is making the drug available to about 6,500 people believed to be suffering from the disease—those who have had one or more episodes (about 60% have) of pneumosystis corinii pneumonia and are not currently receiving systemic drug therapy for other conditions included in the definition of AIDS as established by the Centers for Disease Control.

Testing is being permitted under an Investigational New Drug (IND) exemption authorized by the Anti-Infectives division of the FDA.

Other prods.	255	260	(1.9)

Whirlpool Corporation, which lays claim to being one of the nation's largest makers of washing machines and clothes dryers, wants to make life easier for still more people next year. Its chairman and ceo, Jack D. Sparks, expects 3% to 4% growth in 1987 in what he calls core appliance sales: laundry equipment, refrigerators, freezers, dishwashers, ranges and trash compactors. In 1985, net sales for all Whirlpool lines were up more than 10%.

With the purchase of two makers of kitchen cabinets, Whirlpool is in a position to supply almost everything needed for a home kitchen. In late 1985 and early this year, Whirlpool bought, for undisclosed sums, St. Charles Manufacturing Co., St. Charles, Ill., and Mastercraft Industries Corp., Denver, two makers of quality kitchen cabinets. Between them, the two companies had 1985 sales of about $75 million.

Whirlpool also added to its stable the KitchenAid, Inc. for about $150 million from Dart & Kraft. Competitors White Consolidated and Magic Chef held this up for more than a year, claiming the transaction would violate antitrust laws. Whirlpool headed this off by selling to Emerson Electric Co. the KitchenAid dishwasher and trash compactor manufacturing facilities.

Whirlpool also made moves into markets abroad. It bought a majority interest in Fiat's wholly-owned subsidiary, Aspera, S.p.A., Turin, Italy. Aspera makes compressors for kitchen appliances and air conditioning products.

It also acquired a more than 50% interest in Toronto-based Inglis Ltd., an appliance maker and marketer with 1985 net sales of $263 million.

A Whirlpool spokesman reports the company is considering a joint venture with N.V. Philips, one of the world's largest appliance manufacturers. He says linking up in some way with the Netherlands-based Philips could expand Whirlpool's entry into foreign markets.

Whirlpool is entrenched in the domestic market, to a large extent because of its relationship with the nation's chief retailer, Sears, Roebuck & Co. Whirlpool reports about 40% of its consolidated net sales in 1985 were to Sears. The company has been Sears' principal supplier of home laundry appliances for more than 65 years and of home refrigerators and freezers for more than 55 years. Sears markets the Whirlpool products under its Kenmore label.

Appliance magazine in 1985 gathered data from manufacturers, marketing analysts, trade sources and its own estimates to determine market share in the business, and Whirlpool scores very high.

According to *Appliance*, Whirlpool dominates compactor sales with a 65% share, far ahead of General Electric with 18%. Whirlpool is second to GE/Hotpoint in refrigerator sales, missing by only one percentage point, 29% to 28%. GE also commands the bulk of the dishwasher business with 38%, compared with Whirlpool's 20%. Whirlpool, at 15%, is second again to GE in electric range sales (GE's share is 29%).

But Whirlpool dominates in shares of other products. *Appliance* estimates it has fully half the market for washing machines, more than 50% for electric and gas clothes dryers and 37% for freezers.

To keep itself entrenched in the public consciousness, Whirlpool plans to have spent $230 million in advertising and promotion in the four years ending in 1988, double what it spent in the four previous years.

The 11-monitored media survey for 1985 shows Whirlpool spent some $41.7 million on advertising, the largest chunk of that, $14.5 million, on network tv. This contrasts with 11-media spending of $41.4 million in 1984, $16.3 million of that on network tv.

The BAR/LNA seven-media total estimate for 1985 is $39.4 million, up 30% from $30.2 million in 1984. Of the 1985 figure, the most, $6.5 million, was spent on major appliances. This is down from the $8.5 million spent in the same category the year before. LNA does not include spot radio, newspaper, farm and business press—media monitored separately for this issue.

Meanwhile, Whirlpool's second-quarter figures suggest the future holds promise. It reports $1.1 billion in consolidated net sales for the quarter, up 11.2% from 1985. The net sales of the new companies, Mastercraft and St. Charles, accounted for $114.7 million of the net sales figure.

Net sales for the first six months of 1986, at $1.95 billion, increased 10.7% over the same period a year earlier. Net earnings in the second quarter were up 7.1%; for the first six months, up 15.7%.

Much of the future depends on the housing market, relatively active as mortgage rates plummet. Moody's comments that the near term is favorable and higher spending for advertising and promotion for Whirlpool brand products will translate into higher sales.

F.W. Woolworth & Co.'s greater emphasis on specialty stores—Kinney Shoe Corp., Foot Locker, Lady Foot Locker, Susie's, Anderson-Little and Richman among others—its incorporation of fast food outlets in its stores and major remodeling of general merchandise stores is paying off on the bottom line, producing a record-breaking year in 1985.

That performance continued into the first half of 1986, with sales of $2.88 billion, up 9.3%, and net income of $48 million, up to 45%, up over the corresponding period in 1985.

No major shift in emphasis is expected with the naming of Harold E. Sells as chairman-chief executive officer, and Frederick E. Hennig as president, Woolworth. Both men have been with the company since the 1940s. Mr. Sells was president-chief executive officer and Mr. Hennig was senior vice president of worldwide merchandising operations.

Signicifant changes in 1985 included the completed phase-out of J. Brannam discount outlets and the phase-in of more Burger King fast food restaurants in selected Woolworth stores with Woolworth serving as the franchisee. The company says it plans to have Burger King franchises in 50 stores by the end of the decade.

Woolworth in 1985 moved into new specialty store areas with its Herald Square stationery stores and Afterthoughts boutiques, selling costume jewelry, leather goods and handbag stores, but it put on hold its planned introduction of Datastop computer software stores. There were 20 Afterthoughts boutiques and two Herald

Square stores by year's end.

Sales from specialty stores have risen from $1.42 billion in 1982 to $1.98 billion in 1985, a 40% increase, while operating income has more than doubled, to $206 million in 1985—a figure that passes general merchandise operating income for the first time ever. In 1985, specialty stores produced 33% of total sales and over 50% of operating income.

Sales in 1985 from foreign operations rose 1.8% to $2.3 billion, with net income up 5.9%, to $126 million.

Woolworth closed down its 37 J. Brannam off-price stores by yearend. The company lost $9 million in 1984 from the off-price units which marketed brand names. It did not report its loss in 1985. Woolworth is not disenchanted with the off-price concept. Its Kids Mart off-price division of Little Folks subsidiary added 52 stores in 1985, bringing its total to 196 at yearend. Kids Mart also expanded from five states into Texas during the year, and planned expansion this year into Utah and New Mexico.

Total expenditures for measured advertising in 11 media increased to 17%, to $24.5 million in 1985. Receiving the bulk of ad spending were the Foot Locker, Kinney and Anderson-Little chains. Foot Locker spending in seven measured media in 1985 was $4.8 million, up 20% from 1984. Kinney spending was $12 million, up 33%, and broken down into $5 million spot tv, $4.4 million newspaper supplements, $2 million network tv, $1.6 million magazines and $300,000 cable.

Zale/U.K.	40	33	21.2

Zale Corp., 63-year-old parent company of Zale Jewelers and the largest corporation in the $9 billion jewelry market, is undergoing a major restructuring designed to intensify the company's focus on domestic jewelry retailing. The strategy involves a re-evaluation of inventory and certain other assets to reflect current market conditions.

The restructuring plan includes the disposition of the Aeroplex and O.G. Wilson Showroom divisions (two underperforming nonjewelry retail divisions); the relinquishing of retail operations in Western Europe and the U.K., and the elimination of obsolete, slow-turning items from inventories of domestic jewelry retail divisions.

During fiscal 1986, ended March 31, the 5% increase in sales was not matched by earnings. Zale suffered a $61.1 million loss. An $84.6 million writedown was recorded mostly from the disposition of dated merchandise and losses on disposal of the airport newsstand, catalog showroom and international retail businesses, according to Zale officials.

First-quarter revenues for fiscal 1987 were $253.8 million, an increase of 15.3% over the year-earlier quarter. Earnings for the three months ended June 30, 1986, were $1 million, compared with a loss of $2.4 million the year earlier. During the quarter, Moody's lowered the rating on Zale's senior debt, citing Zale's "poor record . . . and the intense competitive conditions that will keep Zale's returns from recovering to satisfactory levels."

Arthur Lichtendorf, E.F. Hutton retail analyst, says Zale's financial troubles also relate to its large number of stores in the depressed energy belt and extreme competitiveness in the industry, and he does not see immediate improvement: "The Christmas season, as far as you can guess, looks average. The economy isn't that strong. I don't think the jewelry business is that strong, either."

Also included in the restructuring program are the following:

- Repositioning Zale from a manufacturing-driven to a marketing-driven company, making it more attuned to the modern consumer with an increased focus on differentiating itself in the marketplace.
- Repositioning Zale's executive management style from the traditional entrepreneurial model to that of a corporate team.
- Repositioning the Zale retail division as a retailer of fashionable gold, colored stone and pearl jewelry and not strictly a retailer of bridal diamond jewelry.
- Repositioning the Fine Jewelers Guild into a cohesive centralized division under the name of the guild's flagship store, Bailey Banks & Biddle.

Analyst, Mr. Lichtendorf, says it's too early to tell whether the restructuring plans and the divestitures made this year is working for Zale. "Zale's is trying to be more fashion-oriented to compete with the department stores. Department stores have been doing fairly well in the jewelry business—Zale is on the right track."

Zale Corp.'s promotional budget for fiscal 1986 was $65 million. Advertising expenditures make up about 50% to 60% of the promotional budget, according to Michael Barlerin, Zale senior vp-director of corporate marketing. Zale spent $64 million in fiscal 1985 and $56.9 million in fiscal 1984.

Zale's measured advertising in calendar 1985 was $23.3 million, up 106% from $11.3 million in 1984, according to the 11 media indexes reported in this issue. Unmeasured advertising, including in-store promotions and other collateral, signage, all direct mail and production, brings the total to $65 million.

Most of the ad support—$17.3 million, up from $10.6 million in 1984—backed Zale Jewelers, with 51% of that going to network tv and 23% each to spot tv and network radio. About the same media mix and percentages were reported in 1984.

Included in the restructuring program was creation of a corporate marketing department, which became operational April 1, 1986. The department reflects Zale's previously stated commitment to become marketing driven, Mr. Barlerin says. The department provides research and market development capabilities to direct the company's market research and to monitor emerging trends in the retail industry.

During fiscal 1986, Zale made some organizational changes in its domestic jewelry operations. The Fine Jewelers Guild, the carriage trade stores division, operated under 37 trade names, but to strengthen the marketing capabilities, Zale officials renamed the division Bailey Banks & Biddle, the strongest trade name in the division. The change gives a more centralized approach to merchandising programs.

The BB&B division carries an assortment of fashionable, better quality merchandise principally in the higher price range ($250 to $1,000 per item). Division sales in 1986 were $317.5 million, down 2.7% from 1985. Eleven new stores were added and 23 locations were closed. At yearend there were 309 member stores in 36 states and Guam. Bozell, Jacobs, Kenyon & Eckhardt/Southwest, Dallas, handles.

Diamond Park Fine Jewelers operates leased units in department stores under that name. The units carry merchandise priced between $50 and $250. Diamond Park had sales of $77.5 million, up 26.5% from 1985. In a strong growth year, the division added 66 leased fine jewelry department locations and discontinued operations in three locations. A total of 215 were in operation at yearend.

The flagship Zale Jewelry division, primarily operated under the Zale Jewelers name, generated sales of $457 million in the year, up 4.9%. Zale carries a broad selection of basic and fashion jewelry merchandise in the medium price range of $75 to $450.

The Zale division also operates stores under the Mission Jewelers logo. These stores carry merchandise primarily priced at $50 to $200 per item. Combined sales for Zale and Mission were $486.1 million, up 5.6% from 1985. The division (including Mission), added 36 new stores and closed 18 units during fiscal 1986. At yearend there were 817 stores in 48 states and Puerto Rico.

Credit was offered for the first time in Mission stores to make them more competitive. The Bloom Agency, Dallas, handles Zale Jewelers. Saunders, Lubinski & White, Dallas, is the agency for Mission Jewelers.

Zale Jewelers strengthened its repositioning strategy in December, 1985, with a $12 million Christmas campaign to establish the stores as full-line jewelry retailers instead of "the diamond store."

In May, 1986, Zale Corp. sold its Aeroplex stores, which operated newsstands and gift shops in airport terminals and major hotels, to Greyhound Corp. The stores posted sales of $59.6 million, up 17.5%. The Catalog Showroom division, operating under the O.G. Wilson name, was sold for $45 million to By Land and Sea Distributors, a group of former division managers. The division had 1986 revenues of $44.6 million, down 5.6%.

Zale Jewellers Ltd., which has stores in the U.K. under nine trade names and reported sales of $39.8 million, was sold to Combined English Stores Group for $45 million. Zale Corp. rebuffed Peoples Jewellers Ltd. of Canada, a 300-store chain, when it made several attempts at a takeover during 1986. Zale's board rejected the latest proposal of $484 million in June. Zale execs think it's doubtful the offer can be sweetened sufficiently. But Irving Gerstein, head of Peoples, says he's not about to give up. Thus far, the Zale and Lipshy families have presented a united front. The combined families control approximately 33.4% of the stock.

Texas law requires 66.7% of a company's shareholders to consent to a merger. Peoples is the largest single shareholder with 15%, but a 1981 standstill agreement prevents it from accumulating more than 21% without Zale board approval.

Mr. Lichtendorf, the E.F. Hutton analyst, says "although the Peoples officials say they're not going to go away, it looks as though Zale has beaten them off for the moment. If Peoples makes an offer of $45 or better in cash, then I would say 'take the money.'"

NOTE: Dollars in millions. Sources: Newspaper from Media Records; magazine and newspaper supplement from Leading National Advertisers as supplied by Publishers Information Bureau; network tv, spot tv, network radio and network cable from LNA as supplied by Broadcast Advertisers Reports; spot radio from Radio Advertising Bureau; outdoor from LNA as supplied by Institute of Outdoor Advertising and Outdoor Advertising Assn. of America, and farm publications from Agricultural Marketing Information Services (AGRICOM). Business publication spending—from Rates Reports—is not included in this chart because total spending for all advertisers was not available at press time. Business publication expenditures by the 100 leading national advertisers were up 36.2% to $174 million in 1985 from $127 million in 1984. Business publication spending by the second 100 leading national advertisers was $48 million in 1985 and $32 million in 1984, up 48.5%. Advertising Age published a directory of the 100 leading national advertisers Sept. 4, 1986.

For sale

Denationalization sparks ad budgets

By CLAIRE WILSON and LAUREL WENTZ

The "denationalization" trend that is sweeping foreign markets is proving to be a big plus for the advertising industry.

Cash-strapped governments from Tokyo to Bonn are selling airlines, utilities, insurance companies and other marketers to the private sector. When they do, advertising industries are getting a one-time shot in the arm, followed by the promise of bigger ad budgets.

The most impressive changes are taking place in France and the U.K., where the denationalization trend is furthest along.

In France, the first major companies to go private are Assurances Generale de France, Parisbas Insurance and glass manufacturer St. Gobain. In the past two months, the three have pumped $25 million into agency coffers.

In some cases, the suddenly inflated ad budgets represent a one-shot corporate campaign designed to dust off the old image of a state-run monster and attract aggressive investors.

But as the French market gets

World News Roundup

(Continued from Page 3)

panies with South African interests (AA, Oct. 20), added Ogilvy & Mather and Foote, Cone & Belding to its list of companies to review. A vote is expected next month.

Sao Paulo—Foote, Cone & Belding is talking to No. 7-ranked Dennison Propaganda SA and two unnamed agencies about buying equity. FCB now owns 60% of No. 21 FCB/Siboney Publicidade.

Madrid—The Agricultural Ministry launched a $1.9 million generic ad campaign to promote Spanish food, via local shop Contrapunto, in an attempt to lower the impact of the increased presence of European food products, following Spain's entry into the EEC.

Rio de Janeiro—Coca-Cola Co. is negotiating to sell two bottling and distribution operations here for an estimated $60 million. Three groups are bidding, including a consortium of Coke bottlers.

Ottawa—The Assn. of Canadian Distillers asked the government here to allow spirit ads on tv and radio. Wine and beer advertising are allowed in all media, but spirits are restricted to print only.

Madrid—Psychology Today launched its first Spanish-language edition, *Psychology Today Espanol*, through a licensing agreement with a local publishing group. Delvico/Bates handles.

Tokyo—British Caledonian Airways appointed FCB (Japan) Co. for its new Japanese account. Budget will not be determined until the two countries decide when the airline will start service.

Agency mergers, acquisitions and affiliations: Lowe Howard-Spink & Bell, London, bought the **Wight Co.**, a specialized U.K. sports sponsorship agency, for $1.8 million. . .**Leveille Benton & Bowles** and **Publicite Vickers & Benson**, both Montreal, will merge next month, giving the new agency, Leveille Vickers & Benson, combined billings of more than $32.4 million. . .**Mojo MDA**, Sydney, signed Union 45, Kuala Lumpur, as an affiliate.

Martin Sorrell goes 'below the line'

Saatchi's spinoff makes U.S. move

By LAUREL WENTZ

London—WPP Group, a U.K. holding company that is rapidly becoming the Saatchi & Saatchi of below-the-line marketing, has started its move into the U.S.

With the $24 million acquisition of Pace Communications, a New York company specializing in real estate advertising and communications (AA, Oct. 27), WPP has acquired "a toe in the water in the United States," said Richard Dale, an advertising industry analyst at stockbroker James Capel here.

Pace is the 10th acquisition in as many months for WPP, which has grown since June, 1985, from a manufacturer of wire shopping baskets with a market capitalization of $2.2 million, to a $92 million group of design, sales promotion and incentive and motivation companies in the U.K.

WPP's prime mover is Martin Sorrell, the 41-year-old Harvard MBA who invented the Saatchi group's creative approach to financing acquisitions while serving as group finance director. In the U.K., Mr. Sorrell's name is synonymous with financial savvy, and many have wondered aloud whether he would have approved Saatchi's troublesome acquisition of Ted Bates Worldwide.

M. Sorrell

When Mr. Sorrell decided last year to strike out on his own after eight years with Saatchi, he and his friend, Preston Rabl, 38, a partner at London stockbroker Henderson Crosthwaite & Co., looked for a small company that had a full quotation on the London Stock Exchange and was profitable regardless of what products it made.

They found Wire & Plastics Products, which made a $450,000 pretax profit in 1984. They invested $375,000 each to buy 27% of the company and use it as a base for expansion by acquisition. In November, 1985, the Saatchi & Saatchi holding company bought 10% of WPP for $1.6 million.

Messrs. Sorrell and Rabl's strategy—which they will now apply to the U.S. market—is to identify fragmented areas growing by more than 20% a year. They picked four: Design and graphics; sales promotion; employe motivation and incentive, and video facilities.

"These areas are all growing faster than media advertising and offer huge opportunities for growth by acquisition," said Mr. Rabl, WPP Group's executive director, also Mr. Sorrell's title. "We're looking at below-the-line services—we think they integrate very well."

Pace is a $31.7 million company in a market—real estate communications—worth $750 million and growing by as much as 35% a year.

WPP also is setting up a U.S. holding company called Rasor Inc., to spearhead U.S. expansion. Mr. Sorrell and WPP finance director Robert Lerwill will be on the board.

Mr. Rabl expects WPP to name a U.S. investment banker within a month as the sixth board member.

One of the three U.K. directors —Sorrell, Rabl or Lerwill—will go to the U.S. every week to keep an eye on business and look for new acquisitions among privately held U.S. companies, preferably in the four areas WPP has targeted.

Mr. Sorrell has brought to WPP the acquisition strategy he used at Saatchi of an initial payment with

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service. Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in inage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA-NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page
   Width and Depth in Inches
2. Determine Square Inches of Page
   Multiply Width by Depth Inches
3. Determine the Number of SAU Inches of Page
   Divide the Square Inches by 2.0625 (SAU Inches)
4. Measure the Total Lines of the Page
   Multiply Column Depth Agate Lines by the Number of Columns on the Page.
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches
   Divide the Total Lines of Page by the Number of MRCS SAU Inches of the Page.

SAU* is the registered trademark of the American Newspaper Publishers Association

BJK&E

(Continued from Page 4)

Wayne Fickinger, the agency's vice-chairman, said the improvement stems largely from strength gained from the merger.

"The merger was a very purposeful move that has upgraded our ability to serve clients," Mr. Fickinger said.

BJK&E has been running an ad campaign that states "Being closer to the customer works. It works for our clients and it works for us." The ads tout the agency's 11 full-service and 18 client-service offices.

These offices allow BJK&E to provide quick and accurate service, Mr. Fickinger said. "We can serve national clients right down to the local level."

BJK&E ranked second among all agencies in quality of account executives in the third quarter; it was named by 4.6% of respondents as best in that attribute. That was an increase from 2.7% in the previous quarter and put BJK&E just behind JWT's 5.3%.

BJK&E also improved its score in marketing assistance—named best in that attribute by 4.4% of respondents, second only to O&M's 5.1%—and it was named best in research by 3.8% of respondents, second only to JWT's 6%.

BJK&E ranked third in questioning to determine the hottest agency.

It was named by 3% of the respondents, behind Saatchi & Saatchi Compton (5.7%) and Fallon McElligott (5%).

There were two new names in the hottest agency voting last quarter: San Francisco-based Hal Riney & Partners and the Dallas-based Richards Group tied for fourth in the category, each being named by 2.7% of respondents.

Chiat/Day, which had led the category until the first quarter this year, was named hottest agency by 1.7% of the ad directors surveyed, down from 5.7% the previous quarter. It ranked sixth in hottest agency mentions in the latest survey.

Other findings from the latest Agency Watch:

- Doyle Dane Bernbach Group (now DDB Needham Worldwide), BBDO International, and Young & Rubicam fell in awareness.

DDB, which lost its independent status in the merger that produced Omnicom Group, was named the first agency that comes to mind by 5% of respondents, down from 7.7% the previous quarter and from an Agency Watch high for DDB of 9.7% in the first quarter this year.

BBDO, one of the three agencies that formed Omnicom, was named the agency that first comes to mind by 10.7% of respondents, down from 16.3% the previous quarter.

Needham Harper Worldwide, the other third of Omnicom, had the same awareness score of 2% in each quarter this year.

Y&R's awareness score was 6% in the latest survey, down from 9.3% the previous quarter.

- There was a significant rise in the number of ad directors who cited "responsiveness to needs" as the reason they named a given agency best in providing over-all service and clients. Last quarter, 10% of the ad directors gave this reason, versus just 3% the previous quarter.
- Ad directors consider sales promotion the most valuable type of specialty advertising; 42% of the poll's respondents said it was very important in the latest survey, up from 32% the previous quarter. Retail (35% said it was very important), collateral (29%), black consumer (6%) and Hispanic advertising (6%) followed.

JWT, O&M ranked top two agencies

There seems to be little doubt among company advertising directors: J. Walter Thompson Co. and Ogilvy & Mather Worldwide are the nation's two best ad agencies.

That, at least, is what two years' worth of Advertising Age's Agency Watch survey shows.

Asked to name the best agencies in over-all service and quality of product, ad directors surveyed have ranked JWT and O&M first and second in each quarterly survey to date.

With the exception of the fourth quarter last year, Agency Watch has been conducted quarterly since October, 1984. JWT was named best over-all in five of those quarters and O&M in the other two.

The difference between the two agencies is statistically insignificant. In questioning of 2,096 ad directors in the two years, JWT was named best by 7.6% of those surveyed and O&M by 7.3%. Only five mentions separate the two agencies: JWT was named 159 times and O&M 154 times.

More than 41% of the respondents said they didn't know which the best agency was. Of those who *did* name a best agency, 25.5%—or one of every four—named either JWT or O&M.

The two agencies, moreover, rank first and second in five of the six specific attributes in which respondents were asked to name the best agency.

JWT led and O&M was second in account executives, top management, research, marketing and media. It was only in creativity that another agency broke the JWT-O&M hold. Chiat/Day was second to O&M in that attribute.

JWT is the clear leader in top-of-mind awareness. Asked to name which agency first comes to mind, 23.3% of the respondents named JWT, well ahead of the 13.4% who named O&M.

Here are the top three agencies in the various categories for the first two years of Agency Watch:

Best over-all agency: 1. JWT (named by 7.6% of respondents); 2. O&M (7.3%); 3. BBDO International (4.1%).

Agency that first comes to mind: 1. JWT (23.3%); 2. O&M (13.4%); 3. BBDO (12.9%).

Best at creativity: 1. O&M (6.7%); 2. Chiat/Day (5.6%); 3. JWT (5.4%).

Best account executives: 1. JWT (6.3%); 2. O&M (4.5%); 3. BBDO (3.4%).

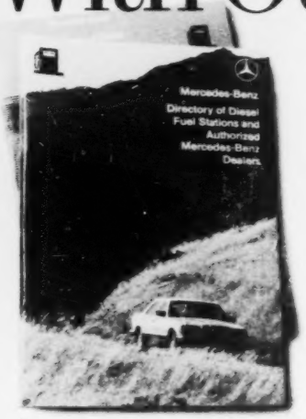
Best top management: 1. JWT (6.8%); 2. O&M (6.1%); 3. BBDO (3.4%).

Best at research: 1. JWT (6.9%); 2. O&M (4.2%); 3. BBDO (2.6%).

Best at media: 1. JWT (6.9%); 2. O&M (3.3%); 3. BBDO (3%).

Best at marketing: 1. JWT (5.7%); 2. O&M (4.5%); 3. Leo Burnett Co. (2.6%).#—*C.F.*

Mercedes Benz Filled Their Diesels With Our Premium.



So did Mazda, Volkswagen, Volvo and Peugeot.

It's not that we invented the wheel, we reinvented the premium.

From Hammond atlases and maps, to our library of books—we offer something everyone values: information.

We also offer total flexibility for you.

Because as publishers, we can put together anything, on any subject. Customizing your premium or incentive to your business and your budget (there are a lot of ways to slice a book).

Just like we did for Time Magazine, General Foods, Burger King and Mercedes (they're still getting mileage from the diesel stop directory we created for them in 1976).

Talk to Dean Hammond. He'll tell you how we can fill your tank with our premium.

Maybe we should say —super premium.

Agencies keep pruning

Client moves hit JWT, Saatchi

NEW YORK—J. Walter Thompson USA is losing its status as lead agency on Miller Brewing's flagship brand as Miller shifts its focus from JWT's High Life to its promising new High Life Genuine Draft, handled by Backer & Spielvogel.

It's a startling turnaround for Backer, which had previously lost the creative assignment for High Life. Its remaining media buying role for the brand had appeared vulnerable.

In 1987, Miller is expected to shift the majority of its spending to Genuine Draft while slashing JWT's "Made the American way" campaign for High Life from about $42 million in measured media to $28 million.

The shift in Miller spending strategies was only one of a number of account shifts and resignations last week. Saatchi & Saatchi took new steps to pacify restless clients within its agency network.

Miller's shift in support to the successful Genuine Draft apparently started this year. Spending on High Life for the first six

Thompson, BJK&E cite cost hikes, budget trims

By STEWART ALTER

Clients' spending cutbacks continue to take a human toll at their ad agencies, as J. Walter Thompson USA and Bozell, Jacobs, Kenyon & Eckhardt join the growing ranks of shops trimming expenses by cutting staff (AA, June 30, *et seq.*).

While these latest moves reflect a trend, they also add a new, more painful twist: Both JWT's New York office and BJK&E have been among the year's top gainers of new business and ranked high in a national survey of ad directors asked to name leading agencies (AA, Nov. 3).

But as their spokesmen indicated, the startup costs of new business cut into the ability to compensate for lost profits from existing accounts that reduced their spending.

Despite $225 million in new billings gained so far this year, BJK&E let go 46 employes nationwide, due primarily to existing clients' spending cutbacks.

JWT's New York office, winner of $95 million in IBM Corp. and Warner-Lambert Co. billings earlier this year—bringing 15 new staffers—last week let go 55 staffers from all departments.

Also, JWT is expected to dismiss about 40 employes in its Washington office, as it is scaled back to a service office for the U.S. Marines account and shifts the remaining business to its Atlanta and New York offices.

The expected layoffs at JWT Washington would leave 44 employes, though some might be reassigned within Thompson. Jeff White, senior vp-general man-

(Continued on Page 102)

Last Minute News

Steinert to leave FCB

NEW YORK—Jan Steinert, president of FCB Direct/East, will leave the agency at yearend to set up his own direct-response shop. His departure will clear the way for Foote, Cone & Belding Communications to merge its two New York direct-marketing operations under Robert Gordon, president of Leber Katz Partners Direct Marketing, forming an agency with $50 million-plus in billings. Mr. Steinert founded FCB Direct/East in 1985.

O&M lays off 10 in L.A.

LOS ANGELES—Ogilvy & Mather here has laid off 10 employes, about 5% of its total work force, in the second round of layoffs in five months (AA, June 16). The cutbacks reflect reduced client spending.

Jacoby to build library

NEW YORK—Robert Jacoby, ousted chairman-ceo of Ted Bates Worldwide, has donated $2 million to Princeton University, where he studied economics, for construction of a library to be named after him. Regarding his future career plans, Mr. Jacoby says he had "spoken to people heavily involved in real estate" and to "investment banking kinds of people" but had made no decision. He is still in arbitration with Bates parent Saatchi & Saatchi regarding his contract.

A-B sinks Baybry's

ST. LOUIS—Anheuser-Busch on Jan. 1 will discontinue distribution of Baybry's Champagne Cooler, in test for the past year (AA, Sept. 30, '85). A-B attributed

P&G 'SYMPATHETIC'

Procter 'more anxious' to listen to agencies' compensation needs

By LAURIE FREEMAN and STEWART ALTER

The more relaxed corporate culture at Richardson-Vicks may be rubbing off on Procter & Gamble, which acquired R-V last year.

As P&G ponders its future course on network tv *(see story at right)*, it also is encouraging slow changes in the way it deals with its ad agencies and, analysts report, exploring whether to change from its individual-brand management system to one of category management.

In its agency relationships, P&G is allowing for more give-and-take, especially on the hot issue of agency compensation.

But P&G vp-advertising Robert Goldstein told ADVERTISING AGE it was "categorically untrue" that the company was scrapping the 15% commission system.

Last spring's swapping of some brands and agencies between the two companies apparently fueled reports P&G was considering switching to the cost-plus-fee system used by R-V, Mr. Goldstein said.

"Richardson-Vicks has a well publicized compensation system, and its system still is used for their brands.

We have no plans to change [R-V's or] our [system] tomorrow, nor on Dec. 1," he said.

(Continued on Page 106)

Soaper slide hits P&G tv strategy

By VERNE GAY

NEW YORK—The cancelation last week of Procter & Gamble's "Search for Tomorrow" daytime tv soap opera is the latest blow to the longest-running and most successful media strategy in U.S. advertising history.

"Search" ends a 35-year run on NBC-TV on Dec. 26, becoming the third P&G-produced soap opera in the past three years to get the ax

(Continued on Page 106)

Weddings were standard fare on P&G's "Search for Tomorrow."

100 of the best, brightest young ad clients—P. 50

Highlights

P&G adjusts agency relationships 1
The more relaxed corporate culture at Richardson-Vicks may be rubbing off on Procter & Gamble, which acquired R-V last year. P&G is pondering its future on network tv and encouraging slow changes in the way it deals with its ad agencies.

Negative political ads predominate 3
What appears certain in the aftermath of last week's elections is that negative political advertising, unless checked through legislative actions, will more and more be the staple of office-seekers at all levels.

Wyler's future uncertain 4
Borden Inc. may sell its struggling Wyler's powdered drink business if the company cannot turn it around, president-ceo Romeo Ventres last week told securities analysts in New York.

Newspapers get positive circulation marks 10
Most major newspapers in the nation's top competitive markets had good circulation news to report, according to an analysis of the Audit Bureau of Circulations' FAS-FAX report for the six months ended Sept. 30.

Delta employes share spotlight 40
Delta Air Lines is featuring individual employes for the first time in new tv commercials that depart from the carrier's usual conservative, methodical image campaigns.

$5M campaign will revive Herbalife 98
Herbalife International has resolved bitter regulatory disputes over ad claims for its health products and will begin a fight to recoup lost sales with a $5 million network tv campaign Nov. 10.

FEATURES

Advertisers' top talent 50

100 of the best and brightest young ad clients

Advertising Age presents 100 of the best and brightest young advertising clients in the nation. The 100 are client executives who put their necks on the line, identifying ad objectives for the agency and approving the final creative project. Their input and their decisions are starting to set the tone of today's advertising and will influence its direction in years to come.

INTERNATIONAL

Olivetti tries new marketing tack 72
At Olivetti, the Italian marketer of office machines, the smallest part of its business—personal computers—has become one of the largest. Although Olivetti has enjoyed great success in the sale of its pcs, other companies have marketed the products under different brand names. Olivetti officials now are making changes to take more control over their own marketing.

OTHER NEWS

Advertising budgets for shampoos—$202 million last year—may plummet by as much as 50% this year as marketers introduce fewer brands and switch their measured media dollars to promotional marketing. Page 3.

Bumble Bee Seafoods' coming test of a skinless, boneless canned pink salmon promises to be the opening act in a renewed struggle for share with Ralston Purina's Chicken-of-the-Sea line. Page 24.

Pat Cafferata says her new role as president-ceo of Young & Rubicam, Chicago, will mean an increased reliance on market research at the agency. Page 47.

Regional dairies are milking consumer interest in nutrition to expand their product bases. Increased demand for calcium-fortified and value-added products has prompted small dairies to extend product lines. Page 86.

Slumping Audi of America has come out slugging against Mercedes-Benz and BMW in its biggest-ever ad spending launch. Page 93.

Goodyear Tire & Rubber Co.'s new campaign, themed "Goodyear, take me home," represents a significant departure from the company's typical advertising and marketing strategy. Page 99.

Marketing Corp. of America, parent of Ally Gargano/MCA Advertising, last week sold its two couponing operations, which will clip the company's $400 million revenues in half. Page 103.

SPECIAL REPORT

In the first six months of this year, magazine ad revenues increased, just as they had in 1984 and 1985, and last year's downturn in ad pages stabilized. But magazine publishing is in turmoil. New and old titles compete for the same, limited ad dollars, spending in certain ad categories is plummeting and costs continue to rise.

Address all subscription correspondence to Circulation Department, Advertising Age, 965 E. Jefferson, Detroit, Mich. 48207 (313) 446-0494.

Picture mag experiment ends at Time

By STUART J. ELLIOTT

New York—Just when Time Inc. is citing hard times as the reason not to launch a new b&w weekly news and photo magazine, it is also celebrating the b&w weekly news and photo magazine launched during the hardest times of all.

The decision Nov. 6 to pull the plug on *Picture Week* came after two tests over 14 months, and development costs of $15 million in after-tax dollars (AA, April 23, '84, *et seq.*). The last test issue, dated Nov. 17 and out today, comes a week after the publication of a special commemorative issue marking the 50th anniversary of *Life*.

The differences between 1936, when Time Inc. introduced *Life*, and 1986, when it chose not to introduce *PW*, go beyond breadlines, headlines and hemlines. Then, it was one man, Time Inc. co-founder Henry Luce, whose instincts told him to bet it all on his dream.

Now, a conservatively managed media conglomerate is gun shy

NEWS ANALYSIS

about launching a magazine that, according to all accounts, had improved its performance in test after a weak beginning. During the second phase of *PW*'s test, said publisher Bruce Barnet, a revamp in editorial content and a cover-price cut produced "the pick-up we were looking for" to a nationally projectible circulation of 1 million or more copies a week. "We had won over the doubters," said managing editor Richard Stolley, who conceived of *PW* in 1981, targeted

Schoenleb out at Bojangles'; mulls buyout

By PATRICIA WINTERS

The fast-food wars, in turmoil over store closings and declining sales, suffered another executive casualty last week as E. Christian Schoenleb resigned as Bojangles' president.

The outspoken Mr. Schoenleb, a 15-year industry veteran and well known lecturer on the fast-food field, said he and Bojangles' New York-based parent, Horn & Hardart, "mutually terminated" his contract following announcement that the 299-unit chain is for sale.

Mr. Schoenleb said he is considering returning to the agency side of the business as well as possibly buying Bojangles'. He did not rule out doing both. Early in his career, he worked on the General Mills account at Needham Harper Worldwide, Chicago.

"I figured after the reorganization, it didn't make sense to stick around," he said. "I didn't want to be there if someone else bought it."

H&H said in October it was positioning Bojangles' for sale or spinoff to shareholders. The chain produced $3 million in

West Coast News

Japan's Daihatsu names agency for Hijet

Long Beach, Cal.—Daihatsu America, Japan's fifth-largest auto maker, hired Abert, Newhoff & Burr, Los Angeles, to introduce its Hijet utility vehicle in January. The move is seen as a first step in introducing its full line, probably in 1988, although Daihatsu won't comment on future expansion.

Los Altos, Cal.—**Stuart Anderson's Restaurants'** search for a replacement for Hal Riney & Partners on its $10 million account has narrowed to Foote, Cone & Belding; JWT/West; Ketchum Advertising, and McCann-Erickson, all San Francisco, and Ogilvy & Mather and Scott Lancaster Mills Atha, Los Angeles.

City Of Industry, Cal.—**Presto Food Products** hired JWT/West, Los Angeles, to succeed Admarketing on its $2 million account. The company is expanding distribution of its Mocha Mix nondairy creamer to markets including Denver and Kansas City.

Los Angeles—**John Littlewood**, president of N W Ayer/Los Angeles, was named ceo. Bartine Stoner, former ceo, remains chairman.

Magazines

Seeds of optimism sown on rocky ground

By Belinda Hulin-Salkin

At first glance, the numbers look fairly good: Over-all consumer magazine ad revenues for the first six months of 1986 increased 4.8% over 1985. Some magazines, including *Rolling Stone* and *New Woman*, even reported staggering revenue gains of 40% to 70%. Not bad, considering that the industry ended 1985 up 4.5% over 1984's record-breaking ad revenues. Ad pages are down 0.4% so far this year; that's a stabilizing turn after the 3.3% drop in 1985.

Publishers are testing and launching new titles as quickly as ever. And in the search for growth opportunities, ownership changes among established magazines abound.

But these successes belie the turmoil within the magazine business today. New titles are competing with established books for already-crowded retail rack space and limited ad dollars. Third- and fourth-ranked magazines in highly competitive fields now find it hard to stay afloat, and in some cases, whole categories—witness the consumer science magazines—are in trouble.

Meanwhile, spending in certain advertiser categories, such as computers and tobacco, has been shrinking at double-digit rates, and many costs of doing business—paper, printing, postage—continue to rise. As a result, publishers are running very hard just to keep pace. And according to industry executives, 1987 probably will bring more of the same.

"1986 is turning out to be a tough, scrappy year," says Peter Diamandis, president of CBS

(Continued on Page S-32)

Belinda Hulin-Salkin, a frequent contributor to Special Report, wrote the overview to last year's Magazines Special Report.

Unless otherwise noted, all magazine circulation figures used in this Special Report are Audit Bureau of Circulations' total circulation averages for the six months ending June 30.

Seeds of optimism sown

(Continued from Page S-1)

Magazines, New York. "It's probably the toughest year in the last decade."

Mr. Diamandis believes a mild malaise in the U.S. economy has trickled down to magazine publishing. "People are trying to get control of costs," he says. "Major advertisers are beating up on their agencies; they don't want double-digit increases in their media budgets. That affects us, and we, in turn, beat up on our paper suppliers and vendors."

Other observers add that uncertainty as to the impact of new federal tax laws has made cost-conscious advertisers even more conservative than usual. Mr. Diamandis says several trends could improve the outlook for magazines.

He says advertisers are becoming disenchanted with broadcast tv buys as zapping, videocassette recorders and cable tv make it more difficult to determine who's actually exposed to a network commercial at any given time.

"Advertisers are becoming reacquainted with print," Mr. Diamandis says. "I don't think tv is going away, but now it may be our turn to shine."

Mr. Diamandis and other magazine executives also see a continuing trend toward narrowly targeted, specialized magazines, and a resurging interest in men as a target audience.

"The women's market isn't going to die down," he says. "But some of the hoopla will subside, and in the next decade, advertisers will awaken to the fact that men are still around and they still spend money."

Some observers argue that while advertisers may shift ad buys to the benefit of some magazines and the detriment of others, the over-all problem remains the same: Dwindling ad budgets and heightened competition. In addition to the proliferation of national titles, individual magazines compete with regional publications, narrowcasted tv and increasingly zoned local newspapers for ad dollars and consumer attention.

According to Publishers Information Bureau, New York, total ad revenues for its 147 member magazines topped $2.5 billion for the first six months of 1986, an increase of 4.8% over the same period last year. But only 51 magazines reported revenue gains of 10% or more in that period and 48 showed a decline in ad dollars. The breakout for ad pages borders on the bleak: 82 magazines showed a decline, while only 26 showed an increase of 10% or more.

"It certainly has been a competitive year," says George J. Green, exec vp-group publishing director at Hearst Magazines, New York. "Advertisers have so many options now. The leading magazines in any given fields are doing well, while the others are scrounging around for what's left." Mr. Green says some former national advertisers have turned to regional buys, and in major metropolitan areas, upgraded newspaper sections are now part of the mix.

The decline of several key ad categories has been felt throughout the industry. Through the first half of the year, computer and office equipment ads were down 27.7% from last year, tobacco ads declined 0.7% on top of 1985's 15% drop, snacks and soft drinks were down 7.4% and liquor was off 2%.

Mr. Green and other magazine executives say they're turning to new ad categories to offset the losses. "Tv has had some hard times lately, which is creating an environment for magazines to do better [among certain advertisers]," he says. "Food companies seem less reluctant to put their money in magazines now, and automobile advertising in magazines is up 10%."

> ***"Advertisers are becoming re-acquainted with print. I don't think tv is going away, but now it may be our turn to shine."***
>
> **Peter Diamandis**
> **President**
> **CBS Magazines**

In addition to better response from food companies, which increased ad spending in magazines by 22.6% during the first half of 1986, and auto marketers, magazines are getting more advertising from apparel manufacturers (up 10.8%), retailers (up 12%), sellers of pets and pet products (up 37.5%), and makers of stereos, tvs and other electronic entertainment products (up 14.4%).

"Nobody's going to roll over for any one category," says Michael Levy, publisher of Austin, Tex.-based *Texas Monthly* and vice-chairman of the Magazine Publishers Assn. "But I think you'll see more aggressive pitches to get dollars away from the other media and to boost other categories."

Mr. Levy says retailers could become even more important to magazines, because of stores that need a national presence. "Magazines have lost a lot of dollars to direct mail, but retailers have become very concerned about mailbox clutter. The fact that consumers spend an average of one hour with a magazine appeals to them."

He says publishers need to educate advertisers. "When I see a double-truck ad for a $30,000 automobile in a daily newspaper, I wonder why it's there. Magazines are much better for going after the high-ticket auto buyer. Magazines collectively have to say, 'There's a better buy out there.' We haven't been doing a good enough job in explaining our advantages."

At Conde Nast Publications in New York, executives have used several years of research to woo auto ad dollars into its women's titles. According to corporate marketing director Eckart Guthe, the company's 1981, 1983 and 1986 studies on women and car buying have helped convince auto manufacturers that women are significant customers.

"Six years ago, nobody wanted to believe that women buy cars," Mr. Guthe recalls. "But we showed them the results of our studies, and once they started thinking along the lines of market segmentation—not just demographics—their media buying patterns changed." Conde Nast's *Glamour*, *Mademoiselle* and *Vogue* collectively featured 61 pages of auto ads in 1985, compared to none in 1980, according to PIB.

Mr. Guthe says changes in market conditions periodically force advertisers to take a new approach to marketing, and as a result, media buys shift. That can bring a windfall to certain publications and adversely affect others.

He says Conde Nast is thinking of using extensive reader research to switch habits among other ad categories, such as liquor. "In the beginning, liquor advertisers shied away from any publications that focused on fitness or health. The companies believed that people who run and eat healthy food don't drink or smoke," Mr. Guthe says. "But liquor companies are starting to see that the fitness trend is not their enemy."

Even if advertisers do take a new look at nontraditional magazine buys, Mr. Guthe agrees that unless over-all ad budgets increase, 1987 is likely to be another tough year. "There are more titles, especially in the area we operate in: Upscale magazines," he says.

But not all publishers are facing the coming year with fear and trepidation. Triangle Publications' *TV Guide* circulated 18.5 million copies of its Sept. 13 fall preview issue, a bonus of 2.1 million for advertisers. The issue brought in $12 million in ad revenues, and Radnor, Pa.-based publisher Eric Larson says issues through the end of 1986 have been filling up nicely.

Rather than competing with tv buys, TV Guide ad director Bob Baumler says it benefits from a special synergy with the medium. "*TV Guide* is always sitting right there beside the tv, and it's used with tv," he says.

Likewise, Kenneth Gordon, publisher of Pleasantville, N.Y.-based *Reader's Digest*, considers tv to be something of a partner. "We don't go out and knock tv," he says. "It's got a very important role in building awareness for a product. But a 15-second spot can't give you product details. Our job is to provide the details. Advertisers need that double exposure."

Ad pages at *Reader's Digest* are up 19.4% over a weak 1985 and revenues are up 3.1%. According to Mr. Gordon, the magazine's current success has come from aggressive promotion and an extensive marketing research effort.

New advertising options have been introduced. Special ad sections within *Reader's Digest*, such as the December, 1985, Christmas shopper and October's "Food Digest," have been successful.

The magazine also is in the midst of a $1 million test of shrink-wrapped magazines that would allow the company to include freestanding inserts with its regular distribution.

Not all industry executives agree with *Reader's Digest's* methods, but many believe the company has the right idea.

"We're all going to have to be a lot more innovative in selling the value of magazines," Hearst's Mr. Green says. "The pace of business is going to increase. We're going to have to be more visible to advertisers, and our magazines are going to have to be more carefully focused on the audience we're trying to reach."

Observers expect to see a turning point in the magazine industry as 1988 approaches. It's an election year and there'll be another round of Olympic Games to tout.

Says Steven Rattner, magazine analyst and a principal at Morgan Stanley in New York, "The magazine business is closely tied to the general economic cycle. To some extent, its weakness now stems from its strength before. It will be a lot easier for it to look good next year compared to this year."

Associate editor Julie Liesse Erickson coordinated this report on Magazines.

Perelman eager to snare Gillette

Bitter takeover fight expected

By PAT SLOAN

NEW YORK—Corporate raider Ronald Perelman is showing all the symptoms of mogulmania.

Working on a takeover of hotel company Transworld Corp. and having just finalized Revlon Group's purchase of Max Factor, Almay and Halston cosmetics, the Revlon chairman has offered $4.12 billion for Gillette Co. The move has set up a potential bitter and hostile struggle for Gillette that Wall Street already expects could draw into the bidding such powerhouses as Procter & Gamble and Unilever.

For a year, Unilever and P&G have been rumored to be interested in Gillette, and now Jack Salzman, a Goldman Sachs analyst, isn't ruling out either as a potential white knight: "There's a good possibility of a white knight, maybe Procter & Gamble or some other company of that size."

New IBM PC Super Bowl-bound

By BRIAN MORAN

LAS VEGAS—IBM is preparing to introduce a long-expected successor to its 5-year-old basic Personal Computer via a Super Bowl tv ad blast in January.

Reports swept through the Comdex industry trade show here last week that IBM will position the so-called "PC2" as a work-at-home machine priced about $1,000 or possibly lower. The move would mark Big Blue's second attempt to market an inexpensive, entry-level computer. IBM halted production on its failed PCjr 18 months ago.

IBM's anticipated Super Bowl unveiling of the new pc is directed in part at rival Apple Computer, which traditionally unveils new products in January. Speculation is mounting that Apple may introduce in January the first Macintosh model equipped to run IBM-compatible software.

"It's very likely we'll see a head-to-head battle of IBM and Apple commercials on the Super Bowl," said Clare Fleig, analyst for International Technology Group, a Los Altos, Cal., market research company.

A spokesman for IBM's personal computer division, Montvale, N.J., would not comment. Cupertino, Cal.-based Apple has not divulged its plans for early 1987 new products or a possible Super Bowl appearance. Lord, Geller, Federico, Einstein handles IBM; BBDO Worldwide handles Apple.

Dealers at Comdex indicated IBM has encouraged them to clear their shelves of existing PC inventory to make way for the new unit's arrival. Several dealers speculated that IBM has halted production of the original PC model. The IBM spokesman said production on certain models in the IBM PC line is shut down periodically, depending on demand. He would not comment further.

"It's certain that there are not a lot of PCs left to order," said Peter Teige, analyst for San Jose, Cal.-based Dataquest.

The successor PC should help IBM step up its battle against low-price competitors. Big Blue's basic PC has become increasingly vulnerable to compatible models marketed by a host of challengers, including Fort Worth-based Tandy Corp., Houston-based Compaq

Last Minute News

Sears ties into shopping by tv

CHICAGO—Sears has agreed to give QVC Home Shopping Network, West Chester, Pa., exclusive rights to feature its merchandise, including some not included in Sears stores or catalogs. QVC's prime time program will make its debut Nov. 24 on 26 cable systems, serving 5 million households; 24-hour operation is scheduled to start Jan. 1. Sears has no immediate plans to advertise the new outlet.

Dexatrim account may be moving

NEW YORK—Thompson Medical has reassigned its $10 million Dexatrim capsules account to Laurence, Charles, Free & Lawson from Saatchi & Saatchi Compton, sources say. A Thompson spokesman said he believed the rumor is true but

(Continued on Page 8)

Broader roles for Y&R, Saatchi

Consulting poses conflicts

By STEWART ALTER

Young & Rubicam and Saatchi & Saatchi last week made what could be the most significant moves outside of advertising by advertising agencies to date. The actions will have tremendous consequence in the area of client conflicts and on the entire concept of what a full-service agency can and should be.

Edward Ney resigned as chairman of Y&R to head a new consultancy/investment banking joint venture between Y&R and PaineWebber, and Saatchi & Saatchi hired one of the most respected executives in management consulting to solidify—and significantly expand—its previous entry into that field. Victor Millar, one of two worldwide managing partners of the Arthur Andersen & Co. accounting firm, will join Saatchi to lead an acquisition binge that will build upon the London-based agency's 1984 acquisition of the Hay Group.

While the immediate plans of both agencies call for avoiding controversy, their moves pose questions about client-agency relationships and conflicts that could turn recent merger-related events into minor footnotes in the history of the agency business.

What adds particular importance to these steps into uncharted ad-agency territory are the industry-leading reputations of the key players.

Mr. Ney, 61, had been ceo of Y&R since 1970 before relinquishing the post last year to Alexander Kroll, 49, who now adds the title of chairman. If Mr. Ney is as right in his thinking in the current PaineWebber venture as he was when he looked at the agency business in the 1970s and began transform-

Highlights

IBM preps 'PC2' 1

IBM is preparing to introduce a long-expected successor to its 5-year-old basic Personal Computer via a Super Bowl tv ad blast in January. Reports swept through the Comdex industry trade show in Las Vegas last week that IBM will position the so-called "PC2" as a work-at-home machine priced about $1,000 or possibly lower.

Colgate sheds light 3

Colgate-Palmolive Co. three years ago dropped scores of agencies worldwide and committed its future to three international shops. Only now has the broad significance of those changes become evident, with disinflation and flattened ad spending forcing agencies to consider fundamental changes.

Sears' soft approach 12

Sears, Roebuck & Co., which earlier this year consolidated national advertising responsibility at "hard goods" specialist Ogilvy & Mather, nevertheless is preparing several major new "soft goods" marketing initiatives.

Kennedy's collision course 24

The surprise decision by Sen. Edward Kennedy to chair the increasingly powerful labor and human resources committee puts the liberal Massachusetts Democrat on a collision course with the ad industry.

Federal Express zaps DHL 28

After scrapping its loss-ridden ZapMail service, Federal Express Corp. is preparing to turn up the heat against rival DHL Worldwide Express in the international package delivery business.

Daihatsu tests U.S. waters 86

Japan's fifth-largest auto maker, Daihatsu Motor Co., shortly will begin marketing an industrial vehicle in the U.S. as a first step in a plan to sell its full line here, probably in 1988. Daihatsu America this month appointed Los Angeles agency Abert, Newhoff & Burr to handle Hijet's introduction in January.

Unisys packs power 100

The initial advertising campaign for Unisys Corp.—the new name for merged Burroughs and Sperry—positions it as an exponentially more potent force in the computer industry. But observers say the Burroughs-Sperry combination won't be a stronger competitor to giant IBM than each was separately.

Oliver sympathetic to admen 103

Daniel Oliver doesn't come right out and say no lawful ads should be banned, but the chairman of the Federal Trade Commission leaves little doubt as to where he stands on attempts to restrict tobacco or alcohol ads.

FEATURES

Fishing in Minneapolis 46

Carmichael-Lynch's senior vp-associate creative director Jack Supple takes visitors fishing to demonstrate the effectiveness of Dr. Juice, a product of client Normark Corp. But the Minneapolis agency has done a lot more than swap fish tales to win 14 top awards this year in six national advertising competitions.

INTERNATIONAL

Murdoch buys stake in Asia 66

Rupert Murdoch's News Corp. Ltd. has bought a 35% stake in the Hong Kong-based *South China Morning Post*, thereby making it possible for global marketers to engage in one-stop shopping for major newspapers on several continents.

OTHER NEWS

Conventional wisdom sees advertising's growth as that proverbial glass that's half empty. If you scratch below the surface, however, several powerful forces suggest advertising in 1987 could resume the growth of the early '80s—and on a much healthier basis. Page 4.

J. Walter Thompson USA has signed as the first customer for a new tv ratings service that could become one of the biggest research developments of the decade: Viewership ratings for commercials instead of just programs. Page 6.

"Amerika," the $30 million-plus, 12-hour miniseries due as the next big event on ABC, is generating considerable controversy well before its planned February telecast. Page 22.

After 36 years of conforming to a defined corporate culture—as vp-marketing services at General Foods and chairman of the Assn. of National Advertisers and the Advertising Council—F. Kent Mitchel now defines his own business atmosphere. The 59-year-old executive has set up his own consulting company, Fair Tide Associates. Page 32.

Animal lovers and humane societies are embroiled in a cat fight with Neiman-Marcus over the animal gift in its 1986 Christmas catalog. The California Spangled cat comes in bronze, silver, red and blue. Page 34.

SPECIAL REPORT

Big media's traditionally sunny outlook turned partly cloudy this year. An uncertain economic forecast put advertisers on a cautionary course that leveled media rates and held total ad growth to an estimated 5% to 6%, down from 7.9% in 1985 and 16% in 1984. Some experts suggest this year's ad crunch signals the start of a new era of slower growth for U.S. media.

French shop taps O'Rielly, O'Brien, Clow

By STEWART ALTER

NEW YORK—Walter O'Brien, former vice-chairman of J. Walter Thompson Co., and Curvin O'Rielly, former creative chief both at McCann-Erickson, New York, and Ogilvy & Mather, Chicago, have joined with Stephen Clow to form a new agency in partnership with Roux, Seguela, Cayzac & Goudard, a French multinational shop that billed $287 million in 1985.

Called O'Rielly O'Brien Clow/RSCG, the New York agency represents the first entry into the U.S. by RSCG, which does business in 10 European countries. RSCG was reported three months ago to be exploring a startup with Mr. O'Rielly as an alternative to acquiring a U.S. agency (AA, Aug. 25). That followed its failure to forge a deal with Grey Advertising's Levine, Huntley, Schmidt & Beaver subsidiary (AA, Aug. 4, *et seq.*).

"I've been talking to RSCG for close to seven months now," said Mr. O'Rielly, who said Mr. O'Brien was brought into the discussions in midsummer. "We've been talking seriously for the last six weeks to two months," he added.

"It's exciting," said Mr. O'Rielly of the new venture. "This group really cares about terrific work. They're after a profit as all people are in business, but they're excited about the

Mojo MDA buys Allen & Dorward

By JENNIFER PENDLETON and GEOFFREY LEE MARTIN

California's shrinking pool of independent ad agencies became even smaller last week when Australian agency Mojo MDA acquired San Francisco-based Allen & Dorward.

Mojo MDA is best known in the U.S. for its Clio-winning commercials for the Australian Tourist Commission featuring Australian actor Paul Hogan.

The agreement, expected to be finalized by yearend, calls for an initial payment of $6 million and an additional $3 million in earnout payments over three years. The deal is subject to shareholder approval and creates a combined $250 million agency network, moving Mojo MDA from third place to first among agency groups in Australia.

Allen & Dorward is California's fifth-largest independent agency, with about $75 million in billings.

The merged shop temporarily will be known as Mojo MDA-Allen & Dorward and will later convert to the Mojo MDA name.

Although Mojo has international affiliates in the Far East, this is the first arrangement involving ownership. It also signals the beginning of Mojo MDA's international expansion plans, announced when Sydney-based Mojo merged with Monahan Dayman Adams, Melbourne, just three months ago (AA, Aug. 11).

"We will be looking immediately at expansion in the U.S., particularly Los Angeles and New York, and we are continuing to consolidate our presence throughout Asia

Agencies to get a shot at apple account

WENATCHEE, WASH.—Washington State Apple Commission is reviewing its account, projected to jump by 57% next year to $5.5 million. Cole & Weber, Seattle, which has had the account since 1970, will participate.

LOS ANGELES—**Chiat/Day** co-founder Guy Day, on sabbatical for the past six months, has decided to leave the agency permanently. Mr. Day says he will continue to write fiction and eventually may reenter the ad business. Chairman-ceo Jay Chiat says the agency won't change its name.

SACRAMENTO—The **California State Lottery** will lower billings requirements for agencies participating in the review of its $25 million general account to $40 million from $50 million. The commission will select eight finalists on Jan. 5.

LOS ANGELES—**Wieden & Kennedy** here has appointed Dick Paulsen chief operating officer. Mr. Paulsen, formerly exec vp at Basic Computer Systems, Anaheim, succeeds Steve Keenan, now a management supervisor at Young & Rubicam, Chicago.

SAN JOSE, CAL.—**Altos Computer Systems** has added Wieden & Kennedy, Portland, Ore., to the list of contenders for its $2 million account, formerly at Reiser Williams deYong.#

Credit midwesterners for taking an interest in using plastic right

Midwesterners are smarter than everybody else when it comes to using bank credit cards, according to a national opinion survey of more than 1,000 Americans released in late October by the Iselin, N.J.-based newsletter "Bank Credit Card Observer."

The study found that 38% of midwesterners shop around widely for credit cards before accepting them, compared with 23% of Americans living in the West. Mid-

westerners also pay less interest by carrying over lower monthly balances on Visa and MasterCard than everyone else. They average $446 per month in the north central states, compared with $666 in the Northeast, $781 in the South and $805 in the West.

The study was highlighted in a report called "A Nation of Debtors: Americans owe $4.7 billion monthly on bank credit cards." It found that 6 of 10 Americans—105 million—inaccurately believe there is little variation in bank credit card interest rates, which range from 10.5% in Little Rock, Ark., to 22.5% in St. Louis, says John C. Pollock, the newsletter's editor.

"Our contention is that people are not adequately informed," he says. A national survey of 95 randomly selected bank credit card applications found that only 46% mention the annual interest rate, he adds. Clear disclosure of interest rate, annual fee and the grace period before interest charges are assessed is imperative for smart shopping, Pollock says.

Pollock, who formerly headed the research and forecasts subsidiary at New York-based Ruder, Finn & Rotman, started "Bank Credit Card Observer" in April to shed some light on credit cards as one of the nation's fastest growing industry segments. His background as a political science professor at Rutgers University has served him well, he says.

"My strategy is to build awareness and to establish the rigors of scientific research that I bring to this," he says.

Richard Edel

In fashion, all that glitters one season is a shade subdued the next

If you want a jump on what will be next season's fashionable colors for clothing and interior design, your best bet is to do what the big guys do: Tune into the outside world.

Apparently, there's no grand scheme and no cabal of designers who decide what's hot or what's not. When designers choose their colors, they tend to look most at pop culture, "paying particular attention to what's on television and happening in the art galleries," says Leatrice Eiseman, executive director of the Pantone Color Institute, Moonachie, N.J.

Metallics became the "in" colors shortly after "The Treasures of King Tutankhamen" national museum tour. Although metallics are still a major influence, the retrospective of Viennese art currently at New York's Museum of Modern Art is reviving interest in subdued tones enlivened with a touch of bright color.

"Historically, there's always been recycling of colors. For instance, Art Deco, with its sleek black enamels, mauves and peach tones, is back once again," she says, pointing out that last season's "Miami Vice" fashions were heavily influenced by the Art Deco revival.

Mary Ann Restivo's design adds a touch of bright color to subdued tones.

It extends all the way to colors for telephones, cars and appliances. Even Sears, Roebuck & Co. is selling black washers and dryers. This season, department stores are filled with clothes in low-key colors. There are "lots of charcoals, grays and blacks because designers perceive that customers are buying less and willing to pay more for a classic color. We've all become so much more color aware, especially how we react emotionally to certain colors," Eiseman says.

Still, for the young and the young-at-heart, odd and outrageous color combinations are the rule, while the upscale and more mature consumers prefer understated, muted palettes with a dash of color thrown in. One color popping up on drawing boards for next spring and beyond is green, particularly emerald green for clothing and "Coca-Cola" bottle green for furniture. The question is, is it New Coke or Classic?

Attorneys confess: Law murders their love lives

About to snooze in your booze? Next cocktail party, come prepared. Before that young lawyer starts regaling you with his exploits at the firm, quickly hand him this absorbing young-lawyer fact sheet. It's based on a poll of 1,500 lawyers under 35 and will be published in the American Bar Assn.'s *ABA Journal* next spring. While the young lawyer is reading it, go freshen your drink (perhaps at another party). With luck, he won't sue.

Here's a preview of the poll (responses are in percentages):

What is your household income from practicing law?

6—under $15,000
27—$15,000 to $30,000
41—$30,000 to $50,000
14—$50,000 to $70,000
7—$70,000 to $100,000
5—$100,000 and above

Are you better off economically than your parents were when they were your age?

83—Yes
17—No

Did you obtain financial assistance from your parents (or in-laws) to purchase your first house, condo or co-op?

36—Yes
64—No

Are you married?

31—Yes
69—No

If you are married, does your spouse work for a living?

73—Yes
27—No

Which of the following do you own?

59—a vcr
23—a home computer
47—a food processor
67—a microwave oven
73—a 35mm camera
36—a health club membership
9—a compact disc player
34—a telephone answering machine
23—a sports car

Does your work affect your love life?

67—Yes
33—No
If yes...
14—Positively
86—Negatively

No wonder young lawyers can seem so, well, determined, at cocktail parties.

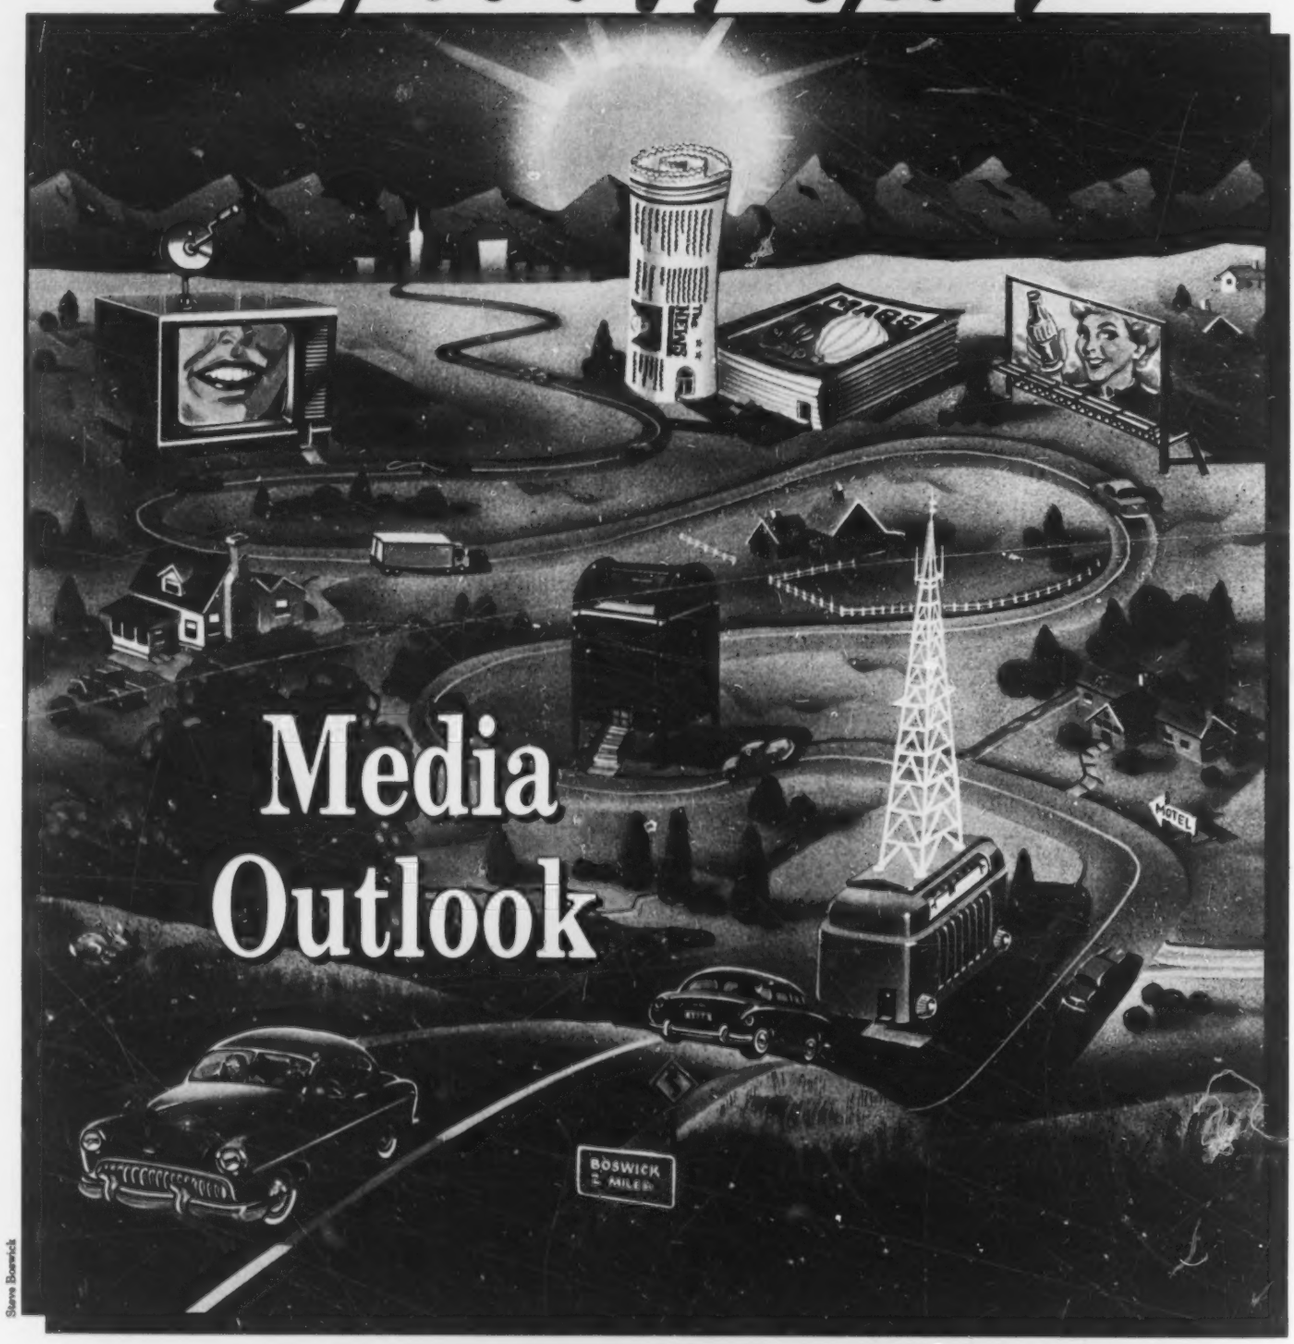
Special Report



Steve Boswick

Media's road ahead filled with challenges

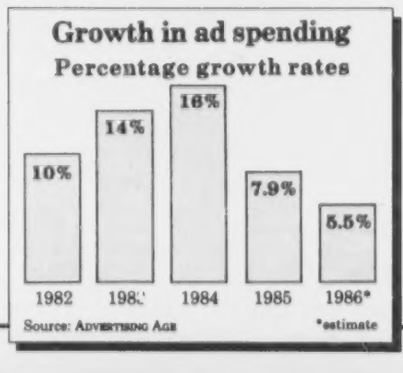
By Lori Kesler

Big media's traditionally sunny outlook turned partly cloudy this year. An uncertain economic forecast put advertisers on a cautionary course that leveled media rates and held total ad growth to an estimated 5% to 6%, down from 7.9% in 1985 and 16% in 1984. And the road back to better health is generally expected to meander considerably before it straightens out.

It has been a sobering experience for an industry accustomed to passing out double-digit rate hikes, even during the lean years of the early '80s.

Determined to maintain short-term profits, corporations flattened their ad budgets, migrated to new media and shifted more dollars into promotional activities. And major media responded by bringing their long-running rate inflation game to an abrupt halt.

Lori Kesler is Advertising Age's St. Louis correspondent and a frequent contributor to Special Report.



Some experts suggest this year's ad crunch signals the start of a new era of slower growth for U.S. media. "This is not a short-term wrinkle," says Michael Drexler, exec vp, national media director, Bozell, Jacobs, Kenyon & Eckhardt, New York. "I think we're in a watershed year. People are breaking out of the traditional ways of doing business."

From now on, says Mr. Drexler, advertisers will demand more accountability. Media will have to find ways of keeping ad rates in line with the consumer price index and other economic barometers, he says, "because companies will no longer plunk down money to buy time or space at any price."

At the same time, it won't be easy to maintain high standards of editorial and programing quality without hiking ad costs, says Michael Atkin, New York-based DDB Needham Worldwide's

Challenging road ahead

(Continued from Page S-1)

senior vp, corporate director-media resources. The recent flurry of media company mergers, buyouts and management shakeups, he says, may already be affecting the way advertising is bought and sold. Media, says Mr. Atkin, are trying harder to accommodate advertisers with more competitive pricing and flexible packages.

"Next year will be a good one for clients because prices will be held down," says Michael Drake, senior vp, director-media planning and information services, BBDO, New York. "It will be a tough year for suppliers because they won't be able to pass costs along to advertisers without first making an effort to control their own spending."

The two biggest national media—network tv and magazines—were punched hardest this year. Growth rates for each are expected to stall out at about 4% for 1986.

Some experts say network tv's dramatic price slide had a trickle-down effect that depressed the rest of the national market. Others argue that the sluggish economy is exerting equal pressure on all sectors. Most agree, however, that several noneconomic factors made media matters worse this year.

> ***Several noneconomic factors made media matters worse this year.***

For example, client mergers tended to limit total ad volume while sheltering more dollars under the umbrella of large advertiser discounts. And hot new product categories to stir up advertising demand were harder to find this year. In the past, such things as home computers and videogames emerged to energize a slow market. Nothing like that materialized in 1986.

Agency media directors also watched more and more ad money being siphoned from major media into promotions. And the growth of direct marketing is taking money away from traditional media's ad revenues, says Richard Kostyra, exec vp and U.S. director-media services, J. Walter Thompson USA, New York. The trend has been building for a long time, he adds, "but advertisers suddenly came face to face with it in 1986. Nobody has an answer to it yet."

Of all the media, network tv probably felt the strongest shock. It experienced "something of a revolt" when advertisers and agencies finally brought an end to what they regarded as many years of excessive pricing, says Joseph Ostrow, exec vp-communications services, Young & Rubicam, New York.

"The networks didn't expect such slow growth this year," adds Mr. Atkin. "Even though their revenues fell 3% in 1985, they hoped for a rebound and were really surprised when it

(Continued on Page S-4)

Media directors predict soft market will continue in 1987

Against a backdrop of upheaval and uncertainty, several agency media directors were asked to slip into the role of soothsayer and speculate on 1987's media picture.

On the whole, they expect next year's patterns to follow current trends, with ad costs inching up less than 5% and almost no growth in ad spending. *(See related story on media forecasts by Robert J. Coen, senior vp, director of forecasting, McCann-Erickson, New York.)*

They say advertisers will continue to keep a tight grip on ad costs, so budgets for established brands will remain relatively flat. But Michael Drake, senior vp, director-media planning and information services, BBDO, New York, suggests that if the new tax laws let low- and middle-income workers take home a bigger chunk of their paycheck, advertising for consumer products may increase.

Michael Drexler, exec vp, national media director for Bozell, Jacobs, Kenyon & Eckhardt, New York, thinks the worst of the economic depression has passed. But he says media revenues, which lag behind the general economy, probably won't pick up until the end of 1987 or early 1988.

Network tv

Media directors put network revenue growth in 1987 at 4% or less. Most expect rates to stay flat or possibly drop, especially if the people meters, which will come into use next year, measure lower audience numbers than previous rating standards have shown.

Network's share of prime time audience slid from 90% in 1980 to 76% in 1986. Mr. Drake says this year's prime time and daytime marketplace has been soft. He says news continues to be popular with corporate advertisers, and late-night offerings remain most efficient in targeting the young adult crowd. He foresees a softening in sports as auto makers move away from male-oriented programing into the dual-audience market.

By the tenets of common wisdom, the Olympics and elections should invigorate the up-front market for the 1987-1988 tv season. However, one expert warns against too much optimism. "Economists are saying nothing follows formula anymore," says Richard Kostyra, exec vp, U.S. director-media services, J. Walter Thompson, USA, New York. "I feel 1987 will continue to be a tough, flat year."

Spot tv

The outlook for spot tv appears mixed, with some media directors predicting moderate growth and others predicting flat or declining sales.

Mr. Drexler estimates 1987's spot market will increase 5.5% as national advertisers key in on hot geographic markets and local retailers build weight either by shifting money from newspaper budgets or adding tv outright.

An alternate scenario has the nets' low rates diverting funds from the national spot market. Mr. Drake says most tv stations will have to search for local and regional advertisers to make up for lost national sales.

Cable tv

Cable's ad revenues are expected to continue rising at a somewhat slower pace than the 30% registered in 1985, or 16% for the first half of 1986. About half the country now is wired for cable, but further expansion will be slowed by the high cost of hooking up the big cities.

Cable's growth potential is attributed to its relatively low out-of-pocket costs as well as its ability to target certain attractive segments and replace lost network weight.

Michael Atkin, senior vp, corporate director-media resources, DDB Needham Worldwide, New York, predicts good growth opportunities for local cable, but not until the systems operators in each geographic market work together to facilitate sales, something they're not yet doing.

Radio

Industry officials and some media directors say radio will keep up the growth pattern established this year, with local spot spending pegged to increase about 8%, network spot up 3% to 5% and network sales 14%.

"We see evidence radio will continue quite strong," says Joseph Ostrow, exec vp-communications services, Young & Rubicam, New York, "because it's one of the most efficient media for targeting by geographics, demographics or life style." Locally, business-to-business advertisers and certain other specialty retailers have moved into radio and gotten quite comfortable with it, adds Mr. Atkin, who expects that trend to persist.

Radio is regarded as the natural beneficiary of a slow-growth economy, and some experts think its networks will be able to command healthy price in-

(Continued on Page S-4)

Challenging road ahead

(Continued from Page S-2)
didn't materialize." Many thought 1985's dip could be explained by the fact that the Olympics and elections had fattened 1984's figures. But the experts say several factors made the networks more vulnerable this year—and will keep the market soft in 1987.

For one thing, the availability of 15-second spots is swelling the nets' total inventory, and the experts predict they will represent about one-third of all network units sold in 1987, up from 19.5% during the first half of 1986, according to Television Bureau of Advertising and Broadcast Advertisers Reports.

Then, too, other broadcast options are playing a bigger part in the game. Barter syndication and cable "are achieving credibility as part of the mainstream of media buying rather than as secondary media," says Jack Myers, president of Infomarketing, a Fairfield, N.J.-based media research company. In fact, these media alternatives have eroded the networks' share of audience while giving advertisers new places to put their money.

Alec Gerster, exec vp, director-media and programing services, Grey Advertising, New York, says the nets took 98% of all national tv revenues in 1980, and only 88% in 1985. But during that time, national tv spending soared from $5.2 billion to $9.5 billion, "so the nets' decreasing shares were masked by the market's growth," he says. "Now, with total revenues stagnant or declining, that share loss really means something."

"The networks this year finally started taking a comparative attitude toward the other media," adds Mr. Kostyra. "Last year they paid lip service to them. Before that, they paid no attention at all."

Syndication, which grew from a $300 million ad medium in 1983 to an estimated $630 million business this year, has earned its stripes as a viable medium because of its efficient prices and quality programing, says Mr. Drexler. And cable,
(Continued on Page S-8)

Media directors predict

(Continued from Page S-2)
creases next year. However, Mr. Drake says network radio's strong start will be followed by a rate drop because of buyer resistance and a movement back into network tv.

Newspapers

BJK&E's Mr. Drexler predicts 7% growth for newspapers. He says cooperative and retail advertising will remain relatively firm because of business' increasing dependence on price-item advertising.

However, he says if the economy keeps struggling, classifieds will drop and drive down over-all newspaper revenues.

More national advertisers will move into newspapers as the industry takes steps to shrink the gap between national and local rates, says Mr. Drexler. But other media directors say not enough is being done to correct the problem.

Mr. Drake adds that newspapers over-all like magazines, have been hit by the decline in tobacco, liquor and computer advertising.

Magazines

Magazines could have a tough year, say the experts. Most say the rise of the 15-second spot and the fall of liquor, tobacco and computer ads will hold revenue growth to 5% or less.

Special-interest magazines will have an edge in the tight economy, says Mr. Drexler, because their lower absolute page costs allow advertisers to maintain program continuity on a tight budget.

Mr. Drake predicts magazines will hold rate increases to 5% or less and they'll be much more likely to negotiate or offer creative rate packages.

He's bullish on fashion, personal finance and health and fitness, but pessimistic about women's service magazines, newsweeklies and male magazines.

Outdoor

The outlook can't be rosy for an industry whose biggest advertisers are alcohol and tobacco products, but media directors see some bright spots on the horizon.

Healthcare, consumer services and business-to-business advertising could pick up some of the slack, says Mr. Drexler.

Mr. Drake says while business is soft for 30-sheet bulletins, eight-sheet posters are gaining some acceptance from package goods advertisers who like being located near retail outlets. And he says outdoor boards near airports and other prime areas are being used to tap a hard-to-reach upscale audience.

Direct mail

Industry sources say direct mail will continue to outpace general media with over-all growth in 1987 in the 12% range.

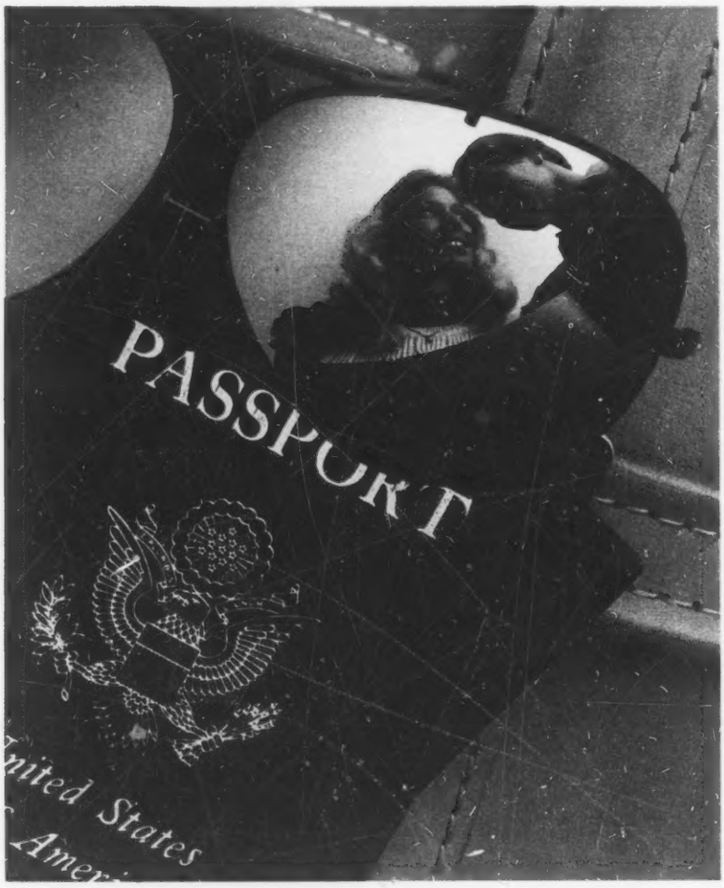
Direct mail's 1986 expenditures are projected at an estimated $17.3 billion, according to DDB Needham estimates.

Major retailers are expected to make greater use of direct mail to build store traffic and target promotions to specific customers, as well as to generate direct catalog sales.

—Lori Kesler

More about Florida's Money Market

Nearly half the population of Fort Lauderdale/South Palm Beach hold passports. Almost 40% used them in the past three years.



The News/Sun-Sentinel delivers two out of three readers in Florida's affluent Money Market.

Challenging road ahead

(Continued from Page S-4)

which has reached nearly 50% penetration, now claims more than $700 million in ad revenues, up from $320 million three years ago.

Some say the nets' pricing strategies will hurt cable and barter syndication in 1987. Mr. Gerster notes, however, that advertisers could have bailed out of the alternatives at the first sign of softening network prices this year, but didn't. "I think that shows some fundamental support for those media," he says.

National and local tv spot sales surged an estimated 6% and 10% this year to $6.4 billion and $6.1 billion respectively, according to BJK&E. National spot easily outpaced the nets as major advertisers zeroed in on high-potential geographic areas.

Local spots' hefty gains are attributed to at least two things: The channeling of manufacturers' ad dollars into local dealer co-op plans and the migration of local retail dollars from newspapers into spot tv.

Radio expects to collect an estimated $7.1 billion in revenues this year, up 8% from 1985, according to a Radio Advertising Bureau official. National spot radio has made only marginal gains, but local spot has been buoyed by solid local retail spending, and network radio is having a smashing year with revenues soaring nearly 15% to $378 million.

Budget-minded advertisers are flocking to [network radio.]

Network radio represents only 5% of the total radio market, but media experts say budget-minded advertisers are flocking to it.

The Publishers Information Bureau reported magazine revenues up 4.8% for the first half of 1986 with ad pages down slightly. The decline in tobacco, liquor and computer advertising has hurt the magazine industry as a whole—and business books and newsweeklies in particular. Mr. Atkin says magazines also are getting pinched by catalogs, some of which are adding editorial material to enhance reader interest, as well as carrying advertising.

But the media experts say fashion books and certain specialty magazines are relatively healthy; so are personal finance books, maturity market magazines and city and regional publications. "It's the continuation of a long-running trend to more selectivity and more targeted marketing strategies," says Mr. Ostrow.

BJK&E projects that strong local retail spending will push this year's newspaper ad revenues 8% to 9% ahead of 1985 with virtually no increase in total circulation. Agency media directors say national ads make up only 13% of all newspaper revenues because papers tend to give priority to local retailers with rates an average 65% lower than national rates.

And they say the rate gap has grown larger during the past decade, so that some metropolitan dailies now charge national advertisers almost twice as much as local retailers. "Newspapers don't really seem to think of themselves as a national medium," says Mr. Atkin.

But, he says, as local retailers stake more interest in broadcast media, newspapers finally may have begin to court national accounts with the lure of more special sections, the benefit of standard ad units, better ad positioning and more flexible pricing.

. . . national ads make up only 13% of all newspaper revenues because papers tend to give priority to local retailers.

Outdoor advertising's revenues are expected to increase about 8% this year to $1.3 billion, up from $700 million in 1980, according to BJK&E.

Outdoor has been hurt by its dependence on two declining categories, tobacco and liquor. But the experts say it's moving aggressively to attract retail, healthcare and consumer services advertising.

Mr. Atkin says the major outdoor companies are investing in new structures, searching for new kinds of accounts, and bringing new creative techniques to their ad product and their marketing strategies. "The suppliers are getting involved in the marketing aspect of the business. Instead of just offering locations, they are keying in on certain neighborhoods and demographics so they can offer advertisers high frequency and selective focus," he says. "The more they do that, the more opportunities they'll see."

This year brought about momentous changes in the media picture. Experts say it's more of a buyer's market today—and will be from now on. In fact, 1986 may go down in history as the year Big Advertisers and Big Media stood eyeball-to-eyeball, and Big Media blinked.

We kept people from running out of Inc.

Douglas T. Dinsmoor
Circulation Promotion Manager,
Inc. Magazine

"To handle our telemarketing subscription renewal program, we look for a company that can deliver the most effective cost per order. We always conduct tests to determine who can meet that objective. WATS Marketing Outbound wins hands down, every time. It's hard to beat WATS' size and experience.

"With WATS behind our renewal efforts, the program practically runs itself. Service is always good and we've never been disappointed in the results.

"Until somebody shows us they can consistently outperform WATS Marketing Outbound, we'll continue to use it. We're extremely happy with what WATS has done for us in terms of the renewal per call ratio and service."

Helping clients reach marketing objectives. That's our goal at WATS Marketing Outbound. Nobody has more experience and nobody gets results like we do.

For information on how WATS Marketing Outbound can help you achieve your marketing goals, give us a call. After talking with us, you'll subscribe to the action-oriented way we do business.

Rate hikes likely to reflect rise in total inflation

By Robert J. Coen

After nearly a decade of double-digit increases and an immunity to economic slumps, media rate hikes are finally moderating.

While double-digit general inflation ended in 1982, media prices continued to rise, fueled by exceptional ad demand from a growing computer industry, by the effects of deregulation and by the appearance of rebate ads. In 1983 and 1984, the expanding economy and the Olympics kept budgets rising.

Last year, the scenario darkened. Media prices softened, tv networks' ad revenues declined and many magazines and newspapers experienced a drop in ad pages. Media disinflation had arrived.

This year, the more moderate pace at which advertising is increased was finally fully recognized and accepted by all sectors of the advertising industry. Media price increases were closer to the general inflation rate than they had been in years. These trends are expected to continue into the near future.

Robert J. Coen, a recognized authority in the field of media forecasting, is senior vp, director of forecasting at McCann-Erickson, New York.

Network tv

The last time tv networks enjoyed the luxury of a seller's market was 1984, an Olympics and election year. Upfront deals for the 1983-1984 season were negotiated at prices 10% to 20% higher than previous season levels, and scatter price increases were nearly as large

through the summer of '84. By fall, the pendulum had swung in the buyer's favor. Rate increases for the next tv season were significantly smaller than in the past, but still well above inflation.

During 1985, advertiser resistance swelled. Most of CBS' and ABC's scatter inventory went at bargain prices. Commitments for the 1985-1986 upfront season were made with practically no price increases, except from NBC. Scatter buys made during the following spring were at rates 20% to 30% below upfront levels.

Over-all price increases for 1986 will be a mix of a few large increases, some large decreases, with most units showing modest gains of 3%.

Upfront prices for the 1986-1987 season rose moderately. In 1987, there should be a modest improvement in demand, with slightly higher network rate increases of 4%.

Spot tv

Spot tv's demand also boomed in 1984, and rates that year rose faster than inflation. In the second quarter of 1986, however, spot started feeling the heat of media disinflation.

Nevertheless, this year's average 4% increase in spot tv still registers slightly higher than current inflation. In 1987, spot's prices are likely to rise 5%. In the next few years, the demand for spot tv may be affected by the growing availability of lower-priced network units, especially the 15-second spot.

Cable tv

Last year, cable networks were finally recognized as realistic alternatives to broadcast networks, with much lower unit prices.

In 1986, because of improved audiences and growing demand, cable prices rose a sharp 14%. In 1987, with more demand for ad positions in programs that deliver targeted, desirable audiences, prices will rise accordingly. Cable's 1987 unit rate increases should be around 8%,

Rate hikes

(Continued from Page S-10)
higher than those of any other medium.

Network radio

The wired radio networks' revenue has soared in the last two years, and greater demand has resulted in fast-paced price increases. In 1986, network rates should show an above average increase of 8%. In 1987, some moderation is expected, but the rates should again be among the highest of all media—6%.

Spot radio

Spot radio enjoyed an excellent year in 1985, and rates were rising at the start of 1986, but softened somewhat as the year unfolded. Rate increases for 1986 should average 6%. Price competition among stations has intensified, however, and 1987's rate increases are expected to be more moderate at 3%.

Newspapers

Because of their monopoly in most markets, newspapers tend to ask for above average rate increases. But linage has declined and orders have shifted from run-of-press space to inserts, so rate hikes are slowing.

In 1986, increases will be around 7%. More moderation is expected for 1987, with rate hikes of 6%.

Magazines

Magazine ad pages have been contracting since they peaked in 1984. Intense battles for shrinking ad volume have lead to price discounts or announcements of modest future rate increases. In 1986, the average increase in magazine rates will be 5%—the lowest in years. In 1987, it will be even lower, 4%.

Outdoor

Cigaret and liquor advertisers have continued to modify their outdoor budgets, and rates in many markets are coming under pressure. In 1986, the congressional and gubernatorial elections have helped sustain demand for outdoor space, but rate hikes of 8% reflect a slowing down. Softening should continue in 1987, with moderate price hikes of 5%.

Direct mail

No increases in postal rates are expected through the end of this year, but over-all direct mail costs will jump 3% because of rising list charges and production expenses. The modest rate increase will creep upward in 1987 to 4%, as most of the economies of scale are exhausted. Some time during the year the postal rates could be raised.

Over-all, the economic outlook for 1987 is guarded. Most media rate increases will be close to the expected 3% rise in total inflation. By 1988, a presidential election and Olympic year, media prices may inflate modestly if the economy resists a recession. But even given the most optimistic scenario, we aren't likely to see rampant media inflation again for years.

An inventive package opens the door to a successful campaign.

Ulysses' campaign to take the town by storm counted on clever packaging. As a direct marketer, you need to wrap your messages with the same ingenuity. Westvaco can help you do just that. Because we'll match you idea for idea.

At Westvaco, we work with direct marketing professionals every day in the creation of packages designed to attract attention and get opened. That's the only way your message will have the opportunity to sell.

Heyday of 15-second spots falls behind schedule

By Dennis Freeman

After five years of partial acceptance and continued speculation about its value, the 15-second spot has come of age. In the 1986-1987 season, for the first time, all three networks are accepting stand-alone 15s in prime time, and many major advertisers are including the shorter commercials in their media strategies.

But so far, while 15s certainly have experienced steady growth, they haven't exploded onto the screen the way observers originally expected. When the unit first hit the airwaves in 1981, many predicted it would become the standard commercial unit by the end of the decade. In last year's fourth quarter, some agency executives expected 15s to represent 35% to 40% of all network units sold by the end of season. This year, network salesmen estimated that 15s would account for 30% of 1986-1987 upfront prime time inventory.

There's no way to tell what will transpire by 1990, but neither of the latter two predictions has materialized. In the first half of 1986, 19.4% of all network tv commercials were 15 seconds in length—up from 10.1% at the end of 1985, according to Television Bureau of Advertising and Broadcast Advertisers Reports. Network and media sources estimate that this percentage has held steady in the second half of 1986. And demand for 15s in this season's upfront market has been soft, say ABC and NBC sources.

"There isn't the volume that we anticipated," says Jon Neavig, NBC vp and general sales manager for the East Coast. "We're probably up to 10% or 11% in prime time, heavier in daytime."

ABC's "very rough estimate," according to a spokesman, is that 15s comprise 15% to 20% of total inventory. CBS declined to give an estimate.

And despite the recent availability of solo 15s, most of the spots still air as "split 30s," back-to-back 15s advertising different products from the same manufacturer. Most 15s are used by regular network advertisers—primarily multibrand package goods and beauty product companies—instead of the smaller, new advertisers observers expected would flock to tv as a result of the medium's increased affordability, according to media sources.

"You can count on one hand the number of 15-second spots that are original, creative [material]," says Roger Rice, president, Television Bureau of Advertising. "All the rest are cutdown 30-second commercials."

The use of 15s remains largely confined to the networks. In 1985, 15s accounted for 1.3% of non-network tv commercials; three months into 1986, the figure rose to 3.2%, according to TvB and BAR statistics.

"Fifteens have not been all that significant in the spot market," says New York-based Katz Television Group president Peter Goulazian. "We've measured them to account for no more than 1% or 2% [of Katz's spot sales]."

At the local level, stations already sell 10-second spots to smaller advertisers at a premium of 60% of a 30, and see little reason to follow the networks in offering 15s at half the price of a 30.

"The rate for our 15-second spot ranges from 60% to 80% of a 30, depending on whether it's a split 30, a stand alone, or has guaranteed placement. At this point, with the small inventory of 15s that we're airing, we probably have taken a fairly hard line in our rate negotiations," says Al Seethaler, general manager, KUTV-TV, Salt Lake City. For the week of Sept. 22 to 28, for example, KUTV aired two 15-second commercials, compared with 1,407 30s and 37 10s.

One reason 15s haven't taken off as expected is that network rates have moderated. "Cpms

Fifteens

(Continued from Page S-13)

[costs-per-thousand] basically were down this year, so we didn't need to cut back on 30s," says David Braun, director-media and program services, General Foods, White Plains, N.Y.

Another reason is that tv stations, advertisers and agencies aren't completely sold on the shorter unit. Says KUTV's Mr. Seethaler, "The reality of the market is that you cannot sit on the sidelines and watch the money go by. It would be nice to be a purist and say we will not accept 15s, but in a competitive market, that's unrealistic."

Non-network tv stations aren't fond of 15s because they add to the clutter already created by 10s, which the stations are more familiar with and have been running steadily since tv's earlier days.

The networks have been reluctant to accept the shorter units because they make clutter harder to control, and virtually double the computer time needed to track commercial placement, media inventory and billings, sources say. Networks managed to resist advertiser pressure to make 15s available in prime time through the early 1980s. Then last year, in an attempt to combat softening rates, CBS began accepting the shorter unit in all dayparts.

"ABC and NBC held out as long as they could," says NBC's Mr. Nesvig, "but then the judgment was made that we couldn't be competitive [unless we did the same.]"

Far from increasing network revenues, many observers say 15s have helped to soften the market. "The 15s certainly have had an effect on pricing," says Gary Carr, director-network operations, SSC&B:Lintas Worldwide, New York. "Network pricing has been kept under control because a lot of brands have been able to run 15s instead of 30s, and keep the same advertising weight at half the price."

Adds Mr. Nesvig, "Other forces have been keeping advertising rates down, but the increased use of 15s has had something to do with the correction in daytime cpms."

According to Mr. Goulazian, not all advertisers are clamoring for the 15-second spot. Many, in fact, remain wary of the unit. "In concept, 15s sounded very attractive to advertisers," he says. "They could get 15s at half the cost of a 30, while commercial testing revealed that a 15 was 70% as effective as a 30. But I think advertisers have become somewhat concerned about making their most important ad medium less effective by increasing the [number of] commercials on television."

Mike Hedge, associate media director, BBDO, New York, says the current research on the effectiveness of the 15-second spot is based on an environment in which 30s are the norm. "When the environment shifts to where 15s are the norm," he says, "I think the research will show the relative value of the 15 is not the same as it is today. The 30 may stand out more, and have greater cost-effectiveness."

Agencies also question the shorter unit's effectiveness for selling new products and introducing new campaigns, Mr. Rice says. "Those using the spot are using it simply as a reminder, for brand recognition. Most agencies responsible for moving merchandise aren't convinced that a 15 can do the job."

Sean Fitzpatrick, vp, director-creative services, Campbell-Ewald, Warren, Mich., says agencies also are resisting because they haven't come to terms with the creative possibilities of the 15-second spot.

On the other hand, numerous marketers, particularly those that use 15s to stimulate brand awareness of established products, appreciate the fact that the shorter spots enable them to hold the line on media costs and increase the frequency of their messages.

Henry Wittemann, vp-advertising services, Alberto Culver Co., Melrose Park, Ill., says 15s have worked very well for the company. "The shares of products at retail prove that the results are very satisfactory. This year, we're using 15s exclusively for all established brands."

Currently, networks are attempting to control commercial clutter by decreeing that only two 15s may run in each commercial pod (break). Viewers are seeing, at most, only one extra commercial per pod, a number

most agencies and advertisers say viewers will tolerate. As the demand for 15s increases, however, networks will come under pressure to permit more than two 15s per pod, and clutter may pose a greater problem.

Even though 15s haven't grown in the tidal wave proportions originally predicted, some agency executives still say they will eventually comprise a large portion of tv inventory.

"They will be insidious," says Stanley Becker, exec vp-creative director, DFS Dorland Worldwide, New York.

"They will slowly crop into our view," he says. "Twenty-five per cent of the work we now do is for 15s. Maybe in three or four years, they will become the rule."

Advertorials make money, stir debate

By Belinda Hulin-Salkin

Somewhere in the twilight world between magazine advertising and editorial content, advertorials have firmly taken root and now flourish.

The genre isn't new; advertorials have been around for more than a decade. And, while there are no industry figures measuring their growth, observers say the use of these ad vehicles has become more widespread and frequent in recent years, as individual magazines fight an industrywide advertising slump.

Indeed, advertorial revenues have been known to increase in some magazines, as run-of-press ad revenues decline. Sources say advertorials can account for as much as 14% of ad revenues.

Advertisers love these themed sections, where their ads nestle next to complementary editorial copy. For them, it's the best of all worlds. Magazine ad directors like them because they bring in extra ad dollars, and often, new advertisers. Readers are drawn in by the editorial content, which directly relates to the product or service being advertised.

In the interest of editorial purity, however, most editors, would rather pretend these hybrids don't exist. That may get harder to do.

Publishers argue about what to call these sections, how to improve them and what their actual impact is on ad revenues, but no one expects them to disappear.

Belinda Hulin-Salkin, a Collingswood, N.J.-based free-lance writer, is a former Advertising Age *stringer and an occasional contributor to Special Report.*

"We do very well with advertorials and I think our advertisers have gotten very good results," says Stephen Nicoll, advertising director, *Forbes*, New York. "Of course, the success of an individual section largely depends on the concept, the subject matter and the quality of the write-up."

***Business Week's* approach to advertorials is to shun the term, but not the concept.**

Forbes is heavily committed to advertorial products, running as many as 400 ad pages yearly in its 24 to 26 special ad sections. In 1986, advertorials contributed an estimated 8% to the magazine's over-all ad revenues.

"The use of advertorials is definitely on the rise. We really use them to draw new advertisers into the book," explains Mr. Nicoll. "It gives them an opportunity to run their message surrounded by relevant text, and it gives us a chance to show off the pulling power of the magazine."

Mr. Nicoll balks at the idea that advertorials—produced and written by agents hired by the ad department—compromise

Economy may stunt tv networks' future growth

By Verne Gay

NEWS ANALYSIS

At a recent New York press briefing, the new acting chief executive officer of CBS made a pronouncement that could become one of the more prophetic statements about the future of network tv rates.

"I think we've come through a decade of above-average growth in advertising expenditures," said Laurence Tisch. "And that decade is over. We are in a new decade, where growth in advertising expenditures will be more in line with the growth in the economy.

"Add to that total framework the competition we have for growth in the media and I think that total media expenditures will track the consumer price index."

While Mr. Tisch was not speaking directly about how much advertisers will pay for network time in the future, his remarks suggest that network tv's ad revenues—and rates—will grow little, if at all, over the next few years.

During the last year, advertiser spending slowed down—ad growth projections for 1986 are an estimated 5% to 6%, down from 7.9% in 1985.

"Even if the second half of 1986 brings the beginning of revenue improvement, the three networks' days of annual double-digit revenue gains may be gone for the foreseeable future," said Alec Gerster, exec vp and director-media, Grey Advertising, New York, in a recent report to clients.

Both 1985 and 1986 were watershed years for the networks. In this period, barter tv syndication secured a stronger presence and took a bigger piece of the broadcast pie. Its ad revenues grew from $430 million in 1984 to an estimated $630 million in 1986.

During this period, the networks also suffered their first year-to-year revenue decline since cigaret ads were banned from the airwaves in 1971. Total network advertiser spending in 1985 was $8.3 billion, according to Broadcast Advertisers Reports, down 3% from the year before.

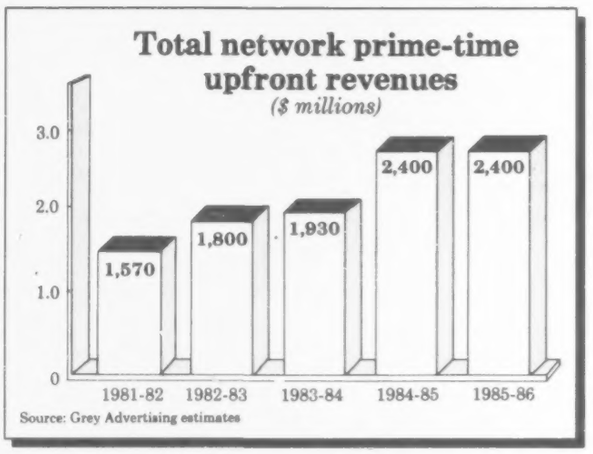
Spending in 1986 is expected to be flat while 1987 will see low, single-digit growth.

And in this season's upfront market, when advertisers purchase network inventory 52 weeks in advance, prices declined on ABC and CBS from the previous year—a first for network tv.

Each of the major networks also underwent top management and ownership changes in 1986. This, however, is not expected to significantly affect the network rate structure. The new managers have concentrated primarily on streamlining and cost cutting, not on new sales strategies.

In October, Rupert Murdoch's News Corp. Ltd. engineered the first global tv sale. The Gillette Co., working through Omnicom Group's BBDO agency, purchased time on Murdoch's European-based Sky Channel, Network Ten in Australia and Fox Broadcasting's "Late Show Starring Joan Rivers." Such a sales tactic could eventually help U.S. marketing efforts for the newly formed fourth network. If advertisers purchase time on the global network, Fox could offer preferential rates on FBC, adding to the competition for tv advertising dollars.

Two other recent developments will have an impact on network rates: The networks' decision to accept "stand-alone" 15-second spots in all dayparts, and the introduction of people meters to measure tv household audience ratings next year.



In the 1986-1987 season, all three networks began accepting stand-alone 15s in prime time. This season's demand for the shorter unit appears to be falling short of the 30% figure network salesmen were anticipating. However, network sources predict the unit will eventually attract advertisers that had been priced out of network prime time during the inflationary years. If this occurs, they hint, demand for the unit will increase—and so will the price. Currently, network 15s go for 50% the cost of a 30-second spot.

An alternate scenario has the supply generated by 15s far exceeding advertiser demand for network spots, and rates, along with earnings, declining.

Next year, Audits of Great Britain, the London-based research company, will begin a U.S. rating service using data from people meters. The meters, which combine the functions of diaries and black boxes in use for the past 25 years, record all information electronically, rather than with the pen and paper method of diaries.

A.C. Nielsen Co. is converting its test of people meters to an operational service in September, 1987. It will decide in December whether to supply advertisers with data taken only from people meters, or to integrate people meter results with conventionally recorded household ratings.

Early test results from both Nielsen and AGB revealed that people meters showed lower audience levels than those reported by the conventional meter/diary system as well as different viewing patterns in certain demographic groups. If Nielsen supplies only people meter data, and if audience levels are lower than previously recorded, advertisers presumably will pay less for network units.

Both developments, however, are taking a back seat to the most elemental trend gripping the networks: The general flattening of spending patterns. The top 30 television advertisers generate exactly one-half of all network revenues. In 1984, these advertisers' network billings represented 70% of their total tv spending, which includes local and national spot spending. By 1985 that level had dropped to 67%. While 1986 figures are not yet available, many experts say these advertisers will continue to shift funds from network tv into syndication or national spot spending.

In 1985, American Telephone & Telegraph, Anheuser-Busch, Coca-Cola Co., Dart & Kraft, General Mills, General Motors, Johnson & Johnson, PepsiCo., Philip Morris Inc., Sara Lee Corp., Sears Roebuck & Co., Sterling Drug, and Warner-Lambert Co. reduced their network tv budgets. Ford Motor and McDonald's Corp. were among the top spenders to substantially boost spending.

Gains in spending by specific category advertisers were offset by declines in other categories. While wine coolers—a relatively small category—foreign autos and cereals increased spending considerably, key categories such as package goods, domestic autos and beers were flat or down.

Late last year, the slowdown in network spending and declining network rates began to have a profound effect on other media

Videocassettes flex their

Coke's doing it in Europe, Cadillac is beginning to use it and home-gym kingpin Soloflex pioneered it. Pushing products via videocassette—by placing ads on home movies or by using the entire cassette as a marketing tool—is on the move.

The Coca-Cola Co. turned a new page in advertising history by affixing soft-drink commercials to the beginning of the European cassette version of "Ghostbusters," produced by Columbia Pictures, a Coke subsidiary. While Coke sources say the company has no immediate plans to tack its commercials on RCA/Columbia's U.S. video releases, there is speculation that this could change by the end of 1987.

Video companies are keeping abreast of the Coke experiment. "MCA video has no immediate plans to put consumer ads on its video releases," says Jane Ayers, media director, MCA Home Video, Universal City, Cal., "but we're definitely aware of the [Coke] situation, and will watch what happens."

Should soft drink or other commercials begin appearing on U.S. video releases, consumers aren't likely to dive for the zapper. In a recent survey of more than 400 vcr owners conducted for Benjamin Co., a video marketing company in Elmsford, N.Y., 63% of the respondents said they would watch commercials at the beginning and end of tapes they purchased; 60% said they would rent tapes with ads on them.

Coke commercials were added to European cassette versions of the movie "Ghostbusters."

Marshall Field & Co. is using the medium for a direct marketing campaign. To announce the October opening of its San Antonio, Tex. store, the company spent $100,000 on 7,500 videocassettes, which were mailed to affluent local residents. The cassettes highlighted the store's merchandise and encouraged credit card aplications.

In a similar marketing move, Cadillac will use videocassettes

As network scatter prices fell, ad dollars that had previously been earmarked for other media shifted to the networks. Even this, however, wasn't enough to turn the networks around in 1985.

On the brighter side, daytime network tv, for two years one of the weakest network dayparts, began to rebound strongly in this year's late third quarter. And late night—particularly on CBS and NBC—was the strongest network daypart this year because of its cost efficiency in reaching adult men.

Also, the networks' scatter market took a healthy turn in September by tightening in five day parts.

Currently, scatter rates are running 5% to 15% over prices paid in upfront, and because upfront pricing varied from +5% to -5% depending on the advertiser, network or daypart, this means over-all pricing will still be flat for the quarter.

The scatter market's upswing reflects the way the networks sold their 1986-1987 upfront inventory.

Except for NBC, which had the strongest pricing in the upfront market, both ABC and CBS oversold their inventory, assuming there would be little advertiser scatter money available in following quarters.

Ironically, the money materialized, pushing network fourth-quarter scatter rates up.

The dynamics of the marketplace led to the fourth quarter's big performance. But several sources say additional money had filtered into the marketplace as well. If this trend continues, scarce network scatter inventory through 1987 could fetch very high prices.

Insert publishers retool as profitability sags

By Paul Edwards

Only a year ago, business was booming in the free-standing insert business.

Couponing was at an all-time high. Some 180 billion coupons were distributed in 1985 and the inserts carried more than 60% of them. And pricing was solid, with most advertisers in the package goods, household products and over-the-counter drug categories paying about $7 per page per thousand distribution.

Of the four insert publishers, three of them—Valassis, Farmington Hills, Mich.; Product Movers, New York, and NCC, Westport, Conn.—were setting records. Only the insert published by John Blair Marketing, New York—bought by Quad Graphics last year—was in trouble because of underlying problems at parent John Blair Corp.

Quad has now reestablished its insert, but MCA's NCC Sunday Inserts has been dropped, a victim of the problem-plagued industry. Over the past year, publishers have committed to more issues, each carrying fewer pages, rather than the added pages they had hoped for. The dramatic increase in production and distribution costs for the additional issues greatly reduced profitability, forcing NCC's sale to Valassis Inserts.

And as a result of a yearlong price war, the average price per page has dropped from last year's $7 to the mid-$5 range, with some pages in so-called national editions going for $4.50.

For major package goods advertisers like General Foods, Procter & Gamble and Colgate-Palmolive, lower prices translate into millions of dollars in savings. But for the producers of fsis, profit margins have eroded severely, though there is hope NCC's departure will help prices come back.

Advertisers don't necessarily agree that prices are too low. At one package goods manufacturer, a promotion director says that with one fewer publisher, fsis will likely carry more pages, making them more cost-efficient. Any cost savings that result should help them lower prices further, she said. But at RJR Nabisco Broadcast, an fsi buyer said he expects that prices may begin a slow climb upward.

"The real key to restoring profitability will be innovative marketing," says Ken Bortner, chairman, Product Movers.

Valassis continues to lead the market, as it has done for years, but its page count per issue has fallen in the past few months. The major reason, according to most observers, is simply the greater number of issues that Valassis is printing this quarter. Late last year, as the Blair insert was being sold to Quad Graphics, Valassis added four new dates to this quarter in an effort to provide an alternative to Blair's customers.

Quad Graphics claims its insert, a year after being purchased, is making money. And it has achieved profitability with an innovation that took all others in the industry by surprise.

This month Quad introduced the industry's first rotogravure edition. Unlike the traditional fsi printed on an offset press, the roto will be limited to advertisers that purchase the full national run of about 48 million circulation. Roto advertisers will not be able to pick and choose individual markets as they can with the web fsis. Nor will they get perforation or sequential numbering of coupons.

But roto advertisers will get the industry's lowest price ever, as little as $4.50 per page for some categories. "Response to the first Quad roto has been so good," says president Paul Moschetti, "that Quad is now planning nine roto dates in its 1987 schedule."

Perhaps the most significant change is being pioneered by Valassis and Product Movers. Both are attempting to go outside the traditional client universe for new advertisers. Valassis has been running ads from Doubleday Book Club. Product Movers has taken an ad from Maytag. Further, with its consumer card, a tipped-on post card, Product Movers is seeking business from financial services companies, like credit card marketers.

Such changes will likely meet with resistance from the newspapers that carry the inserts. But just as likely, if the inserts prove to be an efficient medium for these "new" advertisers, the inserts will prevail. At a price of $6 to $7 per page per thousand for four-color reproduction, they are easily less than half the price of newspaper run-of-press.

Undoubtedly, newspapers will fight back. Some may try turning inserts away at the loading dock if they carry ads they deem competitive. Others may attempt to add surcharges to their insertion fees. But most observers feel that, in the not too distant future, fsis will be carrying more ads and promotions for advertisers outside their traditional marketing area.

marketing muscle

to introduce its Allante, General Motors' first ultra-luxury car. While no release date has been set, Cadillac sources say the video will be mailed to prospective buyers depending on the car they own, club membership and home address. Cadillac will spend an estimated $10 million advertising and promoting Allante in 1987, with a sizable chunk going toward producing and distributing the video.

Soloflex Inc. has been successfully using videocassettes to market its $900 home-gym machine since 1983. The Hillsboro, Ore.-based company sends a 22-minute informational cassette to potential buyers who request it through an advertised toll-free number. The cassette has been generating a 7% purchasing response level, compared to a 3% response from a printed brochure. The video cost $150,000 to produce, with each copy costing $6.50 to process and mail.

"If another product comes along that we feel we can market on video, we won't hesistate to do so." says Karen Schneider, assistant director-media and marketing, Soloflex. "You can't believe how successful that campaign was."

Likely prospects for tacking their ads onto home videos are traditional package goods advertisers whose message can be stated quickly. Companies with new or more elaborate, high-price products, on the other hand, would most likely opt for using the entire cassette as a direct marketing tool.

To be successful in the latter type of video advertising, says Ron Kaatz, media concepts director, J. Walter Thompson USA, Chicago, "the program must be geared toward the affluent consumer. They're the ones who will actually purchase products off of video."

While some are optimistic about videos as a marketing tool, Mr. Kaatz isn't quite sure. "Advertising on videocassette has some potential," he says, "but is the potential worth the extreme costs? You can buy a spread in a magazine and reach an assured circulation of 100,000, while with a videocassette you may only reach 200.

"Marketers must realize that this is not just a highly fashionable medium," he says. "If they don't have a concrete plan, and control over what they're doing, the costs could kill them."

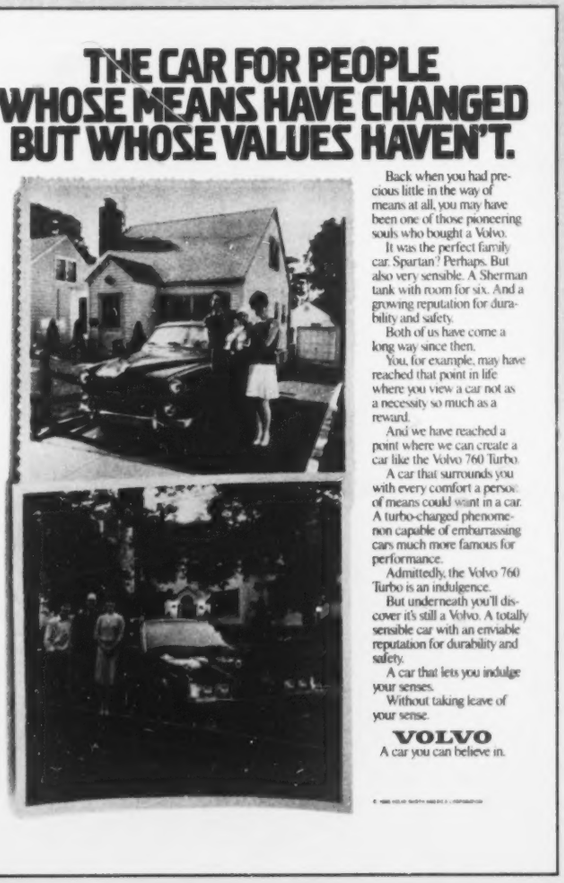
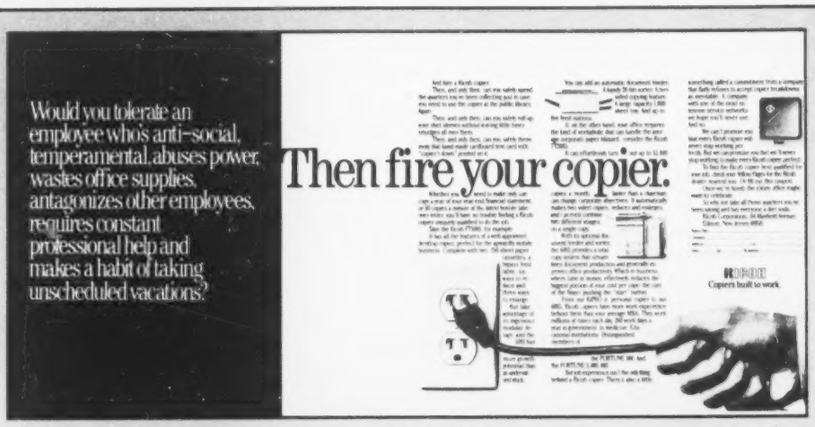
BEST OF PRESS



THE CAR FOR PEOPLE WHOSE MEANS HAVE CHANGED BUT WHOSE VALUES HAVEN'T.
Back when you had precious little in the way of means at all, you may have been one of those pioneering souls who bought a Volvo.
It was the perfect family car. Spartan? Perhaps. But also very sensible. A Sherman tank with room for six. And a growing reputation for durability and safety.
Both of us have come a long way since then.
You, for example, may have reached that point in life where you view a car not as a necessity so much as a reward.
And we have reached a point where we can create a car like the Volvo 760 Turbo.
A car that surrounds you with every comfort a person of means could want in a car. A turbo-charged phenomenon capable of embarrassing cars much more famous for performance.
Admittedly, the Volvo 760 Turbo is an indulgence.
But underneath you'll discover it's still a Volvo. A totally sensible car with an enviable reputation for durability and safety.
A car that lets you indulge your senses.
Without taking leave of your sense.
VOLVO
A car you can believe in.



Would you tolerate an employee who's anti-social, temperamental, abuses power, wastes office supplies, antagonizes other employees, requires constant professional help and makes a habit of taking unscheduled vacations?
Then fire your copier.
RICOH
Copiers built to work.

There's something about the look of this ad—Chiat/Day's creative—that gets us every time. (We've picked similar ads for Apple Computer from C/D.) This ad from the agency's New York office uses a great full-page teaser line, run in reverse type, to urge business people to consider Ricoh copiers in a spread that follows. Creative director: Bill Hamilton; copywriter: Penny Kapousouz; art director: David Nathanson.

Scali, McCabe, Sloves, New York, uses the same tack in both print and tv for Volvo—a duotone alongside color to compare present and past. Both the art and the headline work well in both media. Associate creative director and copywriter: Larry Cadman; associate creative director and art director: Earl Cavanah; photographer: Cailor Resnick Photography.

This ad from Greengage Advertising, New York, for American Re-Insurance Co. also uses an eye-catching and thought-provoking reverse-type headline to draw the reader into a no-nonsense copy block that focuses attention on tort law reform. Creative director: Reggie Troncone; art director and copywriter: Don Miller.

Gardner Advertising, St. Louis, used color very effectively in this ad for Southwestern Bell Media's Yellow Pages in Baltimore. The copy, in slightly larger than agate type, reads, "Thank you to all the businesses in the new Baltimore Metropolitan Yellow Pages. We'd list you individually, but it would take 85 ads this big and print this small..." Creative director and copywriter: Steve Puckett; art director: Marty Chapel.

This Flash Report of newspaper advertiser investments, compiled for Advertising Age by Media Records, is derived from tabulations that cover 29 dailies and 23 Sunday editions in 15 cities: Atlanta, Baltimore, Boston, Cincinnati, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, New York, Philadelphia, San Francisco, Washington and Youngstown.#

Source: Media Records Inc.

Retailers stoke spending

New York—Advertisers increased their spending by 13.8% in August from the same month last year in the major-market newspapers that Media Records measures for Advertising Age's Flash Report.

Spending rose in 10 of 16 categories, with department stores leading all categories with a 16.3% gain to $106.8 million. General-merchandise stores followed with a 24.2% gain to $50.7 million, and amusements spending rose 22.5% to $34.5 million.

The new-passenger-car category continued to show strong gains in August with a 38.7% increase from year-ago levels, to $21.5 million.

Other gainers were publishing and media, up 4.4% to $5.9 million; banks and trust companies, up 1.7% to $4.5 million; stock, bond and investment houses, up 14.8% to $1.4 million, and cameras, photo supplies and services spending, up 6.3% to $374,929.

Declining categories included—besides computer stores and supplies—airlines, off 5.4% to $7.4 million; public service utilities and commissions, down 20.5% to $3.8 million; cigarets, off 40.9% to $3.1 million; alcoholic beverages, down 7.5% to $1.9 million, and computers, equipment and services, down 83.1% to $506,492.

The Flash Report is based on SAU inch measuremer ts in 29 daily and 23 Sunday newspapers in 15 major markets.#

Supermarket advertising is generally a graphics nightmare—an explosion of type styles and faces accompanied by dollar signs. That's why this campaign, via R.L. Meyer Advertising, Milwaukee, for Dominick's Finer Foods in the Chicago area, caught our attention. It uses appealing type styles and bold illustrations to draw readers into the copy. In this ad, note that meat cleavers are used as copy breaks. Creative director: Tom Ungar; art director: Rachel Stephens; copywriters: Tom Ungar, Effie Meyer; illustrator: Matt Zambo.

Best of Press selections are made by a committee of three: Hank Simons, vp-creative director of the Newspaper Advertising Bureau; James Dunaway, vp-information at the bureau, and William F. Gloede, Advertising Age's newspaper industry reporter. National System Inc., St. Louis, provides tear sheets to the Newspaper Advertising Bureau for much of this work.

Offnet bid by NFL backers

Advertisers eye joint grid deal

By ROBERT RAISSMAN and CRAIG REISS

NEW YORK—Representatives of at least 12 major advertisers are considering the formation of a consortium that would offer $750 million to the National Football League for a five-year, prime time, offnetwork tv deal.

The group met Oct. 30 at the New York office of Grey Advertising's LBS Communications, the nation's largest barter syndicator. Among those present were Michael Browner, director of media operations for General Motors; Jerry Solomon, vp-general manager, Anheuser-Busch's Busch Media Services; William Croasdale, senior vp-network, Backer & Spielvogel, representing Miller Brewing; David Martin, exec vp, Stroh Brewery's Stroh Media Services; Mark Reiss, director of corporate media, Coors; Alan Gibbs, director of media buying, Gillette; John Drollinger, manager-corporate media, Coca-Cola; Arnie Semsky,

Last Minute News

Bates may be out as Commodore's agency

WEST CHESTER, PA.—Commodore this week is expected to fire Ted Bates Advertising/New York and hire a Philadelphia-based agency. Likely winner is Lewis, Gilman & Kynett, which lost the Sperry account after the client's merger with Burroughs. The Commodore account is estimated to be in the $10 million range.

Rapp & Collins lays off 15 in New York

NEW YORK—Rapp & Collins, one of Omnicom's eight direct-marketing agencies, last week let go 15 employes at its office here and resigned its Consumer's Union account. The New York office is now down to 60 employes; the agency has 68 more in Dallas and California.

New AmEx unit selects Wunderman

NEW YORK—American Express' new Direct Marketing USA division has selected Wunderman, Ricotta & Kline to develop and market new services to card members. WRK, lead direct-marketing agency of Young & Rubicam, also will help AmEx develop direct-marketing programs and

Ayer reported bidding for Cunningham & Walsh

By STEWART ALTER

NEW YORK—N W Ayer was reported to be holding conversations last week with Mickelberry Corp. about acquiring Cunningham & Walsh.

There was no official confirmation of these reports. However, several sources have confirmed, among other developments, that Mickelberry put out feelers to other agencies about possibly selling C&W.

Supporting the reports is the logic of an Ayer-C&W deal. C&W's package-goods-heavy client list offers almost no conflicts with the Ayer account list and Ayer's growing overseas network could prove a good match for those clients.

Privately held Ayer, which reported 1985 billings of $826 million, is strongest in corporate and image advertising for such clients as AT&T, the U.S. Army, Avon, Continental Airlines, DeBeers and General Motors. C&W, which reported 1985 billings for its group of companies at $340 million, has as its major clients Procter & Gamble, American Home Products and Sterling Drug.

Reports of the current negotiations were greeted officially with denials or silence. Louis Hagopian, chairman-ceo of Ayer, normally accessible to the press, did not return phone calls to his office over a period of several days. Other agency officials said they had no knowledge of such negotiations.

Phone calls to C&W chairman-ceo Anthony Chevins were routed

Hot cold remedy—P. 3

Highlights

Advertisers eye NFL bid 1
Representatives of at least 12 major sports advertisers have met to consider forming a consortium to make a five-year, $750 million bid for the tv rights to the National Football League's prime time games. NFC tv contracts expire after this season.

Dimetapp's competitors sniffling 3
A.H. Robins Co.'s Dimetapp is racing for the No. 1 spot in the $1 billion cold/allergy category this winter, after taking share from every major brand and passing all but three other cold remedies in market share this year.

Christmas promotion perils 4
Retailers, trying to wean themselves from pre-Christmas sales to hype shopping, this year are pushing promotional incentives to entice early holiday business. The new cure, however, may be as bad as the disease itself.

Agencies train for future 24
Despite the wave of ad agency staff cutbacks and the fact that this might dissuade young people from agency careers, industry recruitment and training programs are not a thing of the past.

A resounding vote for car stereos 32
General Motors Corp. and Ford Motor Co. are cranking up the volume of advertising for car stereo systems. High-margin sound systems help manufacturers and dealers recapture some of the profits forfeited to consumer incentives and competitive base prices.

IBM-compatible publishing tops show 33
Desktop publishing, dominated so far by Apple Computer, is opening up to 8 million owners of IBM PCs and compatible systems. More than a dozen marketers, led by Xerox Corp. and Hewlett-Packard, kicked off a stampede of IBM-compatible products at the Comdex trade show.

Miller pushes light limits 78
Miller Brewing Co., defending its vital Lite beer brand, has split with other major brewers in a battle to shape federal rules for the marketing of low-calorie beers.

CATEGORY REVIEW

Wineries uncork ad options 12
The dark clouds over the California wine industry may be lifting, but ad agency executives have little reason to raise their glasses in celebration.

FEATURES

Burkoff's fables 36
"Around our club, the members call John, Jim, Hank and I the Other Four A's, the Advertising Agency of Antiquated Arizonians. We're all over 70, retired, live in Sunshine City, Ariz., and belong to the Mesa & Gorse Country Club, where we reminisce and play golf together at least three times a week."

INTERNATIONAL

Labatt targets U.S. and Europe 50
Labatt Brewing Co., Canada's leading beer marketer, will concentrate on the U.S. and Europe next year in its worldwide effort to increase sales. As its first step, the brewer has named John Morgan, now general manager of Labatt's Ontario region, president of Labatt Breweries of Europe, effective Dec. 15.

OTHER NEWS

Merchants predict this will be the year of the expensive gift, with strong sales anticipated for high-tech goodies such as 8mm camcorders and stereo tvs. Page 48.

Upjohn Co. has brought in an experienced hand with over-the-counter drug marketing to lead a new push into that competitive, $7.5 billion industry. Page 75.

The November sweeps are still in progress, but the Big 3 tv networks have begun planning their next competitive period. February will be a much more "competitive sweeps," predicts Paul Schulman, president of Paul Schulman Co., the network tv buying subsidiary of Advanswers Media Programming. Page 77.

General Foods, concerned that the top MBAs are eschewing marketing for other higher paid business careers, has tackled the problem by marketing marketing. Page 76.

Anheuser-Busch's decision to launch a complete and well funded campaign for Michelob Classic Dark indicates just how competitive the slumping beer market has become. Page 78.

Miller Brewing Co. will collect $1.95 million in cash as part of a $2 million out-of-court settlement against Robert Landau, former chairman of Robert Landau Associates, sports marketing/-sales-promotion agency. Page 79.

SPECIAL REPORT

Worldwide expenditures for marketing, advertising and public opinion research currently are $3.9 billion a year. About 46% of that is U.S. expenditures. The 15 largest research organizations in the world account for about 45% of the global market, and that figure is expected to increase to about 50% by 1990 because of aggressive growth in recent years.

Time Inc. shows ardor for women

By STUART J. ELLIOTT

NEW YORK—Time Inc. finally has a stake in the women's magazine market—and then some.

The communications giant is now a force to reckon with in that lucrative field after the surprising disclosure Nov. 20 of a joint venture with entreprenuer Dale Lang to operate *Working Woman* and most of McCall Publishing Co.

"If you can't beat 'em, buy 'em" was one Time Inc. staffer's reaction to the news the company would join Mr. Lang, owner of *Working Woman* since 1978, in creating an as-yet-unnamed women's magazine publishing company generating $125 million in revenues in its first year.

The new company will be responsible for Mr. Lang's *Working Woman* and McCall Publishing's *Baby!*, *McCall's*, *Working Mother*, *Working Mother Digest* and *McCall's* special-interest titles.

Time Inc. is getting "into a sector of the business we've really wanted to get into for some time," said vp-group publisher Robert Miller, who will represent Time Inc. on the new company's board. In 1977, Time Inc. tested a title

NEWS ANALYSIS

called *Woman*, and its more recent magazine development efforts included two weeklies aimed at female readers, *Flash* and *Picture Week*.

Earlier this fall, sources said, Time Inc.'s top magazine executives had struck an agreement with Chicago's Pritzker family, owners of McCall, to buy that company outright, but it was turned down by Time Inc.'s new president-chief operating officer, N.J. (Nick) Nicholas Jr.

The rejection of that deal,

Time pulls out of videotex try

By BRIAN MORAN

NEW YORK—Time Inc. has pulled out of Covidea, its year-old videotex venture with AT&T and Chemical Bank, accelerating a sweeping changing of the guard in videotex technology.

Time's withdrawal from the estimated $150 million-plus venture comes a week after CBS Inc. bowed out of Trintex, its videotex experiment with IBM and Sears, Roebuck & Co. (AA, Nov. 17).

In addition, the New York Times Co., the supplier of information from its newspapers and other publications to Covidea, confirmed last week that it is considering ending its participation.

Time says it now will participate in the technology solely as a supplier of editorial content. The company's Money will continue to provide weekly excerpts to Covidea.

The media companies that pioneered the industry as a hedge against competition are now rejecting it, turning over the reins to industrial and high-tech giants with more financial resources.

AT&T and Chemical Bank, each owning about 45% of Covidea, said they will continue the venture. San Francisco-based Bank of America has sought regulatory approval for more than a year to become another partner in Covidea. Ogilvy & Mather here handles the service, so far limited to businesses and homes in the New York area.

Time has never disclosed its investment in the venture, begun in mid-1985, but sources estimate it at between $10 million and $15

West Coast News

Grayson becomes 'California' publisher

LOS ANGELES—*California* named marketing director Perry Grayson to replace Richard Trent as publisher. Mr. Trent is raising capital to bid on four Harte-Hanks Communications' San Diego-area newspapers.

LAGUNA HILLS, CAL.—**Soladyne Pacific Corp.** hired Johnston Thoen & Lindh, Los Angeles, to replace Bernard W. Feldman Creative Services as agency for Handy Tan, suntan lotion in a bracelet (AA, Aug. 4). The company plans to take Handy Tan national in 1987, backed by a $2 million ad effort.

SAN FRANCISCO—**Fairmont Hotels** named Gardner Communications to handle its $1.5 million-to-$2 million account previously with Allen & Dorward. Cole & Weber and FCB/Direct also competed. Gardner resigned the Claremont Hotel account, estimated at about $300,000, and the account for the San Francisco Marriott Hotel, under construction.

EVERETT, WASH.—**Jantzen** subsidiary Jansport, an outdoor equipment marketer, awarded its estimated $1 million account to Elgin Syferd, Seattle. Former agency is Janklow Bender, New York.#

ADWATCH

Burger battles take smack at Mac

But its ad awareness is still No. 1

By JULIE FRANZ

The battle of the big burgers already is causing some fallout in advertising awareness for the top three burger marketers.

Heavy advertising for Burger King Corp.'s Whopper, Wendy's International's Big Classic and McDonald's Corp.'s McD.L.T. cooked up some significant changes in fast-food advertising awareness in Advertising Age's adWatch survey for October.

Both Miami-based BK and Wendy's, Dublin, O., increased their shares of first mentions when consumers were asked to name the fast-food advertising that first came to mind from all seen, heard or read in the past 30 days.

Oak Brook, Ill.-based McDonald's, the heaviest ad spender of the three, continues to hold first place in this recall category, but it lost ad recall share.

AdWatch is a joint project of Advertising Age and SRI Research Center, Lincoln, Neb.

Consumers are queried on the first ad they remember over-all as well as in a variety of product areas. During October, 1,000 consumers were polled by telephone.

Ironically, the largest gain was logged by Wendy's, whose advertising consumer awareness increased 3.5 percentage points to 9.4% of first mentions.

That gain was made on the strength of advertising for its new Big Classic burger (AA, Sept. 22), which will be the last major Wendy's campaign from DFS Dorland Worldwide, New York. DFS was pink-slipped five weeks after the campaign began (AA, Nov. 3).

Like its rivals' big burgers, Wendy's Big Classic is loaded with condiments.

Its point of difference is that Big Classic is served on a corn-dusted kaiser roll. The ads tout Big Classic's freshness, saying, "This is the good stuff."

Top-of-mind awareness of Burger King's advertising gained 5.1 percentage points, giving it 17.4% of first mentions in October. BK continued its "Burger King town" effort but also ran more hard-hitting commercials comparing the Whopper with McDonald's McD.L.T.

Network tv spots harken back to BK's 1982 "broiling versus frying" campaign and compare the chain's made-to-order style with what BK characterizes as McDonald's assembly-line production.

J. Walter Thompson USA, New York, handles BK.

McDonald's advertising has cast its "have it our way" preparation system in a positive light. "Wheel of Fortune" hostess/goddess Vanna White and others humorously "chastise" McDonald's for not saying how many condiments are piled on its McD.L.T. (whether you want them or not, of course).

Ms. White reads a letter to McDonald's, complaining that because McD.L.T. is loaded with more yummy ingredients than just lettuce and tomato, it should be called "The one with the works."

Leo Burnett USA, Chicago, handles McDonald's.

That campaign broke during the week of Oct. 13 and covered only the final seven days of the October adWatch polling period. It will have a chance to produce more solid results in November.

In October, recall of McDonald's advertising fell 4.7 percentage points to 41.2% of first mentions, still good enough for first place in the category by a wide margin.

Changes in advertising awareness that are deemed statistically significant by adWatch researchers are those attributed to more than sample variation.

Ibuprofen this year has become a hot commodity in the pain-reliever segment as new products begin flooding the market, sparking heightened consumer awareness of product advertising. Awareness of advertising for Whitehall Laboratories' Advil gained 3.5 points in the **medicine and drug** category, boosting its share of first mentions to 9%. Young & Rubicam, New York, handles Advil.

That gain placed Advil in second place in October, up from third the month earlier. Ads for Johnson & Johnson's Tylenol remained in first place with 24.8% of first mentions, while Sterling Drug's Bayer fell to third with a 4.9% share.

Whitehall's Anacin was fourth with 3% of first mentions.

Joining the list of top five ad recall winners in medicine and drugs was Bristol-Myers Co.'s Nuprin with 1.3% of first mentions, that brand's first appearance among the top five. Grey Advertising, New York, handles Nuprin, which goes after Tylenol in its tv spots.

October's 10 best-recalled advertisers, named without requesting a specific product category, in descending order: Coca-Cola, Anheuser-Busch's Budweiser/Bud Light, McDonald's, Pepsi-Cola, Miller/Miller Lite, California raisins, Ford, Chrysler, E. & J. Gallo Winery's Bartles & Jaymes and General Motors' Chevrolet.

Making a surprise appearance among the top 10 is advertising for California raisins, sponsored by the California Raisin Advisory Board. The board's spots, created by Foote, Cone & Belding, San Francisco, have captured the attention of the advertising industry and consumers alike by featuring animated clay raisins dancing to Marvin Gaye's hit "I Heard it Through the Grapevine."

The seemingly endless line of finger-snapping raisins (decked out in sunglasses and white gloves) was created by Portland, Ore.-based Will Vinton Productions (AA, Oct. 20).

Among other significant changes in the October adWatch data:

- In the **camera** category, awareness of advertising by Eastman Kodak Co. fell 4.9 points, dropping its share of first mentions to 19.4%, Kodak's lowest ad share since March. August, September and Oc-

Cooper named new editor of 'Creativity'

New York—Ann Cooper is assuming the additional post of editor, *New York Creativity*, Crain Communications' monthly publication covering the creative community.

A. Cooper

As editor, Ms. Cooper will direct coverage of the production, film, illustration, photography and packaging industries. She continues to serve as AA's senior editor-creative, writing in-depth profiles on top creatives in the advertising world.

New York Creativity, a pullout section for Advertising Age subscribers in the New York area, made its debut Sept. 8. It appears the first Monday of each month with features and news about agency creatives, producers, commercial production house directors and editors, animators, creators of special effects, commercial music composers, musicians and producers, photographers and other persons engaged in printing and graphics design.

Ms. Cooper joined AA in November, 1984, as a writer, and was promoted to senior editor-creative in February, 1986. Previously a London-based free-lance journalist, she served earlier as an editor with *Marketing* and *Campaign*. She has a bachelor's degree from Napier College, Edinburgh, Scotland.#

CORRECTIONS & CLARIFICATIONS

- Ad linage totals for *New Woman* were 80.6 pages for November, 1986; 70.8 pages for November, 1985; 811.0 pages for the cumulative 1986 total, and 608.2 pages for 1985. These figures were inadvertently left out of the November Consumer Linage Report (AA, Nov. 17, P. 102).
- *Sportswear International*, the U.S. trade publication that covers men's, women's and children's sportswear, is owned by VSI International, New York, not Jean Frey AG of Switzerland (AA, Nov. 10, P. S-24). The Frey organization owns Sportswear International publishing rights for Europe only.#

Agency training survives the cut

By STEWART ALTER

NEW YORK—Despite the wave of ad agency staff cutbacks and the fact that this might dissuade young people from agency careers, industry recruitment and training programs are not a thing of the past.

J. Walter Thompson USA here, which recently cut deep into its personnel rolls (AA, Nov. 10), says it will continue its agency training program, one of the more extensive in the business.

However, the agency did cut four or five people from this year's program, though with 35 it still has "more people than ever before," said Steve Dworin, senior vp-management director and head of the professional development program in JWT's New York office.

New programs also are emerging from smaller agencies that have not formally trained in the past. TBWA Advertising this past summer launched its "TBWA Junior" program.

Programs also are continuing among other agencies that have cut staff because of sluggish ad spending. SSC&B added eight international recruits this past summer to a training program that started with eight U.S. trainees in 1985. The agency has no plans to cut back on the program, a spokeswoman said.

Ogilvy & Mather, another shop cutting back staff this year, has "increased our training budget for next year," said Graham Phillips, chairman of O&M-U.S.

"I get the impression that the cutbacks are not affecting entry-level positions," said Bob David, who recently launched the Institute for Advertising Management, a training program here for account managers new to the advertising business.

This is not to say that everyone is painting a rosy picture. "I think there's a lack of enthusiasm for training programs and for young people coming up," said Gloria Viseltear, president of Huss Viseltear, a New York executive recruiting company. She believes talk about training programs, and programs themselves, have slowed down.

In some cases, the total numbers in a training program don't tell the whole story. DFS Dorland Worldwide, one of the agencies that laid off employes earlier this year, still has 40 people in its management training program. But there are fewer newcomers and more on-staff employes in the program.

"We're not hiring at the same level," a DFS spokeswoman said.

On the creative side, the shop previously hired eight to 14 entry-

Mergers, layoffs spur mixed agency quarter

By STEWART ALTER

The third quarter, normally unimpressive for advertising agencies in non-Olympics years, is the focus of unusual interest this year because of the number of mergers and personnel layoffs that have taken place.

Omnicom Group took a $34.3 million tax writeoff to account for nonrecurring losses arising from the three-way merger that created it in August. BBDO International, Doyle Dane Bernbach Group and Needham Harper Worldwide combined to form Omnicom.

Flattened ad spending took a heavy toll on JWT Group's net income because the agency continued to invest in additional staff and salaries throughout the quarter. But the agency finally responded to the profit squeeze two weeks ago, as had Ogilvy Group, with major layoffs.

Interpublic Group of Cos., which steered a conservative course, avoiding acquisitions and keeping expenses in line, came across shiningly in these difficult advertising times. Net income rose 18.4% to $4.0 million in the quarter; 18% to $26.4 million for the nine months.

"Our operating costs were in line" and "we're a very balanced operation around the world," said Eugene Beard, exec vp-chief financial officer of Interpublic. That balance came into play in October, for example, when sluggish package-goods spending in the U.S. was offset by General Motors' heavy backing of its 2.9% GMAC financing program, explained Mr. Beard.

"One big area that is overlooked is in the acquisitions we do," said Mr. Beard. "We do our acquisitions in-house, and we are very conscious of the price we pay and do not chase price on acquisitions."

Omnicom, which did not pay any price for any acquisitions, nonetheless paid a dear one in the form of its $25.5 million writeoff to account for consolidating and restructuring operations. The agency wrote off another $8.9 million for professional services and discontinuation of incentive-award plans.

Rather than disturbing Wall Street, the huge writeoffs are getting high marks. Charles Crain of Prudential-Bache Securities said that while it was "more than I expected," he was "not at all" disturbed by it. "The more the merrier as far as I'm concerned," he said, explaining that if they write everything off now, it makes for less chance of any surprising declines in earnings down the road. Besides, Omnicom's promised 98% annual dividend was unaffected and the writeoff "was not all cash expense." It "was not as if they had gone out and drained their cash reserves," he said.

Robert Pfundstein, chief financial officer of Omnicom, explained that most of the writeoff involved real estate leases for space no longer needed following the consolidation.

For example, Omnicom now takes up only one floor in Needham's former New York headquarters building; Needham had had five. That's an extra rent "in excess of $3 million annually," said Mr. Pfundstein, noting that it would take at least six months to sublet. Consolidating computer operations was another expense; foregoing a lease on an IBM computer is costing between $500,000 and $700,000. Other costs associated with the merger included printing new stationery around the world for the merged DDB Needham Worldwide—$600,000. The investment banker's fee came to $2.5 million for putting the deal together.

Foote, Cone & Belding Communications showed an impressive 23.4% gain in net income, though in part that reflects the acquisition of Leber Katz Partners in New York and the restatement of 1985 earnings. That absorption of LKP, whose strongest earnings period is in the fourth quarter, involved a restatement that reduced nine-month net income for 1985. Also, said chairman-ceo Norman Brown, "Third-quarter revenues [generally] reflect some shifting of expenditures by clients from the fourth quarter, rather than an over-all increase for the year."

However, there were real improvements, too. "Net new-business performance" was up to $110 million for the first nine months, compared with $45 million in the same period of 1985.

At JWT Group, chairman-ceo Don Johnston observed that "operating income from Thompson Company declined because commissions and fees in most regions around the world were below what we had planned, as our advertising clients spent less than they budgeted." Mr. Johnston noted, "to date there is no indication that the rate of advertising spending will improve in the fourth quarter."

JWT's results were helped by a $2.6 million pretax gain resulting from the "curtailment of a domestic pension plan," said Mr. Johnston. But results were hurt by a higher tax rate and lower earnings at both Thompson and Hill & Knowlton, its pr subsidiary.

Ogilvy, whose chairman-ceo William Phillips said "the advertising environment remains difficult in most parts of the world," also benefited in the third quarter from such nonoperating factors as "higher interest and investment income, including the initial interest payment by Continental Airlines in settlement of their Chapter 11 debt." Continental had owed Ogilvy subsidiary Scali, McCabe, Sloves money from when it was the airline's agency.

Mickelberry Corp., which was doing poorly even when the other agencies were doing well in recent years, did even worse, losing $765,000 in the third quarter compared with a $59,000 loss in the third quarter of 1985.

"Along with many marketing-services companies, our operating results this year have been disappointing," said James Marlas, chairman-ceo. "Deflated media rates, a sluggish economy and aggressive pricing by competitors have taken their toll. No major clients have been lost and some significant new ones have been added, but over-all client spending has been well below our expectations," he said.

Lorimar-Telepictures' advertising segment (not in the chart), showed operating income of $1.0 million in the third quarter, compared with a loss of $1.8 million a year earlier, reflecting "the successful January, 1986, merger of Bozell, Jacobs, Kenyon & Eckhardt," said the company.#

Agency financial results

The third quarter produced a varied picture. Some agencies, like The Interpublic Group and Foote, Cone & Belding, produced impressive third quarter net income gains, while others, like JWT Group and Mickelberry Corp., showed big declines. NM means not meaningful. Source: *Advertising Age*.

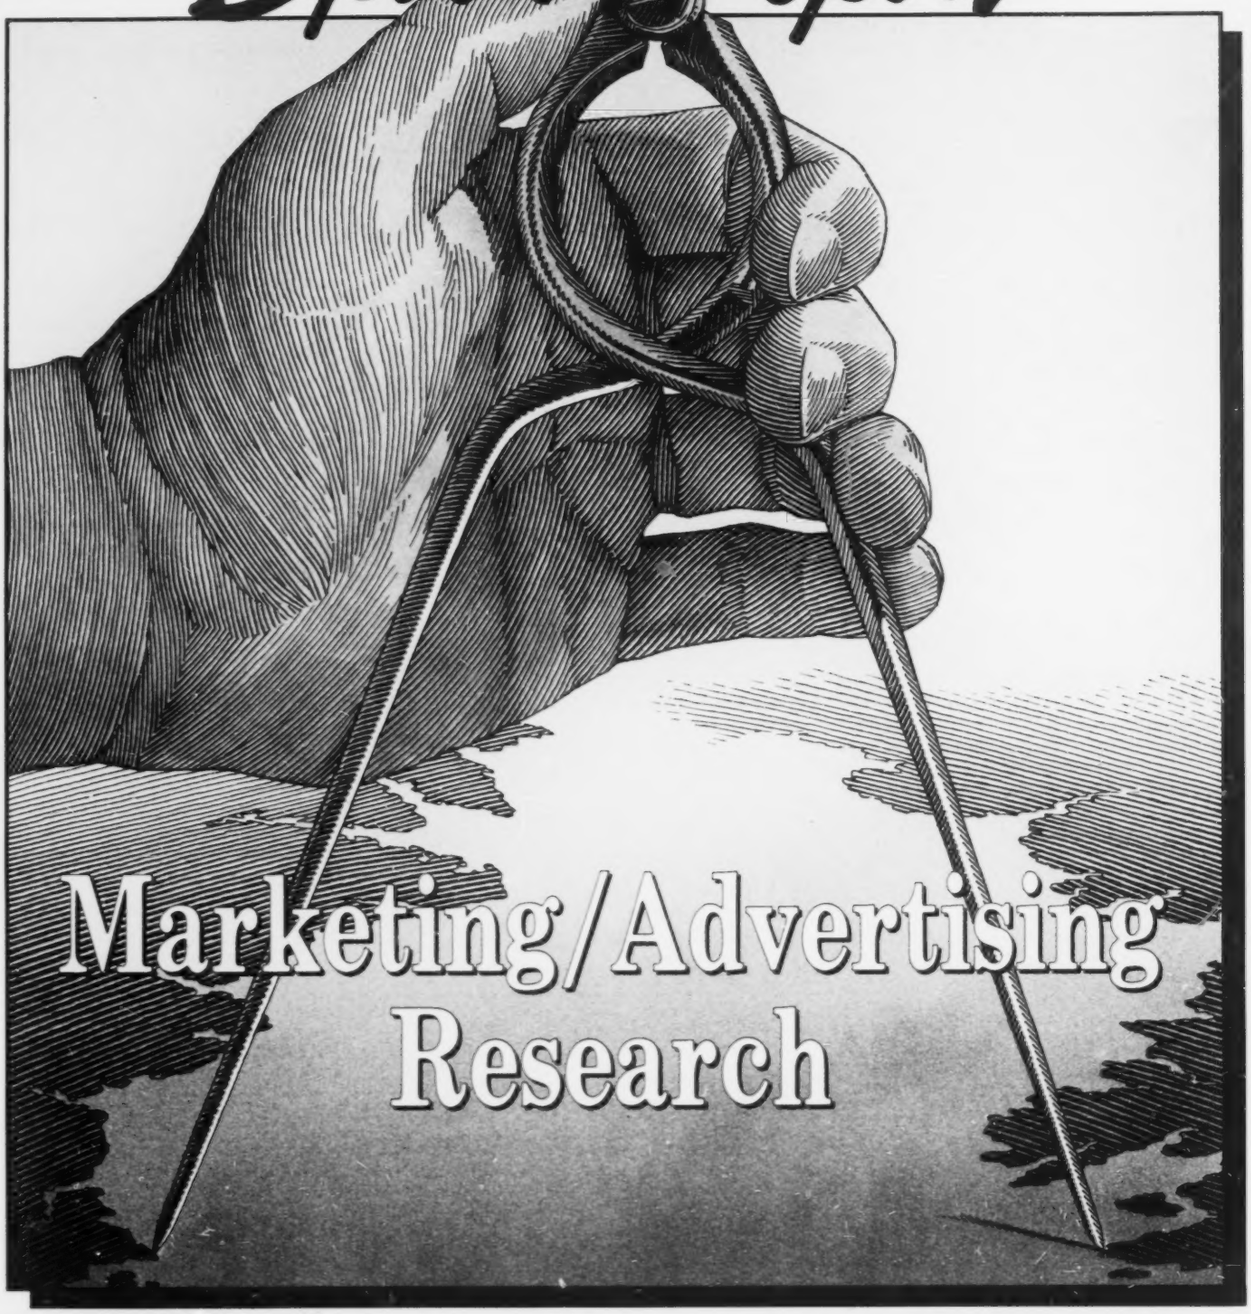
Special Report



Marketing/Advertising Research

Ranking top players in growing global arena

By Jack J. Honomichl

Worldwide expenditures for marketing, advertising and public opinion research currently are $3.9 billion a year. About 46% of that is U.S. expenditures.

The 15 largest research organizations in the world account for about 45% of the global market, and that figure is expected to increase to about 50% by 1990 because of aggressive growth and acquisition policies some have followed in recent years. These are the main findings of this first-ever world ranking, prepared exclusively for ADVERTISING AGE.

Because all revenue figures have been converted to U.S. dollars at the rates prevailing in the third quarter of 1986, some countries—and companies—show more strength than they would have two years ago when the dollar was relatively strong. *(Other cautions related to estimating world volumes are outlined in an accompanying article on Page S-2.)*

Jack J. Honomichl covers research for ADVERTISING AGE, including a monthly column.

Relative cost of a usage and attitude study with same specifications—by country

Based on 1986 Swiss Francs

Index avg. base =100

Switzerland	155	Netherlands	81
France	149	U.K.	80
Italy	136	Finland	77
Sweden	123	Norway	76
Denmark	120	Spain	75
West Germany	113	Belgium	59
Austria	108	Greece	50

Source: Jan C.J. Oostveen, research director, Centrum, Amsterdam, The Netherlands. Article published in *European Research.*

The country-by-country estimates *(see chart on Page S-2)* in most cases are based on data from two or more sources and reflect the situation as of mid-1986. Almost all the figures show significant increases over 1985 levels. It cannot be determined how much of that is because of inflation, which runs high in some countries, shifts in the relative value of the U.S. dollar and local currencies, or "real growth" because of increased use of research. However, it seems that the world research market is growing. The exact growth rate cannot be determined.

Also, there is no correlation between research expenditures and the amount of research being conducted. A recent issue of *European Research* shows that a specific research project could cost as much as three times more to execute in one country than in another. An illustration, based on a usage and attitude study, shows on the table at left.

(Continued on Page S-2)

Markets

(Continued from Page S-1)

For instance, Switzerland has a cost index of 155, contrasted to 50 for Greece. This is caused primarily by a labor cost differential and the relative strength of local currencies to a common standard (Swiss francs in this case). The formula continuously changes, and it varies from one type of research project to another—including pending acquisitions and known volume levels—about 45% of the world market. But the main point is that dollar expenditures alone can be quite misleading, and this would be even more apparent if we had comparable data for countries in Asia (except for Japan, Hong Kong or Singapore, where a given project would cost about the same as in the U.S.).

The Nielsen marketing/advertising research units, with $517 million from 27 countries in 1985, continue to be the world's largest; still, ACN has just about 13% of the world market. Since the ACN merger into parent Dun & Bradstreet, more exacting and current information on the ACN operation is not in the public domain, but ACN undoubtedly is benefiting from current currency relationships because about 52% if its business is outside the U.S.

The impact of this is shown in the IMS International data, which are running about 34% ahead of '85 levels, mostly because of shifting currency relationships.

In total, these Top 15 have estimated revenues of $1.72 billion currently (pending acquisitions are included, as are current volume levels, as known). Because many of the top 15 have aggressively expanded into new countries, acquired subsidiaries and launched new services, these top 15 will control close to an estimated 50% of the world market by 1990.

Today, the top 15 are being managed, for the most part, from just three locations—London, New York and Chicago. Only two are truly still in private ownership—Infratest and the NPD Group.

The balance are either public companies or owned by public companies, including three worldwide advertising agencies: JWT Group, Dentsu, and Ogilvy Group. Details on these companies, how they got started, the key people involved and a description of their activities fol-

(Continued on Page S-4)

Research figures are dollar-estimates

The U.S. dollar size-estimates, for both individual countries and large worldwide research organizations, should be considered workable estimates, not precise figures. The reasons:

1. We are dealing with the ever-shifting relationships of numerous foreign currencies vis-a-vis U.S. dollars. As much as possible, those exchange rates prevailing in the third quarter of 1986 were used, but some of the estimates, based on 1985 data, may well be based on significantly different rates.

2. The quality—and completeness—of country-by-country market-size estimates varies considerably. In some countries—especially the U.K., Japan, Switzerland and Germany—the dollar volume of major research firms located there are in the public domain, but the "all other" volume accounted for by smaller firms, nonprofit research agencies etc., was estimated. In some countries, the figures are based on estimates from local industry leaders.

3. There is risk of overcounting. Because the estimates for most major countries come from totaling the volume of major firms based in that country, it is not always possible to eliminate the portion of that work done in other countries.

For instance, if a U.S. company does a survey in Canada and subcontracts the field work to a Canadian-based firm, the field work portion could be counted in both the U.S. and Canada. This is a particular problem in Europe, where almost all research agencies work outside their home country, either through affiliates or subcontracting.

It is estimated that this could lead to overstatement of as much as 8% in some countries, and 3% or 4% on average. (Data from the U.K. is particularly "clean" in this respect.) Revenues reported by AMSO, the Assn. of Market Survey Organizations, a British professional group, exclude nonresearch volume, intercompany transfers and overseas subsidiaries.

4. In the case of the top 15 worldwide research organizations, the latest (i.e. 1986) volume estimates have been used, including those of pending acquisitions *(see company-by-company profiles for details)*. In many cases, this results in much higher estimates than reported for these companies for 1985.

Much of this difference results simply from a shift in the relationship between the U.S. dollar and the company's home currency. Some of it may be due to acquisitions, finalized or pending. And, of course, some may be attributed to natural growth.

However, the financial estimates in this article are considered current and accurate enough for relative rankings.

One last caution—because the research dollar volume of one country is twice that of another, do not assume that twice as much research is being done.

In fact, the cost of doing exactly the same project in one country can be as much as 2.5 or 3 times as much as in another, often because of differing labor costs. —*Jack Honomichl*

low in the company profiles.

1 A.C. Nielsen Co. Northbrook, Ill., wholly owned subsidiary of Dun & Bradstreet Corp.

In 1923, a 26-year old graduate of the University of Wisconsin, fueled by $45,000 in capital provided by fraternity buddies, rented a small office in the Harris Trust & Savings Bank building in Chicago to start a research company, the fourth such endeavor in the U.S. Sixty-one years later this company had grown to be, by far, the largest marketing/advertising research organization in the world—and Dun & Bradstreet paid $1.3 billion to buy it.

The young man, of course, was the late Arthur C. Nielsen Sr., who probably did more than anyone else to shape and develop the worldwide marketing research industry.

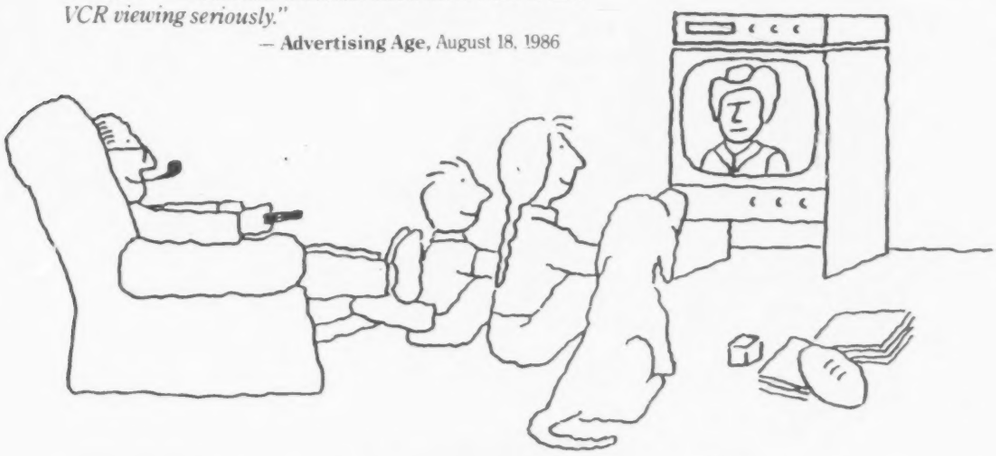
For the first 10 years, and into the Depression, the Nielsen Co. did survey work, mostly for industrial marketers, and it was tough going. Then in 1933, ACN launched a syndicated service, The Nielsen Drug Index, which was based on a projectable sample of drugstores to measure product movement and market size.

Henry Burk
A.C. Nielsen

In the process, Mr. Nielsen established the concept of "share of market," which turned marketing into an ego-driven horse race—and ACN had *the* scorecard. More marketing decisions, expenditures and careers have been affected by that simple share-of-market statistic than any other. Seven months after NDI, ACN started its grocery-

(Continued on Page S-6)

"Total U.S. penetration of VCRs, at the time of the survey, was 34% — a level that indicates advertisers need to take VCR viewing seriously."
— **Advertising Age**, August 18, 1986



Finally. The facts on VCR users.

Do you know who's fueling the VCR boom? National Demographics & Lifestyles has just published its comprehensive study entitled **The VCR User Report.** It contains the first hard data on who's using VCRs, where they live, what they do, and where the market is growing fastest.

Based on NDL's 25-million-name consumer database, The Lifestyle Census,™ **The VCR User Report** provides detailed answers, market-by-market, segment-by-segment, on this complex and rapidly growing industry.

Whether you are planning media, creating promotions, targeting copy, locating retail sites, or developing new products, **The VCR User Report** gives you the information you need to make critical marketing decisions.

To learn more, send for our brochure describing the report in detail. Or call Ben Addoms or Lisa Chewning today. You'll get a clear picture of VCR users. It could put your marketing plans on fast forward.

To those aiding project

Numerous research organizations and individuals provided considerable assistance in the preparation of country-by-country research market size estimates.

A special "thank you" is extended to:

William "Jay" Wilson, Starch INRA Hooper, Mamaroneck, N.Y.; Jerry E. Stafford, NFO/SRG International Ltd., North White Plains, N.Y.; Philip Barnard, RBL Group of Companies, London; Masonobu Ishikawa, Video Research Ltd., Tokyo; John R. Goodyear, MRB Group Ltd., London; Ann Burdus, AGB Research, London; Kurt Heller, IHA-GfM, Hergiswill, Switzerland; Jan C. J. Oostveen, Centrum, Amsterdam; Gregorio DeVilla, Gregorio DeVilla y Asocietos, Mexico City; and the Professional Marketing Research Society and the Canadian Assn. of Marketing Research Organizations in Canada.

—Jack Honomichl

Global markets widen

(Continued from Page S-4)
store counterpart, the Nielsen Food Index, and Mr. Nielsen was on the way to worldwide fame and fortune.

The Nielsen expansion outside the U.S. started at the most improbable time—1939, on the eve of World War II. Lever Bros., a charter Index client in the U.S., suggested that Mr. Nielsen visit the head of Unilever's U.K. operations, taking a letter that praised the value of Index data and suggesting that a similar audit system be set up in the U.K.

When asked to do this, Mr. Nielsen noted that a war was brewing. The U.K. Unilever executive replied, in effect, "Mr. Nielsen, there will be a war in some part of the world in every year we're alive; if you let that deter you, you'll never expand."

Shortly afterward, the new ACN office in London was destroyed by bombs, and the office was moved to Oxford, adjoining the university, on the theory the Germans wouldn't bomb the campus. It's still in Oxford.

During the war, ACN continued foreign expansion: Canada in 1944, Australia in 1948, the Netherlands (Unilever's home country) in 1952, Belgium in 1954. Today, ACN has subsidiaries in 27 countries, employing about 14,000, and offers a wide variety of services beyond the original Index services.

ACN is secretive about the size of its business volume in each country. But 1985 estimates suggest the following breakout: U.S., $248 million; Germany, $41.5 million; Mexico, $35 million; U.K., $23.5 million; Switzerland, $5.2 million; all others, $132.3 million.

Since being acquired by D&B in 1984, various A.C. Nielsen units have been absorbed into D&B. Both of the research units —Nielsen Media Research, with '85 revenues of $103 million, and Nielsen Marketing Research, with '85 revenues of $414 million —now are billed as "a company of the Dun & Bradstreet Corp." (Internally, research operations report to Henry Burk, president.) Richard W. Vipond is president of the marketing unit, and James D. Lyons is president of the media unit; both report to Jack C. Holt, a D&B exec vp.

ACN has pioneered many significant research industry developments: Funding of the first electronic computer (UNIVAC I) for commercial purposes; using meters to measure media audiences (the radio Audiometer, 1942); using supermarket panels for "experimentation" (1933); making a public issue of stock in 1956; being the first customer to install the IBM 3090 model 400 upgrade computer and taking methodologies into the international market place on a syndicated basis.

2 IMS International, New York, a public company. Of total IMS revenues of $248.7 million in 1985, 70% were attributed to marketing research operations through 54 offices in 30 countries producing data on 60 countries, almost all related to the marketing of healthcare services. The U.S. subsidiary, IMS America, Ambler, Pa., had marketing research revenues of $86.9 million in 1985. The balance of IMS revenues, $75 million, comes from trade publications and various life science services.

IMS began operations in 1957 and became a public company in 1972. Technically, the home office is in New York, but both top executives—Andrew L. Clark, chairman, and Robert Louis-Dreyfus, president-ceo and scion of a very wealthy French clan that joined IMS in 1982—maintain London offices.

Geographical sources of mar-
(Continued on Page S-8)

U.S. companies go international

Of the top U.S. companies, 75% are involved in international markets. Of those, 81% have a designated international division: Nine out of ten of those divisions are headquartered in the U.S.; only 28% have a research director.

These are a few of the key findings from a study recently cosponsored by Starch INRA Hooper, Mamaroneck, N.Y., and Haug International, Los Angeles, its West Coast associate. Questionnaires were sent to all the *Fortune 500* industrials and *Fortune 500* nonindustrials, plus client company lists of the two companies. There was a 24% return rate.

Other findings from this study, which updated a similar 1969 study, were:

- The international areas of most concern to U.S. companies are Europe, the Far East, Australia, New Zealand and Canada, in that order.
- Approximately two out of three U.S. companies involved in international work conducted some type of marketing and/or economic research related to overseas markets during the past year. Secondary-source research as well as trade and distribution studies led the list. In the case of consumer goods marketing companies, attitude and behavior studies are most frequent.
- In two-thirds of the cases, international research budgets are allocated on a project-by-project basis; only 29% make a lumpsum, fiscal-year budget allocation.

"Our respondents indicate they feel management is more interested in overseas research now than two or three years ago," says William "Jay" Wilson, president of Starch INRA Hooper and International Research Associates. "However, the lack of good background data for planning a study, the high cost of doing research overseas and the lack of sufficient budget were frequently mentioned problems with overseas research."

For a copy of the complete study report, write Mr. Wilson at Starch INRA Hooper, 566 E. Boston Post Rd., Mamaroneck, N.Y., 10543.

Global markets widen

(Continued from Page S-6)

keting research revenues currently break down as follows: North America, 50% (in part because of the '85 acquisition of two U.S. companies, Luning Prak Associates and LPA Audit); Europe, 35%; Pacific, 9%; Latin America, 5%, and Africa, 1%.

Operating profits on IMS marketing research activities in '85 were up 28%. Total revenues for the first six months of 1986 were up 38.6%. If this growth holds, IMS market research revenues could come close to $260 million in 1986.

The company's original—and basic—business was setting up audits to measure the movement of pharmaceuticals. This led to monitoring the incidence of disease and physician treatment for such diseases. A major activity now is sales territory analysis. Most major world pharmaceutical makers are IMS clients.

IMS has two main EDP centers in Frankfurt and Ambler, with European coding operations in Spain. Clients have online access to various IMS data bases. IMS' growth has been fueled by new service development, acquisitions and foreign expansion. Approximately 3,000 people work in the marketing research operations, headed by Christian Tourres, a London-based IMS senior vp.

Robert Louis-Dreyfus
IMS International

3 SAMI/Burke, New York. Wholly owned subsidiary of Time Inc.

SAMI, its origins in a feasibility study instigated by the late J. Clarke Mattimore in Grand Rapids, Mich., in 1964, specializes in measuring package goods product movement in retail stores. The basic system, amalgamating warehouse withdrawal data on thousands of package goods sold through food stores, reports product movement and share data on 28-day cycles for each of 54 unique marketing areas. A similar system reports on drugstore product movement in 30 markets. In 1985, SAMI introduced a service called SAMSCAN, which reports on product movement from samples of UPC scanner-equipped supermarkets.

In 1986, SAMI purchased Burke Marketing Services, Cincinnati, a company founded in 1947. Its activities, through a fulltime staff of 520 in 42 offices, include: Tv copy testing; test marketing; survey research; predictive market modeling (BASES division); the Burke Institute, which markets an extensive curriculum of courses related to marketing research, and Burke International Research, Ltd., Agincourt, Ont., Canada. Also, in a joint venture with Infratest called Burke International, the company fields multinational surveys through a network of owned/affiliated companies.

The two organizations merged

Carlyle G. Daniel
SAMI/Burke

in September into a new company called SAMI/Burke, with Carlyle G. Daniel, formerly president of SAMI, as chairman-ceo. Jack E. Brown, formerly chairman of BMSI, is president. SAMI/Burke currently is estimated to have revenues of $171 million.

SAMI/Burke, in a joint venture with Arbitron Ratings, has established an organization called ScanAmerica to develop a national single-source tv audience-product movement service. It currently is being tested in the Denver SAMI market area. ScanAmerica, which recently purchased the rights to Telecount Systems, also is planning a system that will electronically record, via computer, on-air running of tv commercials in selected markets.

4 AGB Research PLC, London. Public company.

This worldwide conglomerate was founded in 1962 as an ad hoc survey company by three ex-Attwood Research employes.

AGB derives its name from its original principals: Bernard Audley, who continues as chairman; Richard Gaper, deceased, and Douglas Brown, who has retired.

AGB went public in 1970 and entered into large-scale syndicated studies in the U.K.—first with the AGB Home Audit of domestic appliance purchases based on a 50,000-household panel, and later a grocery package goods panel. In 1968, it won the contract to measure U.K. tv audiences.

AGB now provides tv audience data, derived from either mail diaries, meters or people meters, in 14 countries, from Italy to Hong Kong.

During the 1960s and 1970s, AGB pursued a vigorous acquisition policy, purchasing six research companies (including Attwood) in the U.K. alone. In all, AGB has purchased entirely, or

The sobering truth about new product test marketing

Fairy tale environment for fairy tale data...

The artificial product environment used for scanner-panel, controlled-store test markets is a fairy tale world in which a product receives perfect stocking, pricing, display and promotion at exactly the right time. The critical element of trade acceptance is virtually ignored.

RESULT:
These test results can be fatally misleading when this artificial environment gives way to national realities.

vs. real world environment for real product research.

The strength of a product and its marketing plan can be measured accurately only when pitted against all the realities of the marketplace.

In recent years, however, access to electronic scanner panels has led some marketers to take a costly shortcut. In accepting controlled store distribution as part of the test package, they've bypassed the most critical variable in product distribution.

In the real world, new product sell-in must get past many bends in the pipeline:

First, sophisticated retailers now judge a product on how it fits into their product mix, weighing the item's impact on their business, not the manufacturer's.

Second, there's only so much space on crowded shelves. Acceptance often hinges on whether a store can delete marginal performers to make room.

Third, food chains are varying their format from store to store, and buying decisions often vary by type of format.

Finally, even chain acceptance is no guarantee the product will be available in all its stores. Increasingly, store managers decide what products will go on their shelves.

RESULT:
Uneven distribution — it's a fact of life for any new product, no matter how strong its sales force.

These factors must not be overlooked in new product testing. To try to ignore or adjust for them is perilous.

How to overcome these pitfalls?

NPD Local Market Panels. Based on natural sell-in tests, available in major markets around the country, and designed to measure all aspects of a new product's merchandising program, these panels are proven to be accurate for national projections. We challenge you to compare the results.

For more information on how NPD provides valid projectable data from new product test markets, call us.

Bernard Audley
AGB

an interest in, close to 60 research companies worldwide. U.S. acquisitions include NFO Research and Information & Analysis.

A U.S. startup venture, AGB Television Research, has announced plans to have a 2,000-household people meter panel operating by September, 1987, with plans to expand to 5,000 households by the fall of 1988.

Seven major U.S. ad agencies and CBS-TV have signed agreements to buy audience data, assuming the system is on schedule, and the quality of the data is satisfactory.

AGB also is trying to establish itself in the U.S. radio audience measurement business through a methodology utilized by an Australian subsidiary.

AGB's most vigorous expansion, however, has been in Asia. The company has acquired research operations in Australia, New Zealand, Hong Kong, Singapore, Taiwan, Malaysia, the Philippines, Thailand, Indonesia and Korea. Recently, AGB announced a letter of intent to purchase ASI Market Research in Japan.

That acquisition would add about $8.5 million to the AGB Group revenues of $125.35 million for fiscal year ending April 30, 1986. That would account for about 78% of AGB's total revenues. The remainder is generated by publishing, information systems and marketing services.

5 Arbitron Ratings Co., New York. Wholly owned subsidiary of Control Data Corp.

The predecessor to Arbitron was American Research Bureau, founded in 1949 by Jim Seiler, research director of WRC-TV, Washington, D.C., to measure tv audience viewing with mail diaries. In 1952, ARB merged with a West Coast company, Cooper, Coffin & Clay, which was trying to establish a similar service in Los Angeles. In 1954, ARB merged with C.E. Hooper's organization, Hooper Inc., and started to break out of the pack of companies vying for leadership in the then-booming electronic media audience measurement field. It started radio audience measures in 1964.

ARB pioneered use of metered household panels for tv measurement in New York in 1958, and in 1973, the company name was changed to Arbitron. In 1967, Arbitron was purchased by computer conglomerate Control Data Corp., Minneapolis.

Arbitron, with annual revenues of $122 million in 1985, produces tv, radio and cable audience studies at the local-market level using mail diaries or panels of meter-equipped households. Surveys in 214 tv markets, 11 of which are now measured by a combination of mail diaries and meters—with plans for three more by 1987—account for about 52% of revenues. The balance comes from diary measurements in 260 radio markets.

In 1984 Arbitron bought 40% interest in Burke Marketing Services, Inc., but this interest was sold this year to SAMI, the Time Inc. subsidiary.

Arbitron has about 1,600 full- and parttime employes in 20 U.S. office locations. A telephone interviewing center in Laurel, Md., has 55 stations and,

Theodore F. Shaker
Arbitron

among other things, is used for custom surveys.

The main thrust of Arbitron today is a joint venture with

(Continued from Page S-9)
SAMI/Burke, with each putting up one-half of the money to develop a new national tv audience measurement system called ScanAmerica, which also obtains data on household purchasing activity via wand scanning of UPC codes on package goods brought into panel households.

Control Data, the Arbitron parent company, recently signed a letter of intent with SFN Companies Inc. to acquire its subsidiary, Broadcast Advertising Reports, and the BAR subsidiary, Radio-Tv Reports. These two units have an estimated annual volume of $30 million.

Chairman of Arbitron is Theodore F. Shaker, and the president is A.J. (Rick) Aurichio.

6 Information Resources Inc. Chicago. Public company.

The youngest and fastest growing company of the top 15, IRI started in 1978. Its first product was single-source test marketing facilities, called BehaviorScan, the first two of which came on line in late 1979 (there are now 10 BehaviorScan markets).

The purchasing activity of household panels in these markets is linked, via UPC code scanning of package goods sold in food and drugstores, to cable tv viewing. Additional household panel clusters not linked to tv viewing were added to the BehaviorScan network to create a service called Marketing Fact Book, which produces ongoing hard copy reports on product purchasing activity and access to a database for analysis.

John Malec
Information Resources

By 1983, IRI's revenues had grown to more than $12 million, and it made a successful public issue of its stock, the proceeds of which have fueled acquisitions.

In 1985, IRI acquired Management Decision Systems, Waltham, Mass., which had revenues of about $25 million. MDS specializes in market modeling, simulated test marketing systems, data management software systems, forecasting and consulting. Since then, IRI has acquired the Data Group, a survey company; Keystrokes Inc., which monitors newspaper feature ads, and Marketing Advancements, specializing in coupon distribution analysis.

The combined revenues of all these operations is expected to be $95 million in 1986. IRI this year announced creation of a new package goods monitoring system, InfoScan, which can relate purchasing to store level promotions.

About $5 million of IRI revenues today come from foreign operations, with offices in London, Paris and Sydney, Australia, to market decision support software; a licensing and technical assistance agreement with Nihon Kezai Shimbun, a Japanese publishing company, for application of IRI-MDS systems in Japan; and a joint venture with GfK to develop a BehaviorScan-like system in Germany.

Of the original founders of IRI —John Malec, Gerald Eskin, William Walter and Penny Baron—two remain active, Mr. Malec as chairman and Mr. Eskin as vice-chairman. Gian Fulgoni is president and ceo.

7 GfK-Nuremberg E.V., Nuremberg, Federal Republic of Germany. Co-op company.

Founded in 1934 by the late Wilhelm Vershofen, a professor at the Nuremberg Economic University, GfK, which would be termed a co-op in the U.S., primarily supports approximately 700 private and corporate members.

Member companies need not be German, and GfK will do projects for nonmember companies. It is a for-profit organization which is taxed, but excess revenues are plowed back into building the organization and expanding the range of services.

Today, the GfK conglomerate includes six research organizations in Germany—including two located in Frankfurt—all but one of which are 100% owned. It also has an interest in 14 organizations outside Germany—six of which are wholly owned, the balance from 9% to 73% owned. Two are in Japan, two in Austria; others are located from Denmark to the U.K.

Werner Ott
GfK

There are about 610 employes in the main units in Nuremberg, and 185 in other German-based operations. Revenues in the 1985 fiscal year were $70 million, about 30% of which came from units outside Germany.

GfK research activities in Germany include tv audience measurement via metered household panel; consumer products research, including a purchase diary panel; analysis of

How do you find your marketing potential today?

It takes more than numbers. You need the finesse Elrick and Lavidge has developed to make the numbers reveal your potential, your overlooked markets.

Our 35 years of marketing research experience covers many fields, leading consumer products and business products and services.

Let our expert's edge help you achieve full potential for your new products and those already in the marketplace.

Call today. A telephone or in-person consultation, no obligation, will tell you what you need to know most.

census data; automotive research; media research, and industrial research. One unit publishes syndicated market analysis reports based on market dimension data from numerous countries. Also, GfK has set up a scanner-equipped panel of food stores to report on grocery product movement in Germany.

Several U.S. research companies use GfK's services in Germany. It is the German representative for McCollum/Spielman Research's ACT tv copy testing methodology. It has joint ventures with Information Resources to set up a Behavior-Scan-like test market system in Germany, and with the NPD Group to develop databases on the purchasing of sports and electronic equipment by combining store audits and consumer surveys.

The ceo of GfK is Werner Ott.

8 MRB Group, New York. Subsidiary of JWT Group.

Earlier this year, JWT consolidated its worldwide research holdings into a new division, MRB Group, which reports directly to Don Johnston, JWT's ceo. Total revenues are estimated at $56 million, including the pending acquisition of Winona Research.

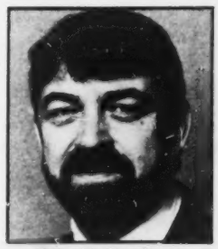
One unit of MRB is MRB Group Ltd., headquartered in London and reporting to John Goodyear. The domestic unit, Simmons Market Research Bureau, New York, reports to Frank Stanton. Both of these men report to Mr. Johnston, who is also chairman of J. Walter Thompson Co.

Frank Stanton
MRB

The international unit recently (AA, Aug. 18) absorbed two new companies, Basisresearch in Germany and Japan Market Research Bureau, into its fold. Each had been a research subsidiary of the local J. Walter Thompson agency office.

The MRB Ltd. organization started in 1979 when four U.K.-based research companies—British Market Research Bureau, Mass-Observation, Market Behaviour and European Market Research Bureau—merged. A new subsidiary, the Media Research Consultancy, was set up in the U.K. in 1980. The same year another arm, Market Behavior, was established in the U.S.

In 1980, MRB also bought Europena Market Research Bureau Italia—S.r.l. in Italy—and a year later, MRB formed a joint venture company in Sri Lanka together with the Indian Market Research Bureau Ltd. In 1983,



John R. Goodyear
MRB

MRB formed a new U.K. subsidiary, Telephone Market Research Bureau, and acquired a 60% stake in Middle East Research and Consultancy, Ltd., headquartered in Bahrain. There are financial links to EMRB Hellas, Athens, and with the Indian Market Research Bureau, Delhi.

In the U.S., JWT finally acquired 100% ownership of Simmons Market Research Bureau earlier this year. SMRB is the leading U.S. company in measuring print media audiences and cross-referencing those data with purchase behavior. Its revenues in 1985 were $16.5 million, which accounts for about 30% of the total MRB Group total.

The U.K. operation centers on the British Market Research Bureau, which calls itself "the oldest established market research agency in Great Britain . . . first incorporated in 1933." Originally, BMRB was a retail audit research company, but today emphasizes advertising media audience and advertising research, featuring the Target Group Index, which relates exposure to purchasing behavior.

9 Research International, London. Wholly owned subsidiary of Unilever, being acquired by the Ogilvy Group.

This group, billing itself "the world's largest full service marketing research organization," finds its roots in the worldwide Unilever complex and its future—presumably by year's end—as a wholly owned subsidiary of the Ogilvy Group, which announced last June its intention to purchase most, if not all, of the RI member companies (AA, August 18). RI sales in 1985 are estimated at $50 million.

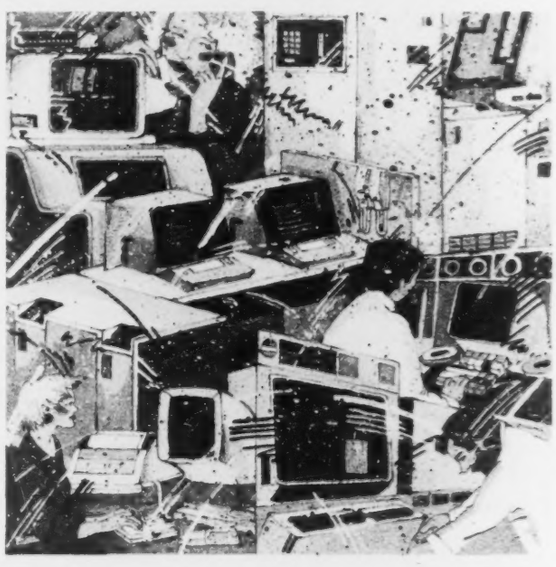
Research Int'l.

Because we have a lot of computers, we have a lot of time. For you.



We don't waste our time doing work which a machine can do better. We don't make calculations ourselves. We let calculations be made. For example by 2 CPU's and 340 Terminals and PC's. We employ the most modern Micro-Computer technology, wherever it can assist in supplying better, faster and more sound results. It is used for quantitative advertising research with scanner systems (Behavior Scan), for video-controlled surveys (VAS), for computer-controlled telephone interviews (CATI), for television research, for all Household and Retail Panels, as well as in many other areas. Because of this, we save a lot of time. For better service, for longer consultation sessions, for a more thorough examination of your special problems. "High Tech" makes it possible! Convince yourself. Give us a call. With an everyday telephone

Global markets widen

(Continued from Page S-11)

In 1972, under the leadership of Eileen Cole, the research units of local-country Unilever companies around the world were brought together under one management, first headquartered in Rotterdam.

The main unit, Research Bureau Ltd., for instance, continued legally to be a subsidiary of Unilever UK, but operationally was a subsidiary of RI.

The network now includes offices in 29 countries and research activities in dozens more, a professional staff of more than 800 and a field force of more than 5,000 interviewers.

In 1977, RI headquarters relocated to London to attract non-Lever business, which now accounts for approximately 70% of the RI total, although Unilever remains the biggest client by far.

RI expanded in 1981 by acquiring Marplan from Interpublic (and rights to use the Marplan name anywhere in the world).

In Germany, the two RI companies, IVE and Marplan, are closely linked, but in the U.K. the two, RBL and Marplan, are less-closely affiliated.

About 25% of RI business is now in the U.K., 25% in Germany and France, with the balance scattered through countries including Brazil, Finland, Norway, Pakistan, South Africa and Zimbabwe.

The range of activities is equally broad: Attitude and usage studies, product testing, print and tv advertising testing, new product development, modeling, image research, pricing research, panels and databases.

The U.S. RI unit, Research International-New York, headed by David Pring, was set up in late 1979 and now accounts for about $2.5 million a year.

In March, 1985, Miss Cole retired. Taking her place as ceo of RI was Ian M. Hunt, previously head of the RI company in Hamburg, Germany.

According to the pending deal with Ogilvy, 15 of the largest RI companies will be purchased. The smaller units are not included, either because of their small size or local laws that inhibit acquisition by nonnationals.

Mr. Hunt will continue as ceo.

10 Infratest Forschung KG, Munich, Federal Republic of Germany. Private partnership.

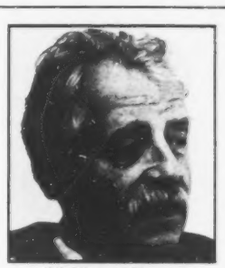
Infratest was founded in 1947 by the husband-wife team of Wolfgang and Lena-Renate Ernst to specialize in media research.

The first major activity was radio audience research for Bavarian Radio.

Today, the company is still strong in advertising/media research. For 19 years, it has participated in the annual German Media Analysis study, a standard reference for publishers and advertising agencies.

Lena-Renate Ernst
Infratest

Through a network of subsidiaries and affiliates throughout the world, Infratest, still owned by the Ernsts, is a major factor in international automotive, financial, social, political, healthcare, economic and industrial research, as well as national and multi-national ad hoc survey work.



Wolfgang Ernst
Infratest

The company's business still is concentrated in western Europe, however. Total Infratest revenues for 1986 are estimated at $50 million.

The parent, located in Munich, is a combination of separate units that specialize (e.g., media/advertising, social research, etc.), and are from 60% to 100% owned by the parent, a holding company.

There are about 290 fulltime Infratest employes in Germany, plus a parttime field force of 2,000. The units outside Germany employ 292, of whom 125 are in the U.K.

Infratest took a big step into worldwide research in 1980 when it purchased from 34% to 100% interest in seven research subsidiaries of Burke Marketing Services.

This gave Infratest direct penetration into the U.K., Italy, France, Belgium and Sweden—

BIG GAME HUNTERS

...bag big profits with the PROFIT TICKETS!

Now big game hunters can confidently set their marketing sights on potent game promotions which will dramatically increase traffic and sales.

You can turn to Chicago Lithographing Company. We've earned our big game reputation with game, sweepstake and lottery programs exclusively. We have successfully helped promotional firms with the development and production of big games for major supermarkets, oil companies, state lotteries and fast food chains.

Chicago Litho has printed billions and billions of Profit Tickets, including scratch-off and punch-out style, for satisfied customers throughout the world.

Chicago Litho is a single source supplier for your big game promotions. There is no second handling, second guessing nor costly delays due to additional suppliers.

Our extensive facilities offer you everything from high speed multi-color presses to sophisticated numbering, perforating, die-cutting and collating equipment. We have the controls to help you produce secure hidden image games. You can have us compute the odds for pay-offs and handle the dispersion of prizes. Added to each job are strict security, controlled distribution, and on-time delivery.

So if you're a big game hunter stalking a successful promotion, talk to the single source professionals who know the territory. Contact us for complete information.

Chicago Lithographing Company
560 S. Vermont, Palatine, IL 60067 (312) 359-3733

plus an affiliation with the Burke company located in Frankfurt.

A byproduct of this transaction is that Infratest ended up owning a 5% share of BMSI, and BMSI ended up owning 5% of a new Infratest international subsidiary company.

Also, the two have established —and have 50-50 ownership of —a new company, Burke International Research, which fields multinational studies through the six ex-Burke companies in Europe and five other former BMSI subsidiaries (now affiliates) in Brazil, Venezuela, Japan, Australia and Argentina.

Also, BMSI and Infratest own 67% of BGI-Gartner Group, Stamford, Conn., which fields international market studies of the high-ticket office equipment market.

In 1983, Infratest bought ABT Research in Bonn, a subsidiary of ABT Associates, Boston, a research-consulting company.

Infratest is estimated to have a dominant position in the West German healthcare research market, automotive/accessory market and financial market research. Recently the company has been expanding into the database business. About 55% of total Infratest revenues come from work within West Germany with annual growth rates running between 10% and 15%.

11 M/A/R/C Inc. Irving, Tex. Public corporation.

M/A/R/C finds its roots in a Dallas-based ad agency, Tracy-Locke, since acquired by BBDO. The research department of Tracy-Locke, which had been established by Cecil B. (Bud) Phillips in 1950, was split off in 1965 as a stand-alone profit center called Marketing and Research Counselors.

Mr. Phillips, who had left to work in a marketing management job at the Dumas-Milner division of American Cyanamid

Cecil Phillips M/A/R/C

Co., returned to head the operation, and he still continues as chairman, ceo and president of the company.

The company name was changed to M/A/R/C Inc. in 1985 as the organization, by then separate from Tracy-Locke, made a public issue of its stock.

M/A/R/C primarily specializes in telephone surveys, with central phone centers in three locations totaling 275 positions, all CRT-equipped.

Software and systems developed for telephone interviewing are leased in the U.S. and in Europe through an Amsterdam research company called Interview.

M/A/R/C has a system called Local Market Network—composed of local field offices with CRT-equipped interviewing positions on-line to a computer in Dallas—that recently was expanded to 30 markets.

This brings M/A/R/C's total phoning capacity to about 490 positions.

M/A/R/C also operates a Neighborhood Panel, which is a census-balanced national mail panel composed of 300,000 households. The company has about 340 salaried and 186 hourly staff employes in 13 U.S. offices.

M/A/R/C has made one acquisition, a research company called Trendex, which has since been discontinued.

The part of total M/A/R/C revenues for its most current fiscal year attributable to research activities is $46 million.

12 Video Research Ltd. Tokyo. Closely held corporation.

This organization, which only works in Japan, was founded in 1962 by Dentsu (the largest advertising agency in Japan and one of the largest in the world), Toshiba and 18 of Japan's major commercial television companies.

Later, Hakuhodo Inc., Daido Advertising Inc. and two tv stations also became company stockholders.

Masanobu Ishikawa Video Research

Using 1985 revenues and 1986 conversion rates for the yen, VR's annual volume is about $45 million.

There are 252 fulltime salaried employes in eight offices. Dentsu holds a 36% interest in VR.

VR activities include radio and tv audience research throughout Japan using mail diaries or panels of meter-equipped households (they are currently developing a new "highly sophisticated" on-line meter equipped with a VCR sensor, an individual viewer measuring device and a home scanning device that can be used for scanning bar codes); monitoring of all tv and radio commercials on-air (including the length of seconds and the GRP for each ad and/or product); and an audience and consumer report compiled by surveying the actual contact with four major media

(Continued on Page S-16)

No Other Research Company Has It...

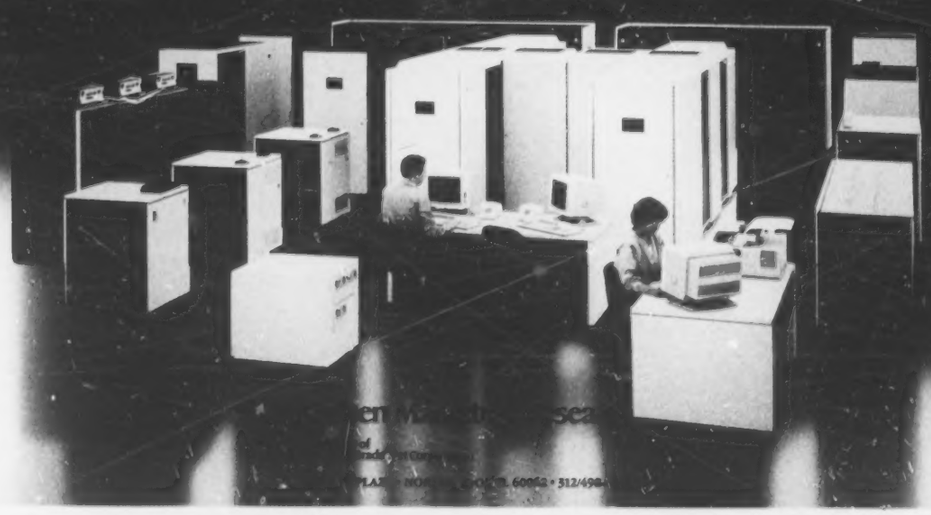
Because no other research company processes enough weekly scanning data to need it!

The 3090 Series are IBM's newest mainframe computers and the Model 400 is the latest in that series. Nielsen Marketing Research recently took delivery of the very first of these units, the fastest, most powerful general purpose computers in the world today. Having the first of these computers was a natural for the company that was the first to offer a comprehensive scanning based management tool. It was also a necessity.

This upgrade in computing capacity was precipitated by the tremendous growth in the amount of scanner generated data we process each week and the strong client response to the information they are receiving. Manufacturers are finding weekly UPC data on a national basis and from 26 individual markets to be extremely valuable to their marketing efforts. Many have been working with Nielsen scanning information since 1980. The retail trade is also making widespread use of Nielsen to guide their merchandising and buying decisions. Add to this growing client usage the steadily increasing number of stores that provide us data (over 1,600) and climbing) and the addition of still more local markets, and the importance of having the most powerful computer becomes clear.

Of course, if a company is just starting a scanner based service or has fewer clients or isn't overly concerned about trendability, back data or a truly representative sample, they might be able to get along quite nicely with a lesser computer.

We need the most powerful computer in order to bring you scanning's most powerful service. The computer our business needs is the IBM 3090 Model 400. The service your business needs is Nielsen SCANTRACK. And it's here now. Don't wait on promises.



Global markets widen

(Continued from Page S-13)
and products (i.e., brand usage, ownership, attitudes and life style from single source); and a telephone interviewing program that obtains purchasing data on consumer goods.

VR is now establishing a single-source test marketing system similar to BehaviorScan.

Masanobu Ishikawa is president of Video Research Ltd.

13 Market Facts, Chicago. Public corporation.

This conglomerate, founded by William F. O'Dell in 1946, is incorporated in Delaware and publicly listed (NASDAQ:MFAC).

The U.S. operations had revenues of $37.8 million in 1985, not including revenues from Market Facts of Canada Ltd., Toronto, in which it holds a major equity, but not controlling interest.

If prorated, the Canadian firm would add about $1.2 million to the MF figure, making a total of $39 million, a level expected to hold in 1986.

MF growth was spurred by Mr. O'Dell's relations with Ford division, Ford Motor Co., which accounted for nearly 50% of revenues (and growth) through the 1950s and into the 1960s.

Today, MF's client list is well-stocked with package goods companies, and the services offered include, in addition to traditional survey research, the Consumer Panel, a fixed mail panel of 235,000 households; a network of four mall interviewing sites; central telephone interviewing centers with a total of 116 interviewing stations; and Marketest, a controlled store auditing capability for custom test marketing and in-store experimentation.

David K. Hardin
Market Facts

During 1985, MF acquired a survey company, Tortorello Group. MF has 540 salaried employes in eight offices in the U.S.

Both top MF executives, David K. Hardin, chairman, and Verne B. Churchill, president-ceo, have been with MF since the 1950s. Mr. O'Dell, who left the company in 1964, is retired.

14 NPD Group, Port Washington, N.Y. Privately held corporation.

NPD is owned by founder and chairman Henry Brenner and president-ceo Tod Johnson. Revenues for 1986 are estimated to be $36 million, most of which comes from operations in the U.S., although NPD has minority ownership of International Surveys Ltd. in Canada and is the U.S. member firm in the Europanel group headquartered in Switzerland.

Also, there is a joint venture with GfK for international data bases on purchasing in the sporting goods and electronic equipment markets.

NPD started in 1953 when Mr. Brenner, who had just been fired by Standard Brands (and from four previous research positions), and his wife, Anne, took over an ad hoc mail panel operated by Standard Brands, renamed it Home Testing Institute and, working out of the basement of their home, tried to build the 3,000-household panel into a viable business.

Henry Brenner
NPD

At the time, only NFO Research had such a panel as competition.

In 1965, with support from Scott Paper Co., Mr. Brenner started a consumer purchase diary panel subsidiary to HTI; it was called the National Purchase Diary Panel. Today, the NPD panel is the largest such operation in the U.S. At the time Tod Johnson purchased one-half interest in the NPD panel in 1971, it was a $500,000 business.

In the 1970s NPD started to diversify: Services include a custom diary panel, local market networks for test marketing and application of the mail diary methodology to nonpackaged goods marketers such as toys and restaurant dining, apparel, etc.

In 1981, the NPD and HTI operations became one, and the company became the NPD Group. There are three offices in the U.S. and 335 fulltime salaried employes.

15 Maritz Market Research, Fenton, Mo. Subsidiary of Maritz Inc.

The parent company, specializing in employe motivation, communications and travel programs for major corporations, has an annual volume (fiscal year ending Mar. 31, 1986) of $563 million.

The company first got into consumer research via acquisition of Lee Creative Research in 1973.

There have been three subse-

Questionnaire sheds light on client methods

By Fred D. Reynolds

In recent years, the supplier side of the research industry has gained considerable attention, while far less is known about the client side.

Though there may be a lack of clarity about its boundaries, there is no longer a complete lack of information about the supplier side of the industry, nationally or internationally. Our picture of the client side is almost a total blank.

The University of Georgia Center for Marketing Studies—in its first annual measure of marketing research expenditures—has taken a first step toward tackling this problem. Unlike other studies that have attempted to integrate information on a survey questionnaire, our study collected detailed information at the company level and integrated it later.

This approach arose out of extensive conversations with 30 research directors who present seminars each year to the university's master's of marketing research degree students.

For this study, research directors were simply asked to provide expenditure records as they keep them, in any format and degree of detail.

The study's method worked, even though the level of detail provided by the companies differed widely. Some companies keep very detailed accounts, while others maintain only "top line" records. The method is limited by the amount of detail provided by each company.

The respondent list for this study came from Advertising Age's 1985 lists of top 200 leading national advertisers. We selected the 53 consumer package goods divisions of companies in the following product categories: Food and snacks, soaps and cleaners, beverages and tobacco. Other product categories will be included in future years.

Thirty-six per cent of the companies on the list provided data; 15% refused and 49% ignored the request.

The distribution of respondents by budget level is: 21% below $5 million; 36%, $5 million-$10 million; 14%, $10 million-$15 million, and 29% greater than $15 million.

The results are presented in the following table. On average, consumer goods companies spent $11.6 million for marketing research in 1985, an increase of 6.5% from 1984. Fifty-five per cent of the respondents reported this to be an increase, 33% reported a decrease, and 11% showed no change in this kind of expenditure. These companies allocated 41% of these expenditures to continuous market measurement (tracking) and 59% to custom research.

Fred D. Reynolds is Coca-Cola professor of marketing and director of the Center for Marketing Studies at the University of Georgia, Athens.

Expenditure shifts . . . suggest a renewed emphasis on new product development.

A substantial proportion of the increased spending from the previous year went to market measurement, while expenditures on custom research showed only a slight gain over 1984. Most companies did not provide detailed breakouts for market measurement expenditures, so it is not possible to chart the allocation to the newer technologies, such as scanner-based data, vs. older technologies, such as paper diaries.

YOU CAN COUNT ON US.

Nielsen is the name you think of first when it comes to TV ratings. We're proud of this reputation, but even more important to us is the strong client relationships we've built over 35 years of serving the television and advertising communities. As expressed by our founder, A.C. Nielsen, Sr., "We have a commitment to provide you with a high quality service and an eagerness to explore new areas of research as they unfold."

PROMOTIONS

James W. Carter, vp and general counsel, elected to the board of directors, Nielsen Media Research, Northbrook, Ill. **D. R. Rizzardini** and **R. P. Derr** to vp's, account management, Nielsen Marketing Research.

Ellen M. Saxon to research director, organizational research group, Opinion Research, Princeton, N.J. **Michael A. Zicha** to research director in ORC's Chicago office.

Ellen Cohen to head the newly created Simmons Custom Media Studies Division of Simmons Market Research Bureau, New York, from vp, Media Studies Division.

Also at SMRB, **William Cook** and **Kay Wall** will assume responsibilites for technical management and sales of all syndicated services in addition to the Simmons Annual Study of Media and Markets.

Nancy Gilden to director, marketing services, consumer research services, Custom Research, Minneapolis, from account manager.

However, most companies did provide sufficient detail concerning custom research expenditures by major purposes as shown in the table. For example, advertising research, primarily copy research, commands about 17% of a consumer goods company's custom research budget. In contrast, research on promotions is less than 3%.

Qualitative research, such as focus groups, accounts for almost $800,000 of the annual budget compared to in-market experiments at $1.1 million. In-market experiments include the newer methods such as ERIM and AD TEL as well as the more traditional controlled market and controlled store tests.

New product research (concept and product, simulated and nonsimulated) received more allocation than existing product research—22% vs. 17.8%.

New product research also showed the largest increase over 1984. Expenditures were up 10% from the previous year for this purpose.

In contrast, existing product research declined 5% on products, 2% on packages, and 17% on promotions. Advertising research and qualitative research held their relative positions in the over-all custom budget, increasing 2%.

There also appears to be a significant re-allocation of custom research expenditures in the area of in-market experiments. Most companies reported 1985 data in sufficient detail to place in-market in the distribution of custom expenditures at 16%. However, because only a small number reported such detail in 1984, the base for calculating the per cent change is too small to accurately estimate. Subjective estimate of the change is 15% to 20%, with the largest increase accounted for by electronic test markets.

Marketing research budgets and shifts in expenditures are driven by a complex interplay of influences. Market measurement levels tend to reflect the orientation of managers toward the amount of information they need to be confident or at least comfortable in evaluating marketing performance and the push on prices by new suppliers and technologies.

These levels also influence the counter-push for efficiencies by marketing research managers. Custom budgets reflect the current marketing practices as well as the other influences. Thus, the expenditure shifts found in this study suggest a renewed emphasis on new product development.

Market research expenditures by purpose

Expenditure breakdown

	1985 average ($ 000)	Per cent change from 1984
Market measurement	4,755.4 (41%)	12.9
Custom	6,863.5 (59%)	2.2
Total	11,618.9	6.5%

Labatt hops into Europe and U.S.

By TONY THOMPSON

TORONTO—Labatt Brewing Co., Canada's leading beer marketer, will target the U.S. and Europe next year in its worldwide prowl to increase sales.

As its first step, the brewer has named John Morgan, now general manager of Labatt's Ontario region, president of Labatt Breweries of Europe, effective Dec. 15.

Mr. Morgan will initially work from Labatt's head office here, but he is expected to move to Europe, probably the U.K., early next year.

Sid Oland, Labatt Brewing president, said the brewer's "Blue" label now has only a small presence in Europe, but added, "You'll find we will become much more visible in the coming months."

Among Mr. Morgan's top priorities in his new post will be to hire an advertising agency for Europe.

"We only have a small agency in England at the moment, producing p.o.p. and that sort of stuff," Mr. Oland said.

Since Labatt is Canada's fourth-biggest spender in advertising, at $24.5 million annually, there is likely to be some competition for the account.

In Canada, the Labatt account is shared between four U.S.-owned shops: Scali, McCabe, Sloves; Enterprise (a J. Walter Thompson Co. subsidiary); McCann-Erickson, and Young & Rubicam. D'Arcy Masius Benton & Bowles handles Budweiser in Canada, which Labatt brews and markets through a licensing agreement with Anheuser-Busch. Hill, Holliday, Connors, Cosmopulos, Boston, handles Labatt Importers in the U.S.

Mr. Oland said Labatt will look for licensing agreements with European brewers to make Labatt brands. He also did not rule out the possibility that Labatt might purchase a European brewery.

In the U.S., activity is expected to increase next year as Labatt tries to overtake Canadian import leaders Molson and Moosehead.

"We were the fastest-growing [Canadian] import in the U.S. last year," Mr. Oland maintained.

One analyst agreed that Labatt has a good chance to increase its U.S. market share.

"If Labatt can position itself as truly Canadian, then they have a very good chance in the U.S.," said Ed Ogiba, managing director of Product Initiative, a Darien, Conn.-based new-product consultancy. "But with Molson and Moosehead well established as Canadian brews, they may find it difficult to differentiate their brand. However, there is certainly a growing market for imports among U.S. beer drinkers."

"We are going to be competing quite aggressively," said Rich Fogarty, president of Labatt Importers USA, a wholly owned Labatt subsidiary. "We've been testing Schooner [a Labatt brand] primarily in New England and we are starting to see some numbers that are very positive."

Labatt already holds a 41% share of the Canadian market, but problems on the homefront are forcing the brewer to look elsewhere for growth.

In addition to the flat Canadian market, the U.S. and Canadian governments are negotiating the possibility of allowing duty-free American-brewed beer in Canada.

If that happens, Labatt is worried that U.S. brews will flood the Canadian market by shipping surplus capacity north.

Also, the major Canadian brewers now maintain price parity for similar quality brands, but they are worried that duty-free U.S. brews will engage in predatory pricing.

Already, in western Canada, Pabst Brewing Co. and G. Heileman Brewing Co. have entered the import market with their Olympia and Ranier brands, respectively.

Both have undercut Canadian brewers' prices.#

Quarterback Joe Montana of the San Francsico 49ers is the new star presenter for Tiger Balm ointment in print ads headlined "Joe Montana goes for the balm."

Balms away

QB pitches for Asian ointment

By STEPHANIE YANCHINSKI

SINGAPORE—An Asian conglomerate has enlisted the aid of San Francisco 49ers quarterback Joe Montana to capture a slice of the estimated $300 million U.S. analgesic ointment market.

Tiger Balm, a powerful topical muscle rub made entirely from herbs, is marketed by Haw Par Brothers International, a widely diversified, Singapore-based marketer with annual sales of $118.4 million in about 66 countries worldwide. The product has sales of $100 million a year, but is marketed primarily in Asia.

Industry observers say it will be difficult for Haw Par to crack the U.S. market because of subtle prejudices against Eastern products considered either inferior copies or quirky exotica. They point out that, aside from the Japanese, few companies from the Pacific Rim have established a presence elsewhere under their own name.

But Haw Par is hoping Mr. Montana will convince the growing number of athletes and health-conscious Americans who use muscle rubs in their daily workouts to switch to Tiger Balm.

Haw Par's international marketing manager, Jimmy Chong, said he believes that, instead of being a liability, Tiger Balm's exotic aura and naturalness will set it apart from the competition.

"Americans are adventurous," Mr. Chong said. "But at the same time they like natural products they can feel safe with. So the notions of 'all natural' and 'safe' will figure strongly in all our advertising campaigns."

Haw Par's biggest challenge will be to change the image the product now has. While athletes such as Mr. Montana and tennis star Billy Jean King use muscle rubs to limber up and treat bruises and sprains, the product has traditionally been used for treatment of a variety of chronic ailments among the elderly.

Reaching a younger audience will require a major image reorientation, not only in the U.S. but in Europe. Haw Par is counting on its ad campaign to accomplish that.

With funds limited to no more than several million dollars a year spread across the U.S. and Europe, the company plans strategic placement of print ads featuring Mr. Montana and other sports figures in upmarket sports magazines like *Sports Fitness* and *Runner's World* and newspapers distributed nationwide, such as the *National Enquirer*. Tv will be used sparingly in certain states on the West Coast and in New York.

"The U.S. is such a huge market that we must rely on regional television," Mr. Chong says "and as each region is successful we will keep on advancing" across the country.

Sports sponsorships will also figure highly. The company already participates in prestige sports events such as the Boston Marathon, the Bay to Breakers Run in San Francisco and is lobbying hard to become the official rub of the 1988 Winter Olympics in Calgary. Mr. Chong said Tiger Balm has already been approved as the official ointment of the America's Cup yacht competition.

The current campaign is handled by Gregory Atwood Design

(Continued on Page 51)

Reid

(Continued from Page 3)

McCann-Erickson president John McNamara put it.

SSC&B has Coca-Cola Classic and Diet Coke, McCann handles Coke and Cherry Coke.

Other agencies are Burrell Advertising, Chicago, for black consumer advertising, and Castor Spanish International, New York, for Hispanic advertising.

A striking contrast to his intense, high-spirited predecessor, Sergio Zyman, in both appearance and personality, Mr. Reid calls himself a "team player" who likes to accomplish things "through the system."

Accomplishing things is what is top-of-mind right now as he sets goals for the coming year and beyond. Completing a year in which colas were a No. 1 priority, Mr. Reid enters 1987 committed to making Sprite and Minute Maid orange soda the No. 1 products in their respective flavor segments.

While he admits those are tough assignments, he plans to achieve that goal by 1990 for Sprite and, for Minute Maid orange, within a year after it is fully national.

During each 1987 quarter, Mr. Reid will impose a special focus on a different segment of the soft-drink market. For example, during the first quarter, emphasis will be on diet products, including the sponsorship of an NBC-TV special starring the Pointer Sisters, the singing group Coca-Cola just signed to endorse Diet Coke (AA, Nov. 17).

More important for next year, Mr. Reid is keen on what he terms "integrated marketing," or "the ability to orchestrate all of our brands together into an integrated plan so that they all work together synergistically." The approach also involves making sure the national strategy is carried through to the local level.

Unwilling to cite a specific figure, Mr. Reid said Coca-Cola USA will be quite aggressive next year in regard to ad spending levels, hiking this year's budget. Plans also call for a 70%/30% spending ratio for Coca-Cola Classic versus the upstart Coke. Measured media figures put the company's soft-drink spending at $75 million for the first half of this year.

Even though the company's cola business responded well this year to the special focus it received, Mr. Reid hopes to continue the momentum and expand Coca-Cola Classic's leadership even more.

Giving him good reason for optimism is research that shows strengthening loyalty to Classic. In 1984, 20% of consumers that Coca-Cola polled routinely named Coke as their favorite brand. By September of this year, that figure for what is now called Coca-Cola Classic had grown to 30%. Other research indicated that, in 1984, 26.9% of Coke drinkers drank it exclusively; the figure rose to 41.3% for Coca-Cola Classic in the September period.

If there were ever any thoughts of switching the flagship brand back to its original name, this research ended them.

"When you ask me about the name, the best way I can answer that is to say I love the name Coca-Cola Classic. Consumers are wearing the word Classic like a badge," Mr. Reid said.

Mr. Reid said the company is working hard to develop advertising that captures the brand's strong attractions. "We know it is a big, robust, emotional brand, and it carries a lot of very favorable imagery in the minds of the consumer. We want our advertising to reflect that."

As for the new-formula Coca-Cola, or Coke, which is now aimed at teens, Mr. Reid said he is so pleased with the Max Headroom relationship that there will be even more tie-ins next year.

Max, especially popular with younger, video-friendly people, is the partially computer-generated video talk-show host brought here after a successful run in London.

"We think he not only belongs in advertising but in every form of media and advertising that we have. . .from the tv set to the point of sale," Mr. Reid said. "Max provides us with the perfect vehicle to do that."

Mr. Reid attributes much of Coke's success to Max as well as the "Catch the wave" ad theme, which is expected to continue. Coke has now achieved a level—as of July—of a very successful new product, Mr. Reid claimed. With a 2%-to-2.5% total share of the soft-drink business, the product is helping the company achieve its broad goal of expanding the entire cola business, Mr. Reid indicated.

In a turn of events, Coke now is evaluating a taste-test program conducted in 20 cities this past summer. Mr. Reid claims tests show consumers who come in preferring Pepsi end up showing a strong preference for Coke.

That program, which provides as much as $100 to local nonprofit organizations agreeing to participate in the test, may be expanded.

Also expected to add to the cola business is Cherry Coke, described by Mr. Reid as a "change of pace" drink for cola drinkers. He said this brand has taught the company a great deal about energizing and leading the cola business.

While he would not go so far as to say Sprite lemon/lime has been neglected in the attempt to strengthen colas, Mr. Reid noted that Sprite is "going on the offensive in 1987." Despite the emphasis on colas, Sprite has not performed badly, he indicated. "Brand 7UP is down 15% to 20% in volume; [Pepsi's] Slice lemon/lime is down 35% during this period. Sprite is down only one-tenth of a point—insignificant compared to the losses of the other lemon/limes," he asserted.

In the orange-flavor segment, the battle also will turn into another rivalry between Coca-Cola and Purchase, N.Y.-based Pepsi-Cola Co. Pepsi's Slice orange only recently moved up to claim the No. 1 spot in that segment.

Despite Pepsi's assertion that Coca-Cola is having a difficult time transferring a strong orange juice trademark into a soft-drink brand, Mr. Reid indicated the company's focus on colas is the only thing that has kept it from putting more effort into Minute Maid.

Mr. Reid said the company is willing to co-exist as a bottler with other orange soft-drink marketers, paving the way for the brand's national rollout soon from its present 60% of the country.#

JOHN REID

Readings from Reid

ATLANTA—Coca-Cola USA senior vp-marketing John Reid on:

Agency conflicts: "I don't have a point of view yet. I'm watching the debate with great interest, and I will develop a point of view over time. I'm trying to watch for a while and see how things evolve. I think it's an interesting issue and one that we need to get at." (Coca-Cola Co. has no stated corporate policy on conflicts, officials said.)

Sales promotion: "I strongly believe that the soft-drink system has been and will continue to be balanced between traditional pull activities and traditional push activities. I don't see the balance changing. I think this whole integrated marketing approach is not so much an attempt to change that balance but to see that they work together because that is where the opportunities lie."

Role of agency: "My role is just to let competent people do their jobs and hold them accountable. I've tried not to be a developer of advertising. I think that's the role of our advertising agencies. Having [given his blessing to the agency people working on his business] and assigned them the title of 'competent,' I think their job is to deliver the goods, and my job is to hold them accountable for delivering them."#

UAL

(Continued from Page 3)

from RCA Corp. for $587.5 million.

Along with United, Hertz and Westin, Mr. Zeeman now is responsible for overseeing operations of Apollo Travel Services, the computer reservations system; Mileage Plus Inc., United's frequent-flier program, and United Vacations, a tour operator.

In an interview with ADVERTISING AGE, Mr. Zeeman, a former Burnett executive, said "the opportunities are as broad as your imagination" for UAL to further establish its dominant position as the No. 1 airline "brand" and the top car-rental company.

United's 17% year-to-date market share is up from 14.9% last year, when the airline was hurt by lingering effects of a pilot's strike. Executives predict United's 1986 results will be "significantly ahead" of last year.

Houston-based Texas Air Corp., parent of Continental Airlines and New York Air, will vault ahead of UAL as the largest airline company—with a combined 19% share—if it completes planned acquisitions of Eastern Air Lines and People Express Airlines.

Hertz commands 32.8% of airport car rentals, far ahead of nearest rival Avis Rent-a-Car, Garden City, N.Y.

Since the Hertz acquisition, United reservations agents have used UAL's sophisticated Apollo computer system to cross-sell Hertz car rentals to airline passengers.

In Denver, now among the most competitive of airline markets, United has installed check-in counters at the Hertz drop-off location to save travelers the hassle of dropping off their luggage before they return a car. The service will be expanded to Chicago, Los Angeles and Washington's Dulles International Airport by yearend.

The joint efforts also have taken more subtle approaches. In January, UAL will drop all competing travel advertisers from its airborne short-subject videos and its in-flight magazine, *United*.

> "Some companies will probably go out of their way to not do business with us."
>
> ***—John Zeeman, exec vp-marketing and planning, UAL Inc.***

But UAL's trump card may be discounting programs for corporations, now spreading from the car-rental industry to several airlines, including Continental. United has so far resisted the practice, but says it's "not inconceivable" that it may become more common.

United Vacations, the tour operator, will execute many of the United/Hertz/Westin joint marketing programs, with coordination from Mr. Zeeman and United's vp-advertising John Ruhaak, also a former Burnetter.

The new account at Burnett will bill between $3 million and $5 million in 1987, Mr. Zeeman said.

Hertz agency Scali, McCabe, Sloves, New York, and Westin agency DYR, Los Angeles, will not participate in the joint marketing programs.

United Vacations already has packaged tours to Hawaii, the Pacific and elsewhere, using its three travel providers. Hertz discounts are packaged with United airfares to vacation spots such as Hawaii and Florida. The tour operator fed 55,000 Hawaii-bound passengers to United this year, Mr. Zeeman said, and will provide it with 120,000 to 150,000 more in 1987.

In addition, the unit uses marketing tools to solve logistical problems among its sister companies: When Hertz needed to move 800 cars from Denver to Phoenix, for example, United Vacations created a drive-there/fly-back package that sold out in one day, accomplishing Hertz' objective "at a profit instead of a cost," Mr. Zeeman said.

The combined marketing clout is not without cost, however, to both members and promotional partners in United's Mileage Plus program, which claims 4½ million members. Budget Rent a Car Corp. and Hyatt Hotels Corp., both Chicago, next month will end their participation in United's Mileage Plus program, and Northwest Airlines, St. Paul, Minn., has "eliminated most promotional ties" with Hertz.

"Some companies will probably go out of their way to not do business with us," Mr. Zeeman said. He called such moves "shortsighted," and said "It doesn't have to be a situation where the only other travel-related companies we work with are those we have to own ourself."

Hyatt and other hotel chains perhaps have less to fear from UAL because Westin is the weakest link in the company's mounting travel empire. Westin has 61 hotels, mainly in the U.S. and Pacific countries.

The Hilton International acquisition, however, would add 96 more hotels in 44 countries worldwide, immediately boosting UAL's share among worldwide hotel companies, according to estimates by Laventhol & Horwath, a Philadelphia-based accounting company.#

Burger

Bates' Mars business to Saatchi

By LAUREL WENTZ

LONDON—Mars Inc. is moving three U.K. candy brands, worth an estimated $18 million in billings next year, to Saatchi & Saatchi from Saatchi-owned Ted Bates Ltd., Mars' largest U.K. agency.

However, Bates will keep $3 million worth of additional confectionery business, as well as the $15 million account of Mars' Pedigree Pet pet-foods division.

Bates was widely expected to lose some or all of its U.K. Mars billings to rival Mars agencies Grey Ltd. or D'Arcy Masius Benton & Bowles.

This is the second time in one month that Saatchi has stepped in to share a Bates multinational account. Saatchi recently intervened to handle jointly Bates' $30 million pan-European DHL courier business (AA, Nov. 10).

In the latest moves, Saatchi took over Mars' $3 million account for Marathon peanut and chocolate bar, the $3 million account of Opal Fruits chewy fruit squares business and the M&M's account.

M&M's has been tested in the northeast part of the U.K. since July, 1985. But sources say the brand will be rolled out nationally in 1987 with ad support totaling almost $12 million.

Bates will retain Mars' Lockets and Tunes cough-drop brands, with estimated billings of $3 million.#

Army attacks Ayer

Threat of indictments spurs Pentagon to act

By JANET MEYERS and STEWART ALTER

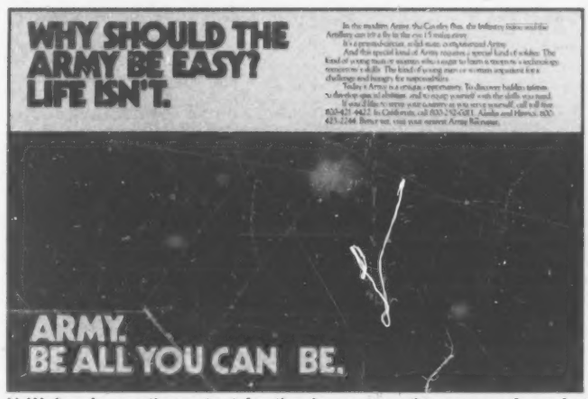
WASHINGTON—The discovery of new evidence of alleged wrongdoing at N W Ayer on the Army recruiting account, cited by the Army to explain its sudden disqualification of Ayer from all government contracts last week, could lead to indictments.

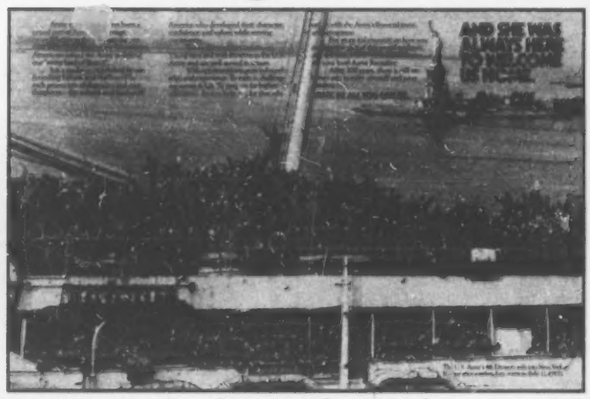
New information reached investigators for the Army and the U.S. attorney in New York in early November, said Major Bruce Bell, an Army department spokesman in Washington.

There are also reports that at least one current Ayer executive, Thomas Donoghue, a vp-account superviser at Ayer Public Relations who worked on the Army assignment, is cooperating with investigators. Mr. Donoghue declined to confirm or deny the report.

Major Bell said he would not "conjecture" about indictments, but an Army source predicted they will be handed down by a New York grand jury, possibly citing conspiracy to defraud and falsification of government documents. The U.S. attorney's office in New York declined comment.

Separately, Major Bell said the Army, which has been in the midst of an agency review, intends to have a new agency handling its $100 million account by Jan. 2. Ayer, which has said it will appeal vigorously its disqualification from government work, also said last week it would ask the Army to delay selection of any new shop for the account.





N W Ayer's creative output for the Army account was not an issue in the decision to bar the agency from further government work. These print ads are part of Ayer's current "Be all you can be" campaign for the Army, which has been well received.

In addition to Ayer, now apparently out of the picture, the finalists for the Army business are Young & Rubicam, BBDO, DFS Dorland Worldwide, SSC&B, all New York, and Ogilvy & Mather, Chicago. The winner is likely to receive a one-year contract with four option years, a package that could be worth half a billion dollars over the five-year period.

Major Bell declined to discuss the nature of the new information obtained last month, but the Army's letter informing Ayer of its disqualification disclosed that "substantial" numbers of former Ayer employes had presented evidence of management involvement in "timecard mischarging," or billing the Army for work not actually done on Army business. It also alleged Ayer conspired with certain subcontractors to rig bids on Army assignments.

A source said at least two former Ayer pr employes based in New York provided investigators with information in recent weeks.

The potential for indictments, said an Army source, forced the Army's hand and led to the decision to immediately disqualify

Nielsen's meter tally rocks nets

By VERNE GAY

NEW YORK—The first people meter audience measurements for the 1986 tv season reveal that tv's most popular series, "The Cosby Show," has 19% fewer adult female viewers than earlier reported, and that over-all network viewing by women aged 25 to 54 has been overstated by the A.C. Nielsen diaries by an average of 10%.

As widely expected, the people meter ratings for virtually all network tv prime time shows were generally lower than the ratings provided by the Nielsen Television Index meters, which have been recording household viewing since 1954. Discrepancies with Nielsen's National Audience Composition diaries, which provide demographic information and are all-important to advertisers, were far greater than many xperts had predicted.

NBC's people meter results for key women emographics were nearly 14% lower than the tandard NTI diary ratings for the same demographics in October. "The Cosby Show" was off whopping 19% for two key female demo-

Colgate tops merger talk

An Advertising Age roundup

NEW YORK—Colgate-Palmolive last week was once again the subject of takeover rumors, fueled by a wild swing in its stock price during trading on Nov. 26. This time, speculation has it that British financier Sir James Goldsmith, fresh from his successful greenmailing of Goodyear Tire & Rubber Co., is now eyeing the package-goods giant.

Other rumors had it that Colgate might be a target of Chesebrough-Pond's as a move to thwart a Chesebrough takeover bid by American Brands.

The rumors came on top of two other takeover bids that were launched last week and the sudden end to another. If the Ivan Boesky scandal has made its mark on takeover mania, it was evident only in Wall Street's new-found disdain for "junk bond" financing.

Among the pre-Thanksgiving financial fodder, in addition to American Brands' offer of $2.8 billion for Chesebrough-Pond's: The Limited Inc. and Edward J. DeBartolo Corp. bidding $1.8 billion for Carter Hawley Hale Stores, in the Limited's second try for the retailer; Irwin Jacobs, chairman, Minstar Corp., offering $3.6 billion, maybe more, to acquire Borg-Warner, and Gillette Co. fending off an unfriendly takeover attempt by Ronald Perelman's Revlon Group.

Neither Colgate nor Chesebrough would comment on the

GM study of magazines raises fears

By EDWARD LAPHAM
Crain News Service

General Motors is conducting an in-house study of how its advertising has been positioned in leading consumer magazines.

Bringing in-house the job of what is known as "position analysis" is the latest example of GM's attempt to consolidate at the corporate level advertising-related functions that have been done by the divisions and their ad agencies.

Issues of magazines that carried no GM advertising were included in the study, raising fears among some magazine sales representatives that GM might have another motive.

In fact, ad reps from at least two magazines said they were told the study would include an evaluation of each magazine's editorial coverage of GM. The implication was that favorable editorial coverage of GM might become a prerequisite for GM ad business, the ad representatives said.

GM denied the study is linked to the evaluation of editorial coverage, or that it presages centralized, internal media buying.

The corporation said the study relates strictly to position analysis and termed any other interpretation a "misunderstanding."

Position analysis evaluates where an ad appears in a magazine relative to front, back and surrounding editorial copy. The object is to determine if ads are positioned for maximum visibility and impact.

Traditionally, the media departments at individual ad agencies, not the clients, conduct position

(Continued on Page 8)

Conde Nast tries 'Signature' route

By STUART J. ELLIOTT

New York—A little traveling music, please, as Conde Nast Publications' unexpected disclosure that it intends to acquire Signature brings a new singer into the lucrative, competitive travel magazine choir.

Conde Nast has long been interested in expanding its presence in travel beyond *Gourmet's* editorial coverage of the field. Its new adviser, Harold Evans, had been looking into a travel startup among a number of magazine development projects (AA, Sept. 29).

In taking the travel trip, Conde Nast concluded that "starting from the ground up is very difficult," chairman S.I. (Si) Newhouse Jr. said after the surprise announcement Nov. 25. "This seemed to be the right way to get into it."

Mr. Newhouse hopes to close the acquisition from Citicorp Diners Club by yearend. It is "a case of both of us having antennae," he said. "[Citicorp had] an awareness of our interest in travel."

This decision to buy instead of create came just five days after Time Inc. made the same move, via a joint venture with Working Woman Inc. to publish women's magazines (AA, Nov. 24).

Mr. Newhouse thinks cost is not the determining factor in these instances, because "it's very expensive to start, but it's very expen-

Chiat/Day reportedly leading pack for Fox

Los Angeles—Fox Broadcasting Co. is leaning heavily toward Chiat/Day as its first agency of record, sources say. A decision is expected this week. Other finalists include BBDO Worldwide and Della Femina, Travisano & Partners (AA, Nov. 24).

Santa Barbara, Cal.—**Larson, Bateman & McAllister** has become Evans, Hardy & Henry, following the departure of the last original partner, president-ceo Michael McAllister, who left to pursue other interests. Partners are senior vp-management supervisor Jim Evans, vp-creative director Dennis Hardy and vp-account supervisor William Henry.

La Habra, Cal.—**American Stores'** Alpha Beta division will hear presentations this week for its estimated $14 million broadcast account from Los Angeles agencies Admarketing; incumbent Bozell, Jacobs, Kenyon & Eckhardt; Eisaman, Johns & Laws, and JWT/West, sources say. Alpha Beta declined to comment.

San Francisco—**SEH Importers**, distributor for the beer-and-lemonade drink Zele Panache, has pulled its estimated $1 million account in-house from Lewis & Partners, San Francisco.

Los Alamitos, Cal.—**Slim 'n Trim** has ended its relationship with Keller-Crescent, Evansville, Ind., after only nine months (AA, Feb. 24). The dairy products licensor will name a Los Angeles agency in the next two weeks to handle its estimated $2 million account.#

International woes trigger FCB changes

New panels formed for more control

By JULIE SKUR HILL

CHICAGO—Foote, Cone & Belding, which blamed international operations for a down year in 1985, is reshuffling executives to solve its international problems and satisfy concerns that there is not enough central control of its multinational accounts.

The agency has ousted its European chairman, promoted others and formed new international committees, according to sources. It also is planning to buy the remaining shares of its South American network and other agencies worldwide.

Late last month Antonio Beja was promoted from president-ceo to chairman-ceo of Latin America/Pacific/South Africa—a new post. Craig Wiggins was promoted from president and chief operating officer of continental Europe to ceo of FCB/Europe.

FCB also named two board members—Len Sugarman, chairman-ceo of FCB/London, and Mr. Wiggins.

Those board members with international backgrounds—Messrs. Beja, Sugarman and Wiggins and FCB Communications chairman-ceo Norman Brown—also are forming a new international committee to coordinate work in regions.

Mr. Brown said, "It's one thing to be pins on a map and another to coordinate and assist clients. This will help the ability to service global clients."

AA, Cole survey agency salaries

NEW YORK—Are ad agencies putting their money where their talent is?

There's one way to find out. ADVERTISING AGE and Cole Surveys, Boston, the leading compensation survey organization, are again teaming up to track trends in advertising compensation through the second annual "Survey of Top Management Compensation in Advertising Agencies." The survey provides the most accurate and up-to-date agency salary information available in the business.

Deadline for returning completed questionnaires is Dec. 31, 1986. Agencies that have not received a questionnaire and wish to participate should contact Cole Surveys, 100 Summer St., Boston 02210, or call project director Ed Reilly at 1-800-343-2215.

The first effort (AA, May 19) included salary information on more than 1,600 agency executives.

The questionnaires for the 1986 survey, sent to about 5,000 agencies, request information on salaries, incentive payments, benefits and perquisites. The forms have been simplified; all information that is provided is treated in a confidential manner as to source.

Twenty-one key managerial and creative positions are covered in the survey, from chief executive officer to copy chief. Survey results, broken down by agency type (independent, subsidiary, branch) and by regional and national size groups for precise comparisons, will be published in AD AGE next March. Agencies that submit data receive a reprint of the article and are given an opportunity, via confidentially coded printouts, to see how their own data compare with similar-size agencies.#

WHY BECOME A WASHINGTON EDITOR?

Esquire magazine dubbed him the last great foreign correspondent.

Arnaud de Borchgrave was born in Belgium. At 14, he fled, escaping the Nazis, and joined the British Navy at 15. After the war, he succeeded Walter Cronkite as UPI Brussels Bureau Chief; then, as *Newsweek's* chief foreign correspondent, he interviewed most of the world's well known leaders, saw the misery of seventeen wars and witnessed major world events.

In that role, de Borchgrave was stimulated by what forty years of world traveling had shown him. He has seen why competitive, uncensored media are essential for democracy to function. Yet surprisingly, the capital of the free world, Washington, D.C., was a city with no choice because it had only one major metro newspaper.

Then, about two years ago, de Borchgrave became the editor of the first growing metro newspaper created in decades — *The Washington Times*.

Now, de Borchgrave and over 230 talented journalists compete to provide news and an alternative viewpoint.

The report card:

- Almost every day, the *Times* has something important you don't see elsewhere," said the monthly "American Spectator."
- Charles Peters, the respected editor of *Washington Monthly*, said that the *Times* has been beating the *Post* consistently at some important stories.
- *The National Journal* placed *The Washington Times* among the most influential institutions in the nation's capital.
- *The Associated Press* has cited *Washington Times'* exclusives over 120 times in just 16 months.

The Washington Times is fast becoming a great newspaper, because of its talented staff. And guiding its progress, Arnaud de Borchgrave and his staff have a simple credo: report the news hard, first, and above all, accurately.

And those efforts are why the man, dubbed the last great foreign correspondent, is helping create one of America's great newspapers.

The Washington Times

We hit what The Post misses.

CORRECTIONS & CLARIFICATIONS

- J. Walter Thompson USA will not get exclusive rights to data provided by R.D. Percy & Co., a new tv commercial ratings company, as previously reported (AA, Nov. 17, P. 6). Percy said it has a policy of not offering data exclusively to any client.
- *Workbasket* has corrected its January-to-November, 1986, ad linage total (AA, Nov. 17, P. 101). The correct total is 350.1 pages.
- A caption with a photo of a *Reader's Digest* reception in Williamsburg (AA, Nov. 17, P. 92) mistakenly identified Mrs. Albert Cole as the wife of retired U.S. Chief Justice Warren Burger. Mrs. Cole was with her husband, director emeritus of *RD*, Justice Burger and *RD* senior counselor Melvin Laird. *RD* supplied the caption.#

Smokers ridin' hard to Marlboro Country

Cigaret industry maintains strength

By JOHN C. MAXWELL JR.

Marlboro, long recognized as the largest-selling cigaret brand in the U.S. as well as the rest of the world, also is the world's largest-selling package-goods product.

On a factory shipment basis in 1985, Marlboro probably had about $6 billion in sales. As such, it surprisingly surpasses Coca-Cola in gross sales and product turn. This phenomenal and continuing success story defies current tobacco market trends.

While most of the activity in the tobacco industry this year has been among the price/value entries, New York-based Philip Morris Cos.' Marlboro is expected to exhibit one of the largest share gains of all standard-price brands—tying with Lorillard's Newport—with an increase of a half a share point.

In addition, Marlboro's 1986 projected volume, nearly 134 billion units, will be the highest ever recorded in the history of the industry, while its market share of 22.9% is the highest of any brand in the U.S. in more than 30 years and is twice that of its closest competitor.

Even more impressive is Marlboro's dominance of the under-35 age category with a 37% share. In fact, Marlboro is the No. 1-selling brand among male smokers, females, high school or college-educated people and those living in Spanish-speaking households.

Of the top 10 U.S. cigaret brands, only Marlboro has enjoyed 21 years of uninterrupted growth in both volume and share; it has held its No. 1 position for the longest consecutive period (12 years, 1975 through 1986), and we see this continuing.

A single-minded marketing philosophy, which effectively reinforces its position in the marketplace, is the basis of the brand's consistent growth.

In addition to the highly visible Marlboro Country advertising from Leo Burnett USA, Chicago, the brand has been supported by promotional programs that enhance and extend that image among Marlboro's prime smokers.

Marlboro's outstanding track record is all the more remarkable when one considers the current proliferation of tobacco brands.

When the brand was positioned in 1954 as a full-flavor, cork-tipped cigaret, it was one of 37 packings in the industry.

Today consumers can choose from among 281 packings.

Even so, when the purchasing decision is made, Marlboro remains a commanding No. 1.

While cigaret volume continues to decline, the combination of lower leaf prices, higher plant efficiencies and acquisitions results in new highs for the industry's earnings.

In addition, the throw-off of billions of dollars of excess cash can be used for future acquisitions, debt repayment, share repurchases and higher dividends.

The dividend stream has been moving up steadily in the past decades, and we see no reason for this to change.

Also, the industry had been paying full tax rates, so the drop to 34% federal tax will help cash flow.

Full-year 1986 industry shipments are projected at a little less than 583 billion units—a decline of 2.1% from '85.

As noted in past reports, quarter-by-quarter shipment comparisons have been abnormally influenced by wholesale inventory swings. A significant trade inventory accumulation occurred in the fourth quarter of 1985, caused by excise tax concerns. Smaller inventory changes occurred in each subsequent quarter due to various company trade inventory programs.

Presuming that cigaret marketers and the trade will follow their historic pattern, trade buying in anticipation of a December/January price increase should somewhat offset last year's inventory buildup.

According to measures of retail sales, such as Nielsen's, the industry's actual rate of decline is somewhat lower, about 1.6%. This rate also is consistent with other sources, such as state tax collections.

Similarly, while quarterly company shares are not representative of the marketplace, annual market shares are reasonable indicators. Philip Morris and RJR Nabisco, Winston-Salem, N.C., are projected to lead all other companies in share growth with gains of a little less than 1 share point each.

PM's 36.8% share will be another record.

Brown & Williamson Tobacco Corp., Louisville, and American Brands, New York, are expected to incur small share losses.

The falloff will be particularly sharp for Liggett & Myers Tobacco Co., Durham, N.C., down 1 share point because of weakness in its generics.

Regarding the standard-price brands, Marlboro will have the best performance again. The 1986 share (22.9%) and volume (nearly 134 billion units) are projected to set new highs, and it will gain 0.5 share points versus 1985.

Newport (3.9% share) will continue to record strong share advances (0.5 point) and the biggest unit jump of the major brands, amounting to about 12%. PM's Virginia Slims (2.9% share), aided by the introduction of Lights 120s, is expected to grow by 0.1 share point.

RJR's Camel should maintain its share, but virtually all the other major brands will lose between 0.1 and 0.3 share points.

The price-value brands remained strong in 1986 as the segment's share is expected to exceed 9%. We believe from here on out this grouping will grow at least 1 share point a year, if Lorillard and American Brands ever decide to get in at a slightly faster rate.

The segment is equally divided between the branded and the value 25s versus generics. RJR's Doral set the pace and should gain 0.7 share points over full-year 1985. Doral will reach a peak share of about 2.3% in the fourth quarter.

PM followed RJR into the "branded generic" category with a successful May, 1986, introduction of Cambridge Lights, which will close the year with a 0.6% share. Value 25s (1.8%) are strong due to the national introduction last March of B&W's Richland 100s, as well as the reintroductions of RJR's Century (February) and PM's Players Lights (September) in a 10-pack carton.

Despite a modest full-year share advance versus 1985, the generics' (black-and-white or private-label) share position is now slowly eroding.

Liggett's generic share will be almost halved versus last year by the success of B&W, PM and RJR.#

Mr. Maxwell is with Furman Selz Mager Dietz & Birney, New York.

Special Report

Profit picture sends operators a clear signal

By Wayne Walley

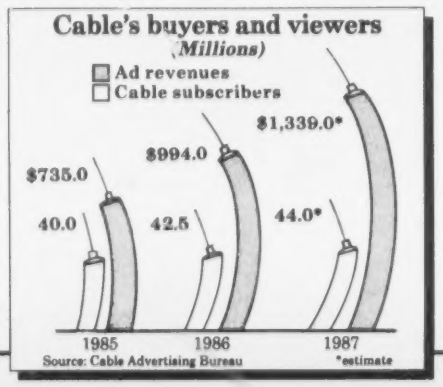
Cable tv enters a new age at the turn of the new year as the pricing of basic cable services is deregulated.

This means that rates charged for basic services by cable operators that experience competition from over-the-air broadcasters no longer will be regulated by the government.

"Now we'll have to do business a whole different way," says Margaret Durborow, vp-marketing/programing, United Cable, Los Angeles, the nation's eighth largest multiple systems operator.

Depending on how cable operators react to the freedom to set basic and pay-cable rates, the future of the premium services, particularly Time Inc.'s Home Box Office/Cinemax and Viacom's Showtime/The Movie Channel, hangs in the balance.

These movie-driven channels helped attract millions of subscribers to cable tv during the boom years in the early 1980s. But now that they are being challenged by videocassette recorders, movie rental outlets, cable's new pay-per-view services and a penny-wise consumer, the drawing power of commercial-free cable has dwindled.



"With the duplication of product, high prices and the increased competition from videocassettes, deregulation could be the death knell for premium services," says Jack Heim, exec vp-business development, sales and affiliate marketing at New York-based Showtime.

"Three or four years ago most people needed cable tv for good reception. The basic service back then cost $8. Pay cost $10. It had luster. It was the first place to see movies on tv without commercials.

Pay was worth more than all the basic cable channels combined. That's no longer true. The vcr has destroyed the previous value of premium services. We have to change that," Mr. Heim says.

(Continued on Page S-4)

Profit a clear signal

(Continued from Page S-1)

To survive, the pay services have taken the offensive. They —Showtime/The Movie Channel and HBO/Cinemax—are fighting for exclusive movie contracts, dropping prices and stepping up production of original pay tv series, specials and sporting events.

Both HBO and Showtime spent millions on aggressive marketing and promotional campaigns such as "The HBO Knockout Fall" and Showtime's "Heat Is On" to attract new subscribers this year.

However, is that enough to keep things going/growing?

"The future of the premium services is the big question," says United Cable's Ms. Durborow, "We see an extensive softness in the [premium services] marketplace, and it could become more of a support system than a primary attraction."

The advent of pay-per-view, cable's new weapon against the videocassette rental market, also looms as a big threat to the future of movie-driven channels.

"Pay-per-view means we have to establish criteria for using shelf space as does any retail business," says Ms. Durborow. "In the past we'd load up with premium services because it was the way to increase profit margins," she says, "but pay-per-view revenues for cable operators exceed that for the premium services.

"In the future I see multi-pay-per-view channels on each system offering different types of movies. After all, we are a convenience-driven society. What can be simpler than pay-per-view?"

"My exercise today is to look at what every channel gives and adds in value and how important the service is to subscribers. Will the premium channel survive? I have faith in Time Inc. and Viacom to do what's necessary to create valuable services," she says.

Both Time Inc. and Viacom have taken a cue from The Disney Channel, the fastest growing pay service in the U.S. Launched in April, 1983, the service already has 2.5 million subscribers and boasts that it is now the main source of revenue growth for the entire pay tv industry.

"Disney has other benefits besides movies," says Stephen Fields, vp-consumer marketing at Burbank, Cal.-based Disney. "With family shows, children's programing and exclusives, whether they be specials, series or movies, it's a unique bundle of entertainment the viewer can't get anywhere else."

The Disney Channel has offered cable operators incentives to lower the channel's subscription price. It has often given free previews to basic cable subscribers, and it has used numerous joint marketing campaigns to promote itself. Once the new kid on the cable block, the service is now on the cutting edge with HBO and Showtime picking up from its lead.

"We knew we had to fix our product," says Showtime's Mr. Heim. "We've done that with exclusive movies, original series and more. Now we've got to adjust the cost and do the marketing to help people understand the value of each channel," he says.

HBO and Showtime's hard sell to the cable operators has also worked, as most have agreed to price reductions to help keep pay-service subscribers.

"We can't simply burden our subscribers by upping prices for everything," says Craig Ehrlich, vp-development, Falcon Cable Television, Pasadena, Cal. "And we can afford not to because advertising sales is proving itself."

Last year, according to Carmel, Cal.-based Paul Kagan Associates, a tv industry analyst, local cable operators across the country brought in an estimated $139 million in advertising revenue. This figure could rise to $187 million in 1986.

At the same time, annual cable tv advertising billings could reach $948 million this year compared to 1985's estimated $767 million.

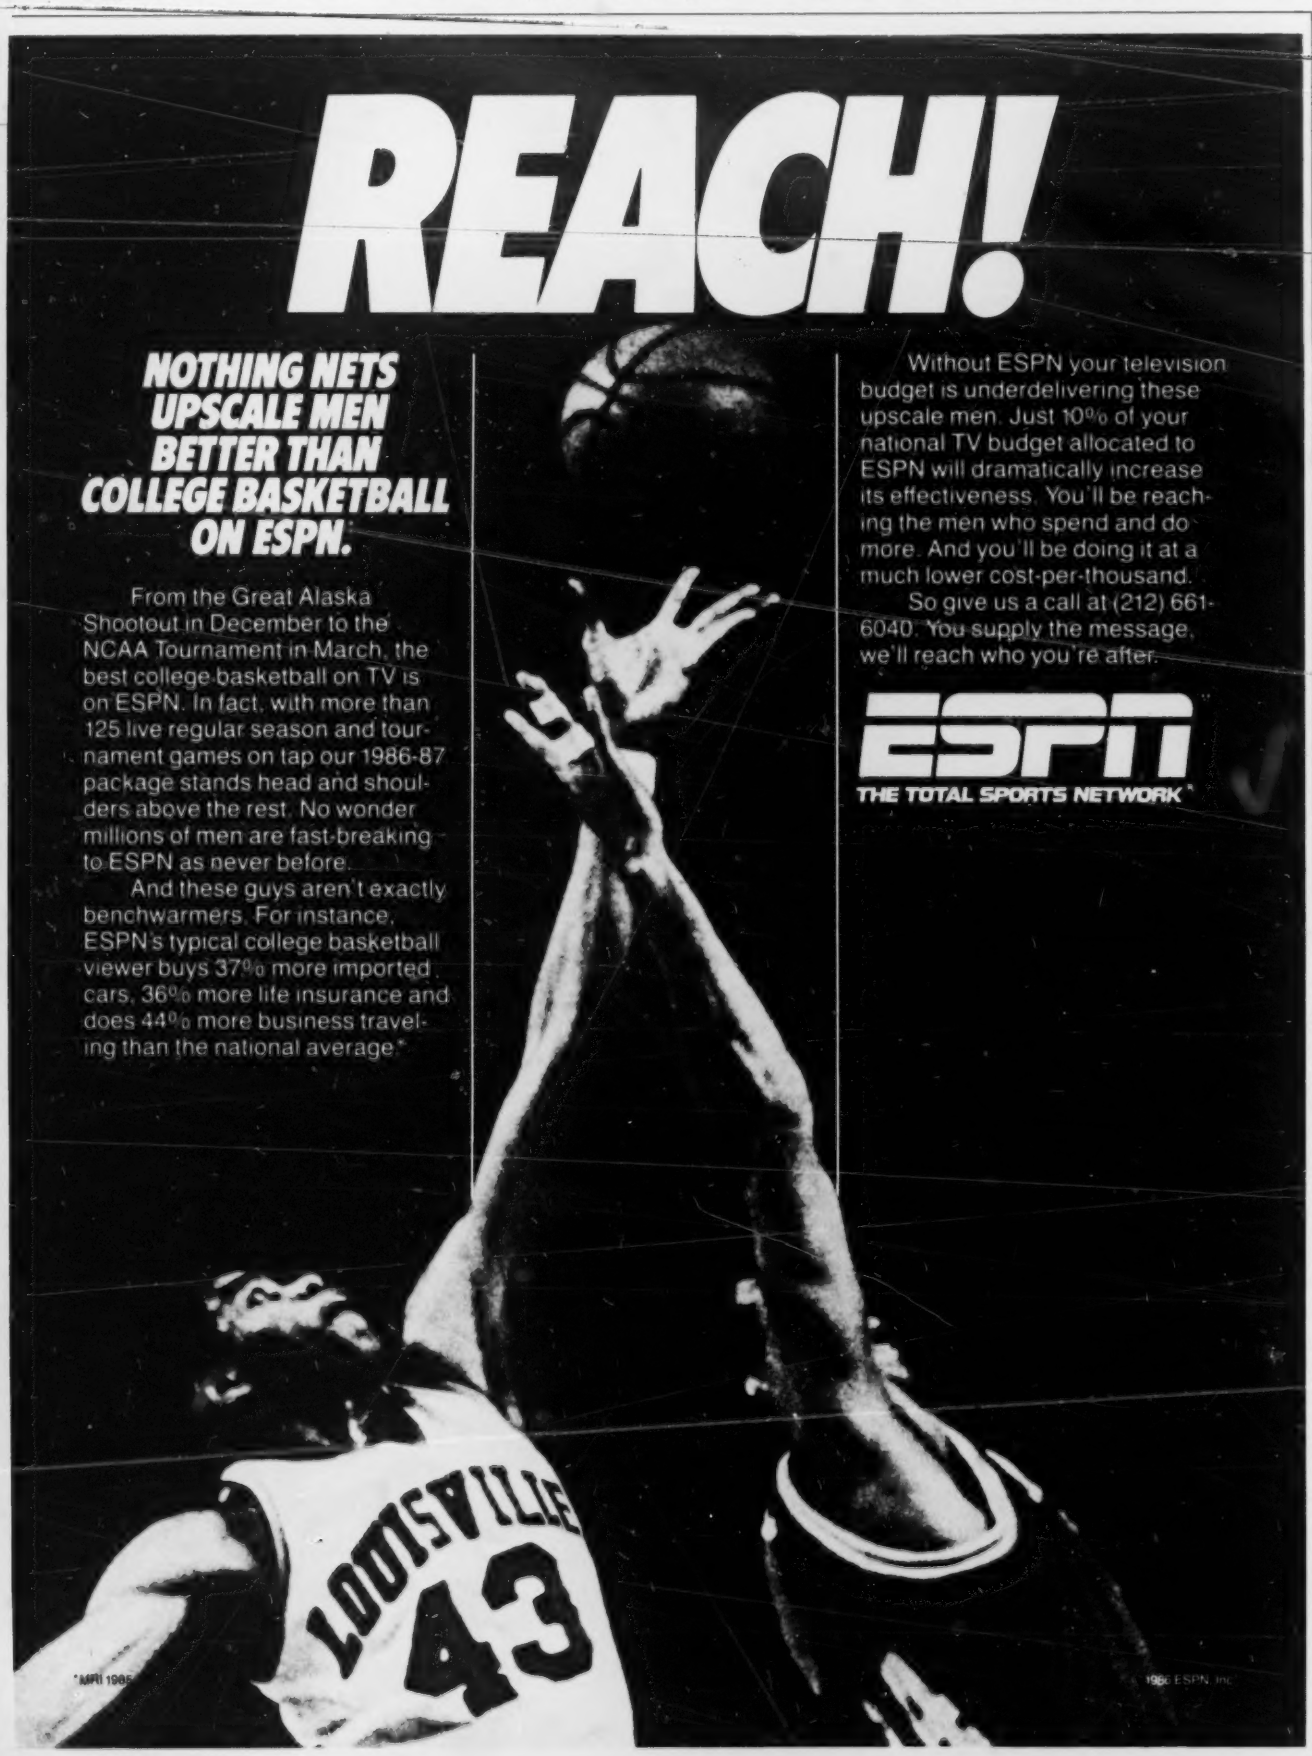
This compares to the three-network revenue projection of $8.7 billion. But by 1995, Kagan Associates sees ad-supported cable networks grossing $2.8 billion with another $1.2 billion generated by local systems.

"[Growth in ad revenues] is a big step toward moving cable into the mainstream," says United's Ms. Durborow. "But we also have lots of other challenges. We need to mass-market cable so it becomes the norm.

"We'll have to be real, live marketers. We used to be guaranteed a profit. Now we'll have to be market-sensitive, get a handle on price value and run the business more efficiently."

That doesn't sound impossible. Some businesses, such as banking and airlines, have flourished under deregulation; others, on the other hand, have stumbled and never recovered.

"Cable technology has to be more user friendly and become transparent. The telephone is a perfect example of that. Instead of becoming more complex, it has to be easier and I think it will," says Ms. Durborow.



REACH!
NOTHING NETS UPSCALE MEN BETTER THAN COLLEGE BASKETBALL ON ESPN.
From the Great Alaska Shootout in December to the NCAA Tournament in March, the best college basketball on TV is on ESPN. In fact, with more than 125 live regular season and tournament games on tap our 1986-87 package stands head and shoulders above the rest. No wonder millions of men are fast-breaking to ESPN as never before.
And these guys aren't exactly benchwarmers. For instance, ESPN's typical college basketball viewer buys 37% more imported cars, 36% more life insurance and does 44% more business traveling than the national average.*
Without ESPN your television budget is underdelivering these upscale men. Just 10% of your national TV budget allocated to ESPN will dramatically increase its effectiveness. You'll be reaching the men who spend and do more. And you'll be doing it at a much lower cost-per-thousand.
So give us a call at (212) 661-6040. You supply the message, we'll reach who you're after.

Cable tests hot-wired to consumer preferences

By Judann Dagnoli

More than a decade after the first satellite-delivered programing, cable tv is still struggling for legitimacy as an advertising medium.

It still has trouble attracting national advertisers. Only 1.2% of the $35.5 billion in media billings placed by the top 500 U.S. ad agencies in 1985 went to cable, as opposed to 26.6% to network tv. (AA March 27, 1986.)

But by creating its own programing, lobbying for standardized channel positions, promoting specific rather than generic programs and working toward a fair and acceptable audience measurement system, the cable industry hopes to improve its image and its position.

It is trying to turn what has generally been considered a negative—its narrow reach—into a positive. Cable has always been touted as a vehicle that can reach specialized demographic groups, and advertisers are beginning to see that kind of narrow reach as a bonus in testing commercials.

If you are a cable tv subscriber living in one of the country's major test markets, for example, chances are the commercial you might watch for V-8 vegetable juice during your favorite soap opera is really a test spot for Campbell Soup Co.

The Camden, N.J. marketer is one of several consumer products giants, including Bristol-Myers Co., Colgate-Palmolive Co., Gillette Co., Johnson & Johnson and Procter & Gamble Co., that uses cable as a testing ground for its advertising.

Through research services such as Chicago-based Information Resources and ASI Market Research, a New York-based unit of IDC Services, major marketers are now using cable to experiment with variables such as frequency, copy impact and media mix.

Cable systems can be used to single out markets where an advertiser may have a low market share or a regional problem such as a strike. Advertisers can experiment with different approaches to find the best mix on a regional basis before moving a program nationally.

In a test for product seasonality, Campbell accelerated advertising for its hot soups in selected cable markets during the summer, says Tony Adams, director-marketing resources and planning.

Campbell, which has worked with IRI for the past five years, also has used different copy treatments and frequencies on cable systems to target soup consumers like children, he says.

Cable tests can also be used to measure the effectiveness of commercials. ASI, which lists ABC, Alberto-Culver Co., Chesebrough-Pond's, International Business Machines and NBC as clients, runs two services: Recall Plus, which measures day-after recall of tv commercials and gives an in-depth assessment of the commercials' performance, and Apex, which determines the ability of a commercial to motivate and persuade viewers.

The company inserts commercials into half-hour family-oriented programs aired during prime time on cable systems. The spots are tested in two different areas of the country in samples of 100 randomly selected households for each location. Interviewers will then call those households to determine recall.

A.C. Nielsen's ERIM Testsight Service, Deerfield, Ill., combines cable and over-the-air testing. In two test markets, with an eventual goal of ten, ERIM tests media plans for clients and measures results with scanner information at supermarkets. "Basically, we are testing a commercial response in relationship to household purchases," says Laurence Gold, vp-marketing, Nielsen Market Research.

In the ERIM system, a marketer substitutes test commercials in place of those spots that would ordinarily appear in its customary media schedules. A control group views the company's regular spots, and a test group views only the test spots. Both groups are issued cards to present at checkout counters so Nielsen can determine how purchasing decisions were influenced by the spots, Mr. Gold says.

ERIM recommends about a year for a test, he says. "Advertising, typically, takes a long time to work, unlike promotion, where there is a high jump in sales right away." The system also can test promotions, he says.

With the Nielsen system, Mr. Gold says, an advertiser can test several marketing plans. For example, it can determine whether Plan A—a heavy frequency and couponing program—or Plan B—a normal advertising schedule with a heavy run-of press in newspapers—sells the product better.

The ERIM system is designed for broadcast as well as cable households because cable-only delivery offers "a large potential

Disney Channel no fantasy

By Wayne Walley

Disneyland is often labeled the happiest place on earth, and now The Disney Channel in Burbank, Cal., is being similarly described.

Launched in April, 1983, the premium service stumbled, tripped and crawled through its first two years, but then mushroomed into the fastest growing pay tv channel in the country, despite competition from videocassette recorders and movie rental stores, cable's pay-per-view and the other pay services.

As of Jan. 1, 1986, the channel had 2.55 million subscribers, up from 1.65 million in 1985, and 3,000 cable operator affiliates, about 500 more than in 1985. It could pass both Cinemax, New York, (3.7 million subscribers) and The Movie Channel, New York, (3.2 million) later this year. (Time Inc.'s Home Box Office, New York, the oldest and most established pay service, has 14.6 million subscribers while Viacom's Showtime, New York, has 5.4 million.)

But while the other pay channels face the upcoming deregulation of the cable industry with uncertainty, The Disney Channel anticipates continued growth.

"We're a different product," says Stephen Fields, vp-consumer marketing, The Disney Channel. "We don't rely on movies. We have fresh programing, and we want to be the best family-oriented service."

Despite its "Disney-is-for-children" image, research proves the channel is bridging any generation gaps. At least 33% of Disney Channel subscribers do not have children under 12; 35% of its subscribers are age 40 and older. And, compared to the percentage of tv households with a videocassette recorder, twice as many Disney Channel households own one.

A customer satisfaction survey in early 1986 found 94% believe the channel is as good or better than expected and 96% were likely to continue subscribing for six months.

And it's not counting on just Mickey Mouse appeal, either.

"For three years we relied on the Disney library and played the titles many times, but now we're more unique," says Mr. Fields.

"We're the exclusive outlet for new Disney movies. We'll have future showings of the different Disney Sunday movies first aired on ABC. We have original series like 'Danger Bay,' new miniseries such as 'Disney's Return to Treasure Island' and

for distortion [of results]," Mr. Gold says.

Because only 45% of all U.S. households are wired, cable is not a true measure of the nation's tv households, he says. And cable-subscriber purchasing patterns are different from the norm because cable subscribers tend to be more upscale than the average tv viewer.

They also watch less network tv, he says. According to the Cable Advertising Bureau, New York, during the second quarter of 1986, viewing of network affiliates in cable households was 28 hours and 57 minutes per week, while network viewing by non-cable households was 31 hours and 8 minutes during the same time frame.

Cable's testing capabilities are not limited to commercials. It is also used to evaluate, and sometimes create, new programing.

Bruce Rosenblum, senior vp, Lorimar-Telepictures, Los Angeles, says his company used cable not just to test, but to develop its "Thundercats" children's cartoon last year. Using ASI Research, L-T aired a six-minute video that gave a rough description of the show's characters and a sketchy plot outline on six cable systems.

ASI contacted viewers in the areas served by the cable systems and queried them about the concept. The response enabled L-T to shape the program accordingly to what the children found most appealing.

Of those interviewed, 90% found the concept clever and imaginative, he says, adding that the usual positive response range is around 75%. More than 70% of the interviewees indicated they would watch "Thundercats," Mr. Rosenblum says.

While proving the show's popularity made the test cost-effective—launching a show could have cost L-T $15 million—the results also provided ammunition for L-T's claim to both stations and advertisers that the show would be a sure-fire hit, Mr. Rosenblum says.

Last month L-T tested "Down to Earth," a family sitcom recently acquired from Atlanta-based Turner Broadcasting System. The program was tested in a theater with an audience of "diehard" network sitcom viewers, Mr. Rosenblum says, because cable-produced programing tends to be seen as inferior to broadcast programing.

The program tested behind "Family Ties" and "Growing Pains," but ahead of "Silver Spoons."

That test "helped us sell the show to stations that may not have thought it was the same quality [as a broadcast show] because it aired on cable," he says.

The results showed advertisers they could reach children with a syndicated show rather than with a more expensive network buy. "Advertisers were forced to rethink their position," Mr. Rosenblum says.

Cost efficiencies also are the goal of major advertisers in testing commercials. Cable testing can save an advertiser 20% to 50% more than other testing methods, Campbell's Mr. Adams says. A test of six combinations of ad schedules on a cable system might cost only $300,000, he says—about the price of one spot on the Cosby show.

In addition, testing is being used by local cable systems to attract advertisers. Robert Owens, president-chief executive officer of Owens Cablemetrics, New York, and previously vp-general manager of Arbitron Ratings, has set up an electronic questionnaire on local origination channels.

Called RIVAC, Respondent Interviewing Via Access Channel, it operates in conjunction with eight or nine multiple systems operators in New York, Connecticut, Texas and Kansas.

Subscribers are provided a diary in which they record their responses to questions asked by a videotaped interviewer.

The cable system uses the results to sell ad time. For example, a local video store could be provided with information about the number of videocassette recorder owners in the cable area.

Cable capablilites and demographics are increasingly utilized to answer the questions facing advertisers in a segmented marketplace. "Target marketing is as yet an imperfect science," ERIM's Mr. Gold says. But the kind of information that research services can supply is invaluable in determining what motivates consumer spending. ■

more. We're also using non-Disney shows which fit in with the programing—Dr. Seuss shows, several 'Peanuts' specials, 18 Shirley Temple movies and some Bob Hope 'On The Road' films."

Original shows constitute at least 35% of The Disney Channel schedule and another 45% of its programing also is unavailable elsewhere.

At the same time, The Disney Channel is a leader among pay services in repricing itself so affiliates can offer it at a reduced rate, giving subscribers a better value for the money. (Pay services normally cost between $10 and $12 per month, but some operators can slash The Disney Channel's retail price to as low as $6 per month.)

Disney hopes to reduce costs to cable operators and to subscribers across the board because, Mr. Fields says, "In every case where the retail price has been reduced, it's increased the profitability—dropping prices always brings in subscribers."

The lower cost also helps the channel's marketing and promotional campaigns, another area in which Disney is on the cutting edge for cable tv. In November, the channel offered a national seven-day free preview in more than 20 million cable homes and will start its free installation and free first month program in January. ■

Turning the corner

Future brightens for net tv, magazines

By VERNE GAY

NEW YORK—Major media—particularly the Big 3 tv networks and consumer magazines—may once again be on the brink of a significant growth year.

After a year of declining ad revenues and nagging doubts about the future, several signs now point to renewed optimism in both net tv and magazines. As the bedrock media for most national advertisers, these are the businesses that suffered the most during the latest slowdown in ad spending.

The change appeared suddenly last week.

In tv, a strong network scatter market emerged—as it traditionally does after the Thanksgiving holiday—when more than 50 advertisers reportedly began shopping for $150 million in first-quarter inventory alone.

What makes this new buying activity especially noteworthy is the way buyers are approaching the market. Last week about a dozen advertisers—including

Retailers put restrictions on Discover

By LAURIE FREEMAN and PATRICIA STRNAD

Sears, Roebuck & Co.'s all-out effort to convince other retailers to accept its Discover Card is running into trouble during this vital Christmas shopping season.

While Sears is spending heavily to promote the year-old card, rival credit card issuers are responding to the challenge, the threat of federal restrictions has been raised and some of Sears' targets among the retailing community are wary about how Sears handles Discover-generated customer data.

"This season marks a major turning point [for the Discover Card]," said a retailing industry source. "If Sears doesn't make a major breakthrough this Christmas season, their credibility is going to be hurt."

Analysts credit Sears with quickly building an impressive base, with 8 million consumers now carrying the card and 480,000 outlets honoring it. San Mateo, Cal.-based Visa International has 93 million cards in circulation, topping New York-based MasterCard International (72.4 mil-

Unilever deal triggers Amer. Brands search

By PAT SLOAN and NANCY GIGES

Rebuffed by Chesebrough-Pond's, which turned to giant Unilever as a white knight, American Brands is still after a major acquisition, sources say, and Gillette Co. may be among the candidates.

Reports that American Brands was interested in the Boston-based toiletries marketer, which only two weeks ago successfully fended off an unwelcome bid from Revlon Group (at a cost of $558 million), surfaced as Gillette's stock jumped $6.75 in heavy trading Dec. 4. Hanson Trust PLC, a British company, was also rumored to be interested in Gillette.

Gillette declined to comment on rumors and recurrent reports that it's considering selling 20% of its stock to Ralston Purina Co. It also had no comment on reports that in the wake of the Revlon attack it had approached Colgate-Palmolive about a possible merger.

Gillette wasn't the only company not talking. In a churning mergers and acquisitions market, American Brands would neither confirm nor deny its interest in Gillette.

Also, reports resurfaced that Revlon chairman Ronald Perelman was interested in American

Highlights

Media picture brightens 1
Major media—particularly the Big 3 tv networks and consumer magazines—may once again be on the brink of a significant growth year.

Sears discovers obstacles 1
Sears, Roebuck & Co.'s all-out effort to convince other retailers to accept its Discover Card is running into trouble during this vital Christmas shopping season. While Sears is spending heavily to promote the year-old card, rival credit card issuers are responding to the challenge, and the threat of federal restrictions has been raised.

Ship comes in at Lands' End 4
Lands' End has remained hidden from public scrutiny, but the direct-mail outfitter, founded by former Young & Rubicam copywriter Gary Comer, went public in October and opened its books for the first time. The company's success, including a 9.5% profit margin, startled even veteran catalog retailers.

Shandwick buys U.S. shop 6
The U.K.'s Shandwick public relations group is moving to grab a share of the U.S. and global pr markets in the latest example of foreign communications companies moving aggressively into the U.S. Shandwick, the U.K.'s largest pr agency, last week purchased Henry J. Kaufman & Associates, a 57-year-old Washington advertising and pr agency.

Quaker loves those Tender Chops 24
Quaker Oats Co. is replacing its slumping Ken-L Ration Love-Me-Tender Chunks dry dog food with Tender Chops. It plans to back the new, dual-texture pet food with a $25 million advertising effort.

Griffin Bacal rallies to Commodore 59
Griffin Bacal's challenge will be to convince consumers and Wall Street that Commodore International Ltd. has turned the corner on financial stability when the agency takes over the troubled computer marketer's account Jan. 1.

SAGE vision for Europe 67
Ogilvy Group's new SAGE Group marketing consulting business is coming to Europe in January. SAGE, launched in the U.S. in September, is a marketing consulting business focusing on product movement at the retail level.

FEATURES

McNuggets of a success story 41
In an excerpt from "McDonald's: Behind the Arches," author John F. Love explains how McDonald's tries to avoid wasted resources and multiple advertising messages by bringing the local advertising agencies into corporate planning. Twice each year, McDonald's meets with principals at all 65 agencies and with members of the Operators National Advertising Fund committee to thrash out new marketing plans and review current ones.

INTERNATIONAL

Lintas, Hakuhodo explore stronger ties 52
SC&B:Lintas, part of the Interpublic Group of Cos., and Hakuhodo International, Japan's second-largest agency, are looking for new ways to strengthen their relationship. They work together worldwide by stationing representatives from each agency in the other's office, but now are looking at a joint venture similar to DYR, the joint venture of Young & Rubicam and Hakuhodo's rival, Dentsu.

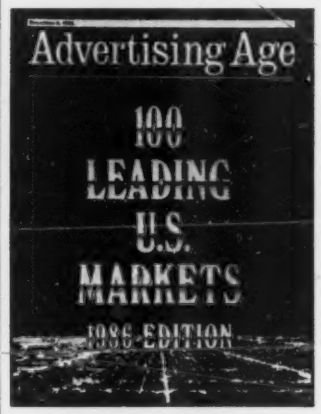
OTHER NEWS

The yearlong price war between producers of Sunday newspaper freestanding inserts may be nearing an end as the result of two developments: Valassis Inserts, the leading producer, changed hands last week, and Product Movers, the industry's No. 2, made an unsolicited tender offer for No. 3 Quad Marketing. Page 3.

The successful simultaneous release of a Spanish-language version of the animated feature film "An American Tail" could change the way Hollywood markets some of its movies. Page 12.

Ski resorts are plowing into segmented marketing to corral everyone from children to businessmen. With national skier days remaining constant at about 52 million per season, resorts must fight to increase market share. Page 56.

Despite their high price tags electronic toys appear to be replacing fantasy items as hot sellers this Christmas. Care Bears, Rainbow Brite, Masters of the Universe and GoBots—best sellers of Christmases past—appear to face impending doom as toy marketers become technology-driven. Page 65.



ADVERTISING AGE profiles the nation's 100 leading markets based on U.S. Census population and provides a sense of each one's character, media and market competition, top businesses, unemployment rates, consumer habits and plans for economic growth.

SPECIAL REPORT

Special Report will return Dec. 15 when it focuses on Healthcare Marketing.

CBS braces to hold line in Super Bowl

By ROBERT RAISSMAN and LARRY G. COLLINS

NEW YORK—CBS-TV is trying to hold firm on its $600,000 per 30-second rate in the Jan. 25 Super Bowl, but sources say so far at least 17 of last January's advertisers will not be participating in the football championship.

CBS-TV vp-sales Jerome Dominus denied reports that the Super Bowl and its pregame and postgame shows remained only 60% sold out just six weeks before kickoff. Last year, NBC had a Super Bowl sellout before December.

Mr. Dominus said CBS' sellout status was "much higher" than 60%, but he declined to be specific.

He also denied widespread reports that CBS was offering packages that include the game and the warmup and postgame shows, with an average 30-second unit costing $550,000.

Some buyers also had said CBS was offering packages that included National Football League playoff games. Mr. Dominus conceded that "there may be some [price] shaving" on the pregame show.

Agency buyers doubt that CBS is close to a sellout, especially since the usually heavy automotive and beer sponsorships have not materialized.

Chrysler Corp.'s Dodge division and American Honda Motor Co. reportedly have each purchased a single 30-second spot in the game, but the car category usually covers four-to-six Super Bowl minutes.

In the beer category, Anheuser-Busch has bought two minutes in

Saatchi touts year's growth

By STEWART ALTER

Saatchi & Saatchi Co., in its first official statement concerning client conflict fallout, ran a newspaper ad last week acknowledging it lost $400 million in billings after its acquisition of Ted Bates Worldwide earlier this year.

But Saatchi said its losses were more than made up, with many of the gains coming from the same clients that earlier withdrew business.

In its two-page newspaper ad, which appeared Dec. 5, London-based S&S said: "Though the total value of business transferred, almost $400 million, has produced a number of gory headlines, it represents only around 5% of total group billings, and has been more than compensated for by over $400 million of new business gained within the group in the same period, including major assignments from Procter & Gamble, RJR Nabisco, Xerox, Mars and Renault."

P&G, RJR Nabisco and Mars were among the major clients that withdrew business from Saatchi units as a result of acquisitions.

The ad, which appeared in the *New York Times* and *Wall Street Journal*, basically presented the results of Saatchi's fiscal year ended Sept. 30. Pretax profits rose 73% to $103 million in the period, during which it acquired Dancer Fitzgerald Sample, Backer & Spielvogel and Bates.

The full financial results, released the previous day, reported that revenue rose 47.2% to $652.7 million and net income rose 64.8%

West Coast News

BJK&E keeps hold on Alpha Beta account

LA HABRA, CAL.—American Stores' Alpha Beta division has renewed three-year incumbent Bozell, Jacobs, Kenyon & Eckhardt, Los Angeles, as agency for its $14 million broadcast account. Separately, Von's Grocery Co., El Monte, has given Keye/Donna/Pearlstein, Los Angeles, the account for its newly formed Pavilions "superstore" grocery division. That agency already handles Von's Jerseymaid dairy unit. The appointment follows rumors that Grey Advertising's hold on the $10 million-to-$15 million Von's general-market broadcast account may be shaky. Earlier, Von's reviewed agencies, including K/D/P, but eventually reappointed Grey (AA, March 24).

LOS ANGELES—**Asher/Gould** has let go vp-media services Lou Podover after less than six months in the post.

SAN JOSE, CAL.—**Altos Computer Systems** has added two more agencies to the review of its $2 million account, currently unassigned. Pinne, Garvin, Herbers & Hock and Transphere International, both San Francisco, join seven others vying for the business (AA, Nov. 17). Brooke Battles, former director of marketing at Mountain View-based Activision, has been named director of marketing and communications at Altos, succeeding Beth Hornthal, who left mid-review to become a consultant.

SAN FRANCISCO—Incumbent agency **Lowe Marschalk** has pulled out of the review for the estimated $2 million New Zealand Kiwi Fruit Authority account. Goodby, Berlin & Silverstein also has dropped out. Mojo MDA-Allen & Dorward remains one of the contenders.

100 Markets diversify for growth

Los Angeles narrows leadership gap with New York; population shifts to sunnier climes but so does unemployment

By R. CRAIG ENDICOTT

The thing about fads, even industrial ones, is that they fade away. Today San Joseans are down on their chips in the depressed Silicon Valley. Yesterday, the big smokestack industries of the Midwest were rolling steel for worldwide distribution only to lose a good part of that market.

This churn effect defining industrial turnover is a dominant theme in Advertising Age's triannual 100 Leading Markets issue. Some of the patina has come off the rust belt, while a few Sunbelt markets have proven anything but an the elixir to the jobless, or the seeker of a more laid back lifestyle. Crude oil may have lost its Midas touch, but markets that rely on it are sure to bask in its fortunes again.

The population churn—the exodus from the Midwest to the South, southwest and Pacific coast—has meant lower unemployment in those vacated areas in general. It also has meant jobless rates in three of the five Sunbelt markets higher than the Midwest's 7.3%. Of the 13 cities in this issue with negative growth in population between 1980 and 1985, 12 are in the upper Midwest.

The 100 list, which is based on U.S. Census population totals, is led by New York with 8.5 million people, up 2.3% from 1980. But Los Angeles-Long Beach is closing fast with 8.1 million, up 8.4%. It has made up half the distance that it trailed New York in the last Ad Age 100 leading markets issue in 1983. Chicago is a distant No. 3 with 6.2 million, up 1.9%. LA-Long Beach, however, is $12 billion ahead of the other two in total retail sales with $49.9 billion in 1985, up 26.3% from 1982, according to data supplied by Marketing Economics Institute, which also ranks LA-Long Beach No. 1 in growth in disposable income among the 100.

Absent this issue are the Michigan MSAs of Saginaw-Bay City-Midland and Lansing-East Lansing. Represented as a single market for the first time is Kansas City, Missouri and Kansas, leaving three vacancies that were filled by Bakersfield, Cal. (No. 91), Columbia, S.C. (No. 97) and Wichita (No. 98), with population growth rates of 19.3%, 7.2% and 5.7%, respectively. Bakersfield, in fact, is ranked No. 8 among the 100 in population growth behind No. 1 Austin, Tex., which recorded a 29.6% growth from 1980.

Markets in which certain industries have become dominant are beginning to confront the churn factor sooner than later. Their antidotes to reliance on oil, computers, hi-tech, rubber, textiles, etc., include several options: Diversification—generally another expression for white collar, service sector jobs; loans to lure retailers downtown; regional growth planning that supplants the helter skelter of home rule; business consortiums selling a city's strengths; and advertising campaigns designed as much to generate local enthusiasm as to attract outsiders.

Houston is facing its worst crisis since Sam Houston won the big one at Buffalo Bayou on the San Jacinto east of town. While the issue was independence from Mexico then, it is oil now. A Houston sociologist's description of the city's problems as a "weeding out process" seems pretty much on target. That process is thinning out the more marginal players in the petrochemicals industry in a city growing increasingly service-minded. Pittsburgh has rebounded from its depression in much the same way. Antiquated mills have been shut and 80% of new jobs—usually white collar—are created by employers with less than 20 workers.

Houston's large service-sector economy has helped hold down unemployment to 10.5% in September, while the big petrochemical centers surrounding it have jobless rates reaching 14.2% (Beaumont-Port Arthur). Houston is rallying local citizenry through the "Houston Proud" ad campaign.

"Crisis-management" has been prevalent in the big markets of neighboring Louisiana where the state once thought its oil-driven economy recession-proof. New Orleans, where unemployment is 10.8%, is trying to offset a $30 million budget deficit. It laid off workers this year and then reduced salaries by cutting the work week among other employes to four days. Now the city is considering assessing a 1.5% earnings tax on salaries above $5,000 for all employed within the city.

The ripple effect of the drop in oil prices from $30 to $10 a barrel has been devastating to Louisiana's capital city, Baton Rouge. A state deficit estimated as high as $500 million has forced the state to trim the payroll by giving workers an extra two days off per month without pay—and 20,000 of those workers live in Baton Rouge. Local sales-tax receipts continue to drop precipitously since they fell 9% in 1984 from 1983. Another $10 million budget shortfall is anticipated for 1987. Only Houston leads Baton Rouge in the rate of increase in bankruptcies among the top markets.

Denver, a big oil and gas center, suffers from downtown vacancy of 29.3%, one of the highest in the nation (18.3% is average). Houston, too, is overbuilt. Multi-family housing is 18%-20% vacant, office space, 26% vacant, and hotel occupancy, 68.2% in 1981, has dropped to 46.8% for the first nine months of this year.

Hi-tech, one of the hot industries cities are searching out, is not everyone's answer. Just ask the many San Jose residents facing a mortgage on their $143,000 (median price there) ranch-style homes who are laid off of work from their Silicon Valley computer jobs. Real estate officials there accuse many desperate landlords of "robbing from next year's market" by offering to pay off a company's current lease if it becomes their tenant.

RANK **17**

Anaheim-Santa Ana, Cal.

Tomorrowland

($ in thousands)

1985 vital statistics

Population	2,122,700
Disposable income	$34,644,916

The "Big Orange" and "Orange Riviera" are just a couple of the sobriquets Southern California boosters have used to describe burgeoning Orange County. Some, calling up the obvious Disneyland connection in this Anaheim-Santa Ana MSA, have dubbed it "Tomorrowland . . . Today," still others, facing its horrendous traffic jams daily, curse it as a commuter's nightmare.

Orange County, which fronts 42 miles of coast between Los Angeles and San Diego counties, has emerged as Southern California's richest market. By any measure, it's also one of the most important markets in the nation. In buying power, its 2.1 million residents command an annual disposable income pegged at $31 billion. Effective buying income per household is $41,819, compared with $34,782 for neighboring Los Angeles County and the $35,666 average for the state.

Orange County's agricultural economy is a thing of the past, but the county still is dubbed the amusement park capital of the world. It was home to John Wayne, who has been memorialized by John Wayne Airport, serviced by 11 major airlines and 79 flights a day. The busy airport will not be able to handle the numbers of passengers projected for the years ahead, and points up the county's need for an overhauled transportation system.

This affluent marketplace is served by an abundance of media, allowing advertisers to choose from 13 tv stations, cable tv systems, 60 radio stations, 20 magazines, nine daily newspapers and 32 weeklies. No newspaper blankets the 750,000 households in Orange County, but the *Orange County Register* (circ. 288,927 daily and 325,650 Sunday in the county as of Sept. 30, 1986) reaches more than any other.

Santa Ana-based *Register* is the flagship of the 32-paper Freedom Newspapers chain. In recent years the paper has been transformed into an aggressive daily, creating what may be the best full-color reproduction in the nation. It competes effectively against the *Los Angeles Times*, which offers an Orange County edition with a weekday circulation of 163,315 and 207,504 on Sunday. The *Times* offers a $24.87 cpm daily for a full-page compared with a cpm of $18.85 daily for the *Register*.

Explosive growth and new wealth have brought more problems than monumental traffic jams. Middle class housing is scarce and land and home prices are high. Cost of a three-bedroom house in Newport Beach is more than $300,000. The median price of a home as of this past spring was $142,856 countywide. With 50% of the county population earning less than the $43,841 median family income, many families can't afford to buy.

Many lay blame for high housing costs on the concentration of land in the hands of a few developers such as the Irvine Co. Developers, however, say housing is expensive because of the price of land and county building fees, costs that are forcing them to seek developmental properties outside the county.

Whatever the case, first-time homebuyers can expect to invest at least $120,000 for a modest new single-family home in Orange County, compared with a cost of $70,000 to $80,000 for a comparable unit in San Bernardino.

Incorporated in 1876 and currently home for some 237,500 inhabitants, Anaheim is Orange County's largest and oldest city and accounts for about 30% of the county's population. Four freeways converge on the city and two more pass nearby. Close proximity to Los Angeles and the Irvine/Newport Beach area makes the city a strategically located, business center. Commonly regarded as a host to tourists and conventioneers, the city is also the No. 1 employer in Orange County. Anaheim has achieved a balance between the entertainment industry, the professional sports community and the industrial community represented by "blue-ribbon companies." Disneyland is the city's third-largest employer with 3,500.

Santa Ana, Orange County's diverse and cosmopolitan county seat, is the market's only true urban city and currently is undergoing large-scale redevelopment with attendant political turmoil. A population of 225,000 is distributed over an area of some 27.2 sq. miles, not including a conservative estimate by the Immigration & Naturalization Services of an additional 40,000 undocumented Hispanic residents. Statistics show whites and Hispanics each account for 44.5% of the total population.

Main Place, under construction on 60 acres at Main and the Santa Ana Freeway, is the largest redevelopment project in the city. A cooperative venture between Henry Segerstrom and

Geographic spread of the nation's

JMB/Federated Realty Associates Ltd., Main Place is a 400,000-sq.-ft. retail complex anchored by Bullocks, Nordstrom and Robinson department stores.

More than 10,000 Santa Ana employers provide 130,000 jobs, with only 11 of the companies employing more than 1,000. The city is national or divisional headquarters for such companies as ITT, Canon, Cherry-Textron, Lear Siegler, Emerson Electric, Philips, Rockwell International and Xerox.

RANK **10**

Atlanta, Ga.

Hotlanta

($ in thousands)

1985 vital statistics

Population	2,471,700
Disposable income	$32,367,246

The one-line joke first appeared in a 1938 newspaper column as a comment on the enormous amount of train traffic through Atlanta. But that was before commercial aviation became a $1 billion-a-year industry in Atlanta. Now, everyone who has ever landed at Hartsfield International Airport knows: "If you die in the South, it doesn't make any difference whether you're going to heaven or hell—you have to change planes in Atlanta."

Behind the joke is the unassailable fact that Atlanta continues to grow as the transportation and communications hub of the Southeast.

Delta Air Lines has its headquarters in Atlanta and Eastern Airlines, which has been acquired by Texas Air, has a major hub and jet maintenance base here. Last year, 21.6 million passengers enplaned at Hartsfield, making the airport the second busiest in the world to Chicago's O'Hare. By the end of this year, Hartsfield expects to load 22.5 million.

Many of those passengers had come to Atlanta for conventions. In 1984, the city played host to 1.1 million conventioneers who spent an estimated $469.5 million. Last year, that grew to 1.5 million spending $634.5 million.

More than 35,000 people work at the airport. Delta is the largest non-government employer, followed by Lockheed-Georgia, General Motors Corp., Bell South/Southern Bell Telephone & Telegraph Co. and Rich's Inc.

The city has become a communications and technology hub. In addition to Ted Turner's Superstation WTBS, Cable News Network and CNN Headline News, Atlanta and suburban Gwinnett County are incubating a hi-tech community which includes Scientific Atlanta, maker of satellite systems, Hayes Microcomputer Products, a producer of modems, and Digital Communications Associates.

Atlanta, whose retail market grew 13.7% from 1984 to 1985, is ranked 10th in the country in total retail sales, notes a study by the New York-based Buying Power Data Service. Retail wage and salaried employment represent 18% of the city's work force.

Adding to the Atlanta retail growth is a full-scale invasion by Minneapolis-based Dayton-Hudson Corp. Since September, 1985, D-H has opened four Branden's housewares, linens and home accessories stores, five new Mervyn's apparel and soft goods home furnishings stores and four Lechmere electronics and appliance stores. Until last year, D-H's only presence in Atlanta had been 11 B. Dalton Bookseller stores—most in suburban malls.

The biggest growth area in Atlanta is commercial real estate. In July 1986, non-residential building permits were running at an annualized rate of $1.418 billion, up 4% from 1985. Atlanta's commercial building is nearly equal to all of the commercial construction in the states of Alabama, Louisiana and Mississippi combined.

As a result of Atlanta's commercial building boom, the major action in Atlanta's media has been in the business press. In September, 1985, *Georgia Trend*, owned by St. Petersburg, Fla.-based Times Publishing, began monthly publication. *Georgia Trend* challenged the established monthly *Business Atlanta*, published by Atlanta-based Communications Channels and the weekly tabloid *Atlanta Business Chronicle*, sold in November by Scripps Howard Newspaper Alliance to American Cities Business Journals. All three publications have had a banner year in 1986.

In Atlanta's static daily newspaper market, the *Atlanta Constitution*, published mornings, and the afternoon *Atlanta Journal*, are both owned by Atlanta-based Cox Enterprises and have continued for several years to hover at a combined daily circulation of about 400,000.

The tv market, however, is in ferment. In 1980, Cox-owned WSB-TV, which dominated the market since the day it signed on in 1948, changed network affiliation from NBC to ABC. Longtime ratings loser WXIA, which had been the ABC affiliate in Atlanta, was stuck with NBC. Now, the move doesn't look so good for WSB. ABC is in decline from the ratings summit, opening the door to both WXIA and CBS-affiliate WAGA. WXIA now claims it has more total daily viewers than either of the other two stations. A.C. Nielsen shows WAGA as No. 1 sign on to sign off during October with a 10 rating, 25 share while WXIA is No. 2, at 9/22, and WSB, at 9/21.

In the 6 p.m. news slot, there is a near dead heat with WAGA leading, followed closely by WSB, WXIA, well

100 Markets

(Continued from Page S-2)

A slowdown in the electronics industry nationwide has left 1,300 unemployed in Phoenix, pushing unemployment to 4.8% from a mere 2.8% in 1985. The 3.7% jobless in Minneapolis-St. Paul are largely laid off from Control Data and Honeywell. Boston has over 7,000 jobless electronic's workers that contribute to 4.3% unemployment statewide.

Most markets have developed or organized growth incentives. Wilmington, Del., lured Chase Manhattan, Citicorp, Manufacturers Hanover Trust and J.P. Morgan among 24 financial institutions because of legislation passed five years ago that offered tax breaks and relaxed rules on credit card interest rates. In the process, this created 8,200 more jobs, contributing to Wilmington's low 4.6% unemployment rate and the state's 3.9%.

Newcomer to the 100 list, Wichita, a market with blue-collar strength tied largely to airplane manufacturing, is expecting continued growth through its ability to offer tax exemptions for up to 10 years for certain businesses.

Broad-based growth is being pushed in rapidly developing Middlesex-Somerset-Hunterdon region of central New Jersey. Economists say jurisdictional oversight is needed to replace home rule to foster careful planning without choking off growth in the area, which is rapidly becoming more congested as the New York City sphere of influence fans out. An Indiana Legislature study recommended that the fragmented cities of northwest Indiana (Gary-Hammond area) be incorporated into a single city called Metrolake to enhance development.

The Fort Worth Corp., a private consortium of businessmen, was formed several years ago to help the city shake off its trail dust image. The group launched a $500,000 campaign in 1985 called "Fort Worth, Welcome Home." Columbia, S.C., through a $2.2 million, four-year economic development campaign, "Columbia In Motion," is saying Columbia is no longer a sleepy southern town that flies the Confederate colors. It is a hi-tech area—the 16th fastest employment growth center in nation, according to Chase Econometrics—with only 5% unemployment, and a cosmopolitan southern city that still flies the Johnny Reb above the Capitol.

Harrisburg, Pa., offers an enterprise zone to lure new business downtown. Akron is beckoning retailers downtown by offering $15,000 in matching startup grants under its Main Street Initiative Program. This former rubber capital has launched the Akron Plus Campaign to create 26,000 jobs by 1990, many of those in Polymer Valley between Akron and Cleveland.

Cleveland, speaking of churn, no longer seems the butt of jokes, a dubious distinction it assumed from Philadelphia. Is Houston its successor?#

out of the ratings race for years, is closing the gap.

Stan Petersen, vice president and Atlanta sales manager for A.C. Nielsen, says November is likely to be a three-way tie.

Radio has become as tightly bunched as tv.

Six fms in Atlanta lead the list, with the fight between WPCH, WKLS and WZXI, according to Arbitron's spring sweeps.

Although the Atlanta Flames gave up the distinction of being the only NHL hockey team south of the Mason-Dixon line when the team fled to Calgary, Canada, the Atlanta Braves baseball team and the NFL Atlanta Falcons, have struggled with losing seasons. Only the NBA Atlanta Hawks have made the playoffs in recent years.

RANK **14**

Baltimore, Md.

Charm City

($ in thousands)

1985 vital statistics

Population	2,252,800
Disposable income	$27,157,535

A trip through the Harbor Tunnel on I-95 for someone unfamiliar with Baltimore gives the impression that the city is little more than a decaying smokestack city. At best the appraisal would be only half right.

Baltimore was born a blue-collar town with a strong base in the shipping and steel industries. And as in other parts of the country, there are plant closings and layoffs. Shipping also has become an increasingly competitive industry, and for several years Baltimore took a beating from aggressive southern ports. But the port is very much alive, and getting in shape for a long battle.

A steady growth in the service industries has offset the decline of heavy manufacturing. Unemployment in the city has eased off to 6.4% as of August, and there is only 4.8% unemployment in the metropolitan area.

Last month, William Donald Schaefer ended his 15-year reign as mayor to move into the governor's mansion in Annapolis. During his City Hall tenure, Mayor Schaefer directed a metamorphosis of the downtown area that is held up as a textbook example of urban renewal and managed to have his name painted on virtually every piece of city property from park benches to garbage trucks.

While gentrification is occurring in Baltimore, the big money is still outside the city in horse country. The native Baltimorean still drives a sedan, and most people would rather get their hands dirty with a bushel of steamed crabs than stand at an upscale eatery in Harborplace—the Rouse Co. waterfront retail project built almost a decade ago and which has become the centerpiece of the skyline and ground zero for redevelopment. The Rouse Co. has begun work across the street from Harborplace on the Galleria—an office, 622-room hotel and upscale retail (Brooks Brothers) development.

Within five blocks of Harborplace is a host of other projects that will total some 1 million sq. ft. of office space. Downtown also is slated to get about 400,000 sq. ft. of retail space in the next year.

Some real estate experts began to make noises about overbuilding when the vacancy rate hit double digits earlier this year and kept rising. A recent survey of office space released by the Office Network listed Baltimore's vacancy rate at 16.7% compared with the national average of 18.3%. Area brokers maintain the 16% level was the peak, and the vacancy rate has since backed off to about 12%.

The convention center booked 117 major conventions in 1986, which brought 225,000 delegates to town. That added an estimated $148.6 million to the local economy.

As if a convention center weren't enough to draw people to town, the city also has gone along with several entertainment projects, which some complain are turning the Inner Harbor into another Disneyland.

The National Aquarium is set to expand onto the pier next door with a huge tank for live whale and porpoise shows. Six Flags renovated a former power plant for an indoor entertainment facility that flagged miserably in its first couple of years but may be there to stay after adding a disco to its line-up this summer.

Just as it was a mall that started downtown on its way, a new regional shopping mall has started another boom town northwest of the Baltimore Beltway. Also built by Rouse Co., the Owings Mills Mall provides 320,000 sq. ft. of retail space. Saks Fifth Avenue is the anchor tenant, which is the first time this city has been able to attract that kind of name. The mall is to be connected into the Baltimore subway line through an overland extension from its terminus at Reisterstown Plaza to the southeast. The subway is a sore point for many commuters who get bogged down in traffic on the main north-south artery, Jones Falls Expressway, because the subway cuts diagonally through basically noncommuter territory. Their consternation will be even more pointed as workmen soon descend on the expressway for a massive renovation.

After struggling for years, *News American* finally closed its doors in June, 1986. That made the *Sun* the only major metro daily. But just days after Hearst folded the *News American*, the owners of Baltimore Sunpapers (*Sun*) sold their newspapers, two tv stations and other holdings to Times Mirror Co.

Sunpapers recorded record circulation in September of 440,000 daily and 507,000 Sunday, compared with a 356,000 daily average and 417,000 Sunday for the six months ending Sept. 30, 1985. Local media buyers say that various ad rates have gone up in keeping with the increase in circulation, but there also is a belief that rates will jump substantially at yearend.

Keeping the *Sun* honest are the six-day *Daily Record*, primarily a legal newspaper, and *Baltimore Business Journal*, a local business newsweekly that was part of a six-paper chain recently purchased by American Cities, Kansas City, which also bought 11 Scripps Howard business journals. Plan is to syndicate national ads.

WJZ-TV (ABC) leads the tv charts with an 8.3 rating and 27 share from sign on to sign off, according to A.C. Nielsen's May reports. WBAL (CBS) is second at 7.4/24, and WMAR-TV (NBC), third at 6.9/22.

RANK **33**

Bergen-Passaic, N.J.

Retailers' Eden

($ in thousands)

1985 vital statistics

Population	1,301,000
Disposable income	$20,367,760

"There are two favorite pastimes in Bergen-Passaic—shopping and eating," says Frank Savino, vp-marketing for the *Record*, New Jersey's largest evening newspaper, whose circulation is concentrated in this northeast corner of the state.

And although natives react negatively to any reference to the region as "a rich New York suburb," the area is wealthy and does take a lot of its lifestyle cues from its neighbor across the Hudson River.

Bergen County's desirability to those seeking New York proximity yet a suburban locale has made it a particularly expensive place to live. According to Jim Hulsizer, supervising planner for the Bergen County Planning Board, "with single family homes at $150,000, and that a handyman's special, many younger families can't afford to buy in this area." The prices in Passaic County, which is older and more urbanized, are only slightly less expensive. The median age in the area is 34.8, somewhat higher than that for the state.

Although Bergen County occupies only 3% of the state's total land, it is the most populated county in New Jersey. However, the combination of high property costs and an aging population has resulted in a population decrease between 1970 and 1980, which is projected to reverse only slightly within the next few years.

Per capita income for Bergen residents in 1983 was $17,962, ranking first of all N.J. counties. Passaic, which has a higher percentage of minority groups, was 12th in rank, with $12,636.

That wealth is not necessarily evenly distributed. Bergen-Passaic counties had their fair share of locals on *Forbes* magazine's recently published list of the 400 richest people in America. One resident, Russell Berrie (estimated $290 million), whose Oakland, N.J., firm Russ Berrie & Co. markets novelty products, recently made an unsuccessful bid to buy the New Jersey Nets basketball team.

Also weighing in at an estimated $250 million was Malcolm Borg, chairman of Macromedia Inc., the parent company of the Bergen Record Corp., which publishes the *Record*; of Macromedia Publishing Inc., which publishes the *News Tribune* of Woodbridge; and of Gateway Communications Inc., which owns four tv stations.

The *Record's* territory is inundated with small, community "shopper" papers and surrounded by other newspapers eager for a piece of the attractive Bergen market. Mr. Savino claims his biggest competition is "two little papers across the river,"—the *New York Times* and the *New York Daily News*. Nevertheless, the *Record* is making a strong push into neighboring areas. In 1984, it opened a new Passaic County headquarters, in Wayne, bringing it head-to-head with the *North Jersey Herald-News*, a morning-evening publication with combined circulation of 108,650.

While Bergen-Passaic residents are fairly dependent on New York for radio and tv coverage, New Yorkers—although often loath to admit it—rely heavily on the plethora of shopping available across the river.

Nine major malls exist in the region, five in Paramus on the major Routes 4 and 17. With more than 700 stores, they account for some 7.6 million sq. ft. of space. Clientele is well heeled. Combined, the two counties are in the top 10 in the country in median household effective buying income (EBI).

Another mall is under way on Rte. 4, called Mall on IV; Federated Department Stores already has opened a 25,000 sq. ft. Filene's Basement off-price clothing store there. A second Filene's Basement is scheduled to open just a few miles away on Rte. 17 by the end of the year.

New Yorkers are not the only ones traveling to shop; even on the seventh day, few seem to rest. Because the blue laws prohibit Sunday openings in Bergen County, many residents head for the four malls in nearby Wayne in Passaic County.

The continued boom in wholesale/retail sales is partially responsible for a continued surge in employment, although such growth is often erratic, because of the seasonal nature of the retail business. Nonfarm employment in Bergen County rose sharply from July, 1985, through July, 1986, by some 17,000 jobs, or 3.9% compared to a 2.9% statewide gain, according to the New Jersey Department of Labor.

Building activity has been especially strong over the past two years. The New Jersey Department of Labor reports that July, 1986's construction industry job count of 19,200 in Bergen was the highest level posted since record keeping began in 1960.

Among the corporate giants that have their headquarters or large operations here are A&P, Becton Dickinson and CPC International. Companies with U.S. headquarters in the area include Sony U.S.A, Sharp Electronics, Grand Union and BMW.

Within the next two years, Marriott Corp. plans to have a full-service hotel at Overpeck Corp. Park in Ridgefield Park, with 254 rooms, health club facilities and two corporate meeting rooms, at an estimated cost of $21 million. JD Construction Corp. is building a 25-story hotel-office complex on the site of the former Ford Motor plant in Mahwah as part of a $300 million "International Crossroads" project.

RANK **8**

Boston

Beantown

($ in thousands)

1985 vital statistics

Population	2,831,700
Disposable income	$55,280,138

Boston is on a roll. The New England Patriots, which call suburban Foxboro home, made an unexpected trip to the Super Bowl in January following a late season surge. That the Patriots were ignominiously mauled by the Chicago Bears did little to dampen local enthusiasm.

The Boston Celtics won the National Basketball Championship last spring, and the long-suffering Boston Red Sox realized "the possible dream"—as expressed in the local media which had called the '67 Red Sox pennant winners the "impossible dream"—by taking the American League Pennant. Even though the Bosox failed to win the World Series against the most tantalizing matchup conceivable for Boston—the New York Mets—the difference in attitude reflects the positive

changes the city has undergone.

From a development standpoint a decade-long boom continues unabated. Depending upon the government official asked, anywhere from $1 billion to $3 billion in construction is under way or imminent, and more is already in the planning stages.

Development also has spilled over into the suburbs, particularly west of the city in the Framingham/Natick area, which grandly calls itself Metro West. Development has become so intense and traffic so congested in the area that plans for an expanded General Motors production facility in Framingham were scrapped when the local authorities, under pressure from the community, hesitated at providing the necessary permits and variances carte blanche.

People are beginning to question the wisdom of continued unrestrained development. In particular, the area's transportation network is severely strained. A $2.2 billion project to eliminate the most intractable bottleneck, the Central Artery and the harbor tunnels, by depressing the elevated highway and adding a third harbor tunnel to the airport, has bogged down in Congress over funding.

In downtown Boston, traffic congestion has reached crisis proportions. More than 2.2 million people enter downtown Boston every day over much the same road network laid out in 1630, and the numbers are increasing annually. A shortage of parking spaces compounds the problem.

Unable to wait for the Central Artery/Harbor Tunnel project, the city has embarked on its own plan to aid traffic flow within the infrastructure that exists now. Aggressive towing at traffic bottlenecks has helped. The city also is making an effort to increase parking by 5,000 to 10,000 spaces at peripheral downtown locations like South Station and North Station.

The city also is trying to steer some development away from downtown, although the effort is not motivated by traffic concerns. Mayor Raymond Flynn's plans to spread the development wealth by linking downtown development with development of depressed areas appears to be progressing although the formal linkage plan itself has been challenged in court and has suffered some setbacks.

Ironically, the first efforts at linkage are occuring at a time when a secessionist movement within the depressed minority communities of Boston is gaining some momentum. A nonbinding referendum on the November ballot asked residents if they favored the creation of a separate city consisting of minority neighborhoods comprising roughly 25% of the city (non-downtown areas)—and it lost. Supporters already have named the new city Mandela, in honor of the imprisoned South African leader.

The Boston area is packed with colleges and universities, and each fall students markedly increase the city's population. The main event in education this year is Harvard University's 350th birthday. The educational establishment in the greater Boston area brings about $4 billion in revenue into the local economy. Private schools contribute $3.5 billion of this money, and $585 million comes from state-supported institutions.

The state's electronics industry is struggling through a national slump, but despite 7,000 layoffs in the computer field over the past year, the state's 4% unemployment rate is one of the lowest in the country. Other technology industries, such as genetic engineering, are starting to take off. Paul Tortelani, commissioner of the Massachusetts Dept. of Commerce and Development, predicts bioengineering will grow 300% in the next three years.

Within the media community, five tv stations have changed hands since March. Most important, Rupert Murdoch purchased WXNE-TV from Continental Broadcasting Network as part of his fourth network effort—Fox Television Stations. As a result of the purchase, Mr. Murdoch will have to sell the *Boston Herald*, which still trails the *Boston Globe*, the powerful mainstay Boston newspaper, in circulation and advertising.

Westinghouse's WBZ-TV (NBC) edged out Hearst's WCVB (ABC) for top spot in the tv market with a 7.3 rating/21 share, according to A.C. Nielsen's May report.

RANK **46**

Buffalo, N.Y.

City of Good Neighbors

($ in thousands)

1985 vital statistics

Population	971,400
Disposable income	$11,110,408

Buffalo has been referred to by those who live here as a "well-kept secret." But while its qualities may be foreign to points south, it is not an unknown commodity to the north.

The metro area, New York State's second largest, is located on the banks of the Niagara River, bordered by Lake Erie. The Peace Bridge, which joins Buffalo to Fort Erie, Ont., is the most heavily traveled border crossing in the U.S.

The proximity of Canada unofficially widens the market area to include southern Ontario. Residents there rely on Buffalo radio and tv. Many Canadians cross the border daily to make use of Buffalo area shopping malls and discount stores.

But while Buffalo is a day's drive and an hour's commute by air to 62% of the Canadian buying power and 75% of the Canadian manufacturing capabilities, 50% of the U.S. buying power is within this same perimeter.

This self-proclaimed "City of Good Neighbors," whose suburban residential and commercial areas have been on an upswing for some time, has been going through heavy urban renewal itself, and not without certain hiccups.

The city has spent $500 million on an above and below ground light rail rapid transit system, yet the system has been plagued by poor planning and management and structural problems. The main problem is that the system's 6.2 miles are not in the populated areas, but cover the nonresidential downtown area. To make matters worse, only five of the system's 6.2 miles are functional.

A mile-long pedestrian mall, dubbed Buffalo Place, is being built downtown along the route of the rail system. The mall, scheduled to be finished in 1987, will connect the retail, office and entertainment district. City officials view the mall as crucial to the future success of the metro rail system.

An attitudinal transformation is what the Buffalo Area chamber was after in late November when it produced the first annual Winterfest, which included 22 athletic and cultural events. Sponsored by Gibraltar Steel, Goldome FSB, Marine Midland Banks and Anheuser-Busch among others, Winterfest's intent is to position the area as a winter wonderland.

Recreation is largely a function of the climate. There are 20 ski areas within a 90-mile radius, netting over $80 million annually, and area operators are eager for the 90-average inches of snow that fall annually.

The economic climate in Buffalo is improving. There has been a shift from blue collar to white collar jobs. Service-oriented jobs have climbed from 18.5% to 30% of the work force in the last 15 years. Disposable household income has increased in the process, from $19,000 to $24,000 in the past five years.

Financial services abound. Goldome, with assets of $11.5 billion, Marine Midland, $23 billion, and Empire of America FSB, $8.6 billion, all are headquartered in Buffalo. These institutions have helped turn Buffalo into a financial hub in the northeast, but also have stimulated the local economy through job growth, corporate sponsorship, contributions and ad dollars. This year, Empire which operates in 46 states, purchased controlling interest in Levy, King & White Advertising, Buffalo, which handles its $8 million account.

Unemployment is down from 12% in 1985 to 7%. Skilled labor, in significant supply as a result of recent steel industry and factory closings, provides employers with a strong talent pool.

Media have undergone tremendous change during the past two years. Buffalo, home to five commercial tv stations, a host of cable stations, and 11 am and 14 fm radio stations, placed 36th in recent ADI rankings.

In July of 1986, WKBW-TV, Buffalo's top-rated ABC affiliate with an 8.5 rating and 27 share in A.C. Nielsen's May report, was sold by Capital Cities/ABC after their merger to comply with FCC regulations limiting network-owned stations to five markets.

The station was bought for $65 million by a group of investors consisting of the Jackson Brothers musical group, former NFL football star O.J. Simpson, NBA star Julius Erving and Edward Lewis, ceo/publisher of *Essence* magazine. WKBW, the am station sold by Cap Cities/ABC to Price Communications, changed its call letters to WWKB. WGRZ-TV, the NBC affiliate rated third in Buffalo tv, was sold in March, 1986, by General Cinema to Acquisition Corp. Both stations are cleaning house to boost sagging ratings.

The *Buffalo News* continues to be the only daily, controling the market with its sunrise and evening editions. Its rates have gone up five times, an average of 8% each time, since the Courier Express closed down four years ago.

Construction of a $54.7 million sports stadium, dubbed Pilot Field, is currently under way in the downtown area. The stadium, which will be the new home of the Bisons, a Cleveland Indians' AAA farm team, is scheduled to open in 1988. Bisons' owner Bob Rich Jr., president of Rich Products Corp., would like to see major league baseball here in the near future.

RANK **42**

Charlotte-Gastonia-Rock Hill, N.C.-S.C.

Queen City

($ in thousands)

1985 vital statistics

Population	1,049,000
Disposable income	$12,117,559

Charlotte, largest city in the Carolinas, still bears the imprint of the Scotch-Irish Presbyterian farmers and traders who founded it in 1768—safe, solid, short on flash.

An ex-city council member characterized its present council, elected in a combined ward-at-large system, as "the Charlotte boys' and girls' choir. They're sitting there singing out of the same songbook. It's the most homogenous bunch [in spirit] I've ever seen." He's talking of a black mayor, Harvey Gantt, who was elected with almost 40% of the white vote; Jewish mayor pro tem Al Rousso, and a council with half of its members women.

There is no one industry or family—there are patricians—that dominates in Mecklenburg (Charlotte) County where unemployment is a low 4.3%. The Mecklenburg labor force has jumped almost one-third in the last 12 years, to 250,300 in August, 1986.

The largest employer is IBM, which has an ever-expanding work force of more than 5,000 who make computer printers and electronic banking equipment in modern quarters in the rolling hillsides of north Mecklenburg's University Research Park.

Forbes magazine listed two local retailing names in its October account of the country's 400 wealthiest: Leon Levine, chairman of Family Dollar Stores, with $260 million, and the Belk family, whose fortune of more than $350 million, *Forbes* said, was divided among 25 family members.

The city is a financial center, home to the Southeast's largest bank holding corporation, NCNB Corp., whose recent mergers have ballooned it to $24 billion in assets. Charlotte-based First Union Corp. has $21 billion, and First Wachovia Corp. of Winston-Salem, N.C., has a strong presence in the city.

Mecklenburg County, with an estimated population of 442,448, is at the center of a seven-county MSA of 1,070,350. And those one million have

Where Ad Age got its data

The 100 leading markets are the 100 most populous Metropolitan Statistical Areas (MSAs) as of July 1, 1985, in the U.S., as ranked July 30, 1986, by the U.S. Department of Commerce, Bureau of the Census, Washington.

Consolidated Metropolitan Statistical Areas (CMSAs) such as New York, were broken down into Primary Metropolitan Statistical Areas (PMSAs) such as New York, Nassau-Suffolk, N.Y., Newark, N.J., etc. Only PMSAs and MSAs were ranked.

Retail sales and disposable income figures for 1985 were supplied by Marketing Economics Institute, New York.

These figures were tabulated to correspond to MSAs as closely as possible. Sales and income data for 1982—the last time Advertising Age profiled 100 markets—also was supplied by MEI. Ad Age avoided making growth comparisons between 1982 and 1985 because geography of a few MSAs was redefined in the period.

Employment statistics were supplied by the U.S. Department of Labor, Bureau of Labor Statistics, Washington. Regional breakouts of this information conform to those of the Department of Labor.

A.C. Nielsen figures used in the profiles to rank the tv markets are for sign on to sign off from its May, 1986, reports. A rating is the percentage of total households in the market watching the channel.

A station's share is its percentage of only those households with their sets turned on.

Arbitron data for radio markets is for viewers 12 and over from the spring sweeps.

Writers for this 100 leading U.S. markets report

For this issue, Ad Age relied on writers who live or once resided in the markets they covered. Space limitations held local color to a minimum. But that was unfortunate for the reader, because the writers, lacing the largely statistical analyses with good down-home character, had editors salivating over their discussion of blackened red fish at New Orleans' fine Prudhomme's, and the barbequed, chopped pork sandwich and slaw that sets apart Raleigh-Durham-Chapel Hill, at least in a culinary sense.

Then there are the nine family-style Basque restaurants that followed immigrant sheep herders from the Pyrenees to Fresno, the mouthwatering mostaccioli served up in abundance on the "Hill" in St. Louis and the ever-present steamed clam digs of Baltimore.

Contributing writers, and the markets they covered: Craig S. Lovelace, Akron; John L. Klucina, Albany-Schenectady-Troy; Ben Dunlap Jr., Allentown-Bethlehem; Chuck Wingis, Anaheim-Santa Ana, Oxnard-Ventura, Riverside-San Bernardino; Jerry Schwartz, Atlanta; Van Wallach, Austin, Nassau-Suffolk, New York, San Antonio; Bill Rintoul, Bakersfield; Alex Montague, Baltimore; Eileen B. Brill, Bergen-Passaic; Dean Barber, Birmingham; Alan Radding, Boston, Providence, Springfield; Judith A. Biltekoff, Buffalo; Merle D. Kellerhals, Charleston; Hannah Miller, Charlotte-Gastonia-Rock Hill; Edward Morris, Chattanooga, Johnson City-Kingsport-Bristol, Knoxville, Nashville; Sara Stern, Chicago; John Newberry, Cincinnati; Bonnie Schwartz, Cleveland; Fred Monk, Columbia, S.C.; Mike Seemuth, Columbus; Tom Bayer, Dallas; Bruce Dawson, Dayton-Springfield; Julie Truck, Denver; Norma Green, Detroit; Ken Flynn, El Paso; Susan Garland, Fort Worth-Arlington; Maureen Glabman, Ft. Lauderdale-Hollywood-Pompano Beach, Miami-Hialeah, West Palm Beach-Boca Raton-Delray Beach; Lynn M. Turner, Grand Rapids; Bradley Johnson, Greensboro-Winston-Salem-High Point; Greg Myers, Greenville-Spartanburg-Asheville; David F. Forward, Harrisburg-Lebanon-Carlisle; Allen M. Widem, Hartford; Mark Coleman, Honolulu; Jennifer Lawrence, Houston; S.L. Berry, Indianapolis; Mary Sweat, Jacksonville; Marian Courtney, Jersey City; Diane Stafford, Kansas City; Sally Saville Hodge, Lake County; Tom Dye, Las Vegas; Tom Honeycutt, Little Rock-North Little Rock; Elliot Blair Smith, Los Angeles; Jim St. Clair, Louisville; John B. Simpson, Memphis; Barbara Frankel, Middlesex-Somerset-Hunterdon; Kathryn Mann, Milwaukee; Bob Geiger, Minneapolis; R[illegible]cca L. Paul, Mobile; Stephen McCarthy, Monmouth-Ocean; Mark Bittman, New Haven-Meriden; Sallie Rose Hollis, New Orleans; Linda Cecere, Newark; Kurt C. Hoffman, Norfolk-Virginia Beach-Newport News, Richmond-Petersburg; Alice Cuneo, Oakland, San Francisco; Curt Autry, Oklahoma City, Tulsa; Jim Williams, Omaha; David Wilkening, Orlando; Belinda Hulin-Salkin, Philadelphia; Marie Spadoni, Phoenix, Tucson; Vince Gagetta, Pittsburgh; William H. MacKenzie, Portland; Debra Simon, Raleigh-Durham-Chapel Hill; Jerold M. Rosen, Rochester, Syracuse; Patricia Martin, Sacramento; Thomas R. Dowell, Salt Lake City-Ogden; Gordon Smith, San Diego; Steven B. Kaufman, San Jose; Jim Collins, Scranton-Wilkes Barre; Mike Parks, Seattle, Tacoma; Lori Kesler, St. Louis; Christopher Bubin, Tampa-St. Petersburg-Clearwater; Shelley Wolson, Toledo; Carol A. Anderson, Wichita; Ed Cohen, Wilmington; Mary Ellen Crowley, Youngstown-Warren.

plenty of money to spend. The median household income after taxes is $23,623, right in line with the U.S. average of $23,680 but higher than the North Carolina average of $20,362. Almost 60% of the Mecklenburg County households have more than $20,000 in income; and the 1980 census showed 64% own their own homes.

Charlotte is riding the wave of its biggest construction boom ever. Between September, 1985, and September, 1986, 2.1 million sq. ft. of office space was added, for a total of 15.9 million. In that period, 1.3 million sq. ft. was absorbed. Much of the new space is in two office towers under construction downtown: 23-story First Citizens Center and 42-story Two First Union Plaza. When their footage is subtracted from the over-all vacancy rate, vacancy is 16.3%.

Piedmont, considering the city a major hub, is planning a $90 million expansion of its facilities built only four years ago to add 106 daily flights to its already existing 194 by 1988.

Most local print advertising is through the *Charlotte Observer*, a Knight-Ridder newspaper with two Pulitzer prizes and the largest paper in the two Carolinas, and estimated annual ad revenues of $80 million. The *Observer* has felt competitive pressure in recent years as small newspapers nearby were bought and improved by other chains. It has responded by creating seven regional tabloids concentrating on news of individual regions and offering lower ad rates, inserted in the main paper several times a week. A full-page ad in the weekday York (S.C. county) *Observer* is $273 and contrasts to a full-page, full-run ad in the main paper at $4,895.

In April, American Cities Business Journals of Kansas City started the *Business Journal*, which agency people say has gained respect as a business-to-business vehicle. Publisher Robert Powell says its 5,000 paid circulation, plus 12,000 to 15,000 circulation-building freebies and vending sales, met its first-year goals.

In tv, WBTV (CBS) with a 9 rating, 31 share, according to A.C. Nielsen's May reports, and WSOC-TV (ABC), 7.3/25, get the bulk of most local buys, but WPCQ (NBC) has joined them since instituting local news shows in September.

In an area without strong mass transit and where a large number of women work, drive-time radio is a strong market. In Mecklenburg, Union and Gaston counties, 59.5% of women worked in 1980, in contrast to 49.6% nationally. In the seven-county Charlotte-centered area that Arbitron Ratings Co. ranks as the 40th largest market among 259, there is a morning drive-time audience estimated at 201,200. Arbitron's spring rankings put WSOC-FM on top in the mornings with 12.8% of the listeners, followed by WBT with 11.4% and WEZC-FM with 11.1%. A station tied for fifth, WROQ-FM, is being sold, along with its sister am station, WAYS, for $13 million to CRB Broadcasting of New York.

Charlotte's growth is tilted heavily toward the south and southeast, where daily traffic jams have city fathers frantically trying to get an east-west road widened and to direct growth northward. Busiest areas include the I-77 corridor south to the South Carolina line and Billy Graham Parkway, running off it to the airport, and I-85 West. Outside downtown, the largest concentration of office space, some 2.6 million sq. ft., is in the I-77 corridor.

RANK **3**

Chicago

Windy City

($ in thousands)

1985 vital statistics

Population	6,176,900
Disposable income	$83,299,720

It's not uncommon to turn on the tv or view a movie and see Chicago's skyline looming in the distance. Since the filming of "The Blues Brothers" here in 1978, Chicago has become the third most popular city to film.

Eleven films were shot in Chicago in 1986 (bringing in $36 million to the city in revenues as well as 20,000 jobs) and included "About Last Night," "Nothing in Common," "Running Scared," "Ferris Bueller's Day Off" and "The Color of Money." Tv shows "Jack & Mike" and "Crime Story" also take place here.

The nation's third largest metro area had a city population of 2.9 million in 1984, down from 3 million in 1980, according to the U.S. Census. Some 54% of the population are 47-plus in age, 20% are 35-47, 17% are 6-17, and 9% are under 6. Racially, the city is 48.2% white, 39.8% black and 14% Hispanic and other. The market is the fifth largest Hispanic market in the country.

Chicago's suburban population is the fourth largest in the nation with just over 3 million. Those folks have total buying power of over $47 billion, ranking second in the nation behind LA/Long Beach, Cal. One of the more important counties rimming Chicago's Cook County is DuPage, west of the city. There, the population grew to 732,900 in 1986, up 5.3% from the year earlier.

The metro area is a study of contrasts. East Chicago Heights, with per capita income of $4,178, is among 11 of the state's poorest suburbs clustered south of the city in an area devastated by steel mill cutbacks. Lakefront Kenilworth, 40 miles north, is Chicago's wealthiest with a per capita income of $40,000. City and suburban employment grew 4.6% last year, surpassing the nation's job growth of 3.4%. Dissecting unemployment statistics, blacks are 25% of the jobless, Hispanics, 13%, and whites, 7.3%.

Chicago, the nation's third largest media market, has seen a proliferation of broadcast outlets in recent years as suburban print media also expand. Signals from 12 tv stations reach the metropolitan area, and cable tv penetration is only 35%, still below the national average. But major portions of the city are being wired.

The increasing number of uhf indies has made the market more competitive for local ad dollars and syndicated programing despite a weakened advertising sales environment. Grant Broadcasting's WGBO-TV was one new entry on the uhf dial. WSNS-TV in the past year became a SIN affiliate in direct competition with another Spanish-language station, WCIU-TV. WFLD-TV was sold by Metromedia to Rupert Murdoch's Fox Broadcasting Co. Mr. Murdoch then had to sell the *Sun-Times* to meet FCC regulations against multiple ownership of media in the same market.

Network o&o stations have done an about-face in local ratings. Perennial leader, WBBM-TV, the CBS affiliate and talent conduit for New York headquarters operations, has been on a slide the past few years. It has dropped behind No. 1 WLS-TV (ABC), which had a 9.4 rating, 25 share from sign on to sign off, according to A.C. Nielsen 's May report, and No. 2. WMAQ-TV (NBC), 6.6/18. WBBM-TV, 5.8/16, is attempting to build its ratings with a "First Edition" news program launched in September.

In print, the *Chicago Tribune* (circulation, 744,969) continues to add new sections targeting specific demographic and geographic segments, zoning many to city and suburban regions. Publisher Robert Page and an investor group purchased the *Sun-Times* (circulation, 612,686). Mr. Page has toned down somewhat the sensational aspects of the tabloid begun under Mr. Murdoch, but the daily still retains its readership strength among commuters and blue-collar workers.

Chicago radio programing formats have diversified in recent months as listener tastes have changed. A year

ago, at least half a dozen stations offered the adult contemporary music format, then dominant among fm outlets. Now, several have changed owners, personalities and formats to create a less homogenous mix of radio stations. WGN leads the ratings pack even without the morning banter of Wally Phillips, long its morning drive anchor who recently moved to evening drive time slot. WGN's success is tied strongly to Chicago's clogged expressways—commuters spend just over an hour commuting to and from work for one of the more lengthy commutes in the nation—and its sports-crazed denizens who tune in to WGN's broadcasts of the Cubs, Bears, DePaul and Notre Dame basketball.

Chicago's retailers, at least in and around the upscale North Michigan Ave. Magnificent Mile, continue to brace for Bloomingdale's arrival in the next 18 months as anchor tenant in the mixed-use $450 million 900 N. Michigan Ave. development that will also include the city's second Four Seasons Hotel. Building developer, Urban Investment and Develpment Co., also designed Boston's Copley Place and Water Tower Place in Chicago.

The city's old-guard department stores, Marshall Field's and Carson Pirie Scott, are sharpening their images and updating their stores in anticipation of the competition. Field's kicked off its major fall and Christmas "Eagle and the Crown" promotion (featuring goods from Great Britain) with a visit from Prince Charles.

RANK **29**

Cincinnati, Ohio-Ky.-Ind.

Queen City

($ in thousands)

1985 vital statistics

Population	1,412,000
Disposable income	$16,759,590

Cincinnati approaches its 1988 bicentennial with a reputation as one of America's most livable cities, thanks in part to a diverse economy base and a hilly, riverside terrain that has withstood most inclinations toward monotonous urban sprawl.

The chamber of commerce launched a campaign to publicize Cincinnati as the "Blue Chip City" several years ago, but the idea hasn't caught on with the local populace, which still prefers the traditional "Queen City," despite its undesired modern connotation.

New office construction and the expanded second-level skywalk system have transformed the downtown area, but activity has practically come to a halt while developers wait to fill some 2 million sq. ft. of stubbornly empty space. Vacancy rates have hovered around 18% for months.

Five office towers ranging in size from 396,000 sq. ft. to 668,000 sq. ft. came on line in the first half of the decade, but no more major projects are expected until the 1990s.

The city's $200 million Fountain Square West project is scheduled for completion by 1992, although final development plans are still being worked out between the city and the developer. It will include a multi-level retail arcade, a luxury hotel and 500,000 plus sq. ft. of office space. The project is a result of a highly publicized bidding war between several national developers. The office tower, topping off at some 700 feet, will anchor the west side of Fountain Square in the heart of the city. To the east the square is framed by Procter & Gamble's newly opened international headquarters, humorously known as the "Dolly Parton" towers.

With the downtown office market saturated, focus has shifted to development of land along both the Ohio and Kentucky sides of the Ohio River and along the interstate corridors in the northern suburbs.

Much of the area's growth has been aided by the presence of General Electric's Aircraft Engine Business Group in nearby Evendale. General Electric, Greater Cincinnati's largest employer, has seen business and employment surge in recent years as a result of strong orders for both its military and commercial jet engines. Major employers after GE are Procter & Gamble, Kroger, the University of Cincinnati and the federal government. Together, they form the nucleus of a regional economy that's highly resistant to cyclical national swings.

However, the area's traditionally strong machine tool industry never really got back on its feet after the 1982 recession, in part because of increasing automation in manufacturing processes and also because of fierce price competition from foreign machine tool builders. Cincinnati Milacron remains a major employer because it is the dominant force in the industry and has invested heavily to refocus its operations away from basic machine tools.

The local media market has remained relatively stable in recent years, probably in part because of the dominance of two locally based media companies, Taft Broadcasting Co. and Scripps Howard.

Taft owns WKRC-TV, the local ABC affiliate, as well as WKRC and WKRQ-FM, two strong radio properties. Scripps Howard owns WCPO-TV, the traditionally dominant CBS affiliate, and *Cincinnati Post*, the city's afternoon daily.

Although Taft has put five of its tv stations on the market, possibly in response to takeover threats, none are local properties. Despite weak profits in recent quarters because of heavy debt load, Taft continues to operate its Electra 24-hour teletext news service which is broadcast nationally over WTBS's cable signal.

Taft figures the service will eventually generate advertising revenue and profit, but there are not yet enough sets on the market capable of decoding the teletext signal. Zenith began manufacturing digital sets with built-in decoders earlier this year, and efforts are under way to convince other manufacturers to do the same.

WIII-TV, a uhf indie, filed for Chapter 11 under the bankruptcy act in May and may be for sale pending a court decision on a recent reorganization plan. The station is a converted stv operation that has never built ratings comparable to the other indie, WXIX.

Another Cincinnati-based media company, Jacor Communications Corp., has acquired the two top-rated radio stations in the city in the past year. Jacor's Terry Jacobs enticed Frank Wood of WEBN-FM, the city's longtime advertising leader, with an offer to merge operations. Mr. Wood moved over to corporate headquarters as president-coo.

Several months later, Jacor announced an agreement to buy Republic Broadcasting Co., owner of WLW, the city's top-ranked am outlet. That agreement has prompted Republic to sell off its fm station, formerly WSKS-FM, after changing its format from album rock to country music.

The Gannett-owned *Cincinnati Enquirer* remains the dominant daily newspaper in both circulation and advertising sales. It operates in a JOA with the rival *Post*.

Cincinnati Business Courier, a 2-year-old business weekly, was sold to Kansas City-based American Cities Publications. The sale was part of a buyout of *Courier's* corporate parent, Indianapolis-based Business Journal Publications.

Cleveland. The new boosterism replaces the self-deprecating attitude of just a few years ago when the city, facing such problems as bankruptcy and a river—the Cuyahoga—that caught fire, was often referred to as "the mistake on the lake."

In the new Cleveland—boosted by a campaign titled: "On America's North Coast"—the economy is stabilizing. The downtown landscape is dotted with new buildings including Standard Oil Co. of Ohio's massive $200 million headquarters on Public Square. An entertainment complex is housed in the restored theaters of Playhouse Square, and new recreation and residential areas are developing in the Flats and Warehouse Districts, former industrial areas adjacent to downtown.

More than $600 million is being invested in new construction in downtown Cleveland, while other local landmarks like Tower City and the Halle Building are being restored.

Added to this is a campaign to build a domed stadium and the city's recent selection as the site of the new Rock 'n Roll Hall of Fame. (The term "rock 'n roll" was coined by former Cleveland disc jockey Alan Freed and the city has long billed itself as "the rock 'n roll capital of the world.")

A few years ago the area's location in the country's "rust bowl" was being lamented. Many today are convinced that the city's position on "America's North Coast" will play an important role in its economic revival. Located on the southern shore of Lake Erie, Cleveland has the advantage of an enormous fresh water reserve: A fact city leaders say will draw new industry, from shipping to manufacturing.

The Cleveland area already is headquarters to 85 corporations with annual sales of more than $100 million each. The city ranks fourth in the number of *Fortune* industrial corporate headquarters and ninth in non-industrial headquarters. Cleveland recently got Harcourt Brace Jovanovich, the giant publishing company, which moved many of its publications from New York to a new facility in suburban Middleburg Heights.

Although much of the Cleveland's economy is becoming more service based, the area remains a leading industrial market. The seven-county CMSA area has 768 plants employing 100 or more and more than 2,000 plants with 20 to 99 workers.

Among the area's largest employers are the federal government, Ford Motor, Goodyear Tire & Rubber, Cuyahoga County agencies, LTV Steel, General Motors, the city of Cleveland, Ohio state agencies, the Cleveland Clinic Foundation and Ohio Bell.

Scripps Howard Broadcasting's ABC affiliate, WEWS, leads market rankings with an 8.8 rating, 28 share from sign on to sign off, according to A.C. Nielsen's May report. WJW (CBS), a Storer station owned by Kohlberg, Kravis, Roberts, ranked No. 2 at 7.3/23. WKYC, an NBC o&o station, trailed at 6.8/21. Cleveland has several independent uhf stations including WUAB, a strong indie at 2.7/9, and WCLQ, which recently began carrying the Home Shopping Network. The PBS station is WVIZ.

There also are 26 am and fm radio stations, although the fm dominate the pack with the first six rankings in the market. The end of October marks the debut of Cleveland's newest rock station, WNCX-FM. The station is replacing WGCL-FM, former rival to WMMS-FM, the heads-on leader in the market with nearly twice the listeners of its nearest competitor, according to Arbitron's spring sweeps.

Eight WMMS-FM staff members have left their jobs to join the new station, including radio personalities. The old WGCL-FM, ranked 6th in the market, and its sister station WERE-AM, No. 12, were recently acquired by Metropolis Broadcasting of Detroit. There are no plans to change WERE's all-talk format. The new station is aiming for a more adult market and will play rock 'n roll.

With the closing of the *Cleveland Press* more than four years ago, Cleveland became a one newspaper town. The *Plain Dealer*, a Newhouse publication, is published daily and Sunday with a daily circulation 452,000, up 11.6% from 405,000 before the *Press* folded in 1982. The big increase occurred in the *PD's* Sunday edition, where the circulation went from 448,000 in 1982 to 552,000 in 1986.

Roldo Bartimole, Cleveland's media watchdog and publisher of *point of view*—a local media-watching newsletter—says there has been "a loss to the public" since the *Press* closed. Stories that should get in the next day, sometimes get in a day or two later [without competition]," he says. Although there are other area publications like *Cleveland Magazine*, Mr. Bartimole says none of these can fill the gap.

Several outlying cities like Elyria and Lorain publish smaller dailies. There also is a number of weekly suburban papers including those published by Sun Newspaper chain.

Regional publications include *Crain's Cleveland Business, Cleveland Magazine, Northern Ohio Live, Western Reserve Magazine, New Cleveland Woman Journal* and *Scene*.

Cleveland has long been recognized for its outstanding cultural offerings such as the city's renowned orchestra and ballet company. University Circle boasts a number of world-class museums including the Cleveland Art Museum, the Western Reserve Historical Society and Natural History Museum.

RANK **35**

Columbus, O.

Buckeye Capital

($ in thousands)

1985 vital statistics

Population	1,287,600
Disposable income	$15,309,271

Most have heard of the "perfect 10," but Columbus boasts of a "perfect 20"—the four major industries of government, consumer services, business services, retail trade and manufacturing, each accounting for approximately 20% of Columbus-area employment.

This broad economic base helped Columbus emerge from the recession of the early 1980's with barely a bruise, and is now fueling growth in the capital city.

Thanks in part to a big government base, the area's average annual unemployment rate peaked at 9.3% during the worst years of the recession, well below the 12.5% high for Ohio. Now the unemployment rate in the seven-county metro area is down to 6%, well under Ohio and U.S. levels.

Sharp growth in the retail and service industries has lifted employment as well. New stores have been opened in recent years by general-merchandisers, Meijer's, Andersons, Wholesale Club, Warehouse Club and Golden Bear Home Centers. The only upscale department store in town is Lazarus, a unit of Federated Department Stores. But new competitors are in the wings—Marshall Field's of Chicago and L. S. Ayers of Indianapolis have expressed interest in entering the Columbus market.

One trend that is attracting the attention of retailers is Columbus' population growth. With approximately 900,000 residents within its city limits, Columbus has surpassed Cleveland as the most populous city in Ohio. Aggressive annexation by the city pulled fast-growing suburbs into the fold, offsetting a decline in population in the city's core neighborhoods.

A growing number of Columbus residents are buying and renovating older homes in urban neighborhoods. One such neighborhood, German Village—a collection of quaint brick homes, restaurants and specialty shops—has become a model for other neighborhoods surrounding the downtown area.

Many of the newer Columbus-based companies have set up headquarters in the northern suburbs. Wendy's International employs several hundred workers at its headquarters in Dublin.

But the biggest employers are public-sector organizations located in, or near, downtown Columbus. The top five are the state government (20,000 employes), Ohio State University (14,500), the federal government (11,000), Columbus public schools (8,500) and the Columbus city government (7,500).

A flurry of construction has added more than 3.5 million sq. ft. of new office space in the Columbus area since 1981. Among the most prominent additions to the city's skyline are the 31-story Huntington Center, opened in 1985, and the 26-story Capitol Square Office Tower, opened in 1984.

Vacancy rates of nearly 20% have slowed construction of suburban office space, but downtown office space is expanding at a swift pace. A new 26-story office building, One Columbus, recently was completed. Ground has been broken for 25-story and 31-story office buildings, which will be occupied by agencies of state government. And Nationwide Insurance Cos. has started construction of a 26-story office building that will house part of the Columbus-based company's administrative operations.

Several fast-food companies—including Wendy's, Bob Evans, Rax, White Castle and G.D. Ritzy's—started in Columbus and developed into national chains. The area has been a good testing ground for other retail products, too.

Financial services is another industry with a major presence: Banc One Corp. and Huntington Bancshares Inc., two regional bank holding companies, are located here; and there are more than 50 insurance companies.

Manufacturing hasn't been a fast-growing industry, but it isn't declining either. Some old-line manufacturing companies have made deep cuts in local payrolls. Owens-Corning Fiberglas Corp. of Toledo has announced the permanent layoff of 700 to 900 employes at its Columbus-area plant, which employs 2,000. Some new manufacturers have set up shop, especially automotive parts makers drawn to the Columbus area by a new Honda Motor Co. plant in Marysville, a 40-minute drive from downtown.

Faster growth is occurring in warehousing and distribution, largely because of Columbus' mideast location and accessibility. Retailers with major distribution centers in the Columbus area include Sears, Roebuck & Co., with a huge 4 million sq. ft. center, J.C. Penney, The Limited, Whirlpool and Kroger. Tiger International operates an 196,000-sq.-ft. air cargo terminal.

Tourism is big business, largely because of such annual events as the Columbus Ford Dealers 500 auto race, the Ohio State Fair (the nation's larg-

BIG GAME HUNTERS

...bag big profits with the PROFIT TICKETS!

Now big game hunters can confidently set their marketing sights on potent game promotions which will dramatically increase traffic and sales.

You can turn to Chicago Lithographing Company. We've earned our big game reputation with game, sweepstake and lottery programs exclusively. We have successfully helped promotional firms with the development and production of big games for major supermarkets, oil companies, state lotteries and fast food chains.

Chicago Litho has printed billions and billions of Profit Tickets, including scratch-off and punch-out style, for satisfied customers throughout the world.

Chicago Litho is a single source supplier for your big game promotions. There is no second handling, second guessing nor costly delays due to additional suppliers.

Our extensive facilities offer you everything from high speed multi-color presses to sophisticated numbering, perforating, die-cutting and collating equipment. We have the controls to help you produce secure hidden image games. You can have us compute the odds for pay-offs and handle the dispersion of prizes. Added to each job are strict security, controlled distribution, and on-time delivery.

So if you're a big game hunter stalking a successful promotion, talk to the single source professionals who know the territory. Contact us for complete information.

MEI

est state fair), Bank One Marathon, and Memorial Tournament, a golf tournament organized by Columbus native Jack Nicklaus.

With the death of Scripps Howard's *Citizen-Journal* at the end of 1985 when the JOA broke up between the city's two papers, the locally-owned *Dispatch* has increased daily circulation 18.5% to 248,121 and Sunday 2.7% to 371,489. The tv market is led by WBNS-TV (CBS), with an 8.5 rating, 28 share, but in hot pursuit is WCMH-TV (NBC), at 8.2/27. ABC affiliate, WTVN-TV, trails at 6.4/21. Rankings are from A.C. Nielsen's May report.

RANK **12**

Dallas

Big D

($ in thousands)

1985 vital statistics

Population	2,311,700
Disposable income	$33,429,648

Economic woes of the state's depressed oil industry have tested Dallas' success-oriented mindset and entrepreneurial spirit this year. And although some serious economic difficulties have touched the area, the economy and outlook remain buoyed by the area's diversity.

"Over the past six years, the Southwest and particularly Texas has been sort of an economic nirvana," says Howard Davis, president and ceo of Tracy-Locke advertising agency. "I think there was a perspective that we would continue forever unscathed by economic vagaries."

Not so in 1986. Dallas' real estate and banking industries suffered heavy losses during the year. Earnings of the area's largest bank holding companies plunged because of heavy losses in energy and real estate portfolios. The foreclosure rate skyrocketed. Office towers were left vacant; home values were depressed.

Bernard Weinstein, director of the Center for Enterprising at the Edwin L. Cox School of Business at SMU, says the area has experienced a "huge withdrawal of purchasing power" in the past year when per capita personal income grew 5.1%, less than the 7.2% rate of increase in 1985.

That, he says, is reflected in lower retail sales, which triggers a ripple effect for advertisers and agencies.

Dallas sales tax receipts fell by almost 6% in the first half of 1986, putting unexpected stresses on the city's budget, which, in turn, forced temporary cutbacks in some city services.

Residential real estate sales have been closing at an average of 22% below asking prices, three times the spread between asking and closing prices the year before, real estate sources report.

And perhaps reflecting an undercurrent of economic stresses among some groups, major crime in Dallas has risen steadily over the past two years, with an over-all 22% increase being registered for September, 1986, compared with the previous September.

During the same 12-month period, petitions for protection under the bankruptcy act rose 51%. In sharp contrast, the number of bankruptcy filings in the district in 1980 totaled 1,848. Nonetheless, the area's unemployment rate, projected by Mr. Weinstein to end the year with an average 5.1% for the fourth quarter, is the second lowest in the state, which was consistently recording unemployment rates of about 9%.

Despite a 2.6% growth rate in 1986, somewhat less than the 3% recorded in 1985, Dallas' population remained relatively young—still one of the area's major attractions for major national marketers. The area's median age in 1985 was 29.9, according to a Sales and Marketing Management survey that also reported the 18-34 age group to be 32.7% of the Dallas PMSA.

Dallas' two major daily newspapers saw the ripples appear in their ad linage figures, which have been soft for the year. By the end of the nine-month period ended Sept. 30, the sluggish economy in particular had taken its toll on the market's No. 2 newspaper, the *Dallas Times Herald*, which was purchased from Times Mirror Corp. by William Dean Singleton and his Media News Group. Media Records reflects that for that period the *News* had a 56.6% share of the market's total daily linage, up from 54.4% in the same period the year before. The *News*' total Sunday linage represented a 58.6% share, up from 57.1% in the comparable period of 1985. The figures include a 54.8% share of total retail for the *News*, and a 56.3% share of total general linage, both up from 52.6% and 54.7%, respectively.

Jeremy Halbreich, *Morning News* executive vp, attributes some of the softness to the psychological impact of reading about the state's over-all depressing economic situation spurred by the plunge in crude oil prices.

In tv, Times Mirror-owned KDFW-TV (CBS) led the charts with a 7.4 rating, 21 share, just edging out A.H. Belo's No. 2 WFAA (ABC) at 7.3/20. KXAS (NBC) was not far off at 7/19. The Dallas market has strong indies, led by KTVT, 3.6/10, and KTXA, 2.5/7. Figures are sign on to sign off from A.C. Nielsen's May report. KVIL-FM and KKDA-FM are the two lead radio stations in that order in a very competitive market.

Tracy-Locke's Mr. Davis says, "There has been a general tendency to say 'the sky is falling' when you read about Houston. We forget that [in Dallas] we've had many, many years of incredible vitality, and nothing lasts forever.' "

The Dallas agency outlook was particularly bright in contrast to the outlook in Houston where one Houston agency chief says under the cloak of anonymity that the competition to keep one's clients is so stiff that, "There are no [business] principles in Houston, now. Anything goes. Incumbents are doing all they can do to hold on. Any loss would be devastating."

The general outlook in Dallas, however, is far from bleak. The National Planning Assn. projects that between the years 1985 and 2000, Dallas will record the eighth largest increase in the number of new jobs to be created among larger cities.

Perceived as a problem by some and as an opportunity by others, the city's commercial building vacancy levels have remained high, reflecting in September a downtown office vacancy level of 20.4%, the fifth highest such rate in the nation.

RANK **49**

Dayton-Springfield, O.

Gem City

($ in thousands)

1985 vital statistics

Population	931,100
Disposable income	$10,797,022

Transportation has been a driving force in the Greater Dayton-Springfield area since the beginning of the century. The area gave the world the Wright Brothers, man's first powered flight, and the first man on the moon, Neil Armstrong, whose boyhood home is just 40 miles to the north.

Besides being the bread and butter of the work force of almost 500,000, transportation influences what tourist trade the area has. In addition to the National Air Force Museum, the oldest and largest military aviation museum in the world, the area boasts the Dayton International Air Show. This four-day event in late July is rivaled only by the Paris Air Show in attracting flying buffs and exhibitors.

October, 1986, saw the opening of I-675, the $715 million, 26-mile roadway connecting I-70 on the east with I-75 on the south. This interstate highway was proposed a quarter of a century ago as a north-south beltway around Dayton. The roadway opened just in time to coincide with the reopening of a 15-mile stretch of I-75 through downtown Dayton that had been under reconstruction for more than three years. Locals jokingly referred to Dayton as the orange construction barrel capital of the world, after the ubiquitous squat lane barriers.

The highway already is an economic catalyst for the area. This is borne out by more than $100 million in commercial-industry developments that already have sprung up along it.

The small suburban city of Fairborn, population 28,000, which sits between Dayton and Springfield and is trisected by I-675, I-70, and I-75, issued $25 million dollars of construction in the first nine months of 1986, adding to its economic base largely defined by Wright-Patterson Air Force Base, confined within its city limits. The base is the area's largest employer with civilian and military employment of 33,000. It also has attracted the large amount of hi-tech and aerospace businesses that have located along I-675.

Dayton-Springfield's rebound from the depressed conditions of the late '70s—its current 7.5% unemployment rate is half the levels reached during the height of the depressed period—also is traced to General Motors' reopening of its truck and diesel engine plant in south Dayton.

In Springfield, Navistar (formerly International Harvester) gave the area a shot in the arm by keeping its truck manufacturing plant there. Honda Motor Co., which has its large plant in Marysville outside of Columbus, added a huge distribution center on I-75. The first engine recently rolled off Honda's motor assembly plant near Anna, O., 20 miles up I-75.

While construction and development has been expanding, media has constricted. Cox Enterprises merged the *Dayton Daily News* and the *Journal Herald* in September. To appease irate readers, the two papers asked them to vote on which specific features from the morning *Journal* and the afternoon *Daily News* would be kept. But when all the votes were in and the merger complete, almost all features had been kept. All that had been accomplished was publishing one single edition in both the morning and afternoon, although the Saturday afternoon edition was dropped.

WHIO-TV (CBS) dominates the tv market with 9.4 rating, 31 share, and Dayton's other local vhf affiliate, WDIN-TV (ABC) is second at 6.4/21, according to A.C. Nielsen's May report covering sign on to sign off. The NBC affiliate, WKEF-TV, a uhf station, is third at 4.8/16.

Two uhf indies, WRGT: "The Wright One," and WXIX-TV, and PBS station WPTD, Oxford, the Miami University station, fill out the tv market. Three cable companies serve the area, promising to make things interesting after the first of the year when the deregulation of that industry goes into effect. In radio, WHIO-FM was far out in front of No. 2 WGTZ-FM in the Arbitron spring sweeps.

Springfield is served by one daily newspaper, the *News Sun*, also a Cox Enterprise paper, and two am and two fm radio stations. Springfield area residents receive all tv and radio stations from Dayton as well as from Columbus, 45 miles to the northeast.

Downtown Dayton is undergoing a city-backed rebuilding. The turn-of-the-century Arcade Square recently was turned into a below-ground food court topped by a four-story glass dome. Surrounding office buildings are under construction. Just across Third Street is Courthouse Square, the focal point of which is the restored Montgomery County Courthouse upon whose steps both Abraham Lincoln and John F. Kennedy pleaded their cases to Daytonians.

President Ronald Reagan borrowed a page out of the history books when he jetted into nearby Wright-Patterson Air Force Base, traveled by motorcade to Courthouse Square, spoke to Daytonians from the same steps, and then left by train to tour Ohio counties during his successful campaign in 1984.

RANK **26**

Denver

Mile High City

($ in thousands)

1985 vital statistics

Population	1,614,000
Disposable income	$23,730,731

Denver, a petroleum center in a state that remains a net importer of oil, is not as strapped financially as cities like Dallas and Houston, which are reeling from the impact of the slump in oil prices. The city's diversified economy has further enabled Denver to escape much of the budget crunching forced upon other oil-producing areas.

Gains for Denver's growth are increasingly tied to the city's burgeoning service sector, particularly in such areas as tourism, high technology, public construction and retail trade. Manufacturing, mining and agriculture are troubled spots.

The state's normally sunny employment picture took a sharp dive this fall when the now-defunct Frontier Airlines laid off some 3,000 workers in the metro area. Unemployment in the state, which usually is below the national average, in the first nine months of this year rose to the national average of 7%, up from the 5.9% Colorado recorded in 1985.

Most of the strong job gains through mid-1986 centered on such service industries as amusements, lodging, business services and healthcare. For 1987

MEI

United Banks of Colorado Inc. is projecting an increase of about 3% in employment. Inflation, a byproduct of employment, is expected to remain below the national average as it has since 1984. For 1987, the bank holding company predicts inflation will average 3.4% in the Denver-Boulder area.

The Colorado ski industry purported its fourth consecutive record season in 1985-86 with 9.12 million skier visits, up 0.9% from the previous season. The state's some 30 resorts have also had to redouble their marketing and advertising efforts as the aging baby boom population tightens the market. More than $130 million was spent on ski area improvements in 1985-86.

Colorado's high technology companies, while battered by a low dollar and foreign competition, also are expected to fuel some of the growth in the coming year. Hi-tech, represented by some 1,100 companies statewide, comprises about 3.3% of employment.

Several large public construction projects are either being planned or seeking support. Among the projects, the most expensive and controversial is a new international airport to replace the aging Stapleton International Airport. Mayor Fredrico Pena's administration, which has lobbied hard for the $1.5 billion airport, estimates that the project can be completed by the mid-1990s if started in 1987. This coming spring, Denverites will vote to annex land for the new airport.

Construction contract has been awarded for a $110 million convention center but debate still rages in city council as the city searches for additional revenue sources for funding and revenue sharing. A section of the C-470 highway, which will connect the major north/south I-25 interstate to I-70, also is planned.

However, Denver's downtown office vacancy problem continues to worsen. A recent study by Coldwell Banker places the downtown office vacancy rate at 29.3%, the highest in the nation. Overbuilding and an exodus of many oil and gas firms have been blamed for much of the problem, which some experts predict will take at least five years to absorb.

Retail centers also are overbuilt, with a report by Frederick Ross & Co., placing the vacancy rate at an all-time high of 12.8%. To combat the retail glut, many developers have begun a scramble to locate and attract a strong national anchor. The upscale Cherry Creek shopping center, located in growing southeast Denver, will get a Saks Fifth Avenue store in 1987.

Denver-based Realties Inc., which is developing the Broadway Plaza project near I-25 and South Broadway, is bringing the Paris-based retailer Printemps in to anchor its International Collections retail center.

Retail sales growth, while remaining on a par with the nation in 1985, is expected to surge at least 5% in 1987, partly as a result of increased tourism.

But while Denver retailers continue to compete, the city's cultural institutions are experiencing their own financial woes as they struggle for a limited pool of funds. Save for a last-minute bailout by Mayor Pena in October, the Denver Symphony Orchestra would have played its last concert, as declining attendance and funds contributed to its near-bankruptcy.

Denver is served by two competing morning dailies, the *Rocky Mountain News* (daily circulation, 295,922) and the *Denver Post* (daily circulation, 203,755). The *Post*, however, claims a Sunday lead with circulation of 373,244 to the *News'* 330,258, according to Sept. 30, 1986, ABC FAS-FAX reports. In addition to the dailies, the Metro Denver area is served by eight tv stations. Ratings and market share for leading tv stations: KUSA, ABC, 7.6/23; in hot pursuit is KCNC, NBC, 7.2/22; and last is KMGH, CBS, 5.4/17. Figures are sign on to sign off from A.C. Nielsen's May report.

There are 30 radio stations, the first five rankings going to fm stations with KOSI-FM outdistancing the others for the top spot, according to the Arbitron spring sweeps. KOA and sister station, KOAQ-FM, were recently put up for sale by owner A.H. Belo Corp., Dallas. KOA is the closest am station to the top, ranking No. 6 in the sweeps.

Scripps Howard sold in September its *Rocky Mountain Business Journal*, a weekly business tabloid, to Kansas City-based American City Business Journals.

Detroit

Motor City

($ in thousands)

1985 vital statistics

Population	4,318,600
Disposable income	$53,257,841

Syndicated columnist Bob Greene made headlines in Detroit when he "confessed" that his visits to Motor City had become a guilty pleasure. Among the favorite things about the southeastern Michigan city situated between Lakes Huron and Erie, Mr. Greene said he liked the dailies, the tv stations and Tiger Stadium.

Such comments were delicious pleasure to Detroiters in an era when it has become fashionable to knock the city usually by citing the high crime rate in the center core (actually Flint, Mich., to the north has a higher crime rate).

The local media Mr. Greene admires are going through several changes including ownership, divestiture and ongoing circulation wars.

The Gannett-owned *Detroit News* and the Knight-Ridder-owned *Detroit Free Press* are preparing for a JOA pending approval of the Justice Department. Gannett acquired the Evening News Assn. earlier this year in a transaction that ended ownership by the Scripps family dating back to 1873. The *Free Press* declared itself a failing newspaper in papers filed for the JOA.

Broadcasting properties are up for grabs. ABC-owned and operated WXYZ-TV, No. 2 in the market with a 9.1 rating, 24 share, was sold to Scripps Howard Broadcasting as part of the Capital Cities takeover of ABC. Capital Cities, which owned WJR/WHYT am, fm, also sold off ABC's WRIF-FM to Detroit-based Silver Star Communications to meet FCC multiple ownership requirements. WWJ/WJOI am, fm were put on the block as part of Gannett's purchase of the ENA and sold to a group of Detroit-area businessmen, including former RKO president Robert Williamson. WJBK-TV, the CBS affiliate owned by Storer, ranked No. 3 at 7.2/19. The top station is WDIV (NBC), at 10.2/27, according to A.C. Nielsen's May report for sign on to sign off.

Unlike some downtowns with commercial and residential use, Detroit tended to bedroom community concepts early on in its growth and the suburban sprawl continues with malls and stores that ring the central city. But, as the city recovers from the depression of the early '80s, retailers are starting to look at Detroit as a viable market for their expansion.

The new retail growth is just part of over-all redevelopment taking place. Chrysler, for example, has announced it will refurbish and redevelop its Jefferson Ave. plant, which employs nearly 5,000 of its 38,000 area workers. First phase construction, to include a paint facility for trucks, might be ready by January.

Much of the downtown development has come during the tenure of Democratic Mayor Coleman Young, a black who has forged a strong coalition of blacks and whites, the latter including such "royalty" as Henry Ford II, Ford Motor Co. chairman and driving force behind development of the Renaissance Center, industrialist Max Fisher (who struck his original fortune in the oil business) and Al Taubman, the real estate-shopping center tycoon who recently bought Sotheby's and made an unsuccessful bid to purchase Pulitzer Publishing Co. of St. Louis (*St. Louis Post-Dispatch*).

The typical Detroiter commutes 51.3 minutes between home and office on expressways clogged most mornings and evenings. The city ranks No. 3 in the nation in passenger car expenditures, well ahead of cities with larger populations (it is No. 5), according to SRDS. Contributing to this ranking is the city's lack of a people-moving system, although one is in the works.

The long drive time augurs well for the radio market and out-of-home advertising. Detroiters listen to radio an average of 24.6 hours a week, placing the market in a tie for ninth in radio listenership in the nation, according to Radio Advertising Bureau. Radio stations provide heavy sponsorship of programing breaks for commuters, from ad sponsorship of traffic reports, time checks, news and sports updates and the like. Competition in radio is heightened also by formats: There are seven adult contemporary stations, one classical and five black. WJR, an am station with a monopoly on sports in this sports-crazed time, is the overwhelming leader in the market, according to Arbitron's spring sweeps.

Top marketers in the area include the car companies: General Motors, Chrysler, Ford, American Motors, Volkswagen of America; the computer company, Burroughs; Domino's Pizza (in nearby Ann Arbor); the No. 2 U.S. retailer, K mart; the No. 3 brewer, Stroh Brewery, and industrial concerns including Ex-Cell-O, Budd Co., Fruehauf, Federal Mogul and Masco.

As white-collar employment continues to rise and Detroit diversifies with robotics and other hi-tech areas, the city has become less a slave to the cyclical nature of the auto industry, although a poor year in the industry still is felt throughout the Detroit economy, as when Chrysler nearly went under and other U.S. automakers struggled in the early 1980s.

Unemployment rate in the seven-county Detroit metro area stood at 7.6% in August, 1986, based on total employment of 1,979,000, compared with a 9.6% rate in August, 1985.

RANK **41**

Fort Lauderdale Hollywood-Pompano Beach

Venice East

($ in thousands)

1985 vital statistics

Population	1,125,200
Disposable income	$16,486,938

"How sweet it is," says Jackie Gleason, one of Fort Lauderdale's most celebrated citizens. And he should know. About one in four residents of the county he lives in is 65 and older, which should make Mr. Gleason, 70, feel right at home. Another 57% of the area's population falls between the ages of 18-64 and 20% is under 17.

Besides Mr. Gleason, Fort Lauderdale is most known for Spring Break, which draws 400,000 college students from February-April. With those numbers, it is not surprising the area supports at least 3,091 restaurants and 583 hotels and motels with far more opening or planning to open.

Fort Lauderdale, considered a Miami stepchild, is a burgeoning dichotomy, with large pockets of elderly ex-Northerners on the one hand running the condominiums with their powerful voting blocks, and the yuppies on the other, many of whom live in new communities such as Weston or Coral Springs to the west.

Of all U.S. cities, Fort Lauderdale has one of the lowest number of single family homes, 49%, which owes to the fact that the area is second in the nation in number of condos, 32%. Fort Lauderdale is also third in the country for having the fewest number of homes built before 1949. An average home costs $92,100.

Geographically, the city boasts so many canals off the Intracoastal Waterway, it is frequently referred to as "Venice East." One of the largest boating shows in the world is held here in November, when the rest of the country is warming up for winter.

Perhaps the largest business development is the continuing expansion of the Fort Lauderdale-Hollywood International Airport and its close proximity to burgeoning and also expanding Port Everglades. One of the busiest air traffic routes in the country is Fort Lauderdale-New York, because of its heavy flock of snowbirds.

Real estate is an enormous industry with new shopping centers and housing communities opening nearly every weekend. At least two ad agencies in the county specialize in real estate, and the Saturday edition of the *Fort Lauderdale News & Sun-Sentinel* boasts the largest real estate section in the country. The morning *Sun-Sentinel* (circulation 125,259) and the evening *Fort Lauderdale News* (66,785), are both owned by Tribune Co., Chicago. The two link up for the Saturday real estate prize, with total circulation of 185,576, according to ABC FAS-FAX reports for Sept. 30, 1986.

The *Miami Herald* has heavily eaten away at the paper's market by publishing a separate Broward edition. *Herald* circulation in Broward County is 101,550. Scripps Howard daily, *Hollywood Sun-Tattler*, (circulation, 34,095), also is supported by locals. Miami/Fort Lauderdale lies in the same 14th ADI, and all the network affiliates have begun Broward bureaus or have Broward news teams.

Fort Lauderdale has a growing skyline with the addition of a new museum of art, a new library, sleek new office towers such as Two Financial Plaza, the Barnett Bank Plaza and First Fort Lauderdale Place. And it continues to grow. By the end of the decade, the city will have a $33 million

MEI

Performing Arts Center. But as with most cities, downtown parking is a continuing problem.

The county spends an estimated $900,000 a year on economic development through its private Committee of 100, an affiliate of the Broward Economic Development Board.

Gold Coast Graphics moved from Dade to Broward earlier this year, taking 300 jobs and a $5 million annual payroll because of Dade's refusal to grant the printer tax free revenue bonds. Other companies, such as Racal-Milgo Inc. and Hector Turf Inc. also abandoned Dade for Broward.

Broward's largest public companies are Pantry Pride of Florida, Development Corp. of America and Atlantic Federal Savings Bank. The top employers are Broward County School Board, 12,488; Broward County government, 6,600; and Winn Dixie, 3,400. Major corporations such as Westinghouse, Gould and American Express built plants west of Fort Lauderdale when land was dirt cheap, regulation was nonexistent and family-oriented communities could be developed to attract employes.

Though sandwiched between two cities known for high crime, Miami and West Palm Beach, Fort Lauderdale has managed to escape the serious criminal element. Residents seem most disturbed by deaths of spring breakers who fall from hotel balconies. Last year, because of the deaths and other activities police relate to alcohol consumption, the city toughened up its drinking and public lewdness laws and built a wall around the Fort Lauderdale "Strip." Many students rebelled by driving 45 minutes south to Miami Beach. Still, locals know better than to even attempt a trip to the beach during what they call "the enemy invasion."

Broward is the second most expensive Florida county to live behind the Florida Keys (Monroe County), according to the Governor's Office of Planning and Budget. An average annual income for a resident of Fort Lauderdale is $36,655. The area's population grew an estimated 10.5% from 1980-85, to 1.1 million.

RANK **39**

Fort Worth-Arlington, Tex.

Cow Town

($ in thousands)

1985 vital statistics

Population	1,199,900
Disposable income	$16,804,151

Fort Worth-Arlington in north central Texas is one of the nation's prime growth areas. Population has increased 23.3% in five years. For the five year period, 1983-88, the metro area is ranked as the third fastest growth area of the top 50 metropolitan areas, according to *Sales & Marketing Management's*, "1988 Metro Market Projections."

Fort Worth has weathered the oil crisis better than most. Texas is wrestling with a $3.5 billion revenue shortfall and record unemployment. Mayor Bob Bolen boasted in October that despite proposed fiscal 1987 spending increase of 7.1%, Fort Worth will be the only major city in Texas not to increase property taxes this year. In the first quarter, employment in Fort Worth stood at 6.8%, up from 6% recorded one year earlier, but still below state and national rates.

The city's labor force is still growing, but not all displaced workers have found jobs. Hometown companies like Gearhart Industries and Western Co. of North America are shrinking. Kendavis Industries, a huge privately-owned oil service company, is in involuntary bankruptcy.

Within the last two years, Fort Worth has attracted new industries employing 2,100, while American Airlines and other hometown employers are together hiring 5,350 new workers. There is plenty of office space. Downtown vacancy still languishes at 22%.

Fort Worth's economy is diversifying into aerospace manufacturing, livestock marketing, food production and electronics. The area's largest employers: General Dynamics-Fort Worth Division, 23,500 employed locally; American Airlines, 9,000; Bell Helicopter, 7,600; Tandy Corp., 6,500; General Motors CPC Arlington Plant, 3,000; Gearhart Industries, 900.

In its heyday, Fort Worth was a mustering point for Chisholm Trail cattle drives to Kansas. It was Cowtown, repleat with saloons, brothels, gambling dens, Butch Cassidy and Wyatt Earp, not exactly a modern-day image. To shake off this trail dust, Fort Worth Corp., a business consortium formed in the early 1980s, launched a $500,000 nationwide publicity campaign last fall themed "Fort Worth, Welcome Home."

Though Fort Worth never was a boomtown, it is ironically succeeding now. Streets aren't crowded nor city services strained. Land prices, while rising, are reasonable.

The North Side is getting a $50 million facelift, including the restoration of the Cowtown Coliseum. Downtown includes a rebricked Main St. and the recently renovated shops and galleries known as Sundance Square.

Fort Worth has no income tax, corporate tax, estate or inheritance taxes. More than 40% of the population is 20 to 44-year-olds and 74.8% white. The city is served by one daily newspaper, the *Fort Worth Star-Telegram*, and spillover from the two Dallas dailies.

The area, included with Dallas as the 9th ranked DMA by A.C. Nielsen, has the NBC affiliate, KXAS-TV, and two indies, KTVT and KTXA, the latter two wresting a very high 6.1 rating, 17 share from the total market, according to Nielsen's May report.

Arlington, halfway between Dallas and Fort Worth, was just a sleepy little town until General Motors opened its plant there in 1952. Today, Arlington is at the heart of the nine-county area known as the Metroplex.

It is the third largest city in north central Texas. Population is expected to hit 291,000 in 1990, up 14%. Unemployment is 4.6%. It is served by one daily, *Arlington Daily News*.

Although enhanced by proximity to Dallas, Fort Worth and the D/FW International Airport, the city has a solid economic foundation of its own. Tourism is one of city's most important industries—it hosted more than 4 million visitors last year, most coming to theme park, Six Flags Over Texas, the state's No. 1 man-made tourist spot.

The city opened its convention center in 1985; new hotels followed. During 1986, four new hotels added 756 rooms, giving the market 5,000 rooms.

Within the city limits is a General Motors assembly plant and the Great Southwest Industrial District, a 14,000-acre tract encompassing 350 companies employing 12,000 people.

Arlington has some of the lowest taxes in the country, and has no corporate or personal income tax. Average age is 29.7; population is 92.8% white.

In October, the city became a first, not by choice but out of necessity, when it began insuring itself for liability through the sale of $9 million in taxable bonds. Arlington's program makes it the first such self-insurance program in the country.

FOCUS '87

COMPREHENSIVE BUSINESS REVIEW & FORECAST

Timed to help you grapple with economic uncertainty, and plan for the impact of tax law revisions...

A COMPREHENSIVE VIEW OF THE FINANCIAL FUTURE

For reliable, astute information on business and financial prospects in 1987, corporate decision makers, investors, and consumers will turn to Focus '87 for a comprehensive review of 1986, and a preview of the trends and issues that will shape their business and financial planning during the months ahead. This is one of The Record's most eagerly awaited business sections of the year, and one that is most likely to be retained for future reference.

A SOUND ADVERTISING INVESTMENT

Focus '87 appears in The Sunday Record, when readers can spend more time leisurely absorbing this comprehensive issue...and more time reading your advertisement. It reaches 516,300 adults in affluent Bergen and Passaic counties, where 61 percent of all professionals and managers reported reading The Sunday Record in the past week. Among these readers are the executives involved in the selection and/or purchase of financial services, advertising media or telecommunications systems, plus executives involved in site selection for conventions and meetings, or in buying business electronics and other equipment. This elite readership makes Focus an ideal environment for business and financial advertisers, as well as those that provide services for business executives. The Sunday Record delivers more than three times the readership of The New York Times and almost four-and-a-half times the readership of The Newark Star-Ledger in affluent Bergen/Passaic counties, the #9 market in the country in median household Effective Buying Income.

Advertising deadline: January 13, 1987

Call for more information on space, color, and the impact of your advertising message among top corporate decision makers and wealthy investors.

SUNDAY, JANUARY 25, 1987

Brown, president of local ad agency Taylor Brown & Barnhill. Mr. Brown along with many other local executives view Houston's economic woes as part of the normal growing pains of a young city that achieved success perhaps too soon and too easily.

Now the ripple effect of depressed crude oil prices, covered extensively by the national media, cannot be denied by even the most ardent Houston boosters. But the city is fighting back on nearly all fronts.

From the Houston Astros to the local committee determined to sell the city as the perfect site for the 1988 Democratic Convention, efforts are being made to market the positive side of a troubled economy.

A citywide ad campaign called "Houston Proud" was instigated by Mr. Brown's agency last February as a means to urge Houstonians to take pride in their city. Largely a volunteer effort and backed by the Houston Economic Development Council, the campaign has generated enthusiasm locally but some snickers nationally for its questionable grammar and marketing value.

The *Dallas Morning News* gave front page coverage of comedian Gary Somberg's "Houston Poor" takeoff of the "Proud" campaign. Mr. Somberg is selling a "Houston Poor" starter kit for $16, which warns, "If you can afford this kit, you may not qualify."

It is difficult, however, for this city that is celebrating its 150th birthday to find humor in a high unemployment rate of 10.5%, record foreclosures, depressed retail sales, widespread layoffs and sizable office, apartment and hotel vacancy rates.

Economic indicators are not encouraging—particularly because of record growth the city experienced from 1974 to 1982 that makes slight gains seem instead like failure. The boom of the '70s has made the bust of the '80s seem even worse.

Houston still remains a relatively affluent market. According to *Sales & Marketing Management*, 1985 average household income after taxes was 15% greater in the Houston Metropolitan area than the country as a whole.

Further, Houston is still a young city with a 1985 median age of 29.2 years compared with the U.S. median age of 31.9 years.

What characterizes Houston now is how the market is adjusting to a major financial crisis spawned by the energy recession.

For some, like long-time retailer Sakowitz here, it has meant filing for Chapter 11 bankruptcy protection. Local advertisers, ad agencies and media are naturally feeling the pinch.

Retail ad budgets understandably are flat to down while industrial accounts are by and large inactive, according to local sources. Businesses that go beyond the Texas market are faring better than those with purely local reach. In virtually all areas there is belt-tightening.

Young & Rubicam pulled out of this market last summer when it sold its Houston agency Rives, Smith, Baldwin & Carlberg/Y&R to Chuck Carlberg and a group of local investors. D'Arcy Masius Benton & Bowles will leave the market by yearend.

Ad revenues and linage at competing dailies, *Houston Chronicle* and *Houston Post*, are down. The *Chronicle* leads in a total average paid weekday circulation of 425,434 compared with the *Post's* weekday plus Saturday circulation of 316,209, according to each paper's publisher's statements for the six months ending March 31, 1986.

The local magazine scene is in what one local ad exec calls a "shambles." The chamber in October gave up its 50-year-old business monthly, *Houston Magazine*, citing poor ad revenues. Similarly, the short-lived *Houstonian Magazine*, formerly *Houston Style*, ceased publishing after two years of targeting an upscale market. Southwest Media Corp., Dallas, is negotiating the sale of *Houston City Magazine* to the magazine's publisher, Lute Harmon.

Houston Home & Garden, owned by Communications International, N.Y., in partnership with Meredith Publishing, projects 1986 ad pages will fall about 14% from 1985.

Capital Cities/ABC's o&o station, KTRK-TV, continues to be the dominant station in a market in which indies claim a combined 10.3 rating, 26 share from sign on to sign off, according to A.C. Nielsen's May report.

Houston's moderate climate promotes an almost year-round outdoor lifestyle. "There are a lot of parks and open spaces," observes Richard Jaffe, president of Telesurveys of Texas, a social/market research company. "The outdoor aspect means that people are not locked up with the tube in the winter. And people have more time to spend with their children here because they can live near their workplace."

While Houston's population growth has slowed compared to the '70s, the Hispanic market is expected to be the fastest growing ethnic market for the next two to three decades, according to Mr. Jaffe. Its Hispanic market is 7th largest nationally, with 700,000 people according to the 1985 U.S. Census.

Indianapolis

Crossroads of America

($ in thousands)

1985 vital statistics

Population	1,203,100
Disposable income	$14,262,143

Native son Kurt Vonnegut Jr. once described Indianapolis as "the world's largest city not on a navigable waterway." However, a lack of ports didn't prevent the city from developing into a shipping hub. During the heyday of the railway system Indianapolis became the crossroads of America, a position it retains today during the heyday of the interstate highway system. The convergent point of four interstates, Indianapolis is within a day's drive for two-thirds of the nation's population.

More people have been coming in recent years, and more have been staying. Between 1980 and 1984, the population of the eight-county MSA increased by 3.1% to 1,203,100, and employment rose by 18.7%. During that same period the median household income rose to $12,997 from $10,050 in 1980; more than 20,000 new housing units were built; and 1,000 new businesses opened.

The mood of the city is upbeat: That's especially apparent in the downtown area known as the Mile Square. Over the past decade $1 billion has been spent on downtown development, with another $800 million worth of projects scheduled for completion by 1990. In the past year alone construction has started on six major downtown structures.

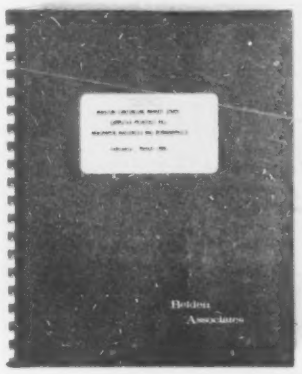
All of this activity translates into an unemployment rate of only 6.3%. Although the closing of Western Electric in 1985 and the recent curtailment of RCA's videodisc production have dealt the blue collar sector unwelcome blows, the environment for enterprising entrepreneurs is healthy. Author John Naisbitt lists Indianapolis among the 10 best places in the country to start a new business.

Except for a newspaper. The Pulliam family dominates the dailies, owning both the Indianapolis morning *Star* and evening *News*. For decades these have been the only dailies in town. The upshot of this lack of competition is a lack of the sort of excitement generated by media friction found in other markets. Though ostensibly there's competition for circulation (the *Star* boasts a daily lead of some 100,000 copies), the papers share building space and ad rates, reducing the competition to numbers signifying nothing.

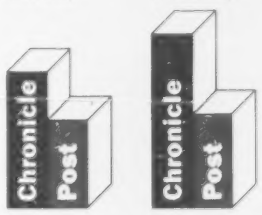
In the publication field the more interesting story is the on-going battle for circulation figures and advertising dol-

WHAT DO THREE BRAND NEW STUDIES SAY ABOUT THE CHRONICLE'S LEAD IN HOUSTON?

OVERWHELMING.

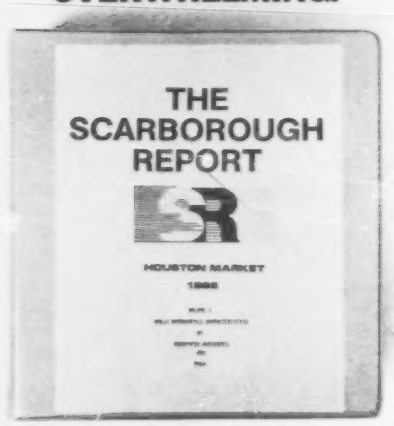


The Chronicle leads by:
28% Daily 47% Sunday

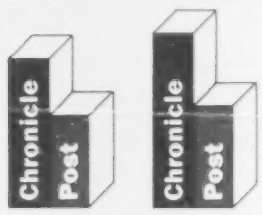


1986 Belden Study
Conducted February–March, 1986

OVERWHELMING.

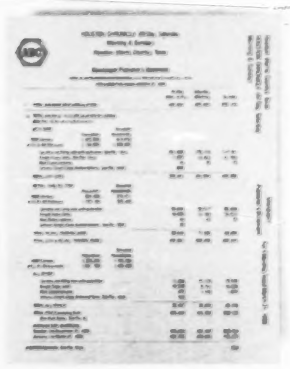


The Chronicle leads by:
32% Daily 42% Sunday

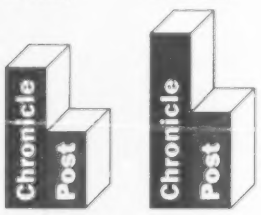


1986 Scarborough Report
Conducted April–July, 1986

OVERWHELMING.



The Chronicle leads by:
37% Daily 45% Sunday



Publisher's Statements
March 31, 1986

How far ahead *is* The Chronicle?

According to the newest Belden study, conducted February thru March, 1986, The Chronicle's lead is 28% daily, 47% Sunday.

But what does the Scarborough Report say? Conducted April thru July, 1986, it puts The Chronicle lead at 32% daily, 42% Sunday.

And how about the Publisher's Statements? Dated March 31, 1986, they show The Chronicle is ahead 37% daily and 45% Sunday.

So it's not a question of whether The Chronicle is leading in Houston. We are–no if's, and's or but's. It's only a matter of *how much* the lead is.

And according to three different studies, The Chronicle leads by an average of 32% daily, and 45% Sunday.

By comparison, when our competitor boasts of being Houston's best-read newspaper, did you know their data is two years old? It's true. They're quoting figures from a Simmons-Scarborough study whose data was gathered in 1984, and released in 1985.

But what really counts is how the numbers add up *this year*, in 1986. And you can look at three different studies, all reflecting the same, single fact: The Chronicle has an overwhelming lead over the competition.

For more information on why The Chronicle is Houston's most powerful, cost-efficient buy, phone Joycelyn Marek, Research Manager, collect at (713) 220-7401.

Houston Chronicle
Houston's primary advertising investment

SOURCES: 1986 Belden Continuing Market Study, Houston P.M.S.A. The 1986 Scarborough Report, Houston Market. Calculations computed by The Chronicle from the March 31, 1986 Publisher's Statements for The Houston Chronicle and The Houston Post (City and RTZ). Represented by Sawyer Ferguson Walker.

lars between the two city magazines—*Indianapolis Monthly* and *Indianapolis Magazine*. Both claim a monthly circulation of 20,000 plus, with the *Monthly* often holding a slight edge.

Activity among the tv stations has been less dramatic. The three network affiliates are tightly bunched between 6.6 and 6.0 ratings and 22 and 20 shares. Drama, if any, followed the two indies. WTTV-TV was sold to Lorimar-Telepictures, and WXIN-TV (formerly WPDS-TV) was sold to Outlet Communications.

The radio market hasn't been much more dynamic, though the sale of public station WIAN-FM, owned and operated by the Indianapolis Public School System, raised some eyebrows when public tv outlet WFYI's bid of $100,000 won out over Butler University's $1 million offer. The official explanation had to do with preserving the public interest. Butler already operates a non-commercial station, WAJC-FM, seemed to be the gist. Reverberations from the sale were heard in the press for weeks.

Among commercial stations, Detroit-based Booth American Co. purchased WZPL-FM from Midwestern Communications Ltd. for $13 million. That follows the sale earlier this year of WIRE/WXTZ am/fm by Mid-America Radio Inc., to WIN Communications Inc. of Indiana.

With an average daily commute of 47 minutes, the morning and evening drive time slots are important. And because public transportation is limited to 230 Metro buses, a large percentage of the nearly 676,000 registered cars clog the freeways during peak hours. That translates into ad gold for WIBC-AM and WFBQ-FM, top stations in Arbitron's spring sweeps.

The advertising event in the city—and one of the most important in the country—is the Indianapolis 500. All local media offer race packages to advertisers. With coverage of the 500 starting in early May and lasting through Memorial Day, it's an event that offers plenty of exposure.

However, 1987 will offer another, potentially larger, ad opportunity, albeit a one-time deal: The Pan American Games, to be staged in Indianapolis Aug. 7-23, and nationally telecasted by CBS. So far corporate sponsors such as Eli Lilly & Co., Mayflower Corp., Marsh Supermarkets, Merchants National Bank, and Indianapolis Newspapers Inc. (the *Star* and the *News*) have pledged between $500,000 and $2 million each to be involved.

The games will mark another peak in the city's effort to be recognized as an amateur sports capital. But sports are not the only game in town—there is also a substantial effort being made to attract more convention business to Indianapolis. The $80 million Hoosier Dome is the link between the sports world and the convention business, serving as both a 61,000-seat venue for spectator events and a huge exhibition hall for conventions.

RANK **28**

Kansas City, Mo.-Kan.

Heart of America

($ in thousands)

1985 vital statistics

Population	1,493,900
Disposable income	$19,406,472

When speaking of Kansas City in a national forum, one must debunk some myths. For one, Kansas City is not just in Kansas. The posher bedroom communities are on the Kansas side, but the bigger city is in Missouri. The nation's 28th largest metro area, variously defined by federal and local agencies, covers seven to 10 counties and is about evenly divided on both sides of the state line. It is a sprawling, straddling piece of geography at the center of the U.S.

Kansas City is not flat and dusty, but hilly with tree-lined streets. The dust in the area is kicked up from the record $1.2 billion worth of commercial and residential construction sites that blossomed during the first three quarters this year.

Despite the sour agricultural economy, the city that sits at the center of the nation's breadbasket has seen about $6 billion worth of commercial construction in the last three years. The construction boom—most noticeable in a reviving downtown office tower boomlet and burgeoning suburban office parks—appears to be tapering off this year, but residential unit starts are at record pace—the most since "F.W. Dodge Reports" began monitoring the scene in 1978.

A strong service economy is coupled with big-employer production of automobiles and trucks (two General Motors assembly plants and one of Ford's) and greeting cards (thanks to home-based Hallmark Cards, the city's civic-minded corporate giant).

Top 10 markets in 1985 by index of retail sales to disposable income

Rank	Market	Retail sales	Disposable income	Index
1	Las Vegas, Nev.	$4,092	$6,417	131
2	Knoxville, Tenn.	3,570	5,756	127
3	El Paso, Tex.	2,629	4,320	125
4	Orlando, Fla.	6,576	10,870	124
5	Albuquerque, N.M.	3,136	5,252	122
(t)	San Antonio, Tex.	7,637	12,819	122
7	Chattanooga, Tenn.	2,348	3,996	121
8	Memphis, Tenn.-Ark.-Miss.	5,789	9,905	120
(t)	Little Rock-North Little Rock, Ark.	3,159	3,401	120
10	Charleston, S.C.	2,598	4,501	118

Source: Marketing Economics Institute. MEI

An unemployment rate of about 4.8% earlier this year—consistently at least two points under the national average—helps keep the Kansas City consumer in the malls. Additionally, total personal income is rising at a 4-5.5% rate this year with expectations of a 5.2% annual growth rate in 1987, according to the Mid-America Regional Council.

Belden Associates market surveys for the *Kansas City Star* show that 77% of the seven-county metro area households have annual incomes of $15,000 or more. The $50,000 and above household income segment, which accounts for 12% of the market, is the fastest growing; it jumped 37% between the 1983 and 1985 Belden surveys.

The city has a per capita effective buying income of $12,581 and an average household EBI of $33,302. The workforce is 44% white collar. Forty-eight per cent attended or graduated from college; another 37% are high school graduates. Nearly 85% of the population is white; 13% black and 2% "other," primarily Hispanic.

Vast underground limestone caves, dry and temperate year-round, cement the area's reputation as a distribution center by providing the nation's largest underground storage facilities.

Kansas City International Airport, home to Trans World Airlines' maintenance and overhaul base, has never come close to capacity in terms of passenger traffic. Last year it handled 7.2 million passengers and nearly 33 tons of air cargo, with more than 400 daily airline operations. KCI's largest gate user, Eastern Air Lines, which has KCI's only flight hub operations, this year scaled back expansion plans that would have included a new reservations center, because of financial woes.

Thirty-nine per cent of the workforce hold jobs outside their county of residence, with 62,000 Kansans working in Missouri and 33,000 Missourians commuting to Kansas. Government (the city is a federal regional center) is the area's largest employer. The biggest private-sector employers, each with a payroll of 5,000 or more, are Allied Bendix Aerospace, GM, Hallmark, TWA, the University of Kansas Medical Center, and Yellow Freight System Inc.

The much-ballyhooed quality of life gets its reputation from the Nelson-Atkins Museum of Art, the State Ballet of Missouri, the Lyric Opera and 35 live theater groups. The biggest regional drawing cards on the sports circuit are Kansas City Royals baseball, which attracts more than 2 million fans a year despite the club being in the smallest market of any major league team, and Kansas City Chiefs football. Worlds of Fun and Oceans of Fun, two theme parks north of downtown, draw family vacationers in the summer.

Year-round, the big regional draws are the city's suburban shopping malls and the upscale Country Club Plaza, a Spanish-style shopping and entertainment district in midtown Kansas City that decorates itself with miles of outdoor lights each Christmas season.

Kansas City is served by three vhf network tv affiliates and four uhf stations (two indies, one PBS and one Christian). KMBC-TV (ABC) leads the rankings with a 7.1 rating and 26 share, according to A.C. Nielsen's May reports. Most of the metro area has cable tv access. There are 13 am and 17 fm stations, the top nine of which are tightly bunched behind leader KMBZ-AM. Dominant dailies are the morning *Kansas City Times* and evening *Star*, both owned by Capital Cities/ABC. There are three suburban dailies; one biweekly; four weeklies (two of them minority) and many neighborhood papers.

RANK **2**

Los Angeles-Long Beach, Cal.

City of Angels

($ in thousands)

1985 vital statistics

Population	8,108,700
Disposable income	$105,842,422

"Economically speaking, it can be said that the sun is now rising in the west," observes California Governor George Deukmejian. Support for such a statement lies oceanward: U.S. trade with its Pacific neighbors, spearheaded by the adjoining Los Angeles and Long Beach ports, surpassed trade with its traditional European allies in 1982; by the year 2000, California will rank as the world's fourth largest economic power in its own right.

The Los Angeles-Long Beach metropolitan statistical area, the nation's second largest, consists of 8.1 million residents who have an average household income of $38,200, or more buying power than anyone but the most well-heeled New Yorkers.

Arriving to attend to their whims and contest with the likes of Bank of America, Security Pacific and the nation's largest savings and loans for this country's second-largest consumer deposit base, are 173 non-California banks, 126 of them foreign-based.

Just a few blocks from the Pacific Stock Exchange's gleaming new trading floor in downtown Los Angeles rises the city's most recent, and in some ways most powerful, addition to an increasingly impressive skyline, the 41-story Citicorp Center. Even old money brokerages from Wall Street like First Boston and Morgan Stanley & Co. are flocking to the coast.

What makes the tilt West particularly significant is that it will grow more pronounced with time.

Sixty per cent of the world's population now lives in the Pacific region. And while the first Japanese arrived here in the 1880s to build the West's railways, Japan's three largest automakers Toyota, Nissan and Honda, have since established U.S. headquarters within a few miles of each other in a coastal plain where Japanese farmers operated plant nurseries before World War II.

Because foreign travelers spend over $3.5 billion a year in California, and with a 27-story, 550,000-sq.-ft. World Trade Center under construction in Long Beach, the sense of globalism is growing.

California's international trade surged from $2.6 billion in 1960 to in excess of $94 billion in 1985, over 80% of which was with Pacific Rim nations. The Los Angeles Customs District is growing rapidly as intermodalism, the combination of ships, trains and trucks to transport heavy goods, transforms San Pedro Bay from a regional harbor into an international gateway.

With plans by 2020 to add 2,600 acres of fill to the bay at a cost of $4 billion, the congestion problem that arrived in tandem with increased trade should ease, enabling the Port of Los Angeles to build upon its position as the nation's most profitable port, and the Port of Long Beach as the nation's busiest.

Yet if international commerce is Southern California's future, it by no means dominates the present. Five major retailers-May Department Stores, Carter Hawley Hale, Associated Dry Goods, Federated Department Stores and Nordstrom vie for the nation's second-largest retail market, a lap of riches that support over 610,000 retail employes in all.

Aerospace giants such as Hughes

THE AVERAGE ANNUAL FAMILY INCOME OF DIARIO LAS AMERICAS READERS IS $28,050.

Read all about it. Ask for Diario Las Américas' Reader Profile.

Diario Las Américas

The Spanish-language Daily Newspaper
Founded July 4, 1953

Diario Las Américas
2900 N.W. 39th Street
Miami, Florida 33142-5193

(305) 633-3341

Represented nationally by:
Cresmer, Woodward, O'Mara & Ormsbee, Inc. (CWO&O)

Aircraft, Northrop Corp., Rockwell International and TRW power the Pentagon while employing another 305,000 Angelenos. In addition, most of the largest oil companies have drilling or refinery operations nearby.

Southern California is best known as the nation's entertainment capital. But with so many changes in the last year among its film barons and media magnates, there are wires crossed from Beverly Hills to Hollywood and back.

Ted Turner now owns MGM/UA, or at least what used to be before Kirk Kerkorian bought back parts of United Artists. Lorimar has merged with Telepictures, changing its name to Lorimar-Telepictures but not many of the faces.

And then there are many new faces at Columbia, Fox, Paramount and Walt Disney Productions.

Press lord, Rupert Murdoch, once thought to be a potential successor to the Hearsts at the Los Angeles *Herald-Examiner*, has since declared he's giving up newspaper acquisitions to establish a fourth television network, centering on indie KTTV-TV in Los Angeles, acquired from Metromedia Inc.

Similarly, Jack Kent Cooke came home from Washington D.C., to acquire the Los Angeles *Daily News*, a suburban daily, from Tribune Co., Chicago, which has decided it wants to establish its own fourth network, beginning with Los Angeles indie KTLA-TV. The markets seven indies make it tough on the affiliates, siphoning off a composite 15.1 rating points and a 41 share, according to A.C. Nielsen's May reports. KNBC-TV and KABC-TV are in a virtual dead heat for the top spot with 7.1 and 7.0 ratings, respectively, and 19 shares.

Adding spice to the variety of life is the fight of some Hispanic interests to retain control of KMEX-TV, the Spanish-language station in Los Angeles that SIN Television Network was forced to divest under an FCC ruling.

Hispanics now constitute over 20% of California's population. Los Angeles is considered home to more Mexicans than anywhere but Mexico City while Asians are about 8% of the population total and blacks about 7.5%.

RANK **47**

Louisville, Ky-Ind.

Derby Town

($ in thousands)

1985 vital statistics

Population	954,300
Disposable income	$10,525,008

For a while this year, Louisville was "Dallas." Or so it seemed, at least, as the story of the rich and powerful Binghams and their intra-family rivalry had its run on network tv news, "60 Minutes" and "Donahue," on National Public Radio and in newspapers and magazines of every ilk everywhere.

That drama is now over and the dissolution of the local communications conglomerate complete. The jewel among the media properties, the daily newspapers, the *Courier-Journal* and *Louisville Times*, went to Gannett for an estimated $300 million.

The former Bingham tv and radio properties are market leaders. WHAS-TV, a CBS affiliate sold to Providence Journal Co. for $85.8 million, is virtually tied with WAVE-TV (NBC) for the top tv spot in the market, with 30 share points each, according to A.C. Nielsen's May reports.

WHAS-AM and WAMZ-FM sister stations, sold to Clear Channel Communications of San Antonio for $20.1 million, dominate as No. 1 and 2, respectively, in the radio market, according to Arbitron's spring sweeps.

While the operations and much of the management of these companies have remained basically intact since the sales, change is inevitable. Even before Barry Bingham Sr. put the properties on the market, the newspapers had undergone a significant change when the two separate news staffs were combined for economic reasons. The betting is that Gannett will make an even greater economic move by folding the afternoon *Times*.

Metro Louisville, with a population approaching one million, knows all too well the story of economic moves, especially when told by manufacturers. In early 1970s, for example, manufacturing jobs accounted for nearly 40% of the area's work force. That percentage is down to about 24%. Production workers here still churn out appliances at the General Electric plant, the area's largest employer, Ford trucks, Philip Morris cigarets and liquor products at Brown-Forman, but the heyday is over.

Yet, the area's unemployment picture is not all that gloomy. In July of this year, in fact, it stood at 6.8%, the lowest since March, 1980. The gains, naturally, have been in the service and trade areas. For the MSA, which consists of four counties in Kentucky (Jefferson, Bullitt, Oldham and Shelby) and three in Southern Indiana (Floyd, Clark and Harrison), service jobs in the 1974-1986 period have increased 57% to 91,700. Retail/wholesale trade employment during the period rose to 103,900, up 27.6%. However, as a Metro Louisville United Way study notes, the jobs being created have lower wage scales than the jobs that have been lost. That perhaps explains why the area's per capita and average household effective buying incomes (EBIs) are lower than the national averages. For metro Louisville, the per capita EBI is $10,516 while the U.S. average is $10,813; the Louisville household EBI is $28,827 and the national average, $29,640.

Besides the fundamental change in the work force composition, other national trends, such as a graying population, more working women and more single-parent families, are evident in the United Way study. For example, in 1970 nearly 30% of the area's population was in the 14-and-under category with 9% in the over 65 age range; by 1985, the younger group had declined to 22.6% while the over-65 increased to 11.1%.

The number of women in the metro Louisville work force grew by 17.7% while male employment dropped 3.8% from 1970 to 1982 (the latest data available). In addition, the number of female-headed households with children increased 86.5% in the same period. Children in single-parent families, in stepfamilies or living with other relatives account for 55.3% of all children in the metro Louisville area.

When the terms healthcare and Louisville are linked, the name Humana generally pops to mind. Now a diversified healthcare giant with annual revenues approaching $3 billion, Humana owns and operates 86 hospitals in 21 states and three foreign countries. It is Louisville's fifth largest employer with 5,000 employes.

The face of Main Street is due for another change soon with construction of two office towers by the Webb-Silliman Development Co. on property that has been cleared for development and is vacant except for two older buildings.

A recent study by Louisville Central Area, a non-profit planning group, indicates that the downtown will be ready for additional office space. The study says that in the past two years, more than 1 million sq. ft. of office space has been built or created through renovation and another 1 million sq. ft. is under construction or renovation.

While much of the building and restoration of downtown Louisville in recent years have been on the southern edge, the area nearest the river—the northern fringe of the downtown—is starting to get attention. Phase one of the so-called "Broadway Renaissance" has been completed there, with subsequent phases consisting of a residential complex and additional commercial and retail space.

THE ONLY CHART SHOWING SAN JOSE BELOW SAN FRANCISCO.

Three charts showing it higher:

% of ADI Population[1]	
Santa Clara County	25%
San Francisco County	12%

% of $35M + Incomes[2]	
Santa Clara County	27%

Memphis, Tenn. Ark.-Miss.

RANK 48

Bluff City

($ in thousands)

1985 vital statistics

Population	944,700
Disposable income	$9,904,773

During the 1970s Memphis suffered a lack of cooperation between business and government, lingering division between the races, absence of an over-all plan for community growth, and a series of obsolete plant closings in manufacturing industries, such as Firestone and International Harvester. Economic news was consistently dismal.

That has changed. The turnaround began in 1979 when Tennessee Gov. Lamar Alexander conceived and organized the Memphis Jobs Conference, a community forum for economic study, planning and action. During the pivotal years of jobs conference activity (1980-81) specific goals for growth were defined and adopted, racial issues addressed, and the nucleus for a business-government partnership formed.

According to a recent economic report, titled "Memphis: Tennessee's New Growth City," released by First Tennessee Bank, the state's largest, since 1983, Memphis' employment growth of 10.1% has passed the 9.1% of both Tennessee and the nation. Unemployment has remained at a stable 6.6% over the past year.

Memphis is the 10th largest distribution center in the nation. Distribution industries, centered on homegrown Federal Express, are booming, creating almost 5,000 new jobs in 1985. During a 30-day period in 1986, seven national firms announced a move of major distribution facilities to the city, including Music Corp. of America (MCA), GTE/Sylvania, Wearever-Proctor-Silex, Munsingwear and Bucyrus-Erie.

Memphis International Airport has become America's 16th busiest, moving into the "large hub" category reserved for those airports which enplane at least 1% of the total domestic air travelers in the nation (5.5 million in the year ending in July, 1986). A large expansion of the airport is under way to accommodate a new wave of traffic generated by the merger of Northwest Orient and Republic airlines and to satisfy the continued growth needs of Federal Express. This includes facilities to accommodate Northwest's wide-bodied aircraft.

The city's telecommunications plant is one of the largest in the nation because of its central location, the sophisticated networks of Federal Express, Holiday Corp. and others. More 800-number calls go in and out of Memphis than any city in the south.

Medical industries now account for 9% of Memphis' total employment. And as a result of recent city, county, state and corporate commitments, more than $200 million will be poured into medical research and teaching facilities over the next five years. Included are such institutions as St. Jude Children's Research Hospital and the University of Tennessee, Memphis.

Memphis ranks within the top 10 cities in the south having corporate offices of companies with sales in excess of $1 billion, and 200 of the Fortune 500 now have operating facilities in the city. The most recent coup, International Paper's operating headquarters from New York, was won over 18 other competing cities.

Tourism, through such attractions as Elvis Presley's Graceland mansion, the annual Memphis in May International Festival, Mud Island and Beale St. where the blues began, has become big business. Tourism revenues hit $850 million in 1985, a 14% increase over the previous year. The Convention and Visitors Bureau's "Start Something Great in Memphis" campaign is paying off. The bureau has an annual budget of $1.5 million.

The vacancy rate for all multi-family housing in Memphis/Shelby County is estimated at 7.1%, up from a rate of 4.8% last year. There is an abundance of choice office space available because of low interest rates and tax advantages for downtown developers.

Memphis is served by only one daily newspaper, the *Commercial Appeal*, a Scripps Howard property. But Memphians in increasing numbers depend on *USA Today* for a broader coverage of national news. Numerous weeklies service the area.

The weekly *Memphis Business Journal* is considered by many to be a second newspaper. With a circulation of 10,000, the *MBJ* had a 50% increase in ad revenues in the past year.

The city magazine, *Memphis*, with a circulation of 25,000, has had a 20% increase in ad revenues since May, 1985, when it was rescued from threatened bankruptcy by a group of investors headed by the publisher of the *MBJ*.

The market is served by 26 radio stations. The top five are fm, with WHRK-FM far out in front as No. 1, according to Arbitron's spring sweeps. Tv is represented by all three networks with WMC-TV (NBC) with a 9.4 rating and 28 share, and WREG-TV (CBS), 8.9/26, dominating the ratings, according to A.C. Nielsen's May reports. There are two indies and a PBS station. A full-service cable system also serves the area.

Retail sales for the year ending in July were up 6.9% over the previous year, attributed to rising employment and aggressive marketing by retailers, with complete stocks to meet consumer demand. The slogan of Schawb's Dry Goods Store, a Beale St. merchant offering everything from voodoo potions to clerical collars, sums it up: "If you can't find it here, you're better off without it."

Highest unemployment rates among 100 leading markets

Rank	Market	Unemployment rate Sept. '86	Aug. '86	Sept. '85

Miami-Hialeah, Fla.

RANK 24

Magic City

($ in thousands)

1985 vital statistics

Population	1,753,100
Disposable income	$20,916,317

"Entering Miami often feels like leaving the country, or about as close to leaving the country as you can get while still being able to drink the water and watch David Letterman," says Jane Wallace, a reporter for CBS' "West 57th Street."

Miami was a sleepy resort town built around a railroad until the 1960s when Fidel Castro came to power and much of the Cuban middle class headed north across the Florida Straits. Entrepreneurial Cubans, and others, continue to transform the major source of revenue, tourism, into international business by linking the city with the whole of Latin America. Miami is already the biggest banking capital outside New York.

There are three cultures in Miami: Latin American, based in Little Havana; European-American and Jewish, based in Miami Beach; and black American, based in Overtown.

Of the 1.7 million Miami metro population, Latins make up 41%, non-Hispanic whites 40% and blacks 19%. After Los Angeles and New York, Miami is the third largest Hispanic area of the country. Cubans constitute a majority of Hispanics and represent the wealthiest Hispanic group in the U.S.

There are 25,000 Latin-owned businesses in the county, from mom-and-pop groceries to huge New York Stock Exchange companies. In certain communities, such as Hialeah, Hispanics outnumber Anglos 3-1.

In addition to Cubans, exiles from virtually every country in Central and South America live in Miami. There is a 60,000-plus Haitian contingent, which has given way to a Northeast Miami community called Little Haiti.

When Castro emptied Cuban prisons at the Port of Mariel and sent detainees to Miami in 1980, Miami's crime rate soared. Still the city has tried—but has not very well succeeded—to shed its image as a dangerous place to live. The city is considered the second-most dangerous metropolitan area in the country, beaten out only by New York.

Many wealthy Latin Americans and northern snowbirds maintain winter residences in Miami, so it is not surprising that Miami, at 50%, is ranked among cities with the lowest percentage of single-family homes. An average home costs $86,900. However, the city is seventh in the nation in number of condominiums, 14%, and fifth in the nation in most apartments, 30%. Apartment rentals average $375 per month, with prices brought down by elderly Miami Beach apartment dwellers on fixed incomes.

Because of the transient nature of the city, Miami has one of the 10 busiest airports in the country, with one of the busiest routes: New York-Miami. Earlier this year, the city opened Metromover, a 1.9-mile above-ground subway that runs from Dadeland, one of the busiest shopping malls in the Southeast, to Hialeah, for a $1 fare. Miami has tried to upgrade its bus system; nevertheless, most residents drive to work using major thoroughfares I-96 and Palmetto Expressway. The average commuting time is 52 minutes.

Miami is a giant banking and commerce center. Some 350 international banks and multinational corporations have offices in the city. More than 125 of the Fortune 500 companies have branches or main offices here, including Knight-Ridder and International Business Machines. About 2.5 million sq. ft. of new office space, most of it occupied by financial institutions dealing with Central and South America, have been constructed in downtown Miami since 1984.

The largest employer in the county is Dade County schools with 30,000 employes, followed by Metro-Dade County government with 23,000 employes.

Miami supports the morning *Miami Herald*, 442,560 circulation, considered one of the best newspapers in the country; the Spanish daily, *Diario Las Americas*, 68,800 circulation; the evening *Miami News*, 60,137 circulation; and the *South Dade News Leader*, 11,614 circulation. The *Miami Herald* publishes a section called "El Herald" that is included in newspapers in certain Hispanic Zip code areas.

While the *Miami News* covers only Dade County, the *Herald* tries to cover the tri-county South Florida area and has separate Broward and Palm Beach news bureaus and sections. The *Herald* competes heavily with the *Fort Lauderdale News* and *Sun-Sentinel* on Dade's northern border. The advertising and circulation wars between the two papers are legendary.

The city hosts three network affiliates, two Spanish language stations and countless cable stations. The CBS affiliate, WTVJ-TV, No. 3 in the market, changed hands in 1984, and a deal to sell the station again fell through in October, 1986, leaving the once-popular station internally unsettled. No. 1 station is WSVN-TV (NBC) with a 7.4 rating, 20 share, according to A.C. Nielsen's May report. Both Spanish stations are for sale. There are 32 English and seven Spanish-language radio stations in the Dade-Broward county area and many trade employes and deejays.

to bumper, twice each day.

But will this traffic break last? Mr. Whitman, director of the Somerset County Board of Chosen Freeholders, and others involved in planning the growth of the region highly doubt it. They expect at least five more years of the explosive growth which has transformed New Jersey's waistline Middlesex-Somerset-Hunterdon region in recent years from an area dominated by farms, quiet suburbs and undeveloped tracts to a hub of corporate activity, shopping malls, hotel-conference centers and political battles over land use.

Middlesex County, once the home of aging industries such as the Chevron Oil Co. refinery in Perth Amboy and the N.L. Industries titanium dioxide plant in Sayreville, has felt the brunt of the change, leaving some old-time residents baffled.

Somerset and Hunterdon counties, although less developed, are beginning to face many of the same problems—waste disposal, burgeoning school systems, lack of housing for the poor—as growth accelerates.

Demographic experts such as George Sternlieb, director of the Rutgers University Center for Urban Policy Research, attribute the region's phenomenal growth to location—between major highways such as the New Jersey Turnpike, Garden State Parkway and Routes 1 and 287 and proximity to Newark International Airport. The region also houses corporate magnets, such as Johnson & Johnson in New Brunswick, Merrill Lynch & Co. in Plainsboro and Exxon Corp. research and engineering offices in Clinton, along with Rutgers University in New Brunswick.

But the mass exodus of people and jobs to this region also illustrates the increasing desire to work near the home and a change, for many young families, in discovering the suburbs may have more attractions than the cities.

The nature of the area's population has changed almost as much as the landscape.

Middlesex County has recorded the largest population increase in the state, with 9,400 new residents added July 1, 1984-85, according to the most recent state department of labor figures. The greatest increases have occurred along the Route 1 corridor between New Brunswick and Trenton and in the key areas of Edison, East Brunswick, Old Bridge and Monroe-South Brunswick.

The heaviest growth in Somerset County has been in the Watchung-Raritan area and in the most developed municipality—Franklin Township. In Hunterdon County, the Clinton area has been mushrooming in growth, regional officials say, and the completion of Route 78 should spur further development.

For the three counties, a 3.8% jump in employment in the past year is because of an increase in service jobs and the phenomenal growth of the retail industry.

Residential growth has been just as astounding and property values have zoomed. In all three counties, property has gone up approximately 23% in the past year, according to a state treasurer's study, making the area one of the hottest real estate markets in the country.

Once the home of commuters and farmers, the region now is the fourth richest in the U.S., with a median effective buying income of $35,302, according to the *Sales & Marketing Management's* "Survey of Buying Power," in 1986. The median population age of 33 years, the youngest of any region in New Jersey, means more families with needs for municipal services and the retail trade.

The newspaper market has become competitive as the region has grown. The area is served by the *Central New Jersey Home News* in New Brunswick (daily circulation 58,994), the *Star-Ledger* in Newark (460,330 daily), the *Courier-News* in Bridgewater (49,779 daily), and many smaller dailies and weeklies. Circulation figures are from ABC's FAS-FAX Sept. 30, 1986.

The area gets its tv from New York, Philadelphia, and locally from WOR-TV. The area is heavily cabled with Storer Cable TV and TKR Cablevision, the primary operators. Cable also is a strong ad medium locally.

The key question for economists, local officials and residents is whether the region can sustain, and indeed wants to sustain, further growth. Rutgers' Mr. Sternlieb believes the expansion will continue for another half dozen years, but Joseph Seneca, chairman of the Governor's Economic Policy Council, worries that the shift from manufacturing companies to service industries may leave the region without a significant base.

One solution he sees is a change in the jurisdictional system now dominated by home rule to allow more broad-based planning. James Gilbert, chairman of the new state Planning Commission, says the state intends to take a more active role in determining the need for planning without choking off growth.

"Major growth," says Mr. Seneca, "should not become the goose that lays the golden egg—it should not change the region from an attractive place to work and live."

Milwaukee, Wis.

Beer Capital

($ in thousands)

1985 vital statistics

Population	1,378,600
Disposable income	$17,584,887

More than twice the number of furniture ads air annually on Milwaukee tv than in the average U.S. market. It's not because Milwaukeeans wear out their furniture faster than most, but because 75% of people here live in single-family homes or duplexes.

That trend, traced to a conservative, family-oriented culture, is changing. Permits for multi-family housing construction are up 72% this year, mostly on the northwest side in Oak Creek, Germantown, Menomonee Falls and Brown Deer.

Milwaukee's downtown area also is experiencing the first investment in downtown housing since the 1960s with the construction of Yankee Hill, a $30.8 million apartment and townhouse project, and a former Blatz Brewer, being quartered into apartments at a cost of $20 million. Both projects, to be completed in early 1987, will be for the more affluent Milwaukeeans.

The construction of downtown housing units is a small part of major redevelopment in the central city. Work has begun on the $100 million theater district, which will include three theaters, two cinemas, an office tower, retail space and a Windham Hotel. Construction is under way on the $40 million, 20,000-seat Bradley Center Sports Arena. Completion of both is set for early 1988. What was once a giant Schlitz Beer Brewery is being converted into offices, retail space and restaurants.

One big attraction to office space developers is the low vacancy rate downtown, estimated at 12%, well below the national average of 15.6%. Rents for prime space have escalated 25% during the past five years, however. If more development projects don't get off the ground soon, rents will begin to increase at a much higher rate by 1988, says a major realty exec.

To Milwaukeeans, one of the more exciting additions to downtown this year is the new Marshall Field's, the first upscale department store to land in Milwaukee. It has replaced the old Gimbels Store at the Grand Avenue Mall. Field's also has replaced Gimbels at the Northridge Shopping Center in northwest Milwaukee, and at the Southridge Shopping Center in Green-

ARIZONA'S HOT MARKET

TUCSON

We're 77th and moving up fast...

Tucson is one of the 10 fastest growing cities in the USA. Our current metro population of 635,000 is projected to top 1 million in less than 15 years. We're a sunbelt market with a future.

As the commercial hub for inhabitants of Southern Arizona and much of Northern Mexico, Tucson presents a lucrative marketplace for major business to thrive and grow.

Tucson's daily newspapers, **The Arizona Daily Star** and the **Tucson Citizen**, have a staggering five-weekday adult readership cume of 80%!* This readership is employed by solid growth industries of hi-tech manufacturing, tourism, and government/military.

Gain your foothold on this flourishing market with the advertising medium that supplies the market demand: **The Arizona Daily Star** and the **Tucson Citizen**.

dale. Its Mayfair Mall store, in Wauwatosa, has been open since 1959.

According to a Field's exec, the success of the Wauwatosa store, and the lack of any other specialty department stores in Milwaukee were important reasons behind Fields' decision. The growth in household income was another factor. In 1980, median household income measured $11,272. This year, the median household earns $30,847. But Milwaukeeans aren't rushing out to spend their money. Despite the rise in income, the city has slipped in its national ranking for total sales. "If you can sell it in Milwaukee, you can sell anywhere," says the manager of the Northridge Shopping Center. He quickly adds that the market here is changing. "People are becoming more fashion conscious. They're buying more items based on wants rather than just needs. That means sales of luxury items are increasing." Northridge, Bayshore Mall in Glendale and the downtown Grand Avenue Mall are bringing in trendier, pricier stores such as Laura Ashley.

The increasing number of chic establishments, along with the revitalization of downtown is helping this city overcome a serious inferiority complex. The 1980 recession was a serious blow; there was a corporate exodus from Milwaukee for several years. Now, more companies are moving in than out, and the economy is showing signs of steady growth. Residents are feeling better about their city.

The self-image problem here is made worse by what is commonly a distorted perception of Milwaukee by outsiders. Many still think that this is where most domestic beer is made. While Pabst, Miller and Heileman do have breweries here, they are no longer the major employers. Manufacturing does remain an important sector of this economy. Manufacturing is 27% of the metro area, and services and finance, 53%.

Sports is a big item, and Milwaukee expects to get a boost from its NBA basketball team, the Milwaukee Bucks, this season. They are being billed as a title contender. The Greater Milwaukee Open officials are looking for a major sponsor for their golf tournament in 1987, and expect to strike a deal in January. They also are negotiation with a tv network interested in airing the tournament throughout the Midwest next summer.

The employe-owned Journal Co. dominates the city's media, owning the major newspaper, tv and am and fm stations. The evening *Milwaukee Journal* carries a daily circulation of 293,384, while the morning *Milwaukee Sentinel* circulates to 196,068, according to ABC FAS-FAX figure for Sept. 30, 1986. A.C. Nielsen ranks the city the 30th DMA. The NBC affiliate, WTMJ-TV, leads the nets with a 7.8 rating, 27 share, with WISN-TV (ABC) pulling a 6.7/23 for No. 2, according to Nielsen's May report. The am station, No. 1 WTMJ, outdistances its sister fm station, No. 2 WKTI-FM, in the radio market, according to Arbitron s spring sweeps.

RANK **13**

Minneapolis-St. Paul, Minn.-Wis.

Twin Cities

($ in thousands)

1985 vital statistics

Population	2,282,400
Disposable income	$32,052,975

The upscale Twin Cities area, famous for its lakes, icy winters and heated downtown skyways, has recently witnessed mild setbacks for hi-tech firms, a major airline merger, a development boom and increased media competition.

Layoffs at locally based Control Data Corp. and Honeywell shocked the Twin Cities, a metro expanse that is home to 2.26 million, as did Northwest Orient Airline's $884 million purchase of Republic Airlines in February —two locally based airlines.

Expanding retail sales and a building boom balanced the hi-tech slump. Retail activity increased 5.4% in the fourth quarter of 1985 from 1984, the most recent data available.

The skyline of Minneapolis, nicknamed the "Minneapple," has filled out noticeably. The latest planned additions include the 57-story Norwest Corp. tower and an adjacent 50-story skyscraper built by BCE Development and IDS Financial Services. Downtown Minneapolis office space has doubled since 1970 to 17.8 million sq. ft.—three times the size of downtown St. Paul's 5.9 million sq. ft. office market, located 10 miles to the east.

St. Paul's flagship Galtier Plaza development ran into financing problems after one 46-story tower was built, halting work on an adjacent 36-story scraper. Another major St. Paul project, the 37-story World Trade Center, is only 30% leased midway through construction.

Twin Cities population increased substantially in the green, hilly second-tier suburb cities of Apple Valley, Blaine, Brooklyn Park, Burnsville, Eden Prairie, Maple Grove, Plymouth and Shoreview. According to the Minnesota Planning Agency, the median 1984 family income in the 10-county metro area was $30,093, a 37% increase from 1979.

Unemployment in 1985 was 5.3% in a work force of 1.3 million people in the Twin Cities. Of that total, 116,000 work for the top 10 employers, headed by Honeywell with 21,700 employees. 3M Co., 18,617, and Control Data, 17,550, are close behind.

The city's corporate activities extend into its cultural life, supporting such fine arts institutions as Tyrone Guthrie Theater, the Minnesota Orchestra and St. Paul Chamber Orchestra.

Retail centers have sprung up around the Twin Cities, with Woodbury Center, an estimated 1.2 million sq. ft. retail mall east of St. Paul, the most recently announced project. Far larger than any other shopping center is the Mall of America, a giant 9.5 million sq. ft. development including retail, office, convention, restaurant and entertainment space, due to break ground in May, 1987.

In October, competition intensified between the *Minneapolis Star & Tribune* and the *St. Paul Pioneer Press & Dispatch* when the *Star & Tribune* opened a 12-employe bureau in downtown St. Paul. The dominant *Star & Tribune* (daily circulation 383,000) views the area as a single entity. Its new bureau will help it increase readership in the northeast, east and southeast Twin Cities area with bolstered community sections and more St. Paul news.

The *Pioneer Press & Dispatch* (daily circulation 190,000), takes a single-city approach, selling a few thousand copies each day in Minneapolis news stands. The *Star & Tribune* has a circulation of 35,000 in St. Paul territory.

Competition between business publications has pepped up, with MCP Inc., buying four business magazines from Edina, Minn.-based Dorn Communications for $4 million. MCP subsequently spiked one publication, the *Minnesota Business Journal*, and announced plans to publish its bi-weekly *CityBusiness Minneapolis-St.Paul* on a weekly basis within 18 months.

Machelek Publishing, Minneapolis, will debut in January the *Business Journal of Minnesota*, a "how-to" monthly magazine aimed at small and medium-size businesses. The *Minnesota Real Estate Journal* beat *CityBusiness* to the punch, becoming the first weekly business publication.

The Minnesota Legislature, after years of budget deficits and personal income tax surcharges in the early 1980s, cut corporate and personal income taxes $1.4 billion in the last two years.

Cable tv continued to struggle in Minneapolis, with Rogers Cablesystems wiring far fewer city households than it projected and, finally, asking the city for financial help. Continental Cablevision is wiring St. Paul.

The Twin Cities is served by five vhf and five uhf tv stations, with the CBS affiliate, WCCO-TV, leading the pack with a 6.8 rating, 27 share. United Television's indie, KMSP-TV, is one of the stronger uhfs in any market, at 3.1/12, according to A.C. Nielsen's May report. In radio ratings, WCCO-AM far outdistances other members of that market, which includes 15 am and 17 fm stations.

50 plus

850 THIRD AVE • NEW YORK, NY 10022 • (212) 715-2781

makes Long Island's Nassau-Suffolk metro area a desirable place for marketers: No. 1 in the nation in media household effective buying income with about a $2,000 lead over a nearby rival in Connecticut; by Zip codes the nation's two wealthiest enclaves are Nassau County's Great Neck and Roslyn with after-tax incomes of $74,552 and $70,338, respectively.

But reaching the affluent and others of Long Island is tricky. The media scene in Nassau-Suffolk is heavily influenced by New York City print and electronic media. Times Mirror Co.'s *Newsday* has been the only daily based on Long Island. Skip Ackerman, president of Ackerman Advertising in Glen Head, says *Newsday* has 60% household penetration. That provides one buy for the market "but everybody else is in it. It's a daily catalog and it suffers from clutter."

The electronic side lacks such clarity. Long Island has 15-20 radio stations serving fragmented markets. On the other hand, it has no vhf stations, only public station WLIW-TV and a small uhf commercial station, WLIG-TV.

Nassau contains 64 incorporated villages and 68 unincorporated areas in three towns; Suffolk has 29 incorporated villages in nine towns. In the shadow of New York, they lack a common history or perspective.

Non-islanders also grope for a handle on the place. A survey by Elaine Sherman, professor at Hofstra University's School of Business, revealed that business people around the nation know more about Nassau-Suffolk's housing and traffic woes than its cultural and environmental attributes.

Those are, however, legitimate concerns. A spokeswoman for *Long Island Business*, a weekly publication which compiles the "Long Island Almanac," says traffic, taxes, utility rates and water supply are worrisome: "Companies have left because of electric rates and the lack of unskilled labor."

The economic scene in Nassau-Suffolk has developed a sort of Silicon Suburb of 2,000 hi-tech companies. A survey found the Island will add 17,000 engineering jobs by 1990, a 9.1% growth rate. Defense work done by companies like Grumman, Sperry, Fairchild and Republic account for 30% of the Island economic activity. The over-all unemployment rate in November, 1985, was 4%, down from 1983's 6.4%. The rate for fiscal 1986 was projected at 3.6% by the state department of labor.

Grumman Corp., Bethpage, an aerospace company, has the largest number of employes, 22,000. Next is the Roman Catholic Diocese of Rockville Centre, 12,500. New York Telephone, Sperry Corp. and Long Island Lighting Co. (LILCO) rounded out the top five, according to a survey by "LIA" Business' Research Bureau. The largest retailer, with 10 stores, was TSS-Seedmans.

According to Cushman & Wakefield of Long Island, in Garden City, the area had 2.1 million sq. ft. of new office space construction entering the market in 1985. The rental rate averaged $20.50 per sq. ft., with a 10% vacancy rate. Suffolk, the larger and less developed county, is experiencing the bulk of industrial project development. Figures from *Long Island Business* show that the eight largest projects under construction last year were all in Suffolk county, as were 41 of the top 50.

The area also has undergone a hotel boom. *Long Island Business* counted 15 proposals for expansions or new constructions last January, which it interprets as businesses looking for quality accommodations close to their locations.

The ethnic composition as of 1980 was 91.7% white, 6.2% black and 3.9% Hispanic. The Island is greying, as few families can afford housing there. That results in a lower school population. The state educaton department put actual public school enrollment at 432,400 for 1984-1985, falling to 391,700 for 1990-1991.

The Long Island lifestyle differs considerably from New York City's. Mr. Ackerman notes, "It's a lot more home oriented, with more home entertaining and activities." The typical home may have four or five tv sets, for example.

Out of the home, islanders have plenty of outdoors activities. The south shore of the island boasts Fire Island and other playgrounds of the rich and famous. The two counties have 20 state parks with 25,000 acres of space. Jones Beach and Robert Moses State Park and other beaches provide room for fun in the sun for islanders and city residents. Nassau-Suffolk have 1,600 miles of shoreline.

Mitchel Field in Uniondale has been developed as a culture and entertainment center for Nassau County, with the 18,000-seat Nassau Veterans Memorial Coliseum (home of the National Hockey League's Islanders) and its 60,000-sq. ft. exhibition hall. A 391-room Marriott hotel at the site is planning a 200-room expansion. The area also includes Nassau Community College and Hofstra University. To the north is Roosevelt Field, a major shopping center.

New Orleans, La.

Crescent City

($ in thousands)

1985 vital statistics

Population	1,324,400
Disposable income	$14,118,527

In 1986 Cajun cuisine was sweeping the nation, and everyone dreamed of crawfish and blackened red fish. Yet the city of New Orleans was preoccupied with a quagmire of a different sort: The Crescent City was bogged down in a stagnant economic environment stemming largely from continued recession in the oil and gas sector.

New Orleans laid off 1,200 city workers through October. The work week for the remaining 5,800 was reduced to four days at a 20% wage reduction for several months. City workers were to return to a five-day work week this month.

The city earlier this year slashed services and passed more than $6.5 million in new taxes to try to offset a $30 million deficit in the 1986 budget. Unemployment of 11.1% in the first quarter ranked fourth highest among the nation's 50 largest cities; in September it stood at 10.8%.

New Orleans' plight is part of a larger statewide problem. Having depended too much on the now-capped oil and gas gusher, Louisiana has led the nation in unemployment for some time. In June, the jobless rate in the Pelican State hit 13.8% for one of its highest counts, but slipped back to 12.5% by September. Such widespread economic woes have translated into reduced state aid for New Orleans.

The economic dilemma of the city got national attention with the bankrupt 1984 World's Fair, which collapsed with over $100 million in losses. Yet it has been said that New Orleans accepts disaster with equanimity. Indeed, the story of its present monetary misery is almost a tale of two cities: The financially crippled Crescent City is pressing forward through pivate investors, embarking on a citywide revitalization effort.

The Rouse Corp.'s Riverwalk, a $58 million festival marketplace, opened in August on a half-mile of riverfront in the International Pavilion of the World's Fair. The complex has 114 specialty shops and restaurants (half local, half national) with 35,000 sq. ft. of glass to showcase the Mississippi.

Less than half a mile away is another such marketplace, The Jackson Brewery, which doubled in size this fall to 140,000 sq. ft. with its Millhouse expansion. A drawing card is its French Quarter location—the historic brew-

house of Jax Beer, built in 1891 and now restored by the Jackson Brewery Development Corp.

Between these two is Canal Place, a Houston-style mall open since 1984; neighboring Jefferson Parish boasts two other large, new complexes—the Esplanade Mall, which welcomed Macy's this fall, and Galleria, a mixed-use development with phased openings over the next seven years.

The question is: Can New Orleans's sluggish economy support such intense expansion? Industry experts elsewhere predicted a bloodbath, but city economists say a strong tourism promotion could supply enough buyers to support the centers. Studies that showed 70% of the trade would come from tourism are proving accurate, but Riverwalk officials say repeat local business is picking up and tourists appear to be making the entire mall circuit. Tourism is New Orleans' No. 2 industry, with 1,073 conventions in 1985 and 768,753 delegates. Jackson Brewery reported 5 million visitors last year.

McGraw-Hill's "F.W. Dodge Reports" indicate construction activity topped $1 billion in 1985, up from $882 million in 1984. Nonresidential made up $578 million of the tally.

Other construction focuses on improving transportation, important to a metropolitan area that now faces very heavy freeway traffic with an average daily commute of 55.9 minutes. A second parallel span to the Greater New Orleans Bridge is to be completed by 1988, with an eventual 10 lanes instead of the present four. A riverfront streetcar line also is planned.

Meanwhile, the city's second black mayor in history, Sidney Barthelemy, continues to battle the financial crunch. Voters in September rejected by 61% a property tax that would have charged landowners $195 per lot. The city is considering another controversial tax that would assess 1.5% on earnings above $5,000 for all New Orleans workers, regardless of whether or not they live in the city.

The metropolitan statistical area of the New Orleans region actually consists of six parishes (counties): Orleans, Jefferson, St. Tammany, St. Bernard, St. Charles and St. John. The Economic Development Council also includes Plaquemines and St. James parishes in its over-all River Region picture. Population movement in recent years has been to outlying bedroom communities with St. Tammany Parish, for example, posting a 111.8% increase from 1970-84. Better quality of life and lower crime rates are cited as influencing factors.

The region's oil and gas industry—at $969 million—accounts for 3% of the nation's entire mining sector. Port-related activities are also strong, with the lower Mississippi River amassing 9% of the nation's total water transportation sector. Top private employer is Avondale Shipyards.

New Orleans is served by one daily newspaper, 12 am and 12 fm radio stations, seven tv stations and one cable company. WWL-TV (CBS), regarded as having the strongest local news slot, pulled a 10.8 rating, 32 share to lead nearest competitor, WDSU-TV (NBC), 7.5/22, according to A.C. Nielsen May reports. Arbitron gives radio station WYLD-FM a 15.5 share, outdistancing WEZB-FM with 10.1.

New York

Big Apple

($ in thousands)

1985 vital statistics

Population	8,465,800
Disposable income	$116,792,146

The celebration last July of the Statue of Liberty's centennial was a typical New York City extravaganza—huge, hype-heavy, by turns solemn and silly, bold and crowded. The symbol in the harbor drew the attention of the nation to its largest city, as if it needed the scrutiny. News happenings in New York often have strong national repercussions because so many leading corporations call the Big Apple home.

It's big in every sense. New York ranks at the top in nine ADI categories, finishing second in passenger cars to Los Angeles. New York's households equal 7.7% of the U.S. total. Estimated population in 1985 was 8.5 million, up 2.3% from the 1980 census.

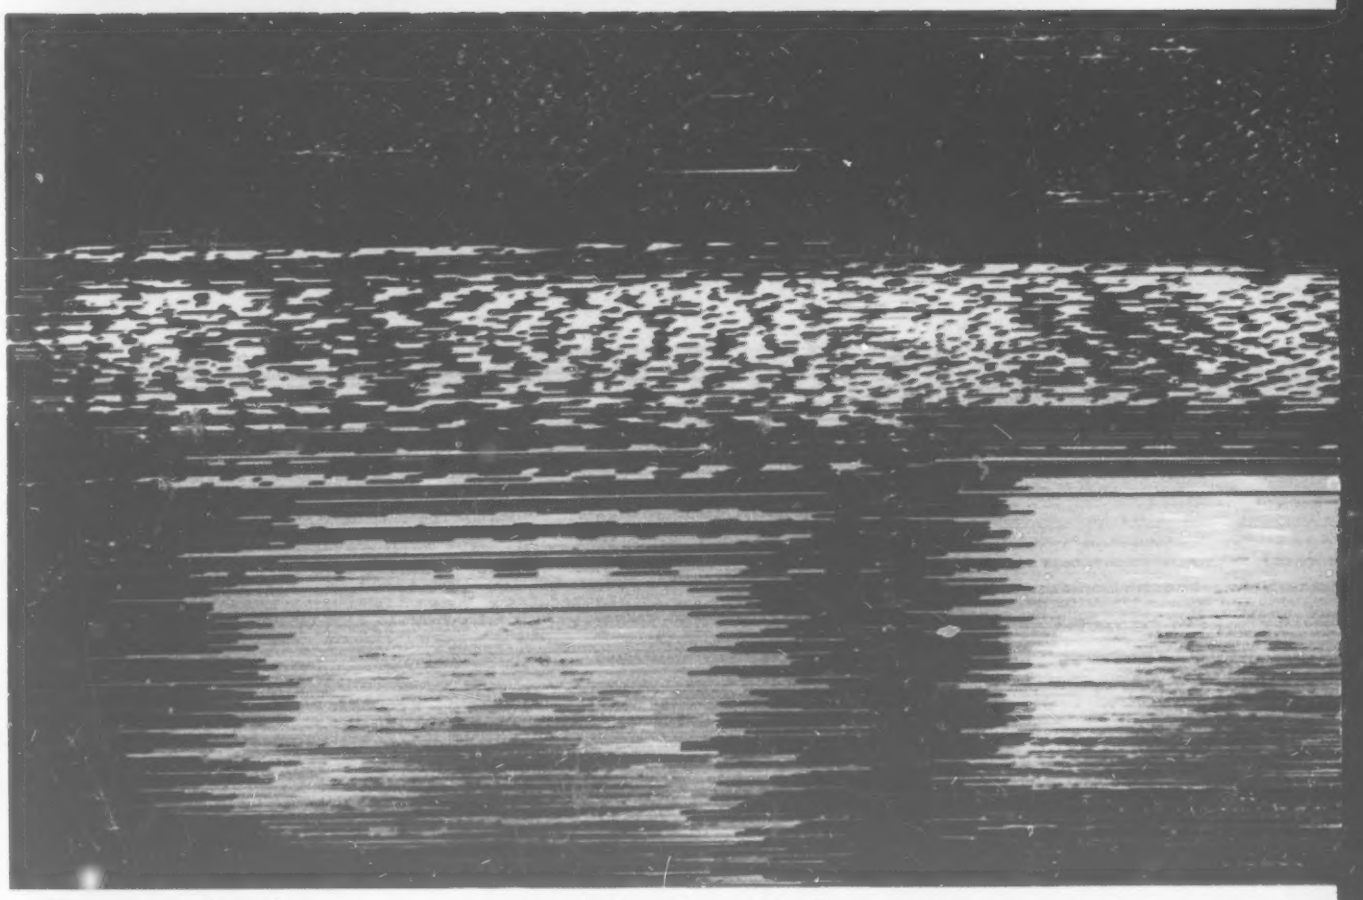
In that environment, national stories are often local events. The boardroom wars of the Big Three networks became a local story because ABC, CBS and NBC all have their headquarters within blocks of each other on Manhattan's West Side. WNBC leads the o&o stations in the rankings with 7.2 rating, 20 share, slightly ahead of WABC, 7/19, according to A.C. Nielsen's May report.

The turmoil of changing ownership affecting the networks—ABC bought by Capital Cities, NBC (RCA) by General Electric, and CBS falling to the control of Loews Corp.'s Laurence Tisch—also hit independent stations. Metromedia sold WNEW-TV to Rupert Murdoch's News America Publishing, which changed the call letters to WNYW-TV. Mr. Murdoch won a two-year waiver of FCC cross-ownership rules to give him time to find a buyer for the ailing *New York Post*. In May, News America sold the weekly *Village Voice* to Leonard Stern, head of Hartz Mountain Corp.

The action extended to the city's radio market. Capital Cities/ABC Inc.

AT&T

INSTANT C



A hot story takes shape at TIME® Magazine.

But at any moment an even hotter story can stop the presses.

TIME can move instantly to handle it.

And within 24 hours the new story is printed and ready for distribution.

All over the country.

AT&T helps make that possible.

An AT&T account team worked with TIME to develop a system designed specifically to meet their needs.

The system includes both AT&T SKYNET® Digital Service and AT&T ACCUNET® T1.5 Service.

Via AT&T satellite, SKYNET Digital Service transmits data, video, graphics and voice—anything that can be digitally encoded.

ACCUNET T1.5 Service sends digitally encoded signals by land.

Together they enable TIME to transmit a page with text and color to all their presses throughout the country in under a minute.

A full-color cover in less than two minutes.

In fact, the whole process, from closing to distribution, can take place in just 24 hours.

To give you an idea how our family of AT&T Digital Services work together to help TIME:

Using AT&T ACCUNET T1.5 Service, TIME sends a

'Big Bang' conflicts balk Grey, help WRG

By CLAIRE WILSON and STEWART ALTER

Client-conflict concerns stemming from agency mega-mergers continued to shape the news into the last weeks of 1986—scuttling one linkup deal and leading to the consolidation of a $60 million ad account.

Grey Advertising's Levine, Huntley, Schmidt & Beaver subsidiary called off talks of a linkup with Belier, the second-largest agency in France, because of fears that Grey clients Procter & Gamble Co. and Mars Inc. might disapprove.

"If the environment was not as it is following Saatchi & Saatchi [acquisition of Ted Bates Worldwide], we would have consummated the deal already," said Bob Schmidt, LHS&B president. "But in general everything has been put on hold."

But if Saatchi/Bates was an indirect influence in killing that deal, it was a direct factor in Cadbury Schweppes USA's sending a $60 million Christmas ad package to Wells, Rich, Greene, New York.

"Internal account conflicts at DFS Dorland forced our reluctant exit from DFS," said James Schadt, ceo of the Stamford, Conn.-based marketer in a prepared statement. "This in turn caused us to review our entire agency lineup with the objective of consolidation."

Mars, a larger client in the Saatchi orbit, has pushed for the resignation of all other confectionery accounts at all Saatchi agencies, including Cadbury at DFS. Cadbury Schweppes this year also emerged as a bigger factor in the soft-drink market, acquiring the Canada Dry and Sunkist lines from RJR Nabisco and becoming a minority investor in Dr Pepper Co. with Hicks & Haas, a Dallas investment group that also acquired Seven-Up

Last Minute News

Race for Reebok narrows to 2 agencies

AVON, MASS.—Reebok USA has trimmed the finalist list for its $15 million account to Ammirati & Puris, New York, and Hill, Holliday, Connors, Cosmopulos, Boston, sources say. It has eliminated Ally Gargano/MCA Advertising, Chiat/Day and DDB Needham Worldwide. The winner will succeed Maslow, Gold & Rothschild, Boston.

Hearst buys Murdoch syndicate

NEW YORK—Rupert Murdoch's News Corp. last week sold its News America Syndicate division to Hearst Corp.'s wholly owned North America Syndicate, as expected (AA, Oct. 20). The News America Syndicate includes comics strips such as "Andy Capp," "B.C.," "Dennis the Menace" and "The Wizard

Adman of the Year

Coca-Cola's Roberto Goizueta engineers startling comeback

By NANCY GIGES

Roberto Crispulo Goizueta, who turned a potentially disastrous decision into a soft-drink marketing coup while staying the course of Coca-Cola Co.'s other businesses, is ADVERTISING AGE's 1986 Adman of the Year.

A year after American consumers "revolted" against a new taste for the company's flagship beverage, Mr. Goizueta, 55, nevertheless capped its centennial year with the best results in perhaps two decades. Whether the yardstick is market share, earnings or stock price, the Atlanta-based soft-drink marketer stands tall.

The company's corporate share is at an alltime high—more than 39% in the U.S.—and the gap between Coca-Cola and Pepsi-Cola Co., Purchase, N.Y., is wider than ever. In 1986, net in-

Top events ran gamut—AIDS to Lady Liberty

Separating **AIDS** fact from fiction was a task common to both human resources and marketing executives at agencies and advertisers in 1986.

As the deadly Acquired Immune Deficiency Syndrome virus spread to what the federal Centers for Disease Control estimated as 1.5 million Americans (as carriers, not necessarily as victims), employers began a closer examination of the necessity of formulating guidelines for dealing with AIDS cases.

As a result, many companies like Quaker Oats Co. and Foote, Cone & Belding—whose client Levi Strauss & Co. has sponsored an educational video with all proceeds going to the AIDS Foundation—now include AIDS under their life-threatening disease or catastrophic illness policies.

Others, such as the Squibb Corp., partly due to the fear of AIDS, are considering developing policies addressing communicable diseases. For some companies, that may mean eventually testing prospective employes for AIDS. Frito-Lay so far has refrained from testing job applicants for AIDS but said it will "reevaluate our policy should further research on the transmission of AIDS be made available."

But even as advertisers and agencies grappled with the impact of AIDS in their own backyard, many also were bringing the subject before the general public either through public service campaigns or products that capitalize on the fears AIDS has raised.

Peter Rogers Associates created the "To care is to cure" AIDS campaign for the fashion, cosmetics and entertainment industries, which donated funds to the American Foundation for AIDS Research (AMFAR).

As part of the campaign, shoe designer Kenneth Cole donated a $250,000 ad budget for a print effort entitled "For the future of our children."

Ads featured models Christie Brinkley, Kelly Emberg and Julianne Philips Springsteen.

Campaigns took other forms elsewhere. The Southern California Co-operative AIDS Risk-Reduction Education Campaign spent $500,000 on a multi-media effort to "Fight the fear with the facts."

In Australia, the New South Wales health department began a $500,000 campaign talking about condom awareness, while the New Zealand AIDS Foundation and New Zealand department of health continued a $600,000 campaign discussing "New rules for safe sex."

In the U.S., such open discussion proved a little harder to do. The Mentor Corp. introduced a new condom marketed to women using an ad titled "I never thought I'd buy a condom." It noted "the list of sexually transmited diseases is

Among '87's thrills: The Aussie assault

FORECAST 1986 1987 REVIEW

It's about the land size of the U.S., but with a population of only 16 million, and it is taking Americans by storm.

Australia blasted forth this year in a major way. The rough-and-tumble, get-out-of-my-way-mate image so clearly matched the mood of the U.S. that a record number of Americans watched Aussies in commercials, in the movies or in person by touring Down Under.

The leading personality in all this was the ubiquitous Paul Hogan, a bridge rigger-turned-comedian who has come to epitomize the typical Australian.

Next year, Mr. Hogan will continue to appear in commercials for Foster's Lager, Australia's leading beer. One of this year's spots shows him fishing he-man style with a baseball bat. He also stars in the current hit movie "Crocodile Dundee."

The film, which he wrote, is about a lovesick Aussie who follows his sweetheart to the U.S. It grossed $76 million in its first eight weeks in the U.S., after earning millions in Australia.

But it is Mr. Hogan's remarkable tourism campaigns for the Australian Tourist Commission that exposed his appeal here.

Those commercials, via Mojo/MDA, Sydney, are expected to draw a record number of U.S. tourists to Australia next year, up from 1.3 million this year and 1 million in 1984.

The latest round of ATC commercials, also featuring Mr. Hogan, will air in January in major U.S. cities, and show "the human face of Australia," according to Don Morris, an agency principal.

Mojo/MDA itself made a major move into the U.S., by acquiring San Francisco-based Allen & Dorward, California's fifth-largest independent agency.

But Australia's luster goes beyond advertising. Australian clothes are expected to continue as hot products in the U.S., with retailers marketing lines with an Australian "look."

The influence of Australia in 1987 will be further aided by media coverage of the America's Cup races.

The races will feature U.S. attempts to regain the race and trophy lost to Australia in 1983.

A key Aussie promises to be Alan Bond, the Perth-based businessman who owns 50% of the Bond Group, which controls beer, real estate and media companies. He is also the owner of the Australia II yacht that won the Cup.

Mr. Bond aims to establish his Swan Premium beer in the U.S. next year, and sources say he would use another victory in the America's Cup races to help a marketing drive here.

And the rough-and-tumble Australian media barons, beyond ex-Aussie Rupert Murdoch, are making their marks in the U.S.

This month, Kerry Packer, chairman of Consolidated Press Holdings, purchased Valassis Communications, a major U.S. producer of freestanding inserts for newspapers. Mr. Packer and others, such as entrepreneur Robert Holmes a'Court, are in the market for U.S. properties.

The **Constitution's 200th anniversary** may not lend itself as easily to flashy tv spectaculars and promotional tie-ins as the Statue of Liberty's 100th did in 1986, but that's not stopping a number of companies and organizations from trying.

Already, the Big 3 tv networks are at work on prime time fare to mark the Constitution's bicentennial, ranging from a 90-minute NBC News tv special to CBS' package of one-minute "We the People" featurettes to ABC's "Miracle at Philadelphia" miniseries.

Walt Disney World, Orlando, included a star-studded bicentennial salute in its own 15th anniversary bash, shown in November on ABC. In syndication, Media Concepts, Richmond Hill, N.Y., was first out of the gate with "The Constitutional Minute," followed by Boston's WNEV-TV and Syndicast Services, New York, with a package of multi-daypart "We the People" specials, briefs and documentaries that began last summer and will run throughout 1987.

The CBS-owned WCAU-TV, Philadelphia, has become a co-venturer in that package, with American Cyanamid and Church & Dwight's Arm & Hammer division among the tv sponsors spending $1 million each.

Another advertiser, CPC International, last fall ran a freestanding insert for Skippy, Smucker's and Hellmann's products, headlined "Win a class trip to the capital and celebrate the Constitution's bicentennial." More such promotional linkups are likely in the year to come.

Adding to the excitement is the possibility that "Constitution Day," Sept. 17, the actual anniversary, will be a onetime national holiday.

Getting off to a relatively slow start, at least nationally, was We the People 200 in Philadelphia, site of the 1787 Constitutional Convention.

The organization is now picking up speed with a series of announcements, such as the naming of Smith-Hemion Productions, Los Angeles, to produce various tv and cable specials on numerous "Celebrate America" events from May through Sept. 17, and also the signing of Marketing/Trademark Consultants, New York, as licensing/merchandising agent.

M/TC so far has booked Franklin Mint and four others for its red-white-and-blue logo, with others pending. Smith-Hemion, best known as the producer of variety tv series and specials, worked with David Wolper, ABC's "Liberty Weekend" exec producer, on Miss Liberty's opening ceremonies last July.

Meanwhile, in Washington, the Commission for the Bicentennial of the U.S. Constitution, headed by former Chief Justice Warren Burger, is working through the Advertising Council with Scali, McCabe, Sloves, New York, on ad plans aimed at getting people, especially youngsters, involved in the serious aspects of the document's celebrations.

Hoping to generate coverage ideas and "challenge the communications industry to work more responsibly for all young people," Action for Children's Television, Cambridge, Mass., distributed a 106-page guide, "Television, Children & the Constitutional Bicentennial."

Dianne Semingson, We the People 200's president, and Smith-Hemion will be talking with tv networks, Home Box Office, Public Broadcasting Service and others as they complete their tv plans for the Philly festivities. More than 200 events, they said, will be concentrated between early May and Sept. 17.

The nonprofit group, having al-

Highlights

Still the season for conflict concerns 1

Client-conflict concerns stemming from agency megamergers continued to shape the news into the last weeks of 1986—Grey Advertising's Levine, Huntley, Schmidt & Beaver subsidiary called off talks of a linkup with Belier, the second-largest agency in France, because of fears that Grey clients Procter & Gamble Co. and Mars Inc. might disapprove. And Saatchi & Saatchi/Bates was a direct factor in Cadbury Schweppes USA sending a $60 million Christmas ad package to Wells, Rich, Greene.

SAMI charts slight food-store gains in '86

By ALAN B. MILLER JR.

For 52 weeks ending Nov. 7, 1986, unit volume in all 470 product categories tracked by SAMI/Burke in food stores had risen a scant 0.8% over the corresponding period in 1985. The rate of gain exceeded 1% in only one product department—refrigerated foods—where sales rose 4.7% on a unit measurement basis of 7.0% in poundage.

In dollars, 263 or 56% of the categories monitored by SAMI/Burke showed annual rates of gain, whereas 207 trended downward in spite of inflationary pressures in some instances.

Although the over-all product movement trend line is quite flat, there were a number of significant changes in the product mix. For example, tonnage growth rates above 25% were registered among shelf-stable juice and juice drink concentrates, fruit rolls bars, frozen sandwiches, refrigerated bread dough and lipcare products.

The new ibuprofen analgesics grew at the rate of 85% and now account for volume of more than $100 million in food stores alone, but the internal analgesics category, in which new brands such as Advil, Nuprin, Haltran and Medipren appear, shows an annual unit growth rate of just 2.4%.

In some instances a single new product can account for sales vitality, such as the volume contributed by Ocean Spray (shelf-stable) juice concentrate—one of the winners in the 1986 new-product derby.

Many of the growth patterns can be traced to the influence of one or more of three buzzwords characteristic of marketing in the mid-'80's: Convenience, health and quality. Under convenience are such mini-catchwords as microwavability, disposable, squeezable, portion pack, time saving and ease. Health connotations include low or light in sodium, sugar, fat or cholesterol, high fiber or calcium, decaffeination, natural or reduced calories. Under a quality banner would be products with premium pricing with gourmet attributes, or other added values, for such items as paper products and health & beauty aids.

Dry grocery: Food

The SAMI category with the second-highest growth rate (after the aforementioned juice drink concentrates) was fruit rolls and bars. This category has undergone evolution in its growth, with fruits in rollup form giving way to fruit bars and in 1986 bite-size entries by Sunkist (Lipton) and General Mills' Fruit Corners Fruit Wrinkles.

The bottled-water category continues onward and upward and, as 1986 was drawing to a close, annual volumes in pints were 35% ahead of the corresponding year-earlier period. Because of the transportation expense of shipping water, there are no national brands. The leading brand in the category appears in only three markets.

The 10% increase in pints of single-strength juice drinks in 1986 translates to $172 million in added sales. Convenience portion-pack, aseptic products were important factors behind this growth in addition to the sales vitality of Gatorade, which falls under the health banner.

The increased popularity of dry toaster items may well be a ruboff of the focus of new frozen pastries and muffins, which are heated in the toaster.

The product classes that have shown exceptional strength in 1986 include rice cakes (+124%), microwave popcorn (+82%), regular catsup in a plastic bottle (+100%), wet cat food ultra gourmet (+52%) and tea bags-black decaffeinated (+52%).

Dry grocery: Nonfood

As was noted in 1985, again there have not been as many innovative new products this year to help swell category volume in this sector. The highest category tonnage

SAMI

(Continued from Page 4)

growth rate was 17% for soaps and bubble bath for children. Much of the gain was the result of the national distribution of Sesame Street Bubble Bath by Minnetonka.

Some product classes that grew far faster than the categories in which they are found include liquid dishwasher detergents (New Palmolive is *the* product class at present), oil soap (+35%), insecticide foggers (+24%) and heavy-duty liquid detergents (+20%).

Frozen foods

As a general rule, frozen foods are under the convenience mantle to start off with and in 1986 a number of growth situations involved health considerations and premium quality as well.

The category with the highest growth rate was sandwiches. Much of the gain in this category can be credited to the introductions of frozen White Castle hamburgers and Jimmy Dean Chicken Biscuits and the national rollout of Hot Pockets by Chef America.

The growth of frozen french toast and pancakes can be traced to the consumer acceptance of Pillsbury Microwave Oven Pancakes (convenience). Among frozen vegetables, the highest growth rates were found among prepared vegetables without sauce—especially the new Green Giant Special Additions line and in the deluxe vegetable category (premium quality).

Weight Watchers (health convenience and high quality) entered the Mexican entree category and helped build volume in this increasingly popular ethnic-food category. New Sara Lee muffins and bagels are responsible for some of the gain enjoyed in the frozen dinner bread-and-roll category.

At the product class level of measurement, some of the growth areas recorded in 1986 were: Breakfast sandwiches (+86%), boneless turkey (+53%), pretzels (+54%), orange juice with pulp (+32%) and turkey entrees (+24%).

Refrigerated foods

The refrigerated section of the store has been a focus of attention among food marketers of late.

Some of the growth in the yogurt category is a result of Dannon going from store delivery to warehousing, but a number of other brands in this health-oriented category have exhibited double-digit growth rates in 1986.

Refrigerated orange-juice products have been showing consistent growth since the last Florida freeze. The theory is that in times of scarcity, price increases are less detectable in the case of refrigerated containers of reconstituted products than is true with frozen concentrates.

Health & beauty aids

The list of fast-growing health & beauty aids growth categories is shorter than usual in 1986, since there were fewer innovative new products to expand category volume. Much of the gain for lip-care products can be traced to sales of Vaseline Lip Therapy items.

The growth rate for hair-setting needs has decelerated due to the arrival of the maturity phase among hair styling mousse products. During the year, Schering Corp. rolled Fibre Trim national in the appetite-suppressant category and Thompson Medical launched Fiberfull, also taking advantage of media coverage of the importance of high-fiber diets.

Some classes of health & beauty aids that have responded to consumer acceptance have been: Ibuprofen analgesics (+85%), hard gas permeable eye-care products (+47%), hay fever medication (+35%) and soft contact lens solutions. Much of the focus among dentifrices and mouthwash has been on formulas which relate to tartar control.

These are some of the 1986 highlights that have been observed. These trends are being followed in greater detail by the many manufacturers who subscribe to our Category Size and Trend/Where The Action Is or Million Dollar Brand corporate development services.#

Mr. Miller is vp-sales service of SAMI (Sales Areas-Marketing Inc.), New York.

"If you think Washington is still a one-newspaper town, you're living in the past."

– Arnaud de Borchgrave, Editor-in-Chief, The Washington Times

"When I was asked to run The Washington Times, more than a few people thought I was 'nuts' to take the job. No one can compete with The Washington Post, they said. You'll never be able to do it.

"They were wrong.

"Sure, it's a tall order to go up against one of this country's biggest newspapers. But we're doing it and we're doing just fine, thank you.

"It will probably surprise many media people to find out that every day over 200,000 people read The Washington Times. And those 200,000 readers include some of the most influential people in the nation's capital. People you don't want to ignore.

"More and more people are reading us because they know they'll find important, exclusive stories, issues and viewpoints in The Washington Times that they won't find in The Post.

"But what readers won't find in The Washington Times is your advertising if you labor under the erroneous assumption that Washington only has one major metro paper. If you don't buy The Washington Times, your Washington buy just isn't complete."

The Washington Times
We hit what The Post misses.

CORRECTIONS & CLARIFICATIONS

- The daily newspaper *Washington Times* is the property of New World Communications, a holding company owned by members and officials of the Unification Church. As a secular corporation, New World Communications pays taxes. A reference to the newspaper incorrectly stated the newspaper is "owned by the Rev. Sun Moon's World Unification Church." The same article said the newspaper has "less than 100,000 circulation" (AA, Dec. 8, P. S-42). Its circulation is 104,186 daily.
- *TV Guide* should be ranked No. 2 in the chart "Leading print properties, Top 10 magazines by circulation," (AA, Dec. 22, P. 21). *TV Guide* has a weekly circulation of 16,874,477 according to Audit Bureau of Circulations FAS-FAX averages for six months ended June 30, 1986.#

Moffitt sells Esquire

Year's 'best deal'?

By STUART J. ELLIOTT

NEW YORK—Phillip Moffitt hopes to remain "a permanent member of the magazine community in some way" after last week's lucrative sale of his Esquire Magazine Group Inc.

The long-expected sale of EMGI to Hearst Corp., American Express Publishing Corp. and Whittle Communications (AA, Dec. 15, *et seq.*), closed Dec. 30. It has made millionaires of Mr. Moffitt, EMGI's president/ceo/editor-in-chief, and his close associates, such as Wilma Jordan, EMGI's chief operating officer. One industry observer called the sale "maybe the best deal anybody has made in a long time."

Bruce Wasserstein, co-head of First Boston Corp.'s investment banking department here—called by *New York* one of Wall Street's "powers that will be"—handled the sale of EMGI for perhaps as much as a stunning $100 million. Estimates are necessary because the parties involved are not discussing figures, other than Mr. Moffitt's statement that shareholders got "a great price."

As expected, Hearst bought *Es-*

Forecast

AA reporters spot '87's hits

In the columns below, some of the senior ADVERTISING AGE *reporters who cover advertisers, agencies and media go on record with predictions of stories they expect to cover during the year:*

Marketers: Yet more mergers

1. Mergermania will continue, with family-owned or family-dominated companies like Noxell, Block Drug, Campbell and S.C. Johnson & Son under increasing pressure to sell out for their valuable brand names.
2. Brand loyalty will continue to decline as consumers seek more narrowly targeted products and as regional and local marketing encourages more promotion at the expense of advertising.
3. The pharmaceutical industry's r&d breakthroughs include baldness treatments and anti-cholesterol aids. Lecithin and fish oils are emerging as the next hot health-oriented supplements.
4. With Jell-O joining the brand names on lines of clothing, Oreos, Life Savers, Chiquita and others will seek licensees as well.
5. Procter & Gamble will solidify its claim as the nation's leading pharmaceutical company when it hits paydirt with sucrose polyester and a plaque-fighting mouthwash.
6. The next wave of specialty food retailers will appeal to muffin, popcorn and coffee aficionados.
7. Food companies will see their experiments with aquaculture and hydroponics begin to yield new food processes for fresh seafood, vegetables and fruits year-round.
8. A backlash against the Yuppies' syndrome will find marketers appealing more to their family orientation and simple life styles.

—Nancy Giges

Agencies: Burnett-Ayer link?

1. Leo Burnett Co. and N W Ayer will merge, forming a "heartland" powerhouse agency.
2. Saatchi & Saatchi Co., as it begins to consolidate agencies, specifically Ted Bates Worldwide and Backer & Spielvogel, will face an unfriendly takeover attempt as a corporate raider, lured in

High-tech toys signal plusher ad budgets

By SARA E. STERN

The $12 billion toy industry's move toward high technology will lessen its dependency on animated tv series as a prime marketing vehicle while increasing its media advertising spending.

The success of Teddy Ruxpin, the first talking plush toy introduced in 1985, and the zooful of competitors on toy shelves in 1986, have created a $500 million market for interactive toys. Even more sophisticated products are about to be introduced this year, including a talking Cabbage Patch Kid from

(Continued on Page 62)

Tonka's SuperNatural line of holographic action figures, available in March, features characters with dual personalities.

Retailers remain faithful to holiday hype tactics

By SARAH E. MORAN

Many retailers are pledging allegiance for 1987 to purchase-with-purchase and gift-with-purchase plans despite less than glowing reviews from analysts about their 1986 performance.

"We attributed a big part of our success to our 'Jingle Bear' purchase-with-purchase promotion," said a spokesman for the 42-store Broadway unit of Carter Hawley Hale Stores, Los Angeles. "We sold 400,000 bears between Nov. 14 and Dec. 11 and plan to continue the program in some way, possibly even bigger than what we did in 1986."

Many big retailers began promoting stuffed bears, reindeer and dogs; cameras; Christmas records, and other come-ons as early as October. The promotions offered shoppers either a free item or a crack at buying something exclusive to that retailer if they made a minimum purchase at the store.

Preliminary sales results, however, indicated the promotions merely had shifted sales to earlier in the season rather than generating additional sales volume (AA, Dec. 22).

Woodward & Lothrop, Washington, sold more than 500,000 "Kringle" bears by the second week of December. "We would definitely do this again next year," a spokesman said. "Once Kringle was gone, however, daily sales took a dive until a few days before Christmas when they picked up again."

Minneapolis-based Dayton Hudson Corp., which ignited the purchase-with-purchase craze a year ago

Last Minute News

Last Minute News begins on page 8 this week.

Highlights

Moffitt parts with Esquire 1
Phillip Moffitt hopes to remain "a permanent member of the magazine community in some way" after last week's lucrative sale of his Esquire Magazine Group Inc. to Hearst Corp., American Express Publishing Corp. and Whittle Communications.

High Life's comeback 3
Miller Brewing Co. is moving into second gear with one of 1986's unlikeliest success stories: The regeneration of its High Life brand.

Ad growth slow through '80s 4
Slower growth is in store for ad agencies and ad-supported media for the rest of the decade, according to predictions by Veronis, Suhler & Associates, an investment banking company involved in communications company mergers and acquisitions.

Cohen pops for independence 12
When creative director Howie Cohen blew up the Jack in the Box clown in the 1980 commercials for the fast-food chain, he did so from the security of a well established agency with New York credentials, Wells, Rich, Greene. Today, he's still trying to create a sales explosion for Jack in the Box, but this time from the insecurity of his own agency, 18-month-old Cohen/Johnson.

Children's clothes with flavor 22
General Foods is setting up a line of Jell-O children's clothes in bright colors that imitate the gelatin's flavors. The company has signed Garan Inc., marketer of Garanimals sportswear, to create the line for fall, 1987, in time for back-to-school shopping.

Sniffing out lemon detergents 49
Colgate-Palmolive Co. is hurrying to beat Lever Bros. to store shelves nationally with a lemon-scented liquid automatic-dishwashing detergent.

Vying for videotape lead 54
The market for blank videotape is so volatile that the top six marketers exchange places almost every quarter, with the leaders in the $1 billion category separated by only two or three percentage points, at most.

B-Cal's direct-mail flight 59
British Caledonian Airways this month starts a major direct-marketing program, aimed at consumers, intended to boost revenues from its five U.S. gateways by 10% within one year. B-Cal will spend more than $2 million annually to reach consumers aged 35 to 55 with household incomes exceeding $55,000.

INTERNATIONAL

Global Brazil campaign on hold 43
The global advertising plans of Varig Airlines, Brazil's national airline, have ground to a halt due to conflicts within the company over whether to spend for advertising or new planes.

Hurdles for Saatchi 43
In making the buy-up of consulting companies its "focal point for the rest of the decade," Saatchi & Saatchi Co., London, has picked a field, like advertising, which has had feverish merger and acquisition activity in the past two years. Some observers are skeptical about whether the consulting business will be as responsive to Saatchi overtures as the ad agency field has been.

OTHER NEWS

Mergermania will continue, predict Advertising Age senior reporters in their overview of what's in store for 1987. Page 1.

Many retailers are pledging allegiance for 1987 to purchase-with-purchase and gift-with-purchase plans despite less than glowing reviews from analysts about 1986 performance. Page 1.

In preparing for midseason prime time schedule changes, the networks' availability of replacement series follows the same order as the ratings: NBC, CBS, ABC. CBS probably needs its backups most, as it tries to narrow the gap with NBC by season's end in April. Page 3.

The list of top 10 most-recalled ads has been affected by everything from skirmishes in the cola industry to little old ladies touting hamburgers. But November marks the first time a group of doo-wopping raisins has captured top honors in Advertising Age's adWatch survey. Page 3.

The days of depicting consumers over the age of 50 as individuals in their "golden years" are over. A new survey reveals that 98% of major advertisers surveyed believe mature consumers prefer to be depicted as healthy, physically active adults. Page 6.

The videogame, long considered down and out, is rising from the ashes. Particularly hot this Christmas were the more expensive videogame consoles. But while videogames are thriving, videocassette recorder-based games are faltering. Page 12.

Kraft Inc.'s buyout of Shelby's Original Texas Chili is forcing competing regional brands to spice up their advertising and distribution plans. The fledgling gourmet chili mix category is expected to get hot as these marketers move into the East Coast and Midwest. Page 50.

CBS Sports president Neal Pilson flat out guarantees that the network will cover the $166 million rights fee nut for the NCAA Basketball Tournament. He further predicts CBS will make a profit well over the 10% profit margin other CBS executives were quoted as predicting. Page 55.

Ayer makes final bid to retain Army

By JANET MEYERS

Washington—As the Army reviews "best and final" financial offers from five agencies seeking its $100 million recruitment advertising account, N W Ayer is making a last-ditch effort to regain the business it held virtually unchallenged for 19 years.

Six agencies, including Ayer, bid for the account in September, but incumbent Ayer was disqualified in November as the Army barred it from new government contracts after raising questions about Ayer's handling of the account (AA, Dec. 1, *et. seq.*).

An outside attorney representing Ayer said last week Army lawyers had indicated to him that Ayer may yet have a shot at winning the new Army ad contract if the agency's suspension from seeking government work is lifted before another agency is selected.

However, an Army spokesman contended Ayer is out of the current competition. The agency, if it is promptly cleared to again seek government work, may ask the Army to reconsider the results of the competition, the spokesman said. It may also ask the Army to compensate Ayer for its expenses in seeking the account, he added.

The finalists—BBDO, DFS Dorland Worldwide, SSC&B, Young & Rubicam, all of New York, and Ogilvy & Mather, Chicago—were asked to submit their best and final offers to the Army Jan. 5. A decision on a winner is expected in two to three weeks. Ayer's contract with the Army expired Dec. 31.

Ayer last week was hoping it could still salvage the review if it could convince the U.S. attorney in New York to close his 3-year-old investigation of the agency.

Ayer also has considered court action to delay selection of a new agency until the Army rules on Ayer's suspension appeal, said Steve Lawrence, partner at Pep-

AA, Eurocom hit by hoax

New York—Advertising Age published a bogus report in its "For the Record" column of Dec. 22.

The item stated that Eurocom president-ceo Bernard Brochand would be replaced in April by "Kris Ericsson," described as a Eurocom majority stockholder who had been on leave in protest against "Eurocom's 1985 nationalization by the French government."

Although the news release displayed the heading, "Eurocom Group, Paris," the published story came as a complete surprise in Paris to Mr. Brochand, who termed it "totally groundless," and added, "It sounds very much to us as if you had been the victims of a hoax."

The identity of "Kris Ericsson" is "completely unknown" to the Havas or Eurocom companies, Mr. Brochand said.

Mr. Brochand pointed out that the denationalization of Havas—the parent company of Eurocom and a Eurocom minority shareholder—"will have no impact on the management of Eurocom," which continues as an independent company.

Mr. Brochand, who continues as Eurocom president-ceo, also added, "We are delighted to be able to report that Eurocom had a very successful 1986 and hope that 1987 will be another good year."#

West Coast News

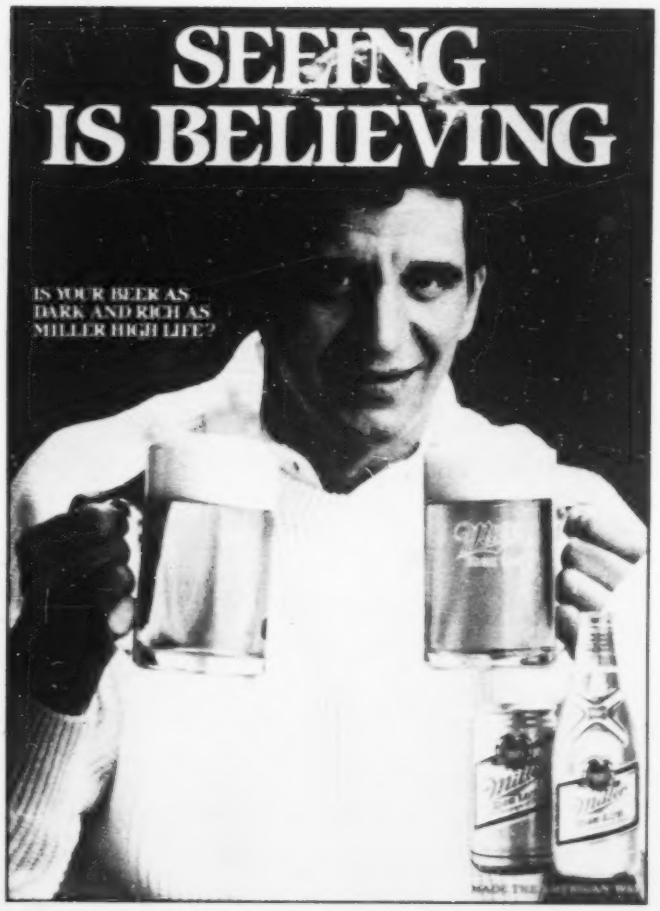
Craftmart taps Gardner as its first agency

Menlo Park, Cal.—Craftmart, an eight-unit Bay Area craft and hobby retail chain, has hired Gardner Communications, San Francisco, as its first agency. Its ad budget will hit $1.5 million in 1987 with plans to enter Southern California.

Livingston, Cal.—**Foster Farms** is aiming upscale in a magazine campaign that broke Jan. 4 for Select Servings, a new line of boneless, skinless fresh chicken. Ads on three consecutive pages in northern California editions of magazines will use artistic, theatrical and literary themes. The campaign, to expand throughout Foster Farms' western marketing territory by midyear, is the first work for the company from its newly named agency, Chiat/Day, Los Angeles. McCann-Erickson, San Francisco, previously handled.

Los Angeles—**General Motors'** Chevrolet division this week starts a West Coast-only tv campaign for the Nova. The effort features a futuristic auction in which the vehicle is called a classic example of Japanese design with American workmanship. Vic Olesen & Partners handles.

Los Angeles—**The Dodgers** have linked with Spanish-language KWKW radio here to broadcast the 1987 baseball season throughout Southern and central California. The arrangement involves five additional local stations in a so-called Dodger Spanish Radio Network. KWKW previously carried the Dodgers from 1958 to 1973.#



Miller sees hope for its High Life

By SCOTT HUME

Miller Brewing Co. is moving into second gear with one of 1986's unlikeliest success stories: The regeneration of its High Life brand.

Asserting that the brand's steady, five-year sales erosion has been stemmed by the combination of the "Made the American way" campaign from J. Walter Thompson USA, New York, and the success of the High Life Genuine Draft brand extension, Miller is confident it has defied the widely held brewing industry adage that beer brands cannot be rescued once they start declining.

The No. 2 brewer now faces the equally difficult task of again increasing High Life sales, which analysts say dropped below 12 million bbls. in 1986 after peaking in '81 at more than 23 million bbls. With sales of Genuine Draft added, however, the High Life brand ended 1986 at about 1985's approximately 12.5 million-bbl. sales level, keeping it the nation's No. 3 brand.

Miller executives definitely see the two High Life brands working in tandem rather than at odds with one another.

"We look at Miller High Life as a franchise, and we're determined to strengthen it," said Miller group product director Jerry Schmutte. "The High Life franchise had been declining for several years, but since February, 1985 [when JWT's 'Made the American way' campaign began], we have significantly reduced the rate of decline.

> "The High Life franchise had been declining for several years, but since February, 1985, we have significantly reduced the rate of decline."
>
> ***—Jerry Schmutte***

"And the addition of High Life Genuine Draft has energized all the equity we have in the Miller name, which was one of the goals.

"While we haven't quite turned around original High Life yet, we know we've done the fundamentals and strengthened the Miller name" to the point where a turnaround can begin, he said.

Actor and former National Football League star

(Continued on Page 65)

Actor Ed Marinaro serves as spokesman for the second phase of Miller Brewing's "Made the American way" ad effort as it tries to turn around its premium High Life brand.

Networks dip into midseason stash

By JAMES P. FORKAN

NEW YORK—In preparing for midseason prime time schedule changes, the networks' availability of replacement series follows the same order as the ratings: NBC, CBS, ABC.

Of the three, CBS probably needs its backups most, as it tries to narrow the gap with NBC by season's end in April. Many agency executives fear the latest CBS management reorganization (AA, Dec. 15) increases the pressure on B. Donald Grant by leaving the CBS Entertainment president "on his own," either to "take the total blame" for failing to close in on NBC or the credit if CBS gains appreciably.

Mr. Grant already has called up three of his backups: "The Cavanaughs," "Outlaws" and "The Shell Game."

"The Shell Game" is due Jan. 8 against NBC's "Cosby Show" and "Family Ties," after CBS last week re-revised its Thursday lineup, placing "Designing Women" on reserve and canceling "The Twilight Zone."

ABC, having now slotted "Dads," "Gung Ho" and "Ohara," saw its bench material dwindle to "Harry," starring Alan Arkin.

Brandon Stoddard, ABC Entertainment president, seems to be focusing on the longer-term, spring tests for "Mariah State Prison" and "Max Headroom" and early commitments for several fall, 1987, series.

ABC's Monday movie package replaced football on Dec. 29 with the rerun "Love Thy Neighbor"; the first new title will be "On Fire," starring John Forsythe, on Jan. 5.

Also, ABC has renewed the low-rating "Starman" for a full season but ordered only five more episodes of "Jack & Mike," indicating a change is probable at 10 p.m. (ET) Tuesday.

CBS now has five contenders left, led by "Houston Knights," which may air at 8 p.m. or 9 p.m. Saturday. The others are "Spies" with George Hamilton, "Hard Copy," "The Popcorn Kid" and "Late Bloomer."

"Late Bloomer," as a "Kate & Allie" spin-

FTC stands firm on ruling limiting fat claims for milk

By JANET MEYERS

WASHINGTON—Dairy food promoters got sour news late last month when the Federal Trade Commission rejected an American Dairy Assn. bid to overturn an FTC order banning it from advertising milk as "96% fat-free."

The ADA, which is the marketing arm of the United Dairy Industry Assn., Chicago, may ask the FTC to reconsider, an ADA attorney said.

The association said milk had been singled out arbitrarily by the 1973 FTC order because no other beverages or foods were banned from making claims about their fat contents.

Making the fat-free claim has become particularly important to the ADA, which, together with the National Dairy Promotion & Research Board, Arlington, Va., has sought ways to promote dairy foods as healthy and nutritious.

Nutritionists often single out dairy products as containing high amounts of fat and cholesterol.

Current advertising, via D'Arcy Masius Benton & Bowles, Chicago, describes milk as "America's health kick," while other campaigns point out dairy foods' high calcium content. McCann-Erickson, San Francisco, handles the calcium ads.

The FTC first imposed the ban because of a radio campaign by then ADA agency Leo Burnett USA, Chicago, that talked about milk being "96% fat-free." The inference, said an FTC staffer, was that fat had been removed from the milk.

Whole milk contains less than 4% fat by weight, but most of its weight is in noncaloric water. Actually, 48% of the calories in milk come from saturated butterfat.#

World News Roundup

GENEVA—International Institute on Multinationals, set up with Nestle's financial backing in the 1970s to improve the public perception of multinational companies, will close its doors "because the public now sees multinationals in a much more favorable light than it did a decade ago."

MONTREAL—The Quebec government split its $4.5 million tourism account for advertising outside the Canadian province between Scali, McCabe, Sloves and Groupe Morrow. The account previously was split between Vickers & Benson and Publicite Martin.

SANTIAGO—British American Tobacco, known here as Compania Chilena de Tabacos, this year will launch a low-tar cigaret called "Colombia Ultra Lights," sources say. The account is handled by Leo Burnett Co.

AMSTERDAM—Ricoh Electronics picked N W Ayer for its European account, estimated at $10 million over three years. The first cam-

ADWATCH

Clay crooners raisin' interest

By JULIE FRANZ

The list of top 10 most-recalled ads has been affected by everything from skirmishes in the cola industry to little old ladies touting hamburgers. But November marks the first time a group of doo-wopping raisins has captured top honors in ADVERTISING AGE's adWatch survey.

AdWatch measures monthly awareness of advertising both over-all and in a variety of product categories.

In November, ads for the California Raisin Advisory Board, Fresno, were mentioned most often when consumers were asked to name the ad that first came to mind of all advertising seen, heard or read in the past 30 days.

The raisin spots garnered 3.1% of first mentions among all advertising seen during the month. That spot is most often held by Coca-Cola or McDonald's, whose recall score is as much a function of media weight as it is advertising creativity.

The two raisin commercials featured animated clay raisins in oh-so-cool sunglasses and white gloves strutting their stuff to Marvin Gaye's "I Heard It Through the Grapevine."

In the first spot, a chorus line of raisins high-steps across a living-room table, snubbing other less nutritious snacks. The

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service. Total Advertising data shown has been supplied by the publisher to Media Records and included on this compilation. All publisher supplied figures are converted to MRCS SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

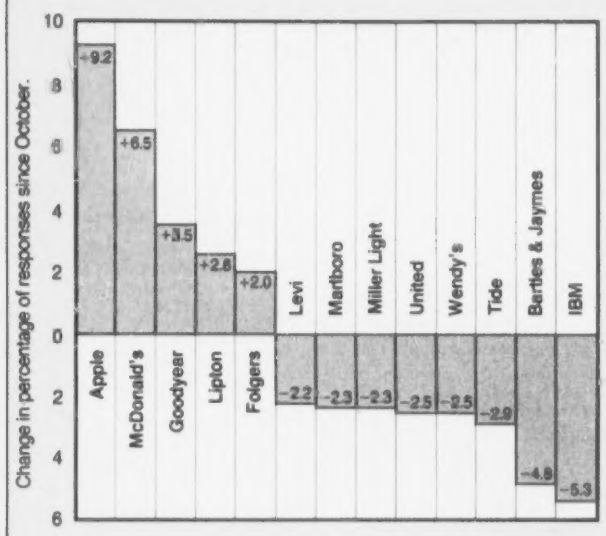
The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page
   Width and Depth in Inches
2. Determine Square Inches of Page
   Multiply Width by Depth Inches
3. Determine the Number of SAU Inches of Page
   Divide the Square Inches by 2.0625 (SAU Inches)
4. Measure the Total Lines of the Page
   Multiply Column Depth Agate Lines by the Number of Columns on the Page
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches
   Divide the Total Lines of Page by the Number of MRCS SAU Inches of the Page

SAU* is the registered trademark of the American Newspaper Publishers Association.

November winners and losers

Question: Of all the advertising for (product category) you have seen, heard or read in the past 30 days, which ad first comes to mind? *Source: SRI Research Center Inc., Lincoln, Neb.*



adWatch

(Continued from Page 3)

second spot broke in mid-November with those dancin' raisins headlining in a construction workers' lunch box.

What makes the little critters so popular?

"God knows," said David Altschul, producer and general manager at Portland, Ore.-based Will Vinton Productions, which produced the spots (AA, Oct. 20). Foote, Cone & Belding, San Francisco, handles the raisin board.

"You can work intimately with a production, but the truth is that you never know until the box office opens or the commercial hits the airwaves if it's really a hit," Mr. Altschul said.

As for the raisin commercials, he emphasizes their "really good characters coupled with really good filmmaking and an extraordinary level of design. The characters are important, though, not the [Claymation] process."

Claymation, already used in spots for Kentucky Fried Chicken and Domino's Pizza, is "easy to put on tv and catch the eye of the viewer," Mr. Altschul said. "The trick is to develop the process enough not to distract the viewer from the message but become an integral part of the spot."

The raisins have taken on a life of their own, he said, adding, "Each raisin has its own personality, taking bits of the real people who created them.

"They're definitely cool."

Rounding out the top 10 are McDonald's, Coca-Cola, Pepsi-Cola, General Motors' Chevrolet, political advertising, Budweiser/Bud Light (Anheuser-Busch), Miller/Miller Lite, Ford and GM.

AdWatch is a joint project of Advertising Age and SRI Research Center, Lincoln, Neb.

Ad awareness is measured by asking a nationally projectable sample to name the advertising that first comes to mind of all seen, heard or read in the past 30 days. Consumers are queried on the first ad they remember over-all as well as in a variety of product areas. During November, 1,000 consumers were polled by telephone.

Those changes in advertising awareness that are deemed statistically significant by adWatch researchers can be attributed to more than sample variation.

Among other significant ad awareness changes in November:

- In the **fast-food** category, McDonald's Corp. survived attacks on its McD.L.T. from Burger King Corp. and Wendy's International to gain 6.5 percentage points in advertising awareness to gather 47.7% of first mentions, its highest score in 12 months. Burger King has 16.6% of first mentions and Wendy's had 6.9%.
- Apple Computer's shift to a softer approach to selling **computers** netted the company 9.2 additional percentage points of advertising awareness, for a score of 30.4%, the company's highest share of first mentions for the year.

IBM Corp. lost 5.3 percentage points of ad recall, the largest drop in November, for a score of 16.3%. Radio Shack was No. 3 with 3.8%.#

For additional information or data, contact Gary Gabelhouse, SRI Research Center, 301 S. 68th St., Lincoln, Neb. 68506. Phone: (402) 489-0351.

Networks

(Continued from Page 3)

off starring Lindsay Wagner, may get the compatible Monday 8:30 p.m. slot come March, some speculated, with "Designing Women" perhaps regaining its old slot an hour later.

Paul Schulman, president of the Paul Schulman Co. subsidiary of Advanswers Media Programming, praised "Houston Knights" but added, "The bottom line in the ratings race is not going to change. It's still an NBC runaway, with CBS second and ABC winning only Tuesday 8 p.m. to 10 p.m."

NBC Entertainment president Brandon Tartikoff has at least seven prospects: "Stingray," "Bronx Zoo" with Ed Asner and the sitcoms "The Days & Nights of Molly Dodd," "The Tortellis," "Sweet Surrender," "Rags to Riches" and "Me & Mrs. C."

"Remington Steele," ordered as six hours, now is being slated as three two-hour movies, the first due at 8 p.m. Jan. 5.

Among the back-up series CBS is counting on to narrow the gap with NBC is "The Cavanaughs," a comedy about an Irish Catholic family in Boston.

As most agency buyers had bet, "Stingray" will be the 8 p.m. Friday replacement for "The A-Team," as of Jan. 9, joining "Miami Vice" and "Crime Story" to offer what Mr. Schulman dubbed "a men's night of hard action" that could work for NBC like CBS' Wednesday.

Although "1986" makes its finale Dec. 30, NBC plans news specials in its 10 p.m. Tuesday slot at least through Jan. 13. "Hill Street Blues" may yet get the spot vacated by "1986," with "Bronx Zoo" a contender for 9 p.m. versus ABC's "Moonlighting."

According to some scenarios, NBC may move "Family Ties" to 8 p.m. Monday, leading into "ALF," a combination that recently drew high ratings. That would allow Lisa Bonet's spin-off sitcom a hefty sampling behind the parent "Cosby Show."

Another spinoff that could benefit from being coupled with its parent is "The Tortellis," behind "Cheers." But a few buyers, including Mr. Schulman, believe "Tortellis" may instead go to 9:30 p.m. Wednesday, to plug the hole left by the just-canceled "You Again?"

NBC has decided to introduce "The Tortellis" behind its parent series "Cheers" on Jan. 22. It then will appear Wednesdays at 9:30 p.m. behind "Gimme a Break," replacing the canceled "You Again?" This was expected by Mr. Schulman a week before the announcement.

"Rags to Riches" and "Me & Mrs. C" probably will be held for March, others added.#

Agencies

(Continued from Page 4)

terms of 1985 revenue growth. They are holding their own in a down market for advertising expenditures."

In some results for the other ad-supported media segments:

- **Broadcasting.** Cash flow growth slowed dramatically in 1985 to 6.5%, the lowest growth rate for the five-year period and substantially below the 14.3% compound annual growth rate. Cash flow margin, however, rose to a record 21.2%, and cash flow return on assets also stood at 21.2%.
- **Newspapers.** "Newspaper cash flow and profit margins have shown greater movement over the five years than all but one other segment in the ad-supported sector," Mr. Suhler said. "The newspaper segment's profit margins ranged from 13.6% in 1982 to 19% in 1985. Its cash flow margins, reflecting the impact of depreciation, moved in a 4.7% range for those same years. Only business magazines' cash flow margin displayed a greater, 5.2% percentage point movement."
- **Business and consumer magazines.** "Next to newspapers, no other segment in the communications industry uses assets as efficiently as the two magazine segments combined," said Mr. Suhler, explaining that this means that their asset base "generates both more revenue and income than the others do."

But there are differences between business and consumer magazines.

"Operating income return on assets for business magazines in 1985 was 26.2%—noticeably higher than 22.6% for consumer magazines and underscoring that the two segments indeed perform differently," Mr. Suhler observed.

"Consumer magazines' assets produce enough revenue to equal themselves once every five months, while it takes close to once every six months for business magazines."#

Miller

(Continued from Page 3)

Ed Marinaro has been enlisted to lead the expected sales upturn. Mr. Marinaro later this month becomes the featured spokesman in Miller's revamped "Made the American way" High Life campaign (AA, Dec. 29), which will be combined with a major price-reduction promotion.

The original "American way" turnaround campaign, which has aired for nearly two years (AA, Feb. 4, '85), positioned High Life as a brand with a long American heritage and "honest" quality (symbolized by several handshaking scenes).

Miller, believing that image has been conveyed successfully, now is altering the campaign to counter the perception (fostered by its clear bottle) that High Life is lighter tasting than St. Louis-based Anheuser-Busch's Budweiser, the nation's leading premium beer.

New tv commercials, themed "Seeing is believing," show Mr. Marinaro in Miller's Milwaukee brewery talking about High Life's brewing process, with special emphasis given the use of roasted malt to create a "dark and rich" beer.

Mr. Marinaro was chosen because he "is believable and straightforward," said High Life brand manager Robert Tyley.

The "Seeing is believing" message will be carried on network and spot tv, radio, print and outdoor.

Also, Miller will start a two-month national point-of-purchase promotion for High Life offering a $2-per-case refund.

The similarity between Miller's use of Mr. Marinaro and Golden, Colo.-based Adolph Coors Co.'s use of Mark Harmon as spokesman is ironic as well as obvious. Sources say Coors and its agency, Foote, Cone & Belding, Chicago, considered Mr. Marinaro for the "Coors is the one" campaign before finally tapping Mr. Harmon.#

Salada rolls tea bags

Little Falls, N.Y.—Salada Foods is introducing Salada Sweetened Tea, which it says is the first tea bag presweetened with NutraSweet, into the mid-Atlantic, Midwest and Northeast. Leo Burnett USA, Chicago, handles.

A-B stirs on waterfront

Will introduce Zeltzer Seltzer

By SCOTT HUME

Anheuser-Busch, having upped its share of the slow-growth beer market to 38% in 1986, this year has set its sights on the $1.5 billion bottled-water market, the beverage industry's fastest-growing segment.

Spearheading its drive to become the dominant company in that market will be a line of flavored seltzer waters marketed under the Zeltzer Seltzer brand name, industry sources said.

That product line is expected to be introduced during the first quarter and accelerate an already frenzied dash by marketers to grab a piece of the bottled water market, where sales have been growing by 15% annually.

Oakland, Cal.-based Clorox Co. last week made its second acquisition in the field, buying Deer Park Spring Water Co., Lodi, N.J. *(see related story on Page 58).*

Sources said the A-B seltzer assignment was the main "carrot" it used last year to lure Hal Riney & Partners away from the $20 million account of G. Heileman Brewing Co. (AA, March 24, *et seq.*). If true, that would indicate plans for a major ad budget backing the Zeltzer launch.

A spokesman for St. Louis-based A-B had no comment on the report and said Bloom Agency, Dallas, is the brewer's agency for water products. But sources said Riney has been working on tv, radio and print advertising for Zeltzer Seltzer since joining the A-B roster of agencies.

Bloom does handle the two regional mineral-water companies A-B purchased last year: Santa Rosa, Cal.-based Sante and Saratoga Springs Co., Saratoga Springs, N.Y. The brewer said its third entry, Ballygowan Sparkling Irish Spring Water, which it recently agreed to import from Ireland, is unassigned.

"Flavored seltzer is not a bad place for

(Continued on Page 58)

Sanka going natural; decaf war perks up

By PATRICIA WINTERS

General Foods, facing competitive ads that have rekindled an old controversy about coffee decaffeinated with chemicals, is switching leader Sanka to a naturally decaffeinated process, supported by a $20 million-plus ad campaign addressing the issue.

GF's campaign, representing the highest spending levels ever for Sanka, responds indirectly to Nestle Foods' recent ads for Taster's Choice decaffeinated that bring up the issue of chemical decaffeination. Taster's Choice receives an estimated $8 million in ad spending annually.

But the decaf battle is only beginning with GF's ads. The Rye Brook, N.Y.-based marketer reportedly has complained about the Taster's Choice ads to the networks and the National Advertising Division, Council of Better Business Bureaus.

In a separate issue, GF reportedly also has filed a challenge to Procter & Gamble's new ads for Folgers Crystals that make a taste comparison with a leading decaffeinated coffee. Cunningham & Walsh, New York, handles Folgers. P&G stood by its ad, which doesn't name a competitor.

All this underscores the all-out market war emerging in the decaffeinated arena. The decaf segment, which was growing rapidly in the early 1980s, has leveled off and

(Continued on Page 56)

A Shepherd tending her beef

Cybill Shepherd confides a craving for hamburgers in this spot, part of the Beef Industry Council's $30 million campaign breaking today on network tv. The star of ABC-TV's "Moonlighting" and actor James Garner appear separately in spots, with Mr. Garner making shish kebabs (AA, Oct. 20). Ketchum Advertising/San Francisco handles the effort, including network radio and print.

Last Minute News

Grace & Rothschild wins J&B

FORT LEE, N.J.—Paddington Corp. has moved its estimated $11 million J&B scotch account to Grace & Rothschild from Backer & Spielvogel, both New York. J&B is the largest account yet for the $25 million G&R agency, which was formed last year.

Ayer counterattacks Army in court

WASHINGTON—N W Ayer, New York, will file papers in court today, making good on its threat to sue the U.S. Army to delay selection of a new agency for its $100 million recruiting account (AA, Dec. 1, *et seq.*). Ayer's suit follows the Army's refusal late last week to lift its suspension of Ayer from government work. The Army is expected to pick a new agency this week from among several contenders.

(Continued on Page 8)

What's on the doorstep at BK? It's Burger Bundles

By PATRICIA WINTERS

Burger King today opens an unusual 522-store test of a mini-burger product called Burger Bundles and at the same time begins phasing out its "This is a Burger King Town" ad theme.

The new campaign theme, "The best food for fast times," breaks in 13 markets in the Midwest, Southeast and West where BK is introducing Burger Bundles, 1-oz. burgers in $1.19 three-packs and $2.38 six-pack cartons with or without cheese and a pickle. A 12-pack is under consideration, sources say.

In a separate but similarly convenience-related action, Burger King confirmed that it has reduced the size of its flagship Whopper to 4 ozs. from 4.2 ozs. (AA, Oct. 13). The chain in 1985 spent $30 million on celebrity-studded advertising touting the burger patty increase from 3.6 ozs. (AA, May 13, '85, *et seq.*).

The Burger Bundle test is the most extensive ever by Burger King and could move to 1,300 restaurants by March. The new slogan eventually will completely replace "Burger King Town" whether or not the mini-burger is successful, according to BK director of public relations Joyce Myers.

In other markets, current BK commercials promoting toppings will continue.

"Obviously this gives Burger King some real product news at a time when there's little of that in the marketplace, and that could help them," said a BK competitor. "But I wonder whether

(Continued on Page 56)

Highlights

Anheuser-Busch adds fizz 1
Anheuser-Busch this year has set its sights on the $1.5 billion bottled-water market, the beverage industry's fastest-growing segment. Spearheading its drive will be a line of flavored seltzer waters marketed under the Zeltzer Seltzer name.

Sanka tries natural process 1
General Foods, facing competitive ads that have rekindled an old controversy about coffee decaffeinated with chemicals, is switching leader Sanka to a naturally decaffeinated process, supported by a $20 million-plus ad campaign addressing the issue.

Chevy finds a pulse 3
The striking, risk-taking "Heartbeat of America" campaign that General Motors Corp.'s Chevrolet division broke this fall couldn't have happened without Chevy first tackling its identity crisis.

BATF's battle of the budget 4
The Reagan administration's fiscal 1988 budget would take its biggest bite out of the agency that oversees alcoholic beverage advertising and labeling.

McCann's promotion plunge 6
McCann-Erickson last week joined the growing list of ad agencies adding sales promotion to their services. Benjamin Colarossi, formerly president-ceo at Cato-Johnson, was named managing director of McCann-Erickson Promotion Group.

Hardee's pushes patties 12
Hardee's Food Systems is introducing a "tougher, back-to-basics" pitch in the face of widespread price cutting by fast-food competitors. The No. 4 burger chain last week began airing new tv advertising telling consumers "We're out to win you over" with what it claims are thicker and juicier hamburgers.

Frito cookies lay an egg 14
Frito-Lay is expected to renew its emphasis on profits in 1987 by scrapping Grandma's cookies and some of the company's newest snacks in the wake of parent PepsiCo's reorganization.

AT&T calling cuts 55
AT&T may eliminate completely the longtime marketing edge of rivals MCI Communications and US Sprint Communications with an 11% cut in long-distance rates, being touted in an aggressive new print advertising campaign. The move marks AT&T's strongest marketing response yet to the price-discounting claims of its challengers since the breakup of Ma Bell three years ago. Ads promote the steady erosion of the rivals' cost advantages over AT&T, and the carrier's 30% rate cut since divestiture.

INTERNATIONAL

TBWA looks at Asia 46
TBWA Advertising, the agency founded by principals in four different countries, is exploring linkages with agencies in Hong Kong, Japan and Korea, countries in which TBWA has no equity or nonequity affiliations.

Curtis' overseas growth 46
Helene Curtis Industries, Chicago, expects overseas sales to increase to 25% of all revenues within the next five years, from 15% now. No countries were specified for expansion, but the U.K. and Germany are the only two countries in the top 10 h&ba markets where Curtis does not have a presence.

OTHER NEWS

The National Football League's Super Bowl XXI is attracting global interest, and in some countries tv stations are competing for rights to broadcast the game. The Jan. 25 matchup is expected to be aired in 60 countries, compared with 59 countries last year and 17 in 1980. Page 3.

Hearst Corp. hopes its centennial present to itself, the purchase of *Esquire*, will be the first in a string of additional acquisitions. Since December, 1978, when Hearst bought the Arbor House book publishing company, it has spent "more than $1 billion" on media acquisitions, including three tv stations, eight daily newspapers, *Redbook* and Diversion Publications. Page 22.

Toy marketers are finding it easier to reach children worldwide as satellite tv and children's programing come of age. U.S. toy marketers say a satellite-to-cable children's network that increased Italian children's programing and a Canadian court decision that knocked down restrictions offer added promotional opportunities and could encourage governments to ease restrictions. Page 46.

BBDO, faced with rising overhead and flat revenues, last week let go about 50 employes, or 5% of its staff. "It's the same thing the whole industry is facing," said Tom Clark, president-ceo of BBDO Inc., the $600 million flagship unit of BBDO Worldwide that includes the New York, Detroit and Minneapolis offices. Revenue increases in 1987 are not expected to better the 6% boost recorded in 1986, he said. Page 60.

SPECIAL REPORT

With the direct-marketing pool in the U.S. getting crowded, some agencies are taking on the world. Several of them foresee at least as much growth potential outside the U.S. as within it.

Add $104 per year for air delivery to Europe & Middle East. Add $34 for surface mail to all other foreign countries. WILLIAM STRONG, vp-circulation; JOHN HUFFMAN, fulfillment director; DAVE KELLEY, circulation manager. Four weeks' notice required for change of address. Address all subscription correspondence to Circulation Department, Advertising Age, 965 E. Jefferson, Detroit, Mich. 48207 (313) 446-0494.

Isuzu's liar zaps 'mom'; CBS winces

By CLEVELAND HORTON

Vaporizing even "liar" Joe Isuzu's mother on screen apparently is too much for CBS.

In storyboards for a new commercial from American Isuzu Motors, Joe appears on screen with his "mother" and declares to the heavens: "May lightning strike my mother" if he is lying. The spot ends with a lightning bolt.

CBS objected to the commercial, scheduled to air in February. CBS vp-programing practices George Dessart said the network objected to the "violent dispatch of a mother," and advised Isuzu to handle the lightning bolt "humorously."

Neither NBC nor ABC objected to the storyboard, according to Isuzu national marketing services manager Leon Rosen.

Isuzu since has submitted a revised storyboard to CBS and was awaiting word from the network. In the new version, mom reappears after the lightning bolt. Della Femina, Travisano & Partners, Los Angeles and New York, handles.

Executives at Whittier, Cal.-based Isuzu, who feared the

Coke, Paramount may bid for LBS

By WAYNE WALLEY

LOS ANGELES—A year after Coca-Cola Television first offered to acquire LBS Communications from Grey Advertising, the deal is said to be alive again with Paramount Pictures Corp. and a partial public stock offering added to the mix.

LBS chairman-president Henry Siegel is said to be considering an offer in which he, Paramount and Coca-Cola Tv would each have 25% interests, with the remaining 25% as the public offering.

No reliable price was revealed, though Grey chairman Edward Meyer reportedly had wanted $80 million for the nation's largest barter-syndication company.

Syndication sources estimated New York-based LBS had some $200 million in 1986 sales, or a 25%-to-33% share of the barter-syndication business.

The usually accessible Mr. Siegel, who was here last week attending the Assn. of Independent Television Stations programing convention, remained unavailable for comment.

Frank Biondi, Coca-Cola Tv chairman-ceo, and Mel Harris, president of Paramount Television, the two other executives who reportedly worked out the deal with Mr. Siegel, also remained unavailable for comment.

Grey had no comment, though one source said that Mr. Meyer was not interested in selling LBS and that no offer had been officially presented to Grey.

However, in a March 21, 1986, proxy statement, Grey stated that "as a result of LBS' growth and the attention the investment commu-

West Coast News

Scali lands $2M in Altos Computer business

SAN JOSE—Altos Computer Systems awarded its $2 million account to Scali, McCabe, Sloves, Los Angeles, following a review including nine West Coast agencies. Rice & Woolward, San Francisco, earlier resigned the account.

LOS ANGELES—**Columbia Pictures** is believed close to hiring McCann-Erickson to handle Hispanic advertising, previously at the agency's Spanish-language unit, La Agencia de McCann-Erickson. La Agencia earlier was spun off as an independent agency (AA, Sept. 8).

SACRAMENTO—**California State Lottery** selected Dailey & Associates and incumbent Rubin Postaer & Associates, both Los Angeles, and J. Walter Thompson USA, San Francisco, as finalists for its $25 million general account. A winner will be named in early February.

SAN FRANCISCO—**J. Walter Thompson USA** hired Steve Darland, former senior vp-management supervisor/director of human resources, Evans/-Kraft, to the new post of deputy manager-director of client services.

LOS ANGELES—**Burger King Corp.** starts a four-week radio and tv drive in Southern California today offering a 50% rebate to buyers of Chicken Tenders. If customers aren't satisfied with Tenders, they may use the rebate toward purchases of McDonald's McNuggets. Admarketing is handling the regional drive for the Miami-based company.#

Colarossi heads McCann sales promotion

By PAUL L. EDWARDS

NEW YORK—McCann-Erickson last week joined the growing list of ad agencies adding sales promotion to their list of services.

B. Colarossi

The agency has hired Benjamin Colarossi, who recently left the president-ceo post at Cato-Johnson, one of Young & Rubicam's two sales-promotion units. He becomes managing director of McCann-Erickson Promotion Group.

McCann has had a sales-promotion department for several years, under the direction of Simon Marlow, primarily to service R.J. Reynolds Tobacco. Mr. Marlow now becomes deputy managing director of the new independent group.

"Our existing people were good," said John Dooner, exec vp-general manager of the New York ad agency. "But they were at an adolescent level, and we didn't want to wait for them to grow up. We needed someone like Ben to infuse expertise now."

Mr. Dooner said McCann felt compelled to act now for two reasons. "The altruistic reason is that we should be able to provide these services to our clients.

"The second and selfish reason is that the advertising business has been in a real state of flux over the past year. Many people have been let go, partly because of the mega-mergers, but also because even though marketing expenditures by clients have been growing, they are shifting funds from advertising to sales promotion. Selfishly, we want to recapture some of that lost revenue."

Mr. Colarossi conceded recapturing those dollars will be a considerable challenge.

"Much of the promotional spending that's done today is handled in-house by marketers," he said. "Agencies have to gain the clients' respect, and that won't be done in two months. We must come up with new ideas. Sales promotion is an entrepreneurial business."

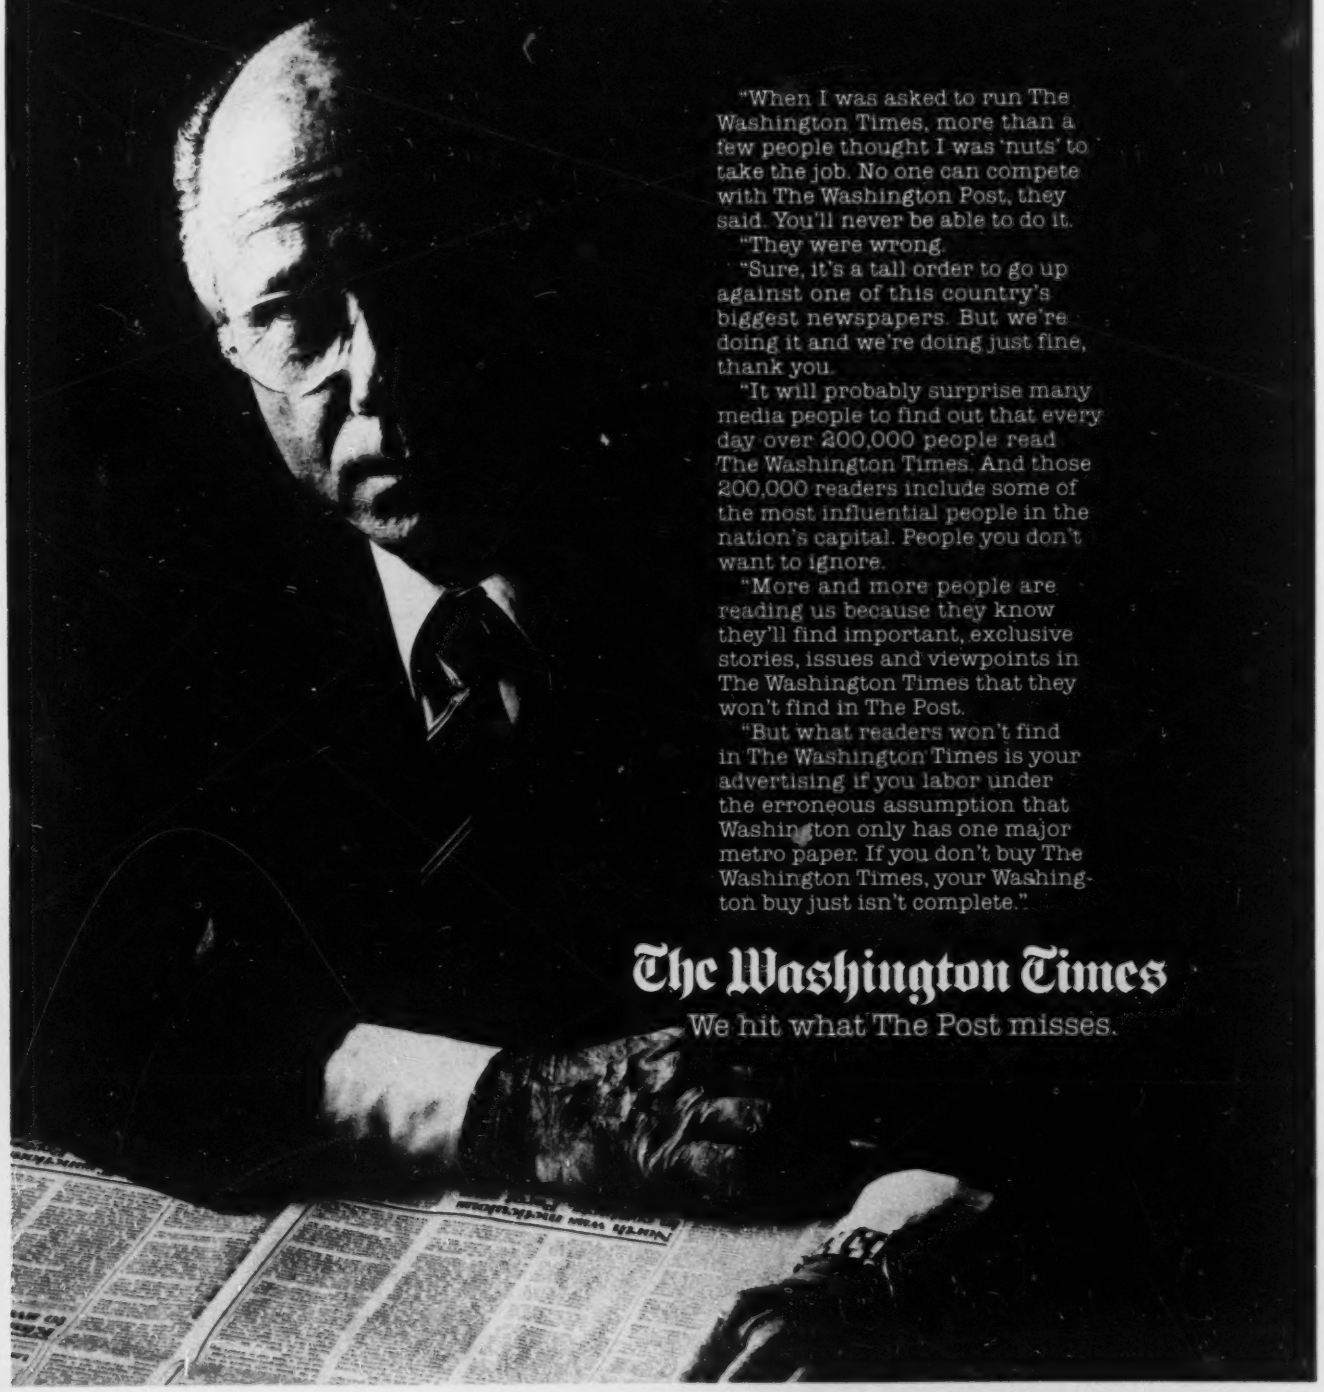
He cited freestanding inserts as an example. "Most marketers handle insert advertising themselves. Agencies don't get a commission on the media and have shown little interest in them. But there's a tremendous amount of clutter now, and I think that an agency can help the client make inserts far more effective and efficient."

Mr. Colarossi began his advertising career in the early 1950s, working on the Revlon account at the old Norman, Craig & Kummel agency. While there, he met Charles Revson, "who knew sales promotion intuitively," said Mr. Colarossi. When Revlon moved its lipstick account to Warwick Advertising, Mr. Colarossi moved with it.

In the mid-'60s, he moved to Ted Bates & Co. as art director working on the Anacin account. In 1970, together with Donald Creamer, Mr. Colarossi opened up Creamer/Colarossi. Nine years later, he left to form Colarossi/Griswold-Eshleman as a New York subsidiary of Cleveland-based Griswold-Eshleman, since acquired by Ross Roy Inc. He joined Cato-Johnson last year.#

"If you think Washington is still a one-newspaper town, you're living in the past."

— Arnaud de Borchgrave, Editor-in-Chief, The Washington Times



"When I was asked to run The Washington Times, more than a few people thought I was 'nuts' to take the job. No one can compete with The Washington Post, they said. You'll never be able to do it.

"They were wrong.

"Sure, it's a tall order to go up against one of this country's biggest newspapers. But we're doing it and we're doing just fine, thank you.

"It will probably surprise many media people to find out that every day over 200,000 people read The Washington Times. And those 200,000 readers include some of the most influential people in the nation's capital. People you don't want to ignore.

"More and more people are reading us because they know they'll find important, exclusive stories, issues and viewpoints in The Washington Times that they won't find in The Post.

"But what readers won't find in The Washington Times is your advertising if you labor under the erroneous assumption that Washington only has one major metro paper. If you don't buy The Washington Times, your Washington buy just isn't complete."

The Washington Times

We hit what The Post misses.

Agencies' response date set

CHICAGO—Deadline is Jan. 19 for the return of completed Agency Income Questionnaires distributed by ADVERTISING AGE.

The latest Agency Income Questionnaire, to be used for AA's 43rd annual report on agency billings and income, further tightens qualifying requirements. "Agencies qualify for AA's leading agency listing only if their gross income figures are confirmed—audited or unaudited—by outside accountants," said Fred Danzig, AA editor.

Agencies that do not already have the questionnaire packet can obtain one by contacting Craig Endicott, special issues editor, ADVERTISING AGE, 740 Rush St., 60611.

The 1986 instruction sheet and form are accompanied by a sample letter that can be used by accounting companies to confirm the agency gross income figures shown on the AA form.

All agencies on the "AD AGE 500" list, to be published March 26, will have submitted confirmed figures. Cutoff for the "500" published last year (AA, March 27) was $1.05 million in gross income, the equivalent to about $7.8 million in billings.

A total of 690 agencies' figures were accepted for publication last year, but only figures for the top 500 were included in the agency index composite.#

CORRECTIONS & CLARIFICATIONS

- A sequence of December Consumer Magazine Ad Linage chart figures was incorrectly attributed. Listed as those of *Country Journal*, they actually were provided by *Country Living* (AA, Dec. 22, P. 23).
- Advertising pages were reported incorrectly for *New Woman* in the December Consumer Magazine Linage Report (AA, Dec. 22, P. 24). The correct numbers are 76.4 pages for December, 1986, and 70.5 pages for December, 1985.
- To complete the December Consumer Magazine Linage Report (AA, Dec. 22, P. 23 and 24), the following totals should be included (all Conde Nast titles):

Glamour 1986 yearend total—2,173.2; 1985 total—2,143.0. *House & Garden* 1986 total—1,159.7; 1985 total—1,163.9. *Mademoiselle* 1986 total—1,639.0; 1985 total—1,503.9. *Self* 1986 total—1,167.3; 1985 total—1,182.5. *Vanity Fair* 1986 total—595.8; 1985 total—429.4. *Vogue* 1986 total—3,193.9; 1985 total—3,247.9.

- If egg producers approve a proposed $23 million marketing program in 1987, advertising and research would be handled not by the United Egg Producers, but by a separate group to be formed upon the program's approval (AA, Dec. 1, P. 12).#

Direct Marketing

U.S. agencies stake claims around the globe

By Lori Kesler

Direct marketing has proceeded swimmingly in this country for nearly a decade. But with the pool here getting a little crowded, some major direct marketing agencies are testing newer waters and taking on the world.

Only a handful of domestic agencies have ventured into the international market, and at this point their non-U.S. billings don't make a huge dent in the industry's total financial picture. However, several direct marketing agencies foresee at least as much growth potential outside the U.S. as within it.

Lori Kesler, ADVERTISING AGE's St. Louis correspondent, who profiled Omaha Steaks International in the October, 1985, Direct Marketing Special Report.

For example, Wunderman Worldwide, New York, a direct marketing subsidiary of Young & Rubicam, doubled its non-U.S. billings from $50 million in 1985 to $100 million in 1986, while domestic billings during that time rose 14.3%, from $175 to $200 million. (Wunderman, Ricotta & Kline recently changed its name to Wunderman Worldwide.)

"In our agency, the non-U.S. part of our business is growing faster than the domestic side," says Steven Dapper, Wunderman Worldwide president and chief executive officer. He concedes that much of the international billings boost came from the opening of new offices in Europe and Japan, whereas domestic increases reflected client growth. But, he says, the company will continue to step up activities abroad because "the world is catching on to direct marketing."

Wunderman, the first major American direct marketing agency to go international, set up shop in Germany, the United Kingdom and France in the 1960s and now has 23 offices in Australia, Brazil, Canada, Europe, Japan and South Africa.

U.S. agencies stake claims

(Continued from Page S-1)

Officials of Chicago-based Kobs & Brady Advertising, a subsidiary of Ted Bates Worldwide, have been scouting the European market in hopes of starting their first offices there this year.

Daniel Ginsburg, Kobs & Brady's senior vp, says direct marketing in the U.S. is expanding at a slower rate than in the past, so it's harder for agencies to attract new business. "We used to have people walking in the door and asking for our help," Mr. Ginsburg says. "We practically had to beat them away. Now, everything's much more competitive."

But Mr. Ginsburg says much of Europe "is just starting to take off. It reminds me of the U.S. in the late 1970s," he says. "In another five years, direct marketing will be booming around the world and everybody will rush into it with the same crowd mentality we saw here a few years ago."

Right now, he says, "there's still a need for good agency talent and some real opportunities for client companies, too."

The world's largest direct marketing agency, New York-based Ogilvy & Mather Direct, grew at about the same rate inside and outside the U.S. last year. Jerome Pickholz, O&M Direct's chairman and ceo, says this is because the same technological forces driving direct marketing in the U.S.—such as computer databases, credit card systems and toll-free phone numbers—are propelling it worldwide. And he says certain lifestyle changes—such as more working women with less shopping time—also are spreading across the globe.

O&M Direct, with 38 non-U.S. offices from Argentina to Singapore, reports $210 million in domestic billings and $220 million in non-U.S. billings for 1986, up from $175 million and $185 million, respectively, in 1985. It handles American Express, seen by competitors as the industry's most important international account.

The company opened offices in the U.K. and Germany during the mid-'70s, and rolled worldwide between 1980 and 1985, acquiring agencies in Spain and Australia and starting the rest of its branches "from scratch," Mr. Pickholz says.

Stan Rapp, chairman of Rapp & Collins Worldwide, New York, which is part of Omnicom Group's Diversified Agency Services, reports his agency's European branches grew by 30% during 1986 to a total of $85 million. Japan and Australia added another $15 million, bringing the agency's non-U.S. total to $100 million, while U.S. revenues, in contrast, added up to $75 million.

Rapp & Collins started putting its international network together five years ago with the purchase of McKorkle Sideaway & Wright in London. Since then, it has acquired three more direct marketing agencies and started five.

Fully half of the BBDO Worldwide direct marketing network's $200 million in billings last year came from outside the U.S., says Ian MacKelden, president of the New York office of the newly formed Marcoa DR Group. "That's clearly the fastest-growing part of our business," he says.

The network is part of Omnicom Group's Diversified Agency Services. It includes the Marcoa DR Group—which combined BBDO Direct, DR Group and Marcoa Direct—along with other BBDO direct marketing agencies. The network now has offices in Australia, Europe, Japan and South America, and it plans to open in the Middle East this year.

Grey Advertising's Grey Direct International, New York, ventured into Sweden in 1982 after Grey clients there began asking for direct marketing services. Now with 15 offices in Canada, Europe, South Africa and Australia, Grey Direct reports non-U.S. billings of $37.5 million for 1986, more than double the $16 million billings of the previous year. Domestic billings rose from $81 million in 1985 to $107 million in 1986.

George Wiedemann, chairman, Grey Direct International, says his agency will continue its expansion into markets where the parent Grey agency already has a presence, "but we'll go prudently," he says. "We prefer to wait until we can see some clear opportunities from an established client base before we go in. We don't try to create a market. We're driven more by client need."

Agency leaders say direct marketing's future development is likely to follow strikingly similar patterns around the globe. Most agree that the industry's long-term growth worldwide will come from such "new wave" direct marketers as package goods companies, travel and financial services, auto makers and business equipment manufacturers.

And they'll use the medium not to sell direct, but to generate leads, build traffic or pinpoint target customers for retail sales.

"Mail order is direct marketing's past," says Mr. Rapp. "Customer database marketing is its future, both in the U.S. and abroad."

Meanwhile, direct marketing in Europe may be moving along faster than most people realize, says Wunderman's Mr. Dapper. "Three years ago, the industry there was 15 years behind this country," he says. "Two years ago, they'd narrowed the gap to five years. Next year, it'll be three months."

In fact, the experts say they've watched some extremely sophisticated direct marketing campaigns unfold in Europe. A supermarket chain in the Netherlands, for example, sends catalogs by mail, takes food orders by phone and delivers the groceries to customers' doors within 24 hours, says Mr. MacKelden. And Mr. Rapp says European auto makers—AB Volvo, Volkswagen AG and Bavarian Motor Works, AG (BMW)—are doing more innovative database marketing than most of their U.S. counterparts.

While Europe does have a lower penetration of direct marketing, says Mr. Rapp, "in the state of the art, they're not behind the U.S. at all."

And in creativity and graphics, "they may be a little ahead," says Mr. Dapper. "They're not afraid to take a chance, to work with a little more panache."

In fact, the experts say one good reason for developing an international network is to facilitate the exchange of ideas. "We do not hold all the secrets of the business here in the U.S.," Mr. Dapper says. "When we go international, we're not just exporting our expertise. It's a two-way street of exporting and importing ideas."

Having an international network in place also gives agencies a shot at bagging some global or multinational clients. But agency leaders admit that most direct marketing accounts are neither global nor multinational.

They are, in fact, national accounts—coming either from native or U.S. companies—because direct marketing programs tend to be designed specifically for one country or region.

"In the direct response business, we've seen very little development that's truly global," says Mr. MacKelden. "But that's a challenge for the whole industry." He says multinational clients represent the greatest potential for major direct marketing agencies, and he'd like to see more clients start moving toward global direct marketing.

He says in direct marketing, as in general advertising, agencies can handle the linguistic and cultural variances of each country without losing sight of global strategies. "It can be done," he says, "in the same way general advertising must be adapted when it's taken from New York to Malaysia."

Not that it's easy. Postal regulations vary from country to country. So do legal restrictions, media patterns, buying habits and lifestyles. "In parts of the Middle East," says Mr. MacKelden, "the streets have no names and the houses have no numbers. Women are not allowed to receive mail unless it's approved by their husbands first."

But this just goes to show in the direct marketing industry "we see all kinds of problems and we overcome them," he says. "We are even working out ways to use direct mail in the Middle East."

Wunderman's Mr. Dapper says global direct marketing can work for a product whose basic positioning and strategy remain the same worldwide. He says many direct marketing programs are offer-oriented "and you can frequently take the same offer and play it across the world. The creative execution might look different from place to place, but the concept would be the same."

Other agency leaders aren't so sure global direct marketing is a workable idea for most clients. "We believed in the myth of the world account when we started expanding internationally," says Mr. Rapp. But he says he has since discovered that "the concept of global marketing—which comes from general advertising—almost never applies to direct marketing."

Grey Direct's Mr. Wiedemann also finds very little evidence of a trend toward globalization. He says a handful of American companies are moving in that direction, but others are doing just as well by "cherry picking" the best agencies in each locale.

"I expect 80% of our growth to come from local business within each country and 20%—maybe less—from multinational advertisers. The truth is, it's going to take agencies and marketers a very long time to get this global idea to gel," says Mr. Wiedemann.

Even O&M Direct, whose extensive global network is the envy of the industry, has very few worldwide clients. It

(Continued on Page S-4)

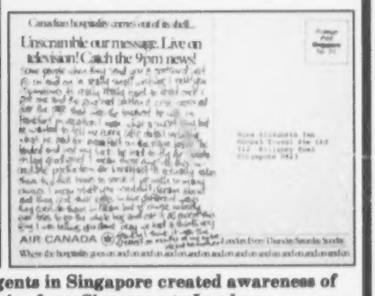
Agency execs eye new lands

The United States and Europe may have put direct marketing on the map, but the major U.S. agencies aren't stopping at the borders of familiar territory. They're marching into more exotic markets every year.

When agency leaders were asked about the hottest spots for the future, they pointed in several directions, from Sao Paulo to Peking.

Some see Australia as a dynamic market right now, especially for direct response tv. In Europe, they're eyeing Spain and Scandinavia, where direct marketing still is in its early stages.

Others are setting up shop in Latin America. Steven Dapper, New York-based Wunderman Worldwide president and chief executive officer, says if the economy there improves, direct marketing growth in the next decade will mirror Europe's in this decade.



Air Canada's direct mailing to travel agents in Singapore created awareness of the airline's thrice-weekly service from Singapore to London.

But Rapp & Collins Worldwide, which opened an office in Mexico City in 1984, pulled out last year because of the country's rampant inflation. "If the bedrock of direct marketing is mail order," says agency chairman Stan Rapp, "countries with inflation rates of 100% become very difficult."

Mr. Rapp likes Japan's potential. His agency entered that market three years ago, and he has high hopes, even though he admits "just about everything about Japan is wrong for direct marketing."

He says Japan's postal rates "are the highest in the world, addresses are hard to find, credit card penetration is relatively low, and very few women are employed outside the home.

"Even the size of the residences works against you. Because the Japanese live in such cramped quarters they can't acquire many products," he says.

Mr. Rapp projects slow development for direct marketing in Japan, but maintains that the country offers good potential in the business-to-business, financial services and credit card sectors because the Japanese so readily adopt workable ideas from the West.

"Like everyone else, we're also looking at the Pacific rim—Hong Kong, Korea, Singapore and Taiwan," says Mr. Rapp. "As their economies strengthen, everyone will begin thinking about them."

And perhaps sometime in the future, he adds, direct marketing will take the high road to China. Mass marketing there has been so limited that one-on-one marketing makes a lot of sense, he says. "We may see direct marketing leapfrogging the kind of ad-supported mass marketing we've had here."

Jerome Pickholz, chairman and chief executive officer, New York-based Ogilvy & Mather Direct, says his agency is definitely looking at China. In fact, O&M already has a general ad agency office in Peking.

"South America is emerging, and we see opportunities in the Pacific basin, but nothing equals the enormous potential of China's 300 million to 400 million households," Mr. Pickholz says. He adds that the Chinese people are in "an acquiring mode right now. There's so much they need to buy; they're prime prospects for just about any product you could imagine."

And then, he pauses to contemplate the enormity of it all. "Wouldn't we love," he says, "to come up with a list of one billion names?"

—Lori Kesler

Chase mailer chases new business accounts

By Claire Wilson

Popular in retail banking for years, direct marketing is just beginning to make an appearance in the wholesale divisions of major banks around the world.

The Chase Manhattan Bank, N.A. in Europe, one of the first large financial institutions to use the discipline, is aiming its very first wholesale direct marketing campaign at some pretty demanding customers: International bankers needing highly specialized currency exchange services.

The sophisticated three-part campaign earned its agency, Paris-based Messages, a 1986 Gold Echo award in the business-to-business category from the U.S. Direct Marketing Assn., as well as a 1986 Silver award from the British Direct Marketing Assn. But another prize Chase Europe is bringing home may be even better—a 14% response rate, thus far, that promises to continue its upward climb.

"I'd mentally prepared myself for a much lower response rate," notes a pleasantly surprised Peter James, London-based European-area payments product manager, Chase.

"Figures that are the industry standard made me expect around 5%," he says.

The campaign, created to generate business for the bank's foreign currency clearing operations, had to be top-notch to appeal to the bank presidents it targeted, many of whom already had established relationships with other banks. While the bankers did share some commonalities, they were from institutions as dissimilar as large banks in the American Midwest to small, private banks in Singapore. Each had different banking needs.

"It's a difficult service to sell. The larger the bank, the more likely it is to already have a long-established history with another institution, either political or financial," notes Mr. James.

"The institution may be younger, and more willing to switch. We had to appeal to all kinds of prospects."

The campaign was originally created exclusively for Chase in France, but when the bank's European directors saw it, they knew it easily could cross international borders. Using tastefully executed, $50-per-unit mailings, the campaign promoted the idea that Chase was serious and efficient, and that it wasn't an impersonal, too-American megabank important only to large customers.

"It was crucial to successfully blend the ideas of quality and technical excellence in the overall presentation," says Mr. James.

Chase developed a highly specialized list of 3,500 names. Its targets were bankers in markets all around the world, except Africa and South America, who use foreign currency clearing services in five European currencies: French francs, ECUs (European currency units), German marks, British pounds and Swiss francs.

The first contact with each prospect was a personal telex informing him that he would receive a special packet within the next few days. Telexes were sent early in the week; the information packet arrived at the end of the week.

The packet, which contained a number of elements, came in a 9-by-12 in. white box tied with string, the ends of which were affixed to the box with sealing wax. Besides a letter from an area manager, an accompanying 16-page brochure explained Chase's state-of-the-art, electronic, international clearing service and what it could mean to the prospect's business.

The entire program was written in English, the international language of banking.

The four-color taupe brochure was peppered with blocks of primary colors, evoking the style of artist Piet Mondrian. The copy crisply conveyed Chase's efficiency in handling international clearing transactions, but did so around a series of four whimsical paintings by French artist Anies d'Andon, who had been commissioned for the project.

Chase Manhattan is a well-known corporate art collector, and the bank executives thought

American Transtech. Changing The Way American Business Achieves Direct Marketing Results.

If you want your direct marketing program to work in today's marketplace, you need to plan smarter, quicker and better than your competitors. You need suppliers who can meet your timing, volume, security and information management needs. You need responsibility. Accountability. Data you can rely on. And fast, measurable results.

You need AT&T American Transtech integrated Direct Marketing Services. Telemarketing. Marketing Information Management. Direct Mail and Fulfillment. The integrity and quality of AT&T. Cost efficiency. And results you can take to the bank. Call 1-800-241-3354 ext. 2524 or 904-636-2524. Or write to us at: Direct Marketing Services, P.O. Box 44075, Jacksonville, Florida 32231-4075.

AT&T The right choice.

Agencies

(Continued from Page S-2)

handles American Express, Shell Oil and Unilever throughout most of the world, but chairman Mr. Pickholz says a typical O&M office gets about 75% of its business from within its own country.

"There aren't many global clients in this industry," says Mr. Pickholz, "because most of them see direct marketing as a matter of local tactics, not global strate-

the art would complement the institution's image.

"Using art as a theme conveys a more personalized feeling," says Yvon LeMen, Messages' director.

"Plus [the banking world], is in some ways traditional, and the message had to be of a particular quality, which art stands for in those circles."

The brochure also held separate inserts in its back cover explaining Chase's operations in the respective European capitals.

The item that created the most stir, however, was a specially designed floppy disk that illustrated Chase's services.

The packet's final element, a hand addressed, sealed envelope marked "confidential," contained an offer for a free, limited-edition lithograph by French artist Pierre Fix-Masseau, whose work is part of New York's Museum of Modern Art's permanent collection.

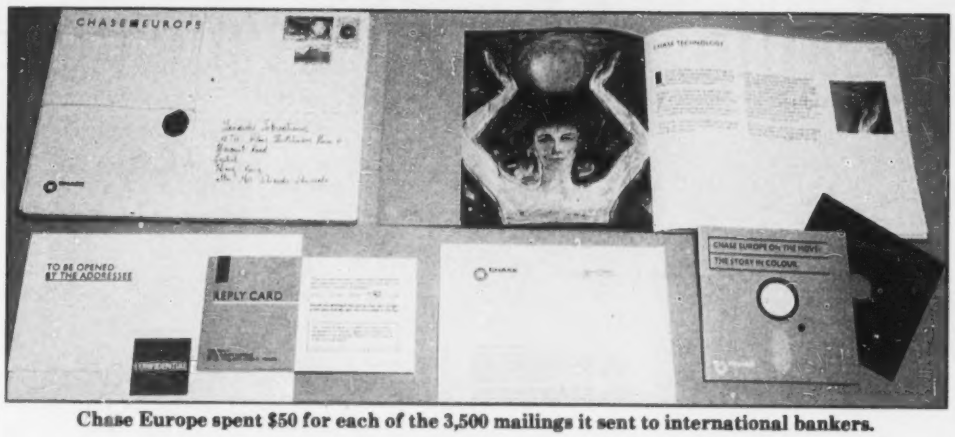
Prospects could order the specially-commissioned lithograph by inserting their business card into a reply envelope, or by sending their order via telex or Swift, the electronic interbank communications system. Prospects were advised to order quickly.

Each lithograph was personally inscribed by Mr. Fix-Masseau and hand-delivered by a local Chase representative as the campaign's final phase. The representative then personally explained Chase's services to the prospect.

Reaction to the campaign went far beyond the high response rate.

"We even received letters from prospects saying they'd never seen anything so beautiful before," says Mr. LeMen, whose agency also won a U.S. Direct Marketing Assn. award the previous year for its Orient Express campaign.

The $50 cost per mailing was high by industry standards but, according to Mr. James, reasonable when the potential results were calculated. The bank did consider a conventional advertising program via international publications, but deemed the direct marketing approach far more cost effective, he says.



Chase Europe spent $50 for each of the 3,500 mailings it sent to international bankers.

It was crucial to produce a product that would convey an image, and not look like junk mail to the prospects, Mr. James adds. Such sophisticated mailings, he says, naturally cost a bit more. Mr. James explains that Chase Europe decided to experiment with the direct marketing campaign because of changes in the European financial marketplace, including deregulation in West Germany, privatization moves in France and London's "Big Bang," which opened up the London Stock Exchange to increased trading volume.

Mr. Jones adds that there probably will be other such initiatives in the future, both from Chase and its competitors.

While Mr. James says Chase Europe has no concrete plans for other campaigns at the moment, if this first effort is judged profitable for the bank, "there will more than likely be others."

gies."

Even global clients want their direct response packages tailored to each local market, he says.

"We make a point of exchanging information around the world. Everyone in the agency knows what has worked in other countries.

"But rarely does a client say, 'I want one campaign mailed in 30 countries at the same time,'" Mr. Pickholz says. "Decisions are, by and large, localized."

The Direct Marketing Marketplace/1987

IN ONE COMPREHENSIVE DIRECTORY . . .

✓ The leading direct marketing companies ✓ Major service firms and suppliers
✓ Creative individuals and organizations

THE DIRECT MARKETING MARKET PLACE

1987

THE DIRECTORY OF THE DIRECT MARKETING INDUSTRY

You can use the *DIRECT MARKETING MARKET PLACE/1987*...

- As a reference and mailing list source to find new business
- To locate service and supply sources—printers, lettershops, list brokers and managers, computer services...
- To find new advertising agencies, consultants, design studios, freelance artists and writers...
- To easily locate key executives and companies...

Here, in one easy-to-use source, you'll find thousands of entries listed *alphabetically* by category. Included with each listing is the company name, address, and phone number; a description of the firm's product or service; the names and titles of key executives; its sales or billings; advertising budget; and expenditures for specific direct marketing media.

SOME OF THE ORGANIZATIONS INCLUDED-

Columbia House; Allstate Insurance; American Express; W. Atlee Burpee Co.; Tension Envelope; Woodruff-Stevens; J.C. Penney Co.; R.C.A.; Dun & Bradstreet; Lee Wards; Doubleday, Inc., plus thousands more.

In one multi-purpose volume, featuring over 33 categories and totaling some 17,000 key executives and organizations, you'll have the entire spectrum of Direct Marketing at your fingertips.

Most important, every listing was supplied by an executive who *personally* responded to either our direct mail or telephone questionnaire. Listings *were not* culled from other source books, lists or compilations.

RESERVE YOUR COPY NOW!

If you use direct marketing to sell or promote a product or service—to raise funds—or if you offer a product or service to other direct marketers—you simply must own a copy of *The Direct Marketing Market Place*

Just return the order form below!

What the experts say about DMMP...

"a vast array of salient information at your fingertips. It's a must for every working professional."

Nat Ross, Professor Advertising Promotion at N.Y.U.

"The DMMP is just about the most useful tool I get every year. It's not only complete but totally reliable. It saves me an incalculable amount of time and money in ferreting out the information that DMMP places at my fingertips."

Ralph Stevens, President Woodruff-Stevens & Associates

"The Direct Marketing Market Place is a comprehensive resource and valuable reference for people in the direct marketing field."

Jonah Gillitz, President Direct Marketing Association, Inc.

"Invaluable where-to-find-it information about every aspect of direct marketing. The best and most complete directory of resources available."

Direct marketing makes international waves

Direct marketing overseas has been described as "booming after six years in the desert," a "Cinderella" about to blossom and "the key to marketing success." Despite the variety of prose, all assessments point in one direction: Upward.

The discipline has made significant strides over the past few years, and is poised for greater expansion, experts say. In many countries, databases are becoming more refined, and marketers are using them with greater sophistication. Agencies from South America to South Africa are increasingly realizing direct marketing's importance and effectiveness, and clients are fueling the industry's growth in their search for more cost effective marketing strategies.

The following profiles on the state of direct marketing in 10 countries will serve as a guide to what marketers and agencies can expect to run up against when venturing into international waters. Readers will learn about restrictions—both regulatory and mechanical—against direct marketing, its penetration level, consumer acceptance, list development, database sophistication and more.

The prevailing message from reports filed by Advertising Age*'s international correspondents, however, is one of justifiable optimism.*

Sweden

If a direct marketer's paradise exists, it might be found in Sweden.

"We are the envy of others in the world," says Staffan Elinder, director, Blomquist Direct Marketing, Stockholm, one of Sweden's leading agencies in the field.

With a population of 8.3 million, Sweden boasts an efficient postal and telephone service and only minor restrictions on direct marketing. But, just as important, direct marketers have access to perhaps the most extensive computerized personal data system in the world.

The government has compiled a vast amount of computer data about its citizenry, coded by individual 10-digit numbers assigned to every Swede. The number is required on most official and commercial documents.

Sweden's relatively lax privacy laws enable the government, through its Computer Center for Administrative Data Transactions, to offer basic information about the population to corporate clients for a fee.

The service, called Coordinated Person and Address Register (SPAR), provides a person's name, address, ID number, marital status, birthplace, citizenship, income and number of children.

"It makes it extremely easy to pinpoint target groups," says Mr. Elinder. "For example, using SPAR I can get a list of all females over 35 with two children who make more than $20,000 a year."

Two other official registers—of home and car owners—are also available. These are supplemented by still other data banks. The Swedish Post Office has encouraged the growth of direct marketing to boost its revenues, and operates a 30-year-old service that provides information on businesses and occupational groups. Several private companies, primarily Stockholm-based Esselte, a diversified corporation with a strong base in information services, also provide detailed mailing lists.

"The easy availability of accurate mailing lists and the country's small population have made direct marketing effective and cost efficient for those seeking specific marketing segments," says Peter Linden, Stockholm-based account exec for Ervaco, a pan-Scandinavian advertising agency.

Direct marketing, in fact, is Sweden's fastest growing marketing tool, with an average annual growth rate in expenditures of 20%. Its role is major, accounting for an estimated $450 million of the $2.1 billion spent on advertising and promotion, including production costs, in Sweden in 1985, according to a study by the Information and Mass Media Group at Gothenburg University.

Its development has been aided by some uniquely Swedish factors. Because advertising on tv or radio is not yet permitted, direct marketing—using mail order, direct mail, and telemarketing—has become the only viable alternative to traditional print advertising.

Sweden has the highest employment ratio in the Western industrialized world. Two-income households are common, resulting in reduced shopping

BEWARE OF TURKEYS!

The strategic plan for your direct marketing venture may look like a swan—but expert analysis may reveal it to be a turkey in disguise. The time to check the genus is now, before it gobbles up huge chunks of time, energy and money.

It's natural for you and your management to be enthusiastic about your strategic plan for starting, acquiring, or building a direct marketing venture, or expanding into a new area.

But how reliable are your key assumptions? Does direct marketing have a meaningful, compatible role in your organization? Is there a potential conflict with your present distribution system? Are your financial assumptions reasonable? Have you planned adequate systems and databases? In short, are you about to give birth to a swan—or a turkey?

How others plan

More than 200 prudent companies in the U.S., Canada, Europe and Japan have turned to Kestnbaum & Company for analysis, research, systems design and management advice. These services have assisted scores of major marketers in successful launches of new ventures and development of current businesses.

Out of this broad experience Kestnbaum & Company is prepared to develop for your senior management a business plan that will: *Focus on key management questions. Be financially sound. Deal with underlying business issues. Provide relevant hard data or draw on our wide experience to present reasonable alternative cost and experience profiles where hard data are unavailable.*

Where appropriate, we will provide access to CatalogSCAN™, a proprietary, constantly updated database drawn from the marketing, format, product lines, price points, merchandising emphasis and other salient features of hundreds of different specialty catalogs.

We can provide detailed evaluations of acquisition candidates which:

- Encompass the entire candidate organization or focus on a few specific areas.
- Assess risks, growth potentials, management practices, systems, cost structure and database practices.
- Incorporate sophisticated financial modeling and projections.
- Provide support for determining the asset value of the customer list and the total value of the company.

Innovation is truly the key to corporate growth. But especially in a marketing discipline or planning process that is unfamiliar to your company, it can become a bold and costly step in the wrong direction. Contact Kestnbaum & Company today for guidance in the development of a marketing enterprise plan that will help assure that your new venture flies high—like a swan.

A business-to-business direct mailing from the Swedish Cancer Society generated a 13.6% response rate.

(Continued from Page S-10)

time. The heavy emphasis on office computerization also has made data-based direct marketing an increasingly accessible and affordable marketing tool.

The roots of direct marketing can be traced to the catalog houses that sprung up after World War II, most of them located in Borås, the country's mail order capital in central Sweden.

Mail order accounted for an estimated 6.4%, or $757 million, of Sweden's total retail sales, excluding food, in 1985, according to the Retail Research Institute, Stockholm. The industry is dominated by several Borås-based companies: Ellos, Josefssons, Halens (owned by Britain's Great United Stores) and H&M Rowells (owned by Sweden's largest retail clothing chain, Hennes & Mauritz).

Mail orders have doubled in the last decade, and some of Sweden's major retail chains have entered the business, including ICA and KF as well as more specialized companies such as AB Volvo, which offers auto parts through the mail.

Direct mail, however, has been the fastest growth sector of direct marketing during the 1980s, with the principal users being book clubs, insurance and finance companies and business-to-business marketers. American Express, for example, has quintupled its number of card holders in Sweden to 200,000 through an addressed direct mail campaign.

Telemarketing, which plays a minor role, is the latest phase of direct marketing in Sweden, having appeared in only the last several years.

The growing direct marketing industry has attracted both home-grown, specialized agencies, such as Helsingborg-based Blechert Direct Marketing and Blomquist as well as international agencies with direct marketing experience, including Stockholm-based Ted Bates AB, Grey Svenska, Ogilvy & Mather Direct and Young & Rubicam's Wunderman Worldwide, its direct marketing subsidiary.

One key obstacle to expanding agency activity in Sweden is the shortage of trained personnel. "The number of people with direct marketing experience is very small," notes Mr. Elinder. "That is proving to be a serious handicap." There are few university-level marketing courses; to fill the gap, mail order houses now offer private training.

Continued growth for direct marketing in Sweden appears certain, however. Some predict it will have the highest percentage of direct marketing spending in Europe, surpassing Denmark within the next decade.

But one key question surrounding its future is what effect the introduction of tv advertising will have on the industry. Commercial tv is expected by the end of the decade. Marianne Johansson, information director, Swedish Direct Marketing Assn., Stockholm, is optimistic about the development. "We believe that tv advertising doesn't represent a threat, but could be used as a complementary medium with direct marketing, with the use of toll-free numbers, for example," she says.

Others are less sure. "With commercial tv, direct marketing growth will presumably decrease," says Lars Nabseth, chairman, Swedish Industrial Assn., Stockholm. "It's natural that some advertising now handled by direct marketing would move over to television."

—Jack Burton

Leading U.K. companies are learning that direct marketing involves more than just sending out mailings and making cold telephone calls.

"They are starting to realize that it is a marketing process rather than a medium," says Peter Rosenwald, chairman of the recently formed Saatchi & Saatchi Direct, London, Saatchi's first direct marketing arm outside the U.S.

"They are becoming aware that direct marketing is personal, and allows them to establish continuous contact with an individual in order to build up brand loyalty," he says.

The biggest attitudinal change toward direct marketing has come from consumer product companies who view it as a means of getting more value from their promotional budgets.

"Manufacturers are finding mass market advertising increasingly difficult as consumers become more choosy and markets begin to fragment," says

A list of top
that don't us
There are a lot of companies and agencies you won't find on this list. Companies like Lever Brothers, Christian Dior, Revlon, Chrysler, McDonald's, Sears & Roebuck and hundreds more. And agencies like Grey Direct, Young & Rubicam, McCann Erickson and hundreds more.
In fact, you may be surprised to see the array of Webcraft clients. It may well represent the cream of the elite and the up-and-coming marketers in the U.S. today. And there are very good reasons why these leading advertisers depend upon Webcraft Technologies.
INNOVATION. CREATIVITY. SERVICE. REPUTATION. LEADERSHIP.
But perhaps more than any of these is Webcraft's involvement and commitment to its clients' businesses.
Webcraft's 10 years of experience in direct marketing, insert advertising and fragrance and cosmetic sampling has made it a premier specialty printer. It is a company that works with its clients in achieving their individual marketing goals and understands those goals, unlike traditional suppliers. Because Webcraft is at the forefront of its industry, the kinds of problems we solve (and the services we provide) aren't standardized. They are designed to our clients' individual needs.
That's why the list of companies that rely upon Webcraft grows smaller every year. Indeed, if you're one of them, give Bill Williamson a call at 1-201-267-5100. When you've talked with us and have seen our facilities and our work, you'll want off the list, too.
WEBCRAFT. Our Clients Make Us What We Are.

Brian Thomas, managing director, Ogilvy & Mather Direct, London.

"Consumers do not just want a Coke, but five different flavors of it. So companies are getting much more interested in finding out who their customers are and in talking to them directly about their needs," he adds.

Direct mail in the U.K.—which includes mail order, according to the British Direct Marketing Assn.'s statistics—accounts for the vast majority of direct marketing expenditures. It is the country's third largest medium in terms of expenditures, behind print and tv, and is currently the fastest growing.

The BDMA estimates that 1985 direct mail expenditures increased by 37.3% to $639 million in 1985, making up 9.1% of total marketing/promotional expenditures. Much of the rise in spending, however, was caused by a big increase in costs. Average postal unit costs went up 16% and production unit costs soared 44%, largely because of a trend toward heavier, more visually attractive packages, according to the British Post.

Guardian Royal Exchange's mailing had an 8.6% response.

In the U.K., mail order has by far the largest share of the country's direct mail pie in volume terms—26.7% in 1985, an increase of just under one percentage point from 1984. According to the U.K.'s Business Statistics Office, mail order sales for 1984 (the most recent figures available) accounted for 3.3%—or $3.9 billion at the current rate of exchange—of total U.K. retail sales.

The most active companies in direct mail tend to rely less on outside mailing lists and more on those they generate in-house.

"There's been a big switch toward database marketing," says Elene Coles, BDMA's assistant director. "Information collected about customers is becoming much more marketing oriented, so that companies can be more precise in targeting their direct marketing campaigns."

Financial institutions—banks, insurance companies and mortgage companies—have been extensively using information from their customer databases for direct mail campaigns. In 1985, financial institutions were second in direct mail usage (in number of items sent) of all those using the medium.

London-based Trustee Savings Bank is one of the biggest direct mail spenders among financial institutions. The bank sends finely targeted information about TSB services to customers in their monthly bank statements.

"It has been absorbing a growing proportion of our promotional budget," says TSB advertising director Roger Lynn.

Mail order companies and retail stores also are creating large customer databases to more precisely target direct marketing efforts. In the past two years, retail chains have been capitalizing on their credit card accounts to boost sales through direct mail.

The British department store chain Debenhams, for example, sells a wide range of products and services through monthly statements sent to its 900,000 credit card holders.

"We should soon be in a position to segment our market and offer certain types of products to specific customers based on their purchasing history," explains Stephen Wright, sales

development controller, The Burton Group, London, owners of Debenhams.

"If, for example, someone bought a piece of luggage, we might send them a mail shot about swim wear. [More finely targeted marketing information] will also open up possibilities for selling third-party goods to our customers, and for creating mail order catalogs for particular types of purchasers," adds Mr. Wright.

Telemarketing has grown rapidly in the U.K. over the last two years, but expenditures remain relatively low compared with those for direct mail. Much of the increase has been in the business-to-business sector. However, British Telecom, the U.K. telecommunications company, recently set up an inbound telemarketing service, Telecom Tan, with the capacity to handle 8 million calls yearly, mainly from callers responding to direct response advertisements.

O&M Direct estimates that in 1985, spending on outbound calls (excluding those from in-house operations) amounted to $44.7 million, a 55% increase from 1984. Spending on incoming calls is estimated at $8 million, a 60% increase over 1984.

Outbound telemarketing, however, has yet to win friends among U.K. consumers who consider it an invasion of privacy. To reduce hostility, the BDMA has a code of practice that outlaws selling disguised as research and computerized dialing. Members who flagrantly abuse the code are asked to resign from the association.

"Outbound calls have to be handled much more carefully here than in the U.S. People are much more sensitive about them," says Mr. Rosenwald. "The major growth area could be in inbound calls."

Despite some doubts about its effectiveness in selling consumer products and services, telemarketing is nonetheless thought likely to be the direct marketing medium which will expand most rapidly in the next few years.

—Sean Milmo

"Back to the Future" is probably the best way to describe direct marketing in Brazil, Latin America's largest consumer market. Direct marketing specialists agree that the country is probably decades behind the times in this area. But advertising executives here can draw on the experience of more developed markets like the U.S.

Hindsight has become foresight for three pioneering agencies, all of them subsidiaries of U.S. agencies: Standard, Ogilvy & Mather with its Ogilvy & Mather Direct; Fischer, Justus, Young & Rubicam with its Wunderman Marketing Direto, and Lage Stabel/BBDO's direct marketing branch BBDO/Sistema, all located in Sao Paulo. None of the large local agencies —six of which rank among the top ten agencies here—have entered the ball game.

Brazil is virgin territory; there are no government restrictions on direct marketing activities. Advertisers, who often complain

The Secret Is Out.

You can have a national TV campaign with a limited budget.

The secret is out. There's no reason why you should allow budget constraints to keep a good direct response product or service off the air. With help from LBAI, you really don't need a substantial budget to start a campaign — or keep it going.

* * *

LBAI — Lawrence Butner Advertising, Inc. — regularly helps many clients when the media budget just won't stretch enough to accommodate national TV. We place their commercials on the air in major markets across the country 52 weeks a year.

LBAI is the largest independent broadcast direct response agency in the business. We know how to help you develop and manage inquiries and orders on a steady basis.

What's more, with our unique, computerized telemarketing capability, we can turn the responses over to you within 24 hours after your commercial runs. So your responses become customers faster.

Talk to LBAI. Today. Ask for Larry Butner, President, and discover how you can have a national TV campaign with a limited budget.

(Continued from Page S-14)
about the high cost of traditional methods, are beginning to discover the advantages of this alternative marketing tool.

Department stores don't have large retail networks in rural areas where consumer income is on the rise and good tv coverage creates a ready market for sales. And the recent end to high inflation has, for the moment at least, spurred consumer spending and interest in catalog sales.

There are little reliable data on the state of direct marketing in Brazil. But the Brazilian Direct Marketing Assn., Sao Paulo, says that catalog and subscription sales came to $370 million in 1985, while sales from March to October, 1986, tripled compared with the same period in 1985.

Business-to-business direct marketing is one of the industry's fastest growing sectors. There's also much growth in direct reponse, says Silvio Lefevre, BDMA president. For example, 80% of all ads in *Exame*, a leading business magazine, carry a phone number or a coupon. "This is a new phenomenon," says Mr. Lefevre. "Lead generation has had fantastic growth in the last two years."

Direct marketing has grown despite some very large obstacles. A postal workers' strike at the end of 1986 dashed catalog marketers' hopes for what might have been their strongest Christmas selling season. Direct marketing executives had been expecting catalog and subscription sales totaling $500 million in 1986, but instead saw a sharp reduction because of the distribution glitch.

Creating a mailing list also is much harder in Brazil than in the U.S. "First to make a list, you have to convince a client to spend money on traditional media," says Karol Sapiro, future partner and director, BBDO/Sistema. For example, to to identify prospects for a local typewriter company, BBDO/Sistema placed a print ad that carried a coupon and offered professional secretaries an opportunity to win free foreign language instruction.

Where lists do exist, screening is often poor, leading to multiple mailings to the same individual, higher mailing and production costs and poor response.

In addition to the mechanical obstacles, inflation could return to haunt direct marketers. Rapidly increasing prices make catalog sales almost impossible, for example.

Direct marketing specialists say their biggest challenge is to educate agencies and clients. Milton Longobardi, general manager, Wunderman Marketing Direto, Sao Paulo, says his part of Y&R's agency presentation is different from the rest of the agency's managers. "I'm the only one who has to explain what it is we do," he says. "It's like trying to sell ballpoint pens in a market where you only have fountain pens."

Still, Wunderman has made a list of 40,000 electronics salesmen for its client, Sao Paulo-based Ford-Philco, and is working on a newsletter to help educate the electronic sales force about the company's products.

Another problem, says Mr. Longobardi, is the state of Brazilian technology. Because Brazil is trying to develop its own computer industry, which is government-regulated, agencies can't import state-of-the-art software or mail printing equipment. "These things put us in the Stone Age," he complains.

Telemarketing, also in its early stages, represents another example of poor understanding on the part of agencies and clients. Tv ads don't show phone numbers long enough for consumers to write them down. And sometimes, direct response advertising omits vital information.

A recent Xerox magazine ad titled "Direct Dial Xerox," for example, featured long-winded copy directing the reader to call the company's technical service office. It even described how each caller can be linked to the company's service database.

But there were no phone numbers listed, and Brazilian telephone directories are notoriously hard to use because legal, listed company names often differ from the names they're commonly known by. Also, telephone numbers change hands frequently.

Agencies rarely suggest that their clients use direct marketing, says Mr. Lefevre, whose consulting company, Lefevre

Consultores Associados, often comes to their rescue. "They call me up and say, 'The client wants to do a direct mailing, can you help us?' "

Agencies often belittle what direct marketing can do for their clients, partly because they earn big fees for placing traditional tv, print and radio ads, he says. He adds that clients often have to insist on direct marketing to overcome agency reluctance.

Brazil is still a bit of an advertising paradise for agencies, which thrive on creating glitzy, prominent campaigns. But because marketers are beginning to discover direct mail, which is inherently less flashy than the country's tv campaigns, Mr. Lefevre says "The turning point is now. The big agencies have to offer all services, including direct marketing, or they can lose accounts."

—Julia Michaels

This month, the Australian Direct Marketing Assn. is putting its money where its mouth is.

"We've had a problem educating the consumer," says Terry Murphy, national director, ADMA, Sydney. "There are a lot of Australians who don't understand, or who distrust, direct marketing. So we've launched 'Operation Integrity,' a print and electronic media campaign aimed directly at consumers."

Financed by the larger association members as well as by Australia Post and Telecom, the national campaign, valued at $350,000 (U.S.), is backed up by an invitation to consumers to either write or phone a toll-free 008 number for an educational booklet on home shopping. The campaign also identifies a "Seal of Integrity," which any ADMA member can place on its advertising.

While direct marketing in Australia is growing steadily, it is being hampered by unsatisfactory list development. Lists are often duplicated, resulting in customers receiving the same mailings several times. Some companies find it more expedient and economical to blanket the market with existing lists, rather than bringing them up to more sophisticated standards.

Specialist companies in the field are tackling the problem, as is Australia Post, which actively promotes direct mail through bulk mail rates and publishes a "List of Lists" that catalogs available mailing lists.

Direct marketing's image also hasn't been helped by the mailing practices of some of the biggest companies in the field, including American Express International. These companies are having difficulty shaking off a "junk mail" reputation because they solicit prospects too frequently—in some cases every two weeks with the same mailing—highlighting Australia's lack of list sophistication.

"It's giving direct marketing a bad name," says Alan Smith, director, Merchant & Partners Direct, Sydney.

"I think American Express is going over the top," he says. "They're sending mailings, on average, to half a million names for every solicitation, which is a large figure for Australia. And because the files they're using aren't very good, they're getting a lot of name duplications. It's a big problem, but they obviously feel it's still a positive thing for them to do."

Another problem is the shortage of trained direct marketing personnel within agencies. "It has become a salary war," Mr. Smith says. "It's like musical chairs, with experienced people moving from job to job."

To overcome the paucity of direct marketing professionals, ADMA has put emphasis on training young people in the field. The association holds workshops and has instituted a direct marketing curriculum at a Sydney university.

"We are also cooperating with the Government's Consumer Affairs Dept.," says ADMA's Mr. Murphy. "They now refer all complaints from the public to ADMA before taking any action themselves, which gives us a chance to talk to the offending companies and see what the problem is. We started off investigating around 130 complaints a fortnight. In a year, that number has dropped to about 20."

The growth areas in Australian direct marketing, according to Lynne de Weaver, associate director with Christian Brann, a Sydney-based direct marketing agency, are financial institutions, insurance companies and business-to-business campaigns. "They're booming, are very profitable, and are going to grow much more in the next 18 months," she says.

Reflecting the state of the industry, ADMA is itself short on statistics, although Mr. Murphy says that empirical research from 1984 is being built upon.

"Simple surveys of our membership indicate that direct marketing's growth is about 25% a year," he says. "Direct mail is, by

far, the most-used medium, and consumer goods—books, clothing, records, do-it-yourself items, jewelry—the most advertised."

Direct marketing's 1986 expenditures, says Mr. Murphy, were around $230 million, generating about $1.65 billion in revenues. Of these totals, direct mail made up 38.4% of the expenditures, 53% of the year's revenues.

Most magazine and newspaper direct marketing in Australia, which accounted for 23.7% and 9.2% of expenditures respectively, is by coupon rather than an 008 number.

Television, with an 008 or direct number, is a relatively new direct marketing medium, amounting to 7.4% of 1986 expenditures. Radio makes up only 0.4% of expenditures.

NatWest Australia Bank's direct mailing to affluent consumers fetched a 40% response.

"From a tv ad, we can expect that between 65% to 70% of those who phone in will buy," says Don Fox, joint managing director, Total Media, Sydney. "Radio is a disaster. We can generate response, but we can't get people to buy. It's as though there are a lot of lonely hearts out there, people who want to phone in just to talk to other people."

Despite the problems, some companies are happy with direct marketing. "Direct marketing has added a 13th month to our marketing year," says Kitty Holloway, Sydney-based direct marketing manager for Australian Guarantee, one of the country's larger financial institutions. "We have a vast customer base, and have been selling more products to the same customers. In 1985, direct marketing represented around 10% of our total marketing budget. In 1986, it was more like 20% to 25%."

There are no major government restrictions on direct marketing, although the Federal Trade Practices Act prohibits false representation, bait advertising and inertia selling, the sending of and billing for unsolicited goods. There are also "grace" provisions enabling dissatisfied customers to return goods and get their money back.

Furthering its efforts to promote Australian direct marketing, the ADMA strongly advocates self-regulation among its members. "We are all conscious of the need to watch our behavior," says Mr. Smith.

The state of direct marketing in Australia is improving each year, but until it matures, the industry is expected to continue experiencing some growing pains.

—Geoffrey Lee Martin

Italy

While direct marketing in Italy is still relatively small-scale, the industry flowered last year.

Agency sources point to a surge in Italian mail order sales, and a sudden expansion of direct mail usage. And the National Direct Marketing Assn., Milan, says its November, 1986 convention attracted more than 3,000 participants, double last year's number.

For two years, Italian mail order sales, which amounted to $850 million in 1985, have outpaced department store sales in annual growth. Many mail-order businesses are getting ahead by concentrating on clothing.

"We are making clothing a top priority," says Italo Pratizzoli, general manager of Italy's largest mail order company, Postalmarket S.p.A., Milan.

Mr. Pratizzoli cites higher profit margins from clothing than from appliances and furniture, which had been the company's standbys. Apparel accounted for more than 65% of Postalmarket's sales in the first half of 1986, up more than 50% from 1979.

Postalmarket doubled its line of clothing by designer names such as Krizia, Biagiotti and Cerruti in its 1986-1987 winter catalog, and its rival, Vestro S.p.A., Milan, added designer Trussardi to its line. Vestro's chairman, Graziano Fiorelli, says, "The Italian passion for style makes fashion by mail a sector with good growth potential."

Direct mail, too, is taking new directions and attracting new players. "Up until last year, most direct sellers in Italy were subsidiaries of foreign publishers, such as the U.S. Book of the Month Club," says Ugo Castellano, president, Young & Rubicam Italia, Milan. "Now, others are discovering this method," adds Mr. Castellano.

Italo De Mars, general manager of direct marketing agency Wunderman Tender Direct, Milan, says that Barilla, a Parma-based food company which has the corner on Italy's pasta market, "has discovered direct mail as a means of increasing

Terry C. Gillette On Catalog Marketing

by Terry C. Gillette, President and Founder of The Company Store

I wasn't asked to write this endorsement — I volunteered the idea. It's my way of saying thank you to a closely-knit group of bright young people doing business under the name of Ovation Marketing.

Ovation is an advertising and marketing agency that specializes in catalogs that produce optimum sales. Ovation works with me, within my budget and schedule requirements, to produce a catalog that conveys my image and message.

The direct marketing professionals at Ovation have an exceptional understanding of direct mail basics. They know the strengths of my company, its products, its people. They take the time to find out exactly who my customers are, and why they buy from The Company Store. Then they create a catalog that's successful not because it wins awards for art directors, but because it sells my products . . . lots of products.

The creative team at Ovation also develops space advertising that sells products right off the page and generates high-quality catalog requests that result in even more sales. With Ovation's help, we've built a house mailing list that ensures continued prosperity for The Company Store.

So there you have it. A description of how Ovation Marketing contributed to the success of The Company Store — and how they won my loyalty. Give Ovation a call at **1-800-722-1002** (ask for Ralph Heath, President) . . . and let them win yours.

Terry Gillette

OVATION MARKETING: The Agency That Gets Results

1. Ovation understands the need for a close client/agency relationship . . . **for speed in decision making.**
2. Ovation understands the need for continuously-updated, detailed knowledge of the client's product line . . . **to produce sales-oriented copy and graphics.**
3. Ovation understands the client's time and money constraints . . . **to develop budgets commensurate with income.**
4. Ovation understands direct mail strategies . . . **to get the right message to the right audience, at the right time.**
5. Ovation understands space advertising goals . . . **and knows how to track results and develop successful patterns into additional sales.**

client fidelity."

Mr. De Mars sees direct mail working well in Italy "for business-to-business. Most of our clients are in the industrial products or services sectors and they need to reach other businesses," he says.

He points to International Business Machines' Italian subsidiary, IBM Italia, Rome, using direct mail to sell accessories and software, and to Barilla, which sends a newsletter to some 2 million retail buyers offering their stores free trials of new products.

Although a very new medium on the Italian direct marketing scene, telemarketing is beginning to attract more companies, particularly for business-to-business efforts.

"In Italy, with so much of the population spread out among small towns and hard-to-reach villages, telemarketing becomes a very convenient means of reaching shopkeepers without using salesmen," explains Mr. De Mars.

Though long on the Italian scene, door-to-door marketing is also treading new paths. Mutual funds salesmen are showing up on the doorsteps of homes and offices.

"Mutual funds, a relatively new investment instrument in Italy, are often dismissed out of ignorance," comments a spokesman from Primegest, an Italian mutual fund.

"If we can get the time—perhaps over a cup of coffee—to explain what they are and how they work, we might win a client who we'd never have won through a lifetime of ads," he adds.

In a country where acquaintances are not made casually, door-to-door networks depend on established relationships such as family, friends and neighbors. The close relationships, aside from [illegible]ing persuasion power, helps some products gain consideration by consumers.

An executive from Tupperware Italia, Milan, says the "friends of friends" system is a success in Italy, where "pressuring" a mere stranger is frowned upon. Tupperware Italia has 3.5 million customers and reports 1986 sales revenues of $50.3 million, a 10% sales increase from 1985.

In general, industry observers say that last year's boom is nothing compared with what lies ahead. Mr. De Mars is convinced that toll-free numbers (*numeri verdi*)—available by the spring of 1987, according to the Italian Telephone company SIP—will cause rapid growth in direct marketing techniques and applications in Italy.

Despite recent inroads, however, Italy lags far behind the U.S. and some European countries in direct marketing. With still only 1% of Italian retail sales coming from direct marketing, not everyone is sure that it will ever account for a substantial part of the market or reach the heights of the U.S. business.

As Y&R's Mr. Castellano says, direct marketing in Italy "is a child, and we don't know if the child is going to grow up."

—Michelle McCarter

South Africa

Direct marketing in South Africa can aptly be termed the Cinderella of marketing. The industry still doesn't get the recognition it deserves, but by all accounts, is expected to blossom fully when recognition finally comes.

Many companies aren't yet tuned into direct methods of selling, and consumers aren't comfortable with them either. Nevertheless, direct marketers and agencies are projecting that growth will easily outpace that of general advertising within the next five years.

According to Barry Cowden, chairman of the 147-member Direct Marketing Assn., Johannesburg, the current, generally accepted figure for direct marketing expenditures in South Africa is around $75 million to $80 million, compared with $360 million to $383 milllion for conventional advertising. But if Mr. Cowden is correct, direct marketing eventually could account for about 40% of the nation's total

(Continued on Page S-20)

marketing expenditures.

"There is increasing awareness of direct marketing's viability," he says. "The market is growing, but only by around 15% to 20% per year. The potential is for much more than that."

So far, direct marketing's growth has been hampered by a lack of agency and consumer sophistication.

"Direct marketing is only really coming of age in South Africa," says Jock Falkson, chairman of leading direct mail agency Effective Letters, Johannesburg. "Agencies are suddenly finding they need direct response units, and they claim to have established them. But they are often unprofessional. Unless the client insists, the spending goes into traditional space buying—the area where agencies have expertise."

Brian Hopkins, managing director of FCB Response, Johannesburg, the country's largest and oldest full-line direct marketing agency, agrees. "Many agencies are only paying lip service to direct marketing. They wheel out the direct guys when the client visits, and then they wheel them back. Part of the trouble is that general advertising agencies find it difficult to move into the direct field. There is a big difference between the two areas."

Besides being "short on heavyweights," says Mr. Falkson, direct marketing is also stymied by certain technical problems. While there are no legal restrictions against the discipline, the postal service is unable to keep pace with marketers' needs. Not all areas in South Africa are served by door-to-door letter delivery, and nowhere in the country are parcels delivered to the door. Instead, they must be picked up at the post. In addition, says Mr. Falkson, South African general mail services are "not particularly cheap" for response mailers.

"We only have one class of mail here and that's first class," he says. There's no third-class service at reduced postage and, while discounts of 12.5% and 25% are offered, the latter requires the mailer to presort into postal codes. "If you make one mistake, you don't get the reduction. That makes spending the money on presorting a very high risk."

Kodak's S. African mailing for its 940 Instant Cameras moved 400 cameras in two months.

Telemarketers, too, are hampered by service inadequacy. Postal and telephone services are run by the South African Post Office, which does not offer toll-free dialing. "Telemarketing is in its infancy, and is growing very slowly because we suffer a lack of toll-free numbers," Mr. Cowden says. "When toll-free services are available, there will be a big expansion in direct response advertising on radio and tv. But the post's progress is painfully slow."

Catalog companies also are critical of the South African Post. Marco Von Embden, managing director, African Wholesalers, Cape Town, the country's largest and oldest catalog company, bemoans the lack of door-to-door mail delivery, which makes mail-order buying less convenient for customers.

Consumers, too, are to blame for direct marketing's slow start. South Africans, particularly whites, tend not to buy from catalogs, although a few, such as Barclays Bank's *Barclaycard Magazine*, are successful.

Mr. Von Embden explains: "Certain sectors of the South African population [whites] have been spoiled because transportation is so easy, so the convenience of catalogs is undermined." The vast majority of African Wholesalers' sales are to blacks and Asians, who traditionally buy more from catalogs because they have farther to commute to retail areas.

Blacks, in fact, will be largely responsible for direct marketings' future growth. They are becoming an increasingly important part of South Africa's buying public. At present, spending by blacks accounts for around 40% of total consumer spending; this is projected to run well over 50% by the early 1990s.

There are major difficulties in targeting them, however. Estimates suggest 40% of South Africa's multi-ethnic population is illiterate. Many blacks are "nameless and addressless" simply because apartheid has confined them to rural areas.

As yet, there's a lack of quality lists, says Mr. Falkson, but the situation is improving. "In the past three years we have acquired 75 customer lists," he explains. "In the previous 23 years, we had obtained only a few."

With recession and black-consumer boycotts against white-owned businesses hammering away at corporate profits, most feel that mailing lists will improve even faster. "If customers find it difficult or expensive to get to conventional stores, then the merchandise has to be brought into their homes by catalog," says one leading retailer. This will encourage fast development and availability of lists.

Despite these roadblocks, some users of direct marketing are highly successful. *Reader's Digest* is one, as is the Edgars Ltd. retail group, a Johannesburg-based national chain of upscale clothing and accessory stores. According to one industry observer, Edgars "knows that each mailing will mean up to $900,000 in additional sales."

Marketing director Carol Grolman will not divulge Edgars' response rate, nor the sales conversion rate. "Let's just say it's very significant, otherwise we wouldn't continue doing it," she says.

Ms. Grolman says that in an average year, Edgars dispatches "240 mailings, which is about 150 million pieces—in English and Afrikaans. Most of our mailings are to existing customers [charge card holders], though we do sometimes mail to outside lists." However, with a customer mailing list rumored to include about 80% of all white households in South Africa, Edgars' use of outside lists would be minimal.

The growth areas in South Africa's direct marketing are financial services and business-to-

business marketing. Financial service, says Mr. Hopkins, "is by far the biggest growth area" with increasing sophistication in computer manipulation of mailing lists. Banks and financial institutions are beginning to use their existing databases more efficiently to cross-sell, and are making their lists available to other users.

In the business-to-business sector, selling costs are increasing at a faster rate than prices.

"We are seeing far more use of direct marketing in this area purely because of the narrowing [profit] margins available to marketers," Mr. Hopkins says.

—Des Kilalea

Belgium

After years of predicting a takeoff for direct marketing in Belgium, industry executives agree that 1986 was the year it finally happened.

"This is the year that the big advertisers started walking into [direct marketing] agencies asking, 'What can you do for me?'" says Irene Allanson, managing director, Ogilvy & Mather Direct, Brussels. "I've been in it since 1979, and I really feel a boom after what you might call six years in the desert," she says.

A mail shot inviting prospects to a dinner brought a Belgian home for the disabled $14,500.

Among companies in Belgium now listening to direct marketing pitches, after years of saying they weren't interested, are Master Foods, Procter & Gamble and Unilever, sources say. Traditional users like banks, magazines, computer, publishing and credit card companies also are increasing their direct marketing budgets.

If this isn't evidence enough of direct marketing's growth in Belgium, there is also a boom in the creation of direct marketing subsidiaries by major agencies. Just about every big agency that didn't have a Belgian subsidiary in January, 1986, has one now. McCann-Erickson, one of the last holdouts, is currently planning its direct marketing shop.

Attendance at The Montreux Symposium and Exhibition, the yearly European direct marketing conference in Montreux, Switzerland, also indicates Belgian interest in direct marketing is on the rise. Last year there were 30 participants from Belgium; this year 80 attended. Seminars on anything related to direct response advertising generally are overbooked shortly after they're announced. In November more than 80 people paid $650 each for a one-day conference organized by the year-old Flemish Direct Marketing Union.

If growth is the keynote of direct marketing in Belgium, the magic word here—as elsewhere—is database. The computerized refinement of mailing and telephone lists to provide more finely targeted audiences is the discipline's fastest growing area.

While the industry is short on statistics, the Groupement de la Vente par Correspondance, Brussels, the country's direct mail association, estimates that direct response accounted for 0.8%, or $48 million, of the country's $6 billion 1985 retail sales. This year, according to Guy Olivier, GVC secretary general, the figure might reach 1%.

Erik Van Vooren, president, Flemish Direct Marketing Union, Kalmthout, says that industry estimates put the direct marketing sector of Belgium's total marketing expenditures at 17% to 20%, but he thinks this is an understatement. He says he thinks a better comparison is neighboring Holland, where direct marketing has gone from 30% of marketing expenditures in 1985 to about 39% in 1986.

Direct marketing, with its database-assisted approach, would appear to be a natural for Belgium, whose small but affluent population is divided nearly in half by the Flemish-French language barrier.

Direct mail and coupon advertising (there is no commercial tv in Belgium) are still probably the major sectors of direct marketing. But telemarketing, despite a lack of toll-free dialing, is coming up fast. Guido Thys, head of Direct Contact Telemarketing, Antwerp, says his young company has been swamped with inquiries for training and surveys on the medium's effectiveness.

(Continued from Page S-21)

Herman Van Hove, managing director of Antwerp-based Biblo, a newsletter publisher, has noticed that coupon ads are being priced out of the market. With publications that are highly specialized by language and subject, most of a potential audience is reached after two or three insertions, leading to high costs-per-thousand.

There are no laws in Belgium governing telemarketing or direct mail. The government recently withdrew a proposal for an extremely strict control of databases that would have required those on mailing lists be informed as to how their names would be used. But some sort of right-of-privacy regulation appears imminent. The direct marketing industry hopes to head off rigorous controls by lobbying and self-regulation.

Meanwhile, optimism prevails. "Things are looking better and better," says Mr. Van Vooren, who is also director of BBDO/Direct, Brussels. "It's the nature of direct marketing that the more often something like a mailing list is used, the better it becomes."

—Paul Montgomery

Japan

Retail sales in Japan may be nearly static, but direct marketing is on the rise.

The Japan Direct Marketing Assn. says the industry is growing about 10% a year; it projects similar growth to 1990. Japanese consumers are particularly receptive to direct mail. A 1984 Fair Trade Commission survey found that 58% of all women interviewed had purchased products via direct mail during the previous 10 months.

Japan's fiscal 1985 (ending March 31, 1986) direct marketing sales of $4.75 billion made up only 1% of the country's total retail volume, compared with 17% in the U.S. JADMA projects that figure will rise to 3% by 2000.

Some industry professionals, however, expect a slightly higher increase. "We foresee direct marketing growing to about 3.5% of retail by 1999," says Thomas Ainlay Jr., manager, McCann Direct, an independent direct marketing department of McCann-Erickson Hakuhodo, Tokyo. "There will be a couple of boom years after the Ministry of Posts and Telecommunications lowers postal rates for commercial mailings," which some observers expect will happen within the next three years.

Postal rates are the major issue with Japan's direct marketers. Because Japan still has no bulk mailing system, direct mail goes first class. Third class, designed for magazines, can be used for catalogs provided they have 50% magazine-style editorial copy and publish monthly, forcing catalogers that don't fall within this category to use private delivery companies.

"A piece must work three to five times better here than in the U.S., simply due to postal costs," says Michael Golding, president, Franklin Mint Ltd, Tokyo, a wholly-owned subsidiary of The Franklin Mint, Franklin Center, Pa.

A Tokai-district food-of-the-month club publishes its offerings in a mail order catalog.

The underutilized Japanese Post is expected to lose $270

Japan's top 10 direct marketers

Company	1985 sales (in millions)	Operations
1. Fuji Sankei Living Service	$355	Catalogs, tv shopping, sales fairs
2. Senshukai Co.	271	Catalogs (apparel, hobby/home goods)

Troy, New York 12182

million for fiscal 1986, according to the MPT's Postal Business Bureau. Only 137 pieces of mail per capita were sent in Japan in 1985, compared with 560 per capita in the U.S. Boosting postal revenues through increased utilization is a logical alternative to hiking rates, and Mr. Golding, who is also a director of JADMA, is the key mover in this arena.

"We're trying to get the MPT to understand bulk mail rates," he says, "and to persuade them that by introducing a new mail tier for [marketing] materials, they will open a new revenue source."

Franklin Mint Ltd., which sells consumer goods such as jewelry, porcelain and books, opened its Japanese doors in 1972 and was one of the country's direct marketing pioneers. The Japanese subsidiary's annual sales are approximately $35 million, and its direct mail and other media expenditures come to some $11 million a year, according to Mr. Golding, who is also corporate vice president responsible for all of Franklin Mint's Pacific locations.

Joint direct marketing ventures between U.S. and Japanese agencies started in 1985, when Dentsu Wunderman Direct and Dai Ichi Kikaku/Rapp & Collins opened shop in Tokyo. More recently, the in-house units of McCann-Erickson Hakuhodo and J. Walter Thompson Japan have started direct marketing operations, and Tokyo-based Grey-Daiko Advertising is studying a similar move. Total billings of these four shops are small, roughly less than $12.5 million. DIK/R&C estimates total direct marketing expenditures at 35% of sales. The agencies' major competitors are the in-house operations of major clients.

"The industry is in its infancy," says Richard Capponi, vp, DWD. "When we arrived, it was like the U.S. in the '50s. Now, it's the early '60s."

Also handicapping direct marketing are restrictions on sweepstake premiums stating that the value of the premium must be no more than 10% of the item's retail cost, with a ceiling of $312.

Lists in Japan also are a problem. Says Isao Nakazawa, exec vp, DIK/R&C, "About 100 million names are on lists, but very few are available for rental or swapping, and many are manual."

Many companies consider lists proprietary and strictly for their own use; those interested in similar lists would often be direct competitors. Also, the language makes computerizing lists difficult. People usually write their names using Chinese ideograms, or *kanji*. Lists, on the other hand, are generally recorded using one of two native Japanese phonetic syllabaries, or *kana*. Because Japanese is rich in homonyms, converting *kanji* to *kana* is highly error-prone, and the technology for doing so is new. McCann Direct's Mr. Ainlay estimates that only 40% to 50% of lists are computerized.

"It's dismal," says Mr. Capponi. "We've uncovered maybe 200 lists we'd be comfortable recommending to clients. In America there are 50,000."

To combat the list shortage, many direct marketers develop their own through advertising. "At DWD," says Mr. Capponi, "we rely more heavily on print media than we would in the U.S. We do a lot of two-steps where we place a print ad requesting people to ask for information. Then we mail."

Japan does have toll-free dialing, but no discount is given to direct marketers on inbound calls. "We've had clients find that even the increased response from a toll-free number isn't enough to pay for the service, so they've stopped using it," says Mr. Capponi.

Inbound telemarketing without toll-free dialing is widely used. Outbound, however, is considered highly offensive once it steps outside the realm of customer service.

Most agree that Japan's most powerful marketing medium is the newspaper. "Very expensive and worth it," says Mr. Capponi. But when a good list is available, says Mr. Nakazawa, "direct mail is the most cost effective, followed by magazines, tv and newspapers."

Unfortunately, direct marketing's reputation is sometimes stymied when problems crop up with direct selling, as was the case with fraudulent sales of land and gold. Direct selling in Japan is an enormous business and is largely unregulated. Med-

(Continued from Page S-23)

icines, newspapers, bamboo poles, securities, banking services and automobiles are all sold door to door. In 1984, direct selling accounted for an estimated 80% of all domestic Toyota sales, according to sources. And the sales force of Dai Ichi Kangyo, Japan's largest bank, typically call on 100 Tokyo homes a day soliciting deposits.

For the future, privacy is a growing issue that will affect list use. A mail preference system that gives consumers the option to have their names deleted from lists when they are made available to third parties is being discussed, and some in the industry, like Franklin Mint's Mr. Golding, advocate more regulation—provided it be done by the industry itself.)

—David Kilburn

France

By some accounts, directing marketing in France may have been slow to develop, but some of its greatest proponents maintain that the market is making up for lost time.

Direct marketing currently represents about 25% of France's $7.5 billion marketing expenditures, and is said to be growing at the rate of 25% per year, according to Denis Bonnet, director of France's largest direct marketing agency, Ogilvy Defrenois Direct, Paris.

Direct marketers are quick to catch on to changes in laws regulating the industry, and such changes are coming along faster than before. Cortal, for example, a three-year-old financial service institution that relies entirely on direct marketing to sell its services, recently ran a two-minute tv spot using a toll-free number, which was permitted on tv for the first time in France with the advent of private, commercial tv in February, 1986. Account manager Jean Michel Braun says the response rate was confidential, but "satisfactory."

His is one of many companies now using using the toll-free "green number," the French equivalent of the 800 number, which was instituted at the beginning of 1984. Currently, there are 6,000 subscribers to the green number, up about 30% from last year, according to a spokesman for Opus-Hintzy, the Paris-based institutional advertising agency that launched the number. While high subscription costs continue to keep toll-free numbers primarily in the business-to-business sector, most observers predict the green numbers will move into the realm of consumer marketing, now that they have been allowed a broader reach via tv.

A leading indicator of the French market's sophistication is the unparalled success of the Minitel videotext, which was a failure in many other countries, notably the U.S. and the U.K. Minitel currently has two million units in operation and will add an estimated 1.5 million to 2 million more per year. In five years, that means 10 million units for France's 21 million households, according to Mr. Bonnet.

Thierry Dequeroy, who markets Minitel throughout the country for the government-owned telecommunications system PTT, says the system gives consumers access to 2,500 list-

dma

8 Ways The Direct Marketing Association Can Help You And Your Business Prosper

1. Information...DMA's staff of information specialists on direct marketing is waiting to answer your business questions and help solve problems.

2. Networking and Contacts... The industry's major Conferences and trade shows allow you to exchange ideas with your peers and make new business contacts.

3. Education...Seminars, both basic and advanced, help you and your staff increase your knowledge and skills.

4. Industry News...Exclusive Member Publications keep you posted on the latest trends and important events.

5. Promotion...The DMA's on-going efforts increase customers' awareness of the advantage of buying direct.

6. Government Representation... The DMA's constant lobbying effort on the federal, state and local levels minimize government regulation.

7. Industry Self Regulation...DMA helps resolve consumer complaints and encourages a healthy direct marketing environment.

8. Exclusive Member Benefits... Members receive substantially reduced rates for all DMA events as well as discounts on car rentals, airline tickets and select hotels. Membership dues and conference and seminar fees are all tax deductible.

Venture Communications International, Inc., 114 East 32 Street, New York, NY 10016

Call Richard Baumer at 212/684/4800

ings by tapping in a four-digit number. Those listings vary from telephone directory assistance, transit information and electronic banking to more imaginative uses. On Paris' Left Bank, for example, a four-digit number calls up the daily menu of a local take-out restaurant, allowing consumers to place an order and have it delivered. Minitel purchases can be charged on Carte Bleue, the French Visa card that can even be used to buy subway tickets.

Mail order houses, specialized retailers, wholesalers and hypermarketers—French high-volume discounters—use Minitel to take orders for merchandise 24 hours a day. According to Mr. Bonnet, La Redoute, one of France's most successful catalog merchants, takes 100,000 orders daily, 45% of them by mail, 52% by phone and 3% by Minitel. Despite its convenience, experts predict that merchandise sales by videotext will never exceed 10% of a retailer's total sales.

Mail order sales account for only 2.5% of all retail sales, a figure equal in market share to department store sales in France, which is traditionally a nation of specialty shops, says Jean-Marc Gely, marketing director, Au Printemps, the major Paris-based department store chain. Neither department stores Au Printemps nor Galleries Lafayette does mail, phone or catalog sales, although both use their credit card lists for purposes other than selling direct.

Mr. Gely says that may change. He notes that department store retail sales dropped in the fall of 1986, following a string of fatal terrorist bombings in Paris, some of them in retail stores, while mail order sales were up by some 25%.

"It's a new phenomenon, but there's certainly a link between our bottom line figures and the success of mail order," Mr. Gely says. "Mail order houses are also trading up and getting more competitive with us."

Catalogs La Redoute and Trois Suisses recently underwent massive tradeups and began selling more expensive merchandise, illustrating the trend towards higher caliber products targeted to a more affluent audience.

According to Bernard Siouffi, Paris-based director of the French direct marketing and mail order associations, books and other published materials make up 24% of all mail order, but the remainder is shifting up, with an emphasis on catalogs skewed to affluent males.

"Major mail order houses and small vendors are looking for high income males, and there seems to be a growing market for things like executive gifts," he says.

In addition to allowing toll-free numbers on tv, other regulatory changes in France allow direct marketers to refer to previous purchases when approaching a customer by direct mail and use third class rates when previously only first class was permitted. Mr. Siouffi says his association is working with the PTT on commercializing and personalizing the telephone list, which direct marketers have had access to only since February, 1985.

"Lists have been one of the biggest blocks to direct marketing in France to date," says Mr. Siouffi. "The big brokers are not well-organized, and in order to develop databases, we need better suppliers, more trained personnel and more up-to-date general files." He adds that direct marketers have no access to French census information, auto registration rolls, electric and gas utility customers' names or the social security rolls.

Ogilvy Defrenois' Mr. Bonnet explains that France's first direct marketing agency was founded in 1970, so the discipline is by no means new. He says it has seen better than average growth and only one major obstacle blocks its future: The fact that many traditional marketers don't understand it.

Mr. Bonnett adds that direct marketing's success stories could be the industry's best advertising, but they aren't often talked about. Both clients and agencies are discreet about their results.

—Claire Wilson

Switzerland

Direct marketing in Switzerland accounted for approximately one-third of the country's total marketing expenditures in 1985, according to a survey by the Swiss Post Office.

The survey also revealed that direct marketing sales have grown 25% from 1979 to 1985, and that 55% of all book sales and 45% of all package tours were achieved via direct marketing in 1985.

But this, say industry professionals, is only the tip of the iceberg. "Given the difficulties of working in three languages—German, French and Italian—and the limitations placed on how much time is available for tv commercials, I would say that direct marketing is the key to marketing success in this country," says Brian Wright, managing director, CCC/Grey, Geneva, an arm of Grey Advertising. A maximum of 24 minutes of daily commercial time is permitted on any one Swiss tv channel.

To reach a mass audience in Switzerland, marketers must create campaigns in three languages, adding significantly to

(Continued from Page S-25)

production costs. Direct marketing, particularly direct mail, is often an attractive option because of its relative cost efficiency, says Mr. Wright. He adds that Grey Advertising recently opened a direct marketing subsidiary, Grey Direct, in Geneva to handle the agency's growing business.

The industry, however, particularly the direct mail sector, isn't without its problems. The direct mail response rate has declined considerably, falling to 1% last year from 7% to 10% a decade ago, says Peter Linsin, managing director, Data Direct Marketing, Zurich, a subsidiary of the international GGK group. He attributes the decline to the sheer volume of direct mail in Switzerland's mailboxes, most of it unsolicited and untargeted.

"Switzerland is a small country and we've got to adapt our direct marketing techniques to that fact," he says. "In the States, or in a big European country like France or Germany, you can send out mass mailings of several million pieces and still get an acceptable return. But given Switzerland's size and linguistic divisions, it's not enough to send out scattershot mailings and hope somebody tunes in."

Recent research conducted by the Swiss Post Office reveals that every household receives roughly 3.3 personally addressed and 8.2 "occupant" addressed or hand-delivered pieces of mail each week, a high volume by European standards.

Some in the industry question whether that level of saturation might be counterproductive. To fend off criticism, the Swiss Direct Marketing Assn. has established a "Robinson List," currently consisting of some 10,000 names of individuals who have requested they be taken off lists for personally-addressed, unsolicited direct mail.

The list is circulated to SDMA members, who are obliged to remove the names from their lists. However, as Ursula Spliess, coordinator of The Montreux Symposium and Exhibition (Europe's annual direct marketing conference) points out, the Robinson list cannot control "occupant" addressed, unsolicited mailings, the mailings of companies based in other countries, or those that aren't SDMA members. "It's a beginning, but that's all," she says.

Consumers also may obtain labels from the Post that read: "Mailman: Please do not put any unsolicited publicity in this mailbox." Government mail carriers oblige, but at least 50% of Switzerland's unsolicited direct mail is delivered by private carriers who don't honor the request.

Unit costs for standard direct mailings average 80 cents, according to Mr. Linsin, despite preferential rates from the Post, which derives considerable revenue from the industry. The Swiss Post Office offers reduced rates for mail weighing less than 50 grams.

There are no legal restrictions against direct marketing in Switzerland. The SDMA stresses a code of conduct for its 10,000 members, but it is nonbinding.

Even telephone marketing is unregulated, although regulation is expected in due time, according to Michael Sutherland, president, Geneva-based Mardev, a leading list broker. Under the current system, for example, nothing prevents direct marketers from calling prospective clients at midnight.

In practice, this doesn't happen. But Mr. Sutherland says if telemarketing progresses beyond its current stage—it's largely confined to subscription solicitations—the public will call for some form of official control. Consumer protection groups, particularly in the French-speaking, western part of the country, already have begun agitating against "cold calls."

Still, direct marketing is popular with many businesses. Fortuna, a Zurich-based insurance company, promotes itself solely through direct response print and tv ads. Its switchboard stays open until 9 p.m., a relatively late hour, to field calls generated by prime time tv commercials.

Certain banks find it useful as well. Bank Aufina, a subsidiary of the powerful Union Bank of Switzerland, is using direct marketing extensively to attract new customers. Banque Rohner, however, a mid-sized bank headquartered in St. Gallen, used to blanket Switzerland with mail shots offering its loan facilities at least twice a year, but has since stopped, according to industry sources, after deciding the return was insufficient.

Radio advertising in Switzerland is still unsophisticated. The state-run network doesn't permit advertising, and commercial stations were licensed only three years ago. There are now some 30 of these, all but one of which carry commercials. The day of the direct response radio commercial is coming, however, according to Roger Schawinski, owner of Zurich station "Radio 24" and a pioneer in the commercial radio field.

"The statistics show that direct mail takes 85% of all direct marketing budgets," he says. "Tv picks up about 7%—a very small sum because of the limits on the amount of commercial time available." He adds that other media, like local radio, are hoping to soon capture some of the [remaining 8%.] "This will happen as people become accustomed to buying through radio commercials."

(X) Represents the number of times published each year; publications are monthly unless otherwise specified. A. Sectional linage included but prorated to circulation of regional editions.

All figures represented in this chart are supplied by the magazines. Advertising Age makes no attempt to verify them and, therefore, is not responsible for inconsistencies or errors.

worries that the campaign would be compromised were eased when Ms. Colliver moved to Chevrolet from GM's AC Delco division, where she had steered development of the brand strategy campaign using spokesman Chuck Yeager.

"It required somebody like Danielle who could come in from outside and say, 'Yes, that's Chevrolet,' " Mr. Fitzpatrick said.

"I came in with a deep belief that Chevrolet needed a focused campaign, a singular identity," Ms. Colliver said.

C-E went through about 100 different songs before settling on the one being used. Lyrics were developed by a group of C-E creatives that included Mr. Fitzpatrick, Mr. Plansker, Mr. Burton, Kathy Speck, Denise Sidlow, Bill Ludwig, Patrick O'Leary and Larry Rau.

The music was developed and produced by Crushing Enterprises, New York. Crushing's president, Joey Levine, headed Crushing's efforts, with Thai Jason working as production manager. The music was written by Robin Batteau, who also sings the male lead in most of the spots and who did the arrangements with Jeff Southworth and Kenny White.

Billy Alessi synthesized the heartbeat sounds, and Rachelle Capelli sang the female solo on the generic "Heartbeat" tv and radio spots.

C-E's Ms. Sidlow worked directly with Crushing in producing the variations of the original spot being used in follow-up commercials.

Mr. Fitzpatrick landed directors who usually rejected car commercials "because it always ends up that the client wants a seven-eighths front view. They brought strong personalities to the work, and sometimes we had horrifying fights."

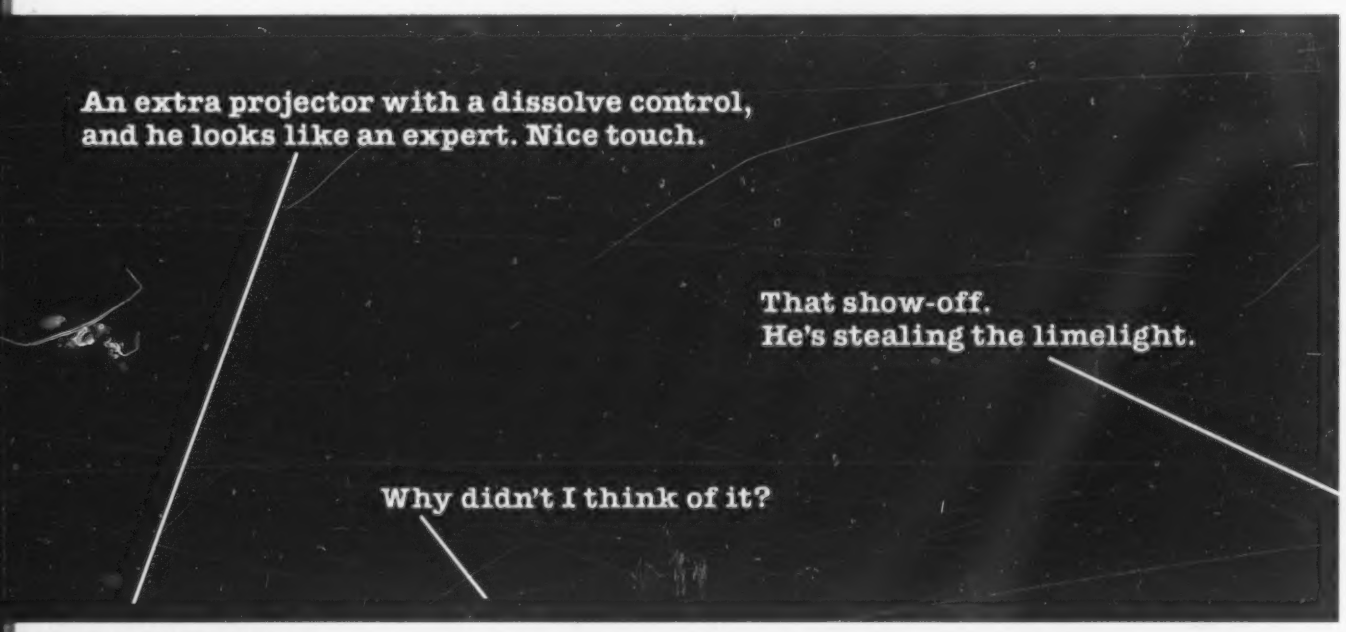
Directors were Bruce Dowad (three theme spots), Peter Smillie (Celebrity, Camaro, Cavalier and Corvette spots) and Peter Heath with N. Lee Lacy (Nova, Spectrum and Sprint spots).

The campaign notably includes women in an unpatronizing way. Chevy's stated marketing goal is to attract more first-time buyers and more women, who already make up 45% of the principal buyers of Chevrolet products.

Kudos are coming from all directions. Consumers want to know where they can buy the music, and a record release may be part of the merchandising plans under development.

The creative director at a competing car agency called to say he was embarrassed because his own kids were singing the "Heartbeat" theme.

"The campaign has captured the imagination of a great number of people," Mr. Fitzpatrick said, "and that's the first objective."#



An extra projector with a dissolve control,
and he looks like an expert. Nice touch.
That show-off.
He's stealing the limelight.
Why didn't I think of it?

Highlights

Lifting Continental's image 1
Texas Air Corp. this week begins a drastic repositioning of its airlines' marketing as chairman Frank Lorenzo moves to fill a creative void in the industry's stagnant, price-oriented advertising. The Houston-based company breaks the opening element in Mr. Lorenzo's new strategy today with the first corporate image tv spots for Continental Airlines.

Bates bites the bullet 1
Procter & Gamble's strict conflict policy is forcing Ted Bates Worldwide to drop most of its American Cyanamid Co. accounts, sources say. The lost business is estimated at $25 million.

ABA's burning issue 3
The advertising industry is battling to defeat a proposed resolution that would put the American Bar Assn. on record favoring congressional action to ban tobacco advertising and promotion.

Tyson's marketing punch 4
Mike Tyson, the youngest heavyweight champion, is the first boxer to hire a marketing agency. The 20-year-old champ of the World Boxing Council has retained Ohlmeyer Communications Co., a major player in sports tv and sports event marketing.

Bleak barter picture 6
The barter tv industry, a year ago the fastest-growing segment in media, now is caught between an over-all decline in network tv ad spending and weak ratings for what had been some of its reliable shows and genres.

Vital move for Sassoon 60

Vidal Sassoon Inc. next month starts an estimated $10 million national tv and women's fashion magazine campaign restaging its 10-year-old salon formula haircare line. Several new salon-linked haircare introductions are expected this year. Vidal Sassoon again will serve as spokesman for the revamped shampoo and conditioner, and copy for the campaign positions the brand as a haircare breakthrough from the person who understands today's styling needs.

Catalina nurtures Cub 72
Catalina Marketing has begun installing its in-store coupon distribution system throughout the Cub Foods supermarket chain in Chicago. Catalina, which earlier moved into Chicago-area stores of Dominick's Finer Foods, now has about 230 stores wired and predicts units in 700 stores will be operating by yearend.

Perfume Taylor made for Saatchi 85
Liz Taylor has entered into a licensing deal with Parfums International, the upscale fragrance group at Chesebrough-Pond's Prince Matchabelli division. William Esty Co., the Saatchi & Saatchi agency that handles Matchabelli, will handle.

INTERNATIONAL

Air France competition 50
Hoping to compete better when European Community skies are deregulated sometime in the future, Air France puts its $3.5 million international corporate image account up for review. Five agencies are in the running.

Black eyes U.S. media 59
Financier Conrad Black joins the list of Canadian corporate raiders who have set their sights on U.S. media properties. Through Hollinger Inc., which he controls, Mr. Black last month bought 21 small-town newspapers in Illinois, Indiana, New York, Ohio and Pennsylvania for about $76 million.

OTHER NEWS

When the marketplace cries for new products, Quaker Oats Co. churns them out. When the corporate raiders are on the warpath, Quaker protects itself by acquiring companies with familiar old brands in solid market leadership positions. Quaker's forte has been adapting to changing conditions, and that's largely because of its chairman, William Smithburg. Page 3.

The departure of legendary editor William Shawn could help *The New Yorker* in grappling with its business-side problems. The appointment of Robert Gottlieb as his successor last week was welcomed by many in the advertising, marketing and media communities who are convinced *The New Yorker*, as it nears its 62nd anniversary, is badly in need of change. Page 3.

As the Magazine Publishers Assn. honored Gilbert Maurer as "publisher of the year," the Hearst Magazines president paid tribute to the readers and editors who made it all possible. Page 85.

A new, high-flying Diet Pepsi spot will make history in March when it lands on Paramount Pictures Corp.'s home-video release of "Top Gun." The commercial, inspired by the hit movie starring Tom Cruise and Kelly McGillis, will be added to the start of each "Top Gun" cassette in a precedent-setting promotion between Paramount and Pepsi-Cola Co. Page 92.

SPECIAL REPORT

This week Special Report focuses on issues tv syndicators will face in the coming year as the 24th annual National Assn. of Television Producers convention prepares for its Jan. 21 opening in New Orleans.

McDonald's is running a series of eight two-page ads (successive rights) in 15 consumer magazines, three professional journals and newspaper Sunday supplements as part of its $10 million-to-$12 million campaign stressing the nutritional value of its food. A goal is to "neutralize" junk food misconceptions about McDonald's good food.

McDonald's heavy in print for nutrition

By SCOTT HUME

McDonald's Corp. strikes a humble pose in the most extensive print advertising effort in its 31-year history.

The estimated $10 million-to-$12 million, yearlong campaign (AA, Oct. 20), which began Jan. 18 in *Parade* and Sunday magazine inserts in the *Chicago Tribune*, *Los Angeles Times* and *San Francisco Examiner*, positions McDonald's as a company responsive to customers' concerns about nutrition.

While staking claim to a leadership role on nutrition as it and several competitors scurry to add packaged salads to their menus, McDonald's also is using the campaign to respond to and, it hopes, undercut, some of its critics.

According to materials sent by the company to its franchise operators, the campaign's strategy is to "get the facts out and to neutralize the junk-food miconceptions about McDonald's good food."

Atlanta agencies hail RJR Nabisco

By WILLIAM F. GLOEDE

When the nation's third-biggest advertiser comes to a town where the advertising business has been on the ropes, euphoria sweeps adland.

So it was last week when executives in the beleaguered Atlanta agency community learned of RJR Nabisco's plans to move its corporate headquarters from Winston-Salem, N.C., to a site on the city's northern border in September. The new corporate resident instantly will become the city's largest, eclipsing Atlanta's current No. 1, the Coca-Cola Co., in terms of sales.

Ever since the demise of McDonald & Little in 1985, Atlanta's agency community has been searching for reasons why Atlanta has not become a creative hot spot like Dallas or Minneapolis. While the short-term impact on the agency community here is not expected to be significant, agency executives are hoping their work

(Continued on Page 88)

West Coast News

Stater supermarkets part with W.B. Doner

COLTON, CAL.—Stater Bros., a 94-outlet supermarket chain, will end its five-year relationship with W.B. Doner, Los Angeles, on March 24, vp-advertising Jerry Bee confirmed. The split follows Doner's addition of the Compton-based Ralphs Grocery Co. Giant division, a $6 million account.

SAN DIEGO—**Franklin & Associates** acquired the Phillips Organisation, creating a $24 million shop. Franklin, house agency for Great American First Savings Bank, claims it becomes the city's second largest shop trailing Phillips-Ramsey, which has $52 million in billings. Phillips Organisation president Bob Phillips becomes exec vp-client services.

SAN FRANCISCO—**Gardner Communications** is gaining an additional $1 million in billings from longtime client Kransco International, which last month purchased the "Roller Racer sit skate" from Nashville Diversified Corp. First ads break in the spring.#

BEST OF PRESS

AT&T IS IN THE PALM OF YOUR HAND.
BOSS, CLARK, WE'VE GOT TO GET BACK TO THE OFFICE AND CALL LONDON BEFORE THE MARKET'S OVER!
WHILE LOIS HAILS A CAB I'LL USE THAT PHONE BOOTH.
AND UNLEASH MY SPECIAL POWERS!
THIS AT&T CARD?
IN A FEW SECONDS MY CALL WILL BE COMPLETED!
BOOM...
YOU ALWAYS DISAPPEAR IN AN EMERGENCY!
'TIS OK. EVERYTHINGS TAKEN CARE OF, LOIS!
AT&T
The right choice.

McCann-Erickson, New York, used a mainstay of the newspaper medium, the comics format, and a well known strip, "Superman," to illustrate the phone service offered by AT&T business long distance. It works especially well with the double-truck size and comics colors. Art director: Milt Marcus; copywriter: George Adels; illustration: Joe Orlando and Dick Giordano at DC Comics.

I wonder if Grant could tell what came of that new Virginia Gentleman Gin.
Introducing Virginia Gentleman Gin. If it had been around 120 years ago, its extra crisp taste might have changed the course of history.
VIRGINIA GENTLEMAN GIN

First he tells me to take Petersburg, then to burn Richmond. Next thing you know, he'll want a case of that new Virginia Gentleman Gin.
Introducing Virginia Gentleman Gin. If it had been around 120 years ago, its extra crisp taste might have changed the course of history.
VIRGINIA GENTLEMAN GIN

This campaign for A. Smith Bowman Distillery, Sunset Hills, Va., via the Martin Agency, Richmond, effectively uses old photos from the Matthew Brady Collection and other sources to catch readers' interest and draw them into the ads, which were intended to run on separate pages. Art director: Wayne Gibson; copywriter: Anne Moss Rogers.

Best of Press selections are made by a committee of three: Hank Simons, vp-creative director of the Newspaper Advertising Bureau; James Dunaway, vp-information at the bureau, and William F. Gloede, Advertising Age's newspaper industry reporter. National System Inc., St. Louis, provides tear sheets to the Newspaper Advertising Bureau for much of this work. Agencies, clients and newspapers are invited to submit ads for review. Submissions should be sent to Mr. Gloede in AA's New York bureau.

This rotogravure ad for the Portland Art Museum, via Borders, Perrin & Norrander, Portland, Ore., uses a simple copy line and an incomparable illustration to drive home the point that most folks never see art firsthand. Creative director: Bill Borders; art director: Terry Schneider; copywriter: Pamela Sullivan; photography: Gary Nolton; illustration: Auguste Renoir.

This Flash Report of newspaper advertiser investments, compiled for Advertising Age by Media Records, is derived from tabulations that cover 29 dailies and 23 Sunday editions in 15 cities: Atlanta, Baltimore, Boston, Cincinnati, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, New York, Philadelphia, San Francisco, Washington and Youngstown.#

Source: Media Records Inc.

Half up, half down in spending

New York—Advertiser spending in major metro newspapers during October in the 16 categories measured by Media Records Inc. for the Advertising Age Flash Report increased 13.8% from the same month last year, to $337.2 million.

Eight categories posted decreases, but they were more than offset by increases in the other eight categories.

There were strong gains in department stores, up 11.7% to $104.5 million; general-merchandise stores, up 20.9% to $48 million; food stores, up 22.3% to $37.7 million; amusements, up 34.2% to $33.3 million; new passenger cars, up 44.2% to $22.1 million, and publishing and media, up 35.9% to $18.5 million. Other gaining categories were radio-tv-phonograph-records dealers, up 22.8% to $22.3 million, and banks and trust companies, up 18% to $10.9 million.

Big losers were cigarets, down 56.5% to $3.5 million; computers, equipment and services, down 23.5% to $2.1 milllion, and cameras, photo supplies and services, down 69.1% to $187,103.

Other categories posting losses were airlines, down 6.7% to $17.8 million; public service utilities and commissions, down 10.9% to $6.6 million; computer stores and supplies, down 5.4% to $4.7 million; alcoholic beverages, down 5.5% to $2.7 million, and stock, bond and investment houses, down 4% to $2.4 million.

The Flash Report is based on SAU inch measurements in 29 daily and 23 Sunday newspapers in major markets.#

This ad for the Planned Parenthood Federation of America in New York, via the Public Media Center, San Francisco, used the shock value of a headline—the likes of which is not normally seen in newspapers—and a strong graphic to draw readers into this long-copy ad. Creative director: Jerry Mander; copywriters: Jerry Mander, Jonathan Polansky and Herbert Chao Gunther; art director: Jessie Bunn; photographer: Ed Kashi.

This ad for the *San Francisco Examiner* from Goodby, Berlin & Silverstein caused a fire storm of controversy in the media, though at least one San Francisco tv station found the humor in the ad. That was precisely what the agency was trying to do, says one of its principals, Rich Silverstein. Art director: Rich Silverstein; copywriter: Andy Berlin; photographer: Hank Benson.

Consumer Magazine Ad Linage

Highlights

Warner-Lambert true to advertising 1

Warner-Lambert Co. has put itself squarely in the ranks of marketers bucking the trend toward spending more marketing dollars on promotion and less on advertising. W-L president-ceo Melvin Goodes last week said the company will increase worldwide ad spending by 13% this year, to $730 million.

Tv shopping narrows 1

Tv home shopping, one of the nation's hottest new industries, is facing fallout and consolidation. The industry was jolted last week when its two biggest players, Clearwater, Fla.-based Home Shopping Network and Minneapolis-based Close-Out Merchandise Buyers, said they were discussing a possible merger.

Johnson gets Check-Up 4

Minnetonka Inc. and Henkel Corp. pulled out of the $1 billion toothpaste category last week by agreeing to sell their joint interests in Check-Up to S.C. Johnson & Son and Japan's Lion Corp.

Pizza Hut consolidates marketing 71

Pizza Hut today begins the second phase of its centralized marketing strategy by announcing the 4,500-unit chain's first national promotional event.

CORPORATE CLOSEUP

Rags to riches 12

Esprit de Corp. is shifting its attention to building a network of franchised and company-owned retail stores. Founded in 1979 as a ragtag collection of a half-dozen ventures, the worldwide company now has annual sales exceeding $800 million.

FEATURES

Judging a book's cover 51

For photographer Bob Osonitsch, romance means work. Since about 1960, he has shot young couples, cynical cops and tempestuous family clans as prototypes for the covers of supermarket paperbacks, including mysteries, science-fiction novels and Harlequin Romances. From the photographs, illustrators paint covers. Though models get only half pay for book work, they enjoy it because of the acting. When they pose for the covers, they caress, smile and writhe.

INTERNATIONAL

Guinness in turmoil 56

The commotion surrounding the British government's investigation of Guinness PLC's takeover practices is raising questions about the future of the brewer's ambitious worldwide marketing plans. Guinness had been trying to position itself as an international spirits and beer giant, but that was before the firing of Ernest Saunders, chairman and ceo.

Indian market research 57

In India, market research long was considered a Western business device irrelevant to a developing economy, but now executives are starting to change their minds. For the first time, thousands of Indian women are being asked to name their favorite brands. And hundreds of families soon will switch on a tv meter.

Two papers plan to drop 'Weekend'

By WILLIAM F. GLOEDE

USA Weekend is in danger of losing two key markets and a sizable chunk of its circulation.

The *Chicago Tribune*, which carries the weekend newspaper magazine on Fridays, and the *Houston Post*, which carries it on Sundays, have notified Gannett Co. they intend to cancel *USA Weekend* in September. If both stick by their decisions to exercise a cancelation option in their contracts, *USA Weekend* will lose two top 10 markets and about 1 million of its total 14.3 million circulation.

Rosslyn, Va.-based Gannett created *USA Weekend* from *Family Weekly*, which it bought from CBS Magazines in 1985. It has worked hard at getting *USA Weekend* accepted by newspaper publishers, many of whom were skeptical of the supplement because of its similarities to Gannett's *USA Today*.

Affidavit spurred Army-Ayer battle

By JANET MEYERS

WASHINGTON—The Army fired N W Ayer as its agency 48 hours after receiving an affidavit from the president of a commercial film production company describing an alleged bid-rigging system he said had been in place for three years, government court papers revealed last week.

The affidavit, filed last Nov. 21, was followed on Nov. 23 by the Army's decision to suspend Ayer, its agency for 19 years, from all government contracting. The Army, which had been investigating Ayer's handling of the Army assignment since 1983, said at the time of the agency's dismissal that they had acted on the basis of "new information."

Ayer, which is challenging the Army's action, last week lost a second bid for a court order that would block the Army from naming a new agency. The Army is expected to name a new agency for its $100 million account this week. Vying for the contract are BBDO, DFS Dorland Worldwide, SSC&B, Young & Rubicam, all of New York, and Ogilvy & Mather, Chicago.

The affidavit, according to court papers filed by the Army, charged that the bid rigging "began at the request of Ayer management in the public relations department."

Summarizing the affidavit, the court papers said the president of the commercial film production company alleged that Ayer executives "obtained higher bids from 'friendly' competitors which were submitted to Ayer along with its bid to satisfy the contract require-

Ashley leaves post at Riney & Partners

SAN FRANCISCO—Hal Riney & Partners general manager Don Ashley ended his 3½-year association with the agency a few months after a reorganization involving senior account management (AA, Aug. 25).

Agency officials at the time denied rumors Mr. Ashley would be leaving the agency, which spun off as an independent from Ogilvy & Mather more than a year ago. Riney management declined to comment on possible successors, but sources suggest director of client services John Yost is a likely candidate. Mr. Yost is a former general manager of Chiat/Day, San Francisco. Mr. Ashley said he is leaning toward a return to marketing research.

* * *

Diet Center, Rexburg, Ida., has drawn up a list of 10 agencies, including incumbent J. Walter Thompson/West, San Francisco, to compete for its estimated $6 million account. The weight-loss chain, with 2,200 outlets in the U.S. and Canada, will chose finalists in mid-February.

Corvus Systems, San Jose, Cal., marketer of personal computer network products, will select about five northern California agencies to pitch its $1.5 million account, now unassigned.

West Coast News

Centram Systems West, Berkeley, Cal., marketer of personal computer networking products, put its agency review on hold following an acquisition bid by 3Com Corp., Santa Clara. Four Bay Area agencies were competing for the $1.5 million account. Humpal, Leftwich & Sinn, Mountain View, previously handled projects for Centram. 3Com's agency is Winkler McManus, Santa Clara.

Pizza Hut spots hit the highway

Alabama deputy sheriffs detain comedian Rich Hall and the Mobile Institute of Pizza Studies in one of 30 commercials already shot for Pizza Hut's "On the road" campaign. The chain will spend at least $50 million and perhaps as much as $80 million on the campaign. Chiat/Day, Los Angeles, handles. *(See story on Page 71.)*

IRI says data can now link ads to sales

By GARY LEVIN

CHICAGO—Information Resources Inc. has developed a new method for linking tv ad exposures to product sales that marketing executives say could force drastic changes in media planning and buying.

The direct correlation of commercial viewing on specific programs to unit sales volume provides the first major alternative to buying tv shows based on broad demographic categories.

It also could hasten the demand for accountability of product advertising.

According to a sample study on a major household-cleaning product, for example, consumers exposed to 47 commercials were no more likely to buy a product than those who saw only one commercial.

The downside risk of this development for agencies and the media, IRI officials warn, is that major marketers may use the information to justify ad-spending cutbacks or increased promotional spending.

The new service, a customized extension of IRI's BehaviorScan test-marketing program, involves the linkage of tv program viewing data from 10,000 BehaviorScan households in 10 markets to product purchase patterns obtained through supermarket scanners.

The electronically wired households' meters measure tv viewing in five-second increments to determine whether a particular tv spot was viewed. The data then enable IRI to measure the optimum frequency of ad exposures that produce additional sales, factoring in variables such as promotion activity, brand loyalty and competitive information in a given

Ad groups' watchdog chief ousted

Sutherland leaves as Fla. tax looms

By STEVEN W. COLFORD

WASHINGTON—At a critical juncture, a key strategist has been dismissed as head of the coalition formed by three major advertising industry associations to monitor and spearhead local legislative and regulatory skirmishes.

The dismissal of William Sutherland as director of the State Legislative Alert & Action Coalition comes on the eve of a scheduled public hearing in Florida. That state is considering levying a sales tax against advertising.

Mr. Sutherland apparently was fired by Wallace Snyder, senior vp-government relations of the American Advertising Federation, although the official version is that Mr. Sutherland resigned.

Mr. Sutherland was selective in his comments, but he and other sources indicated there had been intramural bickering and differing agendas among individual advertisers and the three associations—besides AAF, the Assn. of National Advertisers and the American Assn. of Advertising Agencies.

However, other ad industry officials suggested Mr. Sutherland was in over his head, could not keep up with simultaneous developments in Florida and other states and, as a newcomer to advertising, did not have an adequate feel for the ad business.

A successor to Mr. Sutherland was not immediately named.

"If you have three national trade associations, then you have three opinions on how things should run," said Washington-based Mr. Sutherland. "There was some encroachment by association officers on the banks of the Hudson," he said.

"This does come at a critical time," acknowledged Mr. Snyder, referring to the scheduled Feb. 2 hearing when advertisers, agencies and the media will plead their case to a state revenue commission. "But the commitment from each of the trade associations remains at

Older Mikey pumps 'Life' into brand

By JULIE FRANZ

ADWATCH

Mikey, the lovable child who for 15 years appeared as spokesman for Quaker Oats' Life cereal, has as an adult sparked the brand's advertising recall.

Life's ad awareness score increased 3.4 percentage points from October to December, capturing 5.6% of first mentions in the breakfast foods category in the December adWatch survey.

After years of running the same spot of Mikey as a child, Quaker last fall caught up with the grown Mikey, played by actor John Gilchrist (now a college freshman). Two spots, designed to appeal to teens, followed a sweepstakes that challenged consumers to "Guess who's Mikey?" from a teen-age group pictured on Life cereal boxes.

The Mikey promotion was created by BBDO, Chicago. BBDO has since lost the account to Jor-

Dangling new lures

But no car financing war. . .yet

By RAYMOND SERAFIN

DETROIT—Domestic auto makers continue to dance around another all-out war on financing incentives while looking for other consumer lures to rev up a slow market.

General Motors last week took a decidedly long-term step toward reviving flagging consumer confidence in its products by upping the ante on warranty protection to six years or 60,000 miles on powertrains and 100,000 miles on corrosion, thus putting more heat on Chrysler's heavily promoted five-year/50,000 mile warranty.

Officials at GM car divisions said they expected the bulk of advertising for the new warranty program to come from a corporate campaign, though tag lines are likely to appear in both divisional and dealer ad group campaigns. N W Ayer handles GM corporate advertising.

Separately, Chrysler Corp., Highland Park, extended financing incentives and cash rebates on a limited range of small cars and trucks but was careful not to cross a line that would necessitate a dramatic response by its competitors.

Dearborn-based Ford Motor Co., coming off a strong sales and profit year in 1986, had no immediate response, but some industry observers speculate that Ford might be planning to drop the next auto marketing bombshell.

"Ford is in position to aggressively go for more market share," said Thomas O'Grady, president of Integrated Automotive Re-

Chase becomes AA exec editor

NEW YORK—Dennis Chase has been named executive editor of ADVERTISING AGE.

Rance Crain, president and editor-in-chief of Crain Communications Inc., Chicago, said the promotion will "build more strength into our day-to-day operations" and continue AA's momentum "into this year and beyond."

Mr. Chase, AA's international editor since September, 1980, will report to AA editor Fred Danzig.

In his new post, Mr. Chase will be in charge of day-to-day editorial operations, work under the editor's over-all direction and be responsible for gathering and presenting AA's editorial package in the most effective way for its readers.

D. Chase

L. Collins

Before joining AA in 1980, Mr. Chase served as Chicago bureau chief for McGraw-Hill World News and also as London correspondent for McGraw-Hill.

He was a Walter Bagehot Fellow in economic and business reporting at Columbia University and earlier in his career was a general-assignment reporter for the *Ann Arbor News* and *Grand Rapids Press* in Michigan and also for *Chicago Today*.

By having bureau chiefs and department heads report daily to Mr. Chase, Mr. Danzig will have more time to deal with broader aspects of AA's editorial coverage and forward planning.

In Chicago, deputy editor Larry Doherty will continue to report to Mr. Danzig and deal with a broad range of editorial, production and administrative functions.

AA's international department will be supervised for the immediate future by assistant international editor Mark Rosati.

In other recent staff moves:

Larry G. Collins has been added

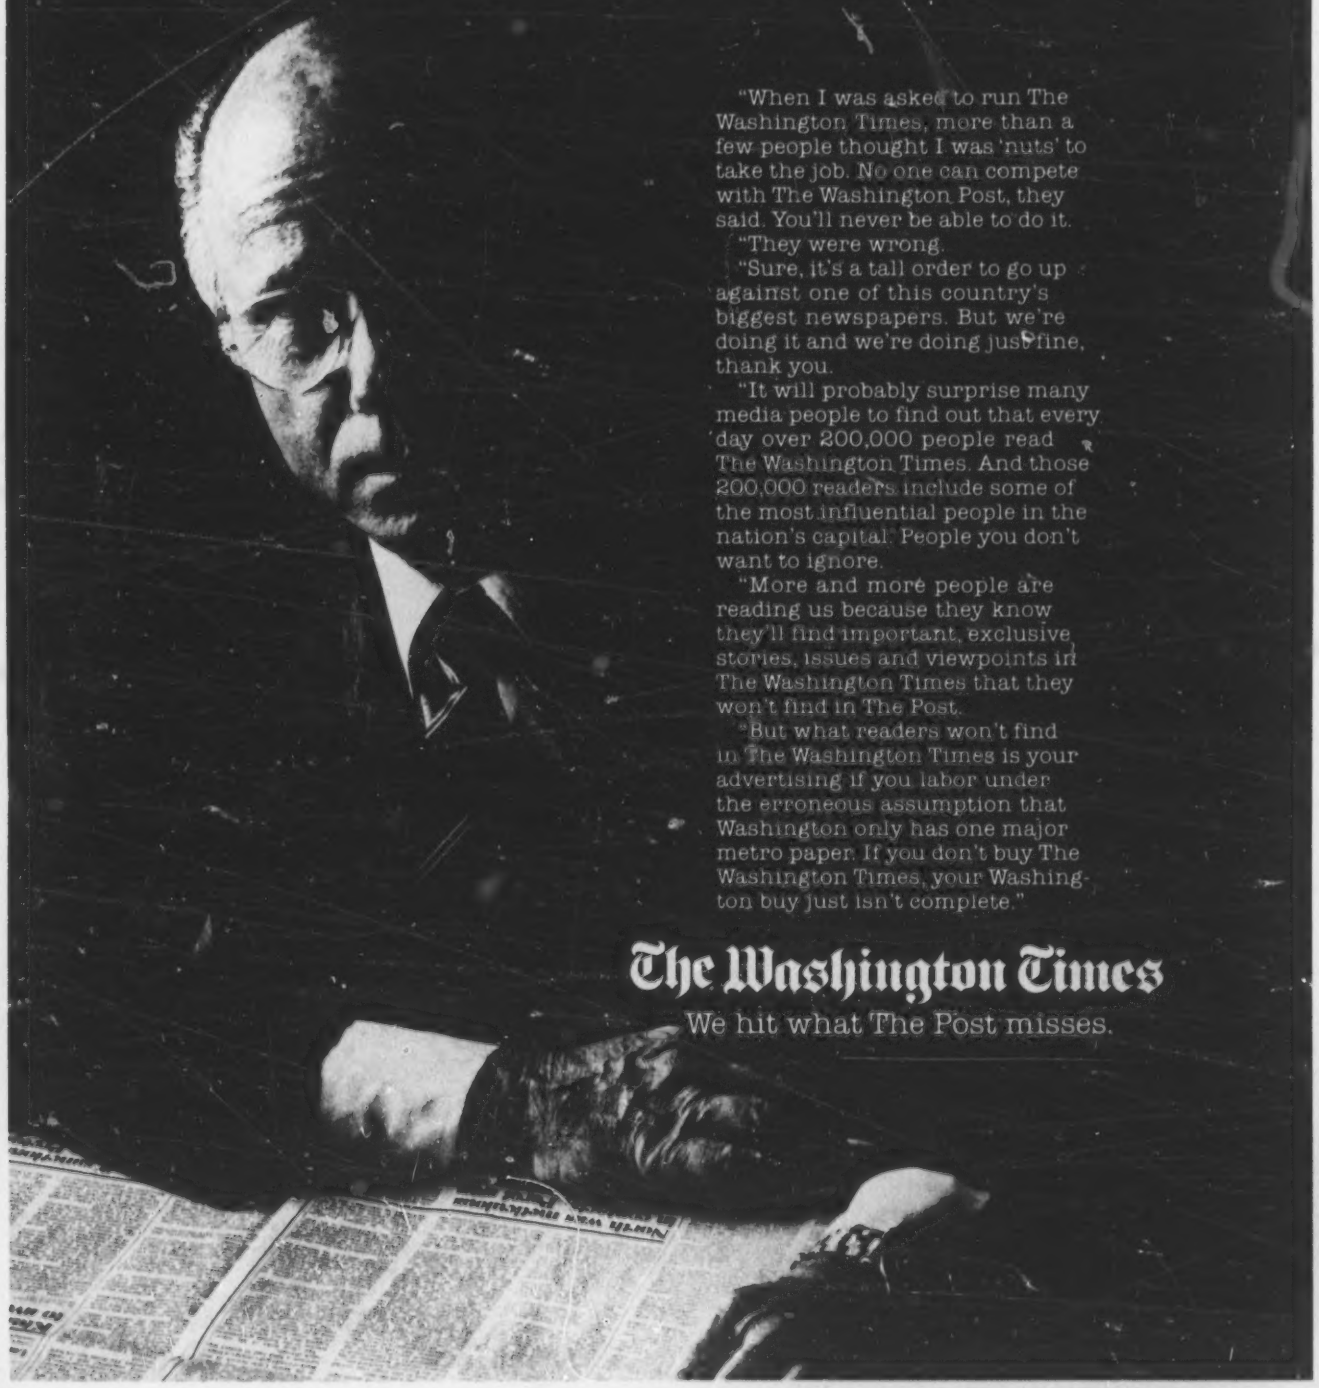
CORRECTIONS & CLARIFICATIONS

- In the ADVERTISING AGE Quarterly Best (AA, Jan. 19, P. 46), the name of Carol DeMelio was misspelled. She was art director for Nikon's eight-page "Great pictures" insert, via Scali, McCabe, Sloves, New York. The copywriter was Brian Belefant, not John Lovering. Also in the Quarterly Best, creative credits for Apple Computer's "Nightmare" tv commercial were listed incorrectly. Correct credits at BBDO Worldwide, New York, are: Charlie Miesmer, senior creative director; John Greenberger, creative director and copywriter; Jimmy Siegel, copywriter; Tony LaMonte and Phil Triolo, art directors; Barbara Mullins, Katie O'Brien and Andrew Chinich, producers. Steve Horn directed the spot (AA, Jan. 19, P. 41).
- For the January Consumer Linage Report (AA, Jan. 19, P. 84), *Barron's* has supplied a corrected figure of 2,317.8 pages for its 1986 yearend total.#

"If you think Washington is still a one-newspaper town, you're living in the past."

— Arnaud de Borchgrave, Editor-in-Chief, The Washington Times



"When I was asked to run The Washington Times, more than a few people thought I was 'nuts' to take the job. No one can compete with The Washington Post, they said. You'll never be able to do it.

"They were wrong.

"Sure, it's a tall order to go up against one of this country's biggest newspapers. But we're doing it and we're doing just fine, thank you.

"It will probably surprise many media people to find out that every day over 200,000 people read The Washington Times. And those 200,000 readers include some of the most influential people in the nation's capital. People you don't want to ignore.

"More and more people are reading us because they know they'll find important, exclusive stories, issues and viewpoints in The Washington Times that they won't find in The Post.

"But what readers won't find in The Washington Times is your advertising if you labor under the erroneous assumption that Washington only has one major metro paper. If you don't buy The Washington Times, your Washington buy just isn't complete."

Big spenders up the ante in ownership game

By William F. Gloede

For better or worse, the era of the corporate press has arrived.

Whether a press controlled by a relatively few big companies is good for America has been debated ad infinitum. But while the debate raged, the big media companies were out shopping. And they bought.

Between 1970 and 1985, chain control of the nation's daily newspapers increased from 50% of the papers and 63% of daily circulation to 71% of the papers and 77% of the circulation, according to Lynch, Jones & Ryan, Washington-based securities analysts. When the 1986 numbers are tallied, those numbers are likely to show chain control of circulation pushing the 80% mark.

In recent years, most of the big chains have run their newspapers in much the same way they'd always been run. There traditionally has been an almost visible iron curtain separating the editorial department from the paper's business departments. And while newspaper groups, especially publicly held companies, squeeze more profit from their papers than the former family ownership, they have not, in most cases, touched the news-gathering operation.

That may be changing, and it has observers both inside and outside the news business worried.

In a cost-conscious business climate, it is becoming more difficult for publicly held newspaper companies to justify to shareholders the heavy investments in news gathering that top dailies used to take for granted. Even in the privately held groups, pressures to deliver more profit with less expense are immense.

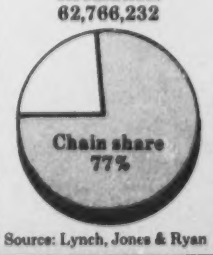
"I see danger down the line, not in the first generation that we're seeing now or even perhaps

(Continued on Page S-2)

Unless otherwise indicated, all circulation figures used in this Special Report are daily circulation averages provided to Audit Bureau of Circulations' FAS-FAX for the six months ending Sept. 30, 1986.

Chain power

1985 average U.S. daily newspaper circulation: 62,766,232



Total number of U.S. daily newspapers: 1,676

Ownership

(Continued from Page S-1)

in the second generation," says Daryl Moen, a professor of journalism at the University of Missouri School of Journalism, Columbia, Mo.

"But down the line, I think there's a very good chance that the new [chief executive officers] of these companies will have a vastly different background—a completely different vision of what a communications company can be or should be—than the chain founders, the Gannetts, the Al Neuharths, the John Knights.

"When that happens, I think it's going to have a negative impact," Mr. Moen says.

Norman Isaacs, the former executive editor of the *Courier-Journal* and *Louisville Times*, former associate dean of the Columbia University Graduate School of Journalism, New York, and author of "Untended Gates: The Mismanaged Press" (Columbia University Press, 1986), is more worried than Mr. Moen.

"I'm unhappy about it, because I think the record is that once you have a publicly held company . . . the management has to run like hell to keep the stockholders happy," Mr. Isaacs says. "The proposition of the financial markets places the whole thrust on quarterly performance."

Mr. Isaacs concedes that he's a "throwback" to another generation, but he insists that the rudiments of good journalism today are the same as they always were. As always, it is expensive to produce a quality news product.

"I probably was one of the last editors to run, for years, without a budget," Mr. Isaacs says. "That's what made the *Courier-Journal* and the *Times* so well-known. We operated in a big-league fashion; that's what Barry Bingham Sr. wanted, and that's what I gave him."

Mr. Isaacs fears that tight-fisted management could keep editors from pursuing major news stories for the sake of the budget. And that, he believes, violates the public trust that the First Amendment protects.

Ben H. Bagdikian, dean of the Graduate School of Journalism at the University of California at Berkeley, also believes the financial pressures of public ownership do not foeter good journalism.

"What has happened in most [public] chains is that because Wall Street investors are interested in the short term . . . outside the showcase papers of the country there has been a decrease in reinvestment in real journalistic quality. They go in for things that are relatively inexpensive and quick, like graphics. But they quietly cut down on local reporting, on the amount of hard news space.

"And because 98% of our newspapers are in monopoly markets, you have enormous flexibility in reducing quality and maximizing prices."

Predictably, securities analysts disagree with journalists, although perhaps not as strongly as might be expected.

"There's no question that with the press being held by the public that there's pressure to maintain healthy earnings increases and run the paper more as a business," says Peter Kent, president of Henry Ansbacher Associates, a New York firm specializing in media mergers and acquisitions. "That doesn't necessarily mean that the quality of the newspaper decreases as a result. But some companies can take it too far."

Over-all, Mr. Kent believes that financially driven media companies can produce newspapers just as well as the media barons and family managers of the past. What professional management does, he says, is improve margins by consolidating business functions and reaping the benefits of economies of scale. "It's just better business," Mr. Kent says.

"There's probably more emphasis on profit margins than ever before" at companies like Knight-Ridder, says Bruce Thorp, a newspaper analyst with Lynch, Jones & Ryan.

"Knight-Ridder in the past has had a reputation for putting out some of the best newspapers in the country," he says. "It has not had a reputation among investors as one of the best newspaper stocks to own." The company, he believes, now is trying to bring its Wall Street reputation up to the same level as its reputation among members of the Pulitzer Prize jury, which gave the company's papers an unprecedented seven awards last year.

In Mr. Thorp's view, there is no inherent conflict between journalistic quality and strong financial performance.

"Quality journalism and profitability go hand in hand," he says. "We've seen time after time that when papers are locked in competition, the quality paper survived. An investor should take a long-term view that greater profit today could mean losses tomorrow, even the loss of the newspaper."

To many, however, concentration of press ownership is more worrisome than bottom-line management of the news business. With fewer newspaper properties available, chains are turning even to small dailies and community weeklies as growth prospects.

"I think it poses real problems," Mr. Bagdikian says. "A few large corporations are coming to dominate most of the business, and those few are getting fewer all the time. I think that's just too much power over something that's critical to public affairs and a democratic political system—even if they were all sterling publishers, which they are not."

Mr. Isaacs points to American John McGoff and his Panax Corp. as an example of what can be done with a concentration of ownership.

Mr. McGoff, a registered agent of the South African government, in the late 1970s used money supplied by that government to buy newspapers in the U.S.—in exchange for the promise that he would use those newspapers to bring the South African government's views to an American audience.

"McGoff was a case in point of what can happen when you own a string of newspapers and all orders come out of headquarters about what to publish and what not to publish," Mr. Isaacs says.

The debate may be moot. The chains already dominate the newspaper business, and they'll likely increase that domination.

"As a practical political matter, I don't think anything can be done about it now," Mr. Bagdikian says. He worries, however, that the chains could start exercising their heretofore untested political power.

"Media power means political power," he says. "The head of any of the leading chains can see the President of the U.S. any time he wants. The head of a local paper can't."

Ansbacher's Mr. Kent disagrees. He does not believe there's any danger of the big companies creating a monopoly of thought or editorial opinion or exercising great political power.

"There's still a great deal of diversity in newspeper holdings in this country, and I think that will continue," he says. "I don't think you'll ever see strict domination of the press by three or four companies." ■

Hearsts established chain concept

Although the growth of chain and group newspaper ownership in the U.S. has accelerated in the last two decades, the concept took root nearly a century ago, primarily through the efforts of the original William Randolph Hearst.

Mr. Hearst (1863-1951) was the son of a California tycoon who had made his fortune in copper, silver and gold mining. The elder Hearst, George, bought the *San Francisco Examiner* in 1880. When he entered the U.S. Senate seven years later, control of the paper went to young Will, and a newspaper empire was born.

Elaborate promotions, the hiring of top-flight reporters and the purchase of modern mechanical equipment allowed Will Hearst to double the *Examiner's* circulation to 40,000 in his first year at the helm.

But San Francisco wasn't enough for the young publisher, who in 1895 bought the *New York Journal*. By 1905, his string of papers had grown to six, with the addition of the *New York American, Chicago American, Chicago Examiner* and *Boston American*. And he was just beginning.

Mr. Hearst wasn't the only early builder of newspaper chains—Scripps Howard being another notable example—but he and his Hearst Corp. were the most ambitious. At its peak in the 1930s, the Hearst chain consisted of 26 daily and 17 Sunday newspapers published in 19 cities and accounting for 13.6% of total daily circulation and a staggering 24.2% of total Sunday circulation in the U.S., according to the journalism textbook "The Press and America," by Edwin Emery and Henry Ladd Smith.

Cities with Hearst papers eventually included Albany, Atlanta, Baltimore, Boston, Chicago, Detroit, Fort Worth, Los Angeles, Milwaukee, New York, Omaha, Pittsburgh, San Antonio, San Francisco, Seattle and Washington. With a major market presence rivaled by no other chain, Mr. Hearst became arguably the most powerful newspaper owner this country has ever produced, as well as the most controversial.

William Randolph Hearst III is stirring up controversy with *San Francisco Examiner* ads.

His papers were fiercely competitive and combative with the kind of lively, colorful writing and splashy makeup that caused them to be labeled "yellow journalism" and "scandal sheets," particularly by their competitors. And the Hearst papers in the years between the world wars were truly *chain* papers. By and large, they looked alike; most of them had an American eagle in their nameplate, and many had *American* in their name, reflecting their owner's strong sense of patriotism.

The papers also shared most columns, comics and features and some editorials. Today, Hearst's King Features Syndicate, now including News America Syndicate, is estimated to be the industry's largest supplier of newspaper features and comics.

The Hearst chain, as constructed by its founder, began to dissolve in the late 1930s, as financial troubles mounted and many of the papers were sold, folded or consolidated, and the U.S. moved inexorably toward one-newspaper or single-ownership cities.

Although no longer one of the largest newspaper groups either in total circulation or number of papers, the privately held Hearst Corp., celebrating its centennial this year, remains an impressive media powerhouse. It ranks 11th among U.S. companies in media revenues (AA, June 30, 1986).

In addition to more than a dozen daily papers, among them the *San Francisco Examiner* and *Los Angeles Herald Examiner*, the company owns tv and radio stations, cable channels and systems, book publishing operations and magazines, including *Good Housekeeping, Harper's Bazaar, Cosmopolitan, Redbook, Popular Mechanics*, and the recently purchased *Esquire*.

Under William Randolph Hearst III, grandson of the company founder, the 145,000-circulation *San Francisco Examiner* aggressively has sought new readers and advertisers. And once again a Hearst paper is stirring up controversy. The *Examiner* currently is running a multimedia ad campaign, via Goodby, Berlin & Silverstein, San Francisco, that attacks tv's ability to comprehensively and intelligently present the news.

—Robert G. Goldsborough

Chains lead efforts to boost national advertising

By Gary Levin
and William F. Gloede

In an attempt to improve their declining share of national advertising, newspapers have taken unprecedented steps to coordinate marketing efforts through chain-initiated combination buys, network sales organizations and new technological developments.

The latest venture, a group of negotiated discount rates for national package goods advertisers developed by Young & Rubicam (AA, Dec. 15), is only one in a series of recent moves designed to recapture national ad dollars lost from tobacco companies and others that have reduced overall spending or channeled it elsewhere.

Chains have played a major role in changing the way newspaper space is sold. Beginning in 1982, several large media companies began bypassing independent rep firms in favor of their own internal sales efforts. Gannett National Media Sales, Knight-Ridder Newspaper Sales and Times Mirror National Marketing were just three such ventures, whose success mainly depended on which markets were included and how the packages were sold. Smaller papers and smaller chains, meanwhile, continued to rely on independent reps to sell whatever national advertising they could command.

More recently, individual dailies woke up to the fact that advertisers—not newspapers—select their combination buys. In response, they began forming ad hoc networks, tailoring group discounts and other incentives to advertisers' media plans.

"From the point of view of agencies and advertisers, it makes more sense to take a group of similarly sized markets and create packages of what [advertisers] want to buy rather than what we want to sell them," says Kingsley Anthony, president of Million Markets Newspapers/Times Mirror National Marketing, New York, formed from the 1986 merger of a chain-owned sales organization and an independent rep firm.

"One thing that has been somewhat missing in the way newspapers have been sold is that we haven't been able to speak with a unified voice," he says.

The Y&R plan may be one solution, capping similar efforts by the Newspaper Advertising Bureau's Future of Advertising project and the American Assn. of Advertising Agencies. It promises varied discounts, averaging 30%, to food and other package-goods advertisers,

> ***"One thing missing is that we haven't been able to speak with a unified voice."***
>
> **Kingsley Anthony**
> **Million Markets Newspapers/-Times Mirror National Marketing**

but excludes the dominant newspaper spenders: Airline, tobacco and liquor marketers.

On a more limited scale, the *Chicago Tribune, Los Angeles Times* and *New York Times* are planning a joint sales effort, including category discounts for combination buys in the top three markets. And Chicago-based Tribune Co. is considering single-price combination buys for ads in the *Tribune* and its New York *Daily News* and on the Tribune-owned tv outlets in those markets, WGN-TV and WPIX-TV.

Sales and technological expertise are being shared on a national basis as well, although newspaper chains carefully avoid pricing collusion, a violation of federal antitrust laws.

Gannett Co.'s New York-based Four Color Newspaper Network was formed in 1985 to help sell color ads in papers committed to the superior reproduction pioneered by the company's nationally circulated *USA Today*.

The network now numbers 250 Gannett-owned and independent dailies with a combined circulation of 17 million. In 1986, advertisers bought 300 pages in Four Color Network papers, representing $1.2 million in ad spending, according to Gannett vp William Shannon.

National marketers including Apple Computer, Delta Air Lines, Ford Motor Co. and Kraft have bought color space through the network. Nearly all these ads were new to member newspapers.

AD/SAT, an independently owned company that transmits ad facsimiles via satellite to 80 newspapers, began operations last fall to offer advertisers the convenience of a single insertion order and invoice for multiple-newspaper buys.

The New York-based operation, which reaches papers with a combined daily circulation of

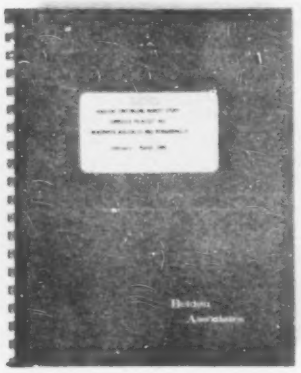
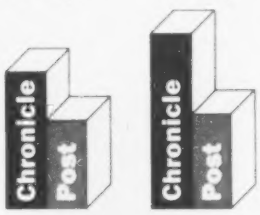
WHAT DO THREE BRAND NEW STUDIES SAY ABOUT THE CHRONICLE'S LEAD IN HOUSTON?

OVERWHELMING.

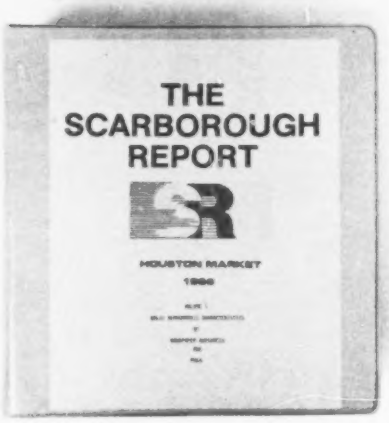


The Chronicle leads by:
28% Daily 47% Sunday

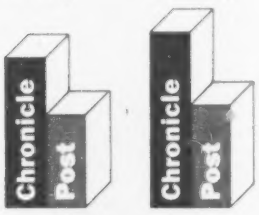


1986 Belden Study
Conducted February-March, 1986

OVERWHELMING.

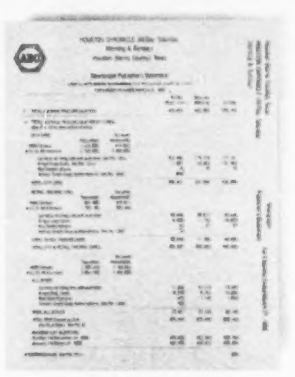


The Chronicle leads by:
32% Daily 42% Sunday

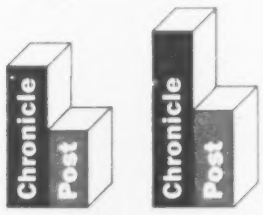


1986 Scarborough Report
Conducted April-July, 1986

OVERWHELMING.



The Chronicle leads by:
37% Daily 45% Sunday



Publisher's Statements
March 31, 1986

How far ahead *is* The Chronicle?

According to the newest Belden study, conducted February thru March, 1986, The Chronicle's lead is 28% daily, 47% Sunday.

But what does the Scarborough Report say? Conducted April thru July, 1986, it puts The Chronicle lead at 32% daily, 42% Sunday.

And how about the Publisher's Statements? Dated March 31, 1986, they show The Chronicle is ahead 37% daily and 45% Sunday.

So it's not a question of whether The Chronicle is leading in Houston. We are–no if's, and's or but's. It's only a matter of *how much* the lead is.

And according to three different studies, The Chronicle leads by an average of 32% daily, and 45% Sunday.

By comparison, when our competitor boasts of being Houston's best-read newspaper, did you know their data is two years old? It's true. They're quoting figures from a Simmons-Scarborough study whose data was gathered in 1984, and released in 1985.

But what really counts is how the numbers add up *this year*, in 1986. And you can look at three different studies, all reflecting the same, single fact: The Chronicle has an overwhelming lead over the competition.

For more information on why The Chronicle is Houston's most powerful, cost-efficient buy, phone Joycelyn Marek, Research Manager, collect at (713) 220-7401.

National sales efforts

(Continued from Page S-4)

22 million, expects to include all of the top 100 markets by yearend. It also plans an interactive message system to link agencies and newspapers with its central transmission center.

All of this new-found cooperation between individual papers and chains is not lost on the independent newspaper reps, whose biggest strength is among smaller dailies outside the top 30 markets.

"I've never seen anything like this happen in the newspaper business," says Owen Landon, president of New York-based Landon Associates, the industry's largest rep firm. Mr. Landon says the new "commitment and intensity" toward networking comes from the "customer-driven" nature of the medium, only lately addressed by publishers.

Other independent sales reps point again to the decline of national newspaper spending by airlines, tobacco and distilled spirits marketers as the primary incentive for this kind of cooperation.

The general softness in ad spending, coupled with inroads by media chains, have spelled doom for some of these independent sales reps. Million Markets merged with Times Mirror National Marketing when the former lost the *Detroit News* account following its 1986 purchase by Gannett. Story Kelly Smith was acquired by Cresmer, Woodward, O'Mara & Ormsbee (CWO&O), New York, in April.

"From our point of view, having a national rep is not as critical as it would be in a bigger market," says Tip Lifvendahl, president-publisher-chief executive officer at Tribune Co.'s *Orlando* (Fla.) *Sentinel*, which serves the nation's 47th largest market. His paper receives 10% to 15% of its ad revenues from national marketers.

> ***The "customer-driven" nature of the medium is behind the new commitment toward networking.***
>
> **Owen Landon**
> **Landon Associates**

Yet he and others believe a half-dozen or so independent sales organizations "will always have a voice in the ad community" because of the fragmented nature of the newspaper industry.

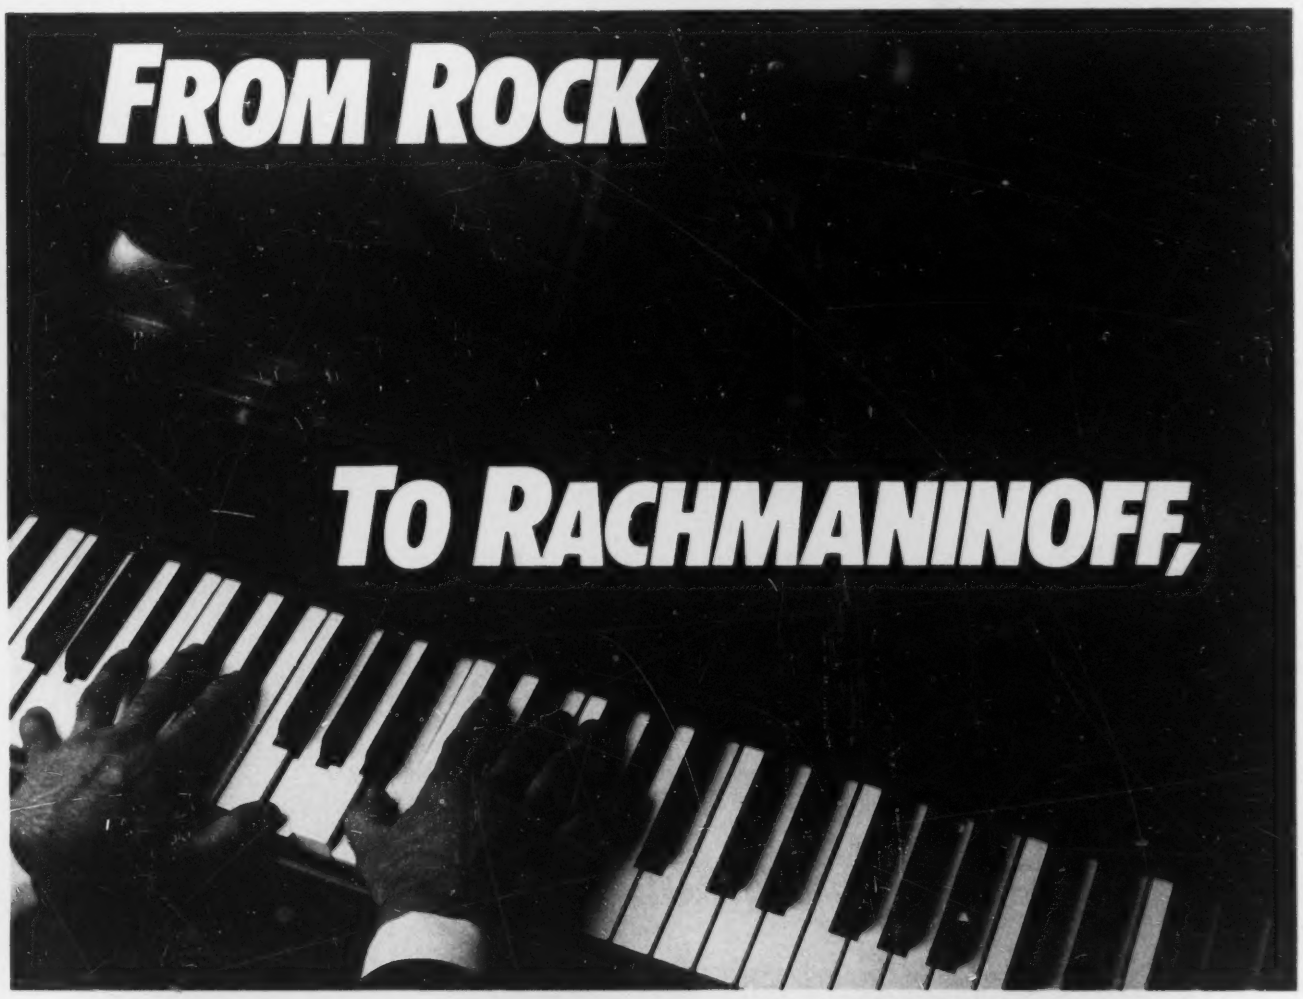
For despite the recent emphasis on networks, newspapers always have been and will continue to be a predominantly local medium supported mainly by local advertising.

Some dailies have tried to supplement declining local spending with innovative sales packages aimed outside their market, however. Knight-Ridder's *Wichita* (Kan.) *Eagle-Beacon*, for example, in February, 1985, introduced a "Laboratory/Wichita" program offering all national advertisers a reduced retail rate if they bought a contract for full-page insertions in six editions. The program promoted Wichita as a test market, highlighting its heavy cable penetration as a competitive advantage to the newspaper; broadcast buys theoretically would be more fragmented and less efficient as a result.

Eagle-Beacon ad director William Poitevint says three advertisers—Redken Laboratories, Southwestern Bell and Philip Morris Cos.' Virginia Slims—bought contracts, but the program's limited success, combined with the declining popularity of full-run ad pages, led the paper to expand the program to half and quarter-pages this year.

Mr. Poitevint says the Y&R program and similar efforts by his and other newspaper companies will, in the long run, help the medium by encouraging advertisers to reconsider newspapers lacking rate biases against national advertisers.

"The sooner we get to rate parity as an industry, the better off we'll be," he says.



WE COVER YOUR WORLD.

It's a world filled with affluent, well-educated consumers living in a market saturated with culture.

It's a world that becomes your oyster when you advertise in The Record.

Our readers, in the Bergen/Passaic market minutes from New York City, are attuned to your message. They have the second highest median individual employment income in America. And a large portion of that income is spent on entertainment of all kinds.

Use The Record at its best, with superb 4-color reproduction, to strike a selling chord with the desirable Record audience.

You'll find — as they do — that we cover your world. All of it.

Middle-market giants perfect growth strategies

By Janice Steinberg

The names aren't as well-known, but chains such as Donrey, Park and Freedom have as strong a grip on the newspaper industry as do Gannett Co., Knight-Ridder and Times Mirror Co.—albeit at a different level.

Janice Steinberg, a frequent contributor to Special Report, investigated feature and lifestyle sections in the July 28, 1986, Newspapers Special Report.

At present, 10 of these middle-market chains control nearly 500 dailies and nondailies, primarily with circulations less than 100,000—and in many cases, less than 20,000. *(See chart.)*

Ownership of papers such as the 6,800-circulation *Lincoln* (Ill.) *Courier*, the 10,976-circulation *Orange* (Tex.) *Leader* and the 16,639-circulation *Norman* (Okla.) *Transcript* has proved profitable for the Copley, Cox and Donrey chains. It's been profitable enough for these chains and their peers to continue buying smaller market dailies—paralleling the rapid acquisition of metropolitan newspapers by industry giants such as Gannett and Times Mirror.

The middle-market chains have several things in common. First, says John Morton, newspaper analyst with Washington's Lynch, Jones & Ryan, "Most of these middle-size companies are growing very rapidly. They've been very active in acquiring more newspaper properties and in some cases broadcast properties as well. These are middle-size companies getting bigger."

In 1986, Topeka, Kan.-based Stauffer Communications purchased two Wyoming tv stations and two newspapers, the Oak Ridge, Tenn., *Oak Ridger* and the Lake Wales, Fla., *Highlander*.

"We've been growing at a rate of better than 20% a year since day one," says Roy H. Park, founder and chief executive officer of 25-year-old Park Communications, Ithaca, N.Y. His company bought five newspapers in just the third quarter of 1986, bringing to 89 its total of newspapers and shoppers; it also owns seven tv and eight radio stations.

These two companies, Stauffer and Park, illustrate another trend among the middle-market chains: Diversification into other media, including tv, radio and cable tv systems.

Says Richard Gottlieb, president of Lee Enterprises, Davenport, Ia., which owns five tv and four radio stations, "We feel as though we're a communications corporation. One arm is newspapers and one arm is broadcast."

> ***"These companies have been very active in acquiring more newspaper and broadcast properties."***
>
> **John Morton**
> **Lynch, Jones & Ryan**

Atlanta-based Cox Communications is the fifth-largest multiple system cable operator in the U.S., according to the Cabletelevision Advertising Bureau; Cox derived 31.7% of its 1985 sales from its cable operations. Copley Newspapers, Donrey Media Group, Howard Publications, Landmark Communications and Stauffer also have cable holdings.

Mr. Morton sees the interest in cable tv as both "a defensive move and an entrepreneurial move, because there probably are going to be some relationships between the information-gathering capability of newspapers and cable television's need for information to distribute. Cable has some unique relationships with newspapers."

Although diversification tends to center on media properties, several companies have ventured farther afield. Copley, La Jolla, Cal., owns a resort hotel. In addition to a chain of computer stores, Stauffer operates insurance and travel services associated with one of its magazines, *Capper's Weekly*. Fort Smith, Ark.-based Donrey took advantage of the geothermal springs at president Donald Reynolds' Duckwater, Nev., property to start a catfish farm.

Besides investing in new properties, most of the middle-market chains have been energetically adding and upgrading newspaper production facilities.

In 1985, Freedom Newspapers' hometown flagship paper, the *Orange County Register*, Santa Ana, Cal., installed a color pagination system, said to be the first of its kind in the world.

David Easterly, president of Cox's newspaper division, predicts that within the next 10 years, Cox and its peers will make significant production advances. He says while previous upgrades were responses to increased circulation, future technological advances will be driven primarily by cost and quality concerns.

But despite similar objectives, significant differences also exist among the middle-market newspaper chains. Major problems and challenges vary not only from chain to chain, but also from market to market within a given chain.

Richard Newell, vp-administration for Howard Publications, Oceanside, Cal., says competition for advertising dollars is his company's greatest challenge. "With not only television, radio, and the other broadcast media, but also some of the third-class direct mailers, the competition for that advertising dollar is much more intense today than it was 10 or 15 years ago."

Mr. Easterly also cites competition as the issue for Cox newspapers in West Florida and Arizona. For the company's papers in Texas, however, the problem is the post-oil boom economy.

Ailing local economies are also a problem for Stauffer; "We're looking for markets that aren't so agriculturally dominated," vp Kenneth Bronson says.

However, Mr. Bronson says Stauffer's problems also stem from the way the company has operated in the past. "Our No. 1 issue is the fact that our price-to-earnings ratio has always been low in the industry," he says. "This goes back to the founding of our company and

the way Oscar S. Stauffer wanted to operate his newspapers; that is, that each individual newspaper would be autonomous. Consequently, it has been a group of newspapers rather than a chain." Stauffer recently began centralizing some functions and plans to begin serious strategic planning this year.

Where these companies seem to differ most is in management style.

In spite of Stauffer's moves toward centralization, Mr. Bronson says the papers will maintain editorial autonomy. On the other hand, Freedom's 32 newspapers each reflect the company's libertarian philosophy, says Michael Maloney, assistant to the president.

Executives of Donrey, Lee, Howard and Cox say their papers operate with complete editorial independence. Cox's two Atlanta newspapers even split on their presidential endorsements in the 1984 election. "We operate a very decentralized business," Mr. Easterly says.

Copley and Park handle the autonomy question differently. Copley is the only middle-market chain with a single editor-in-chief, Herb Klein, for all of its newspapers.

In practice, Mr. Klein says, "I don't get involved with the daily news operation of the papers outside of San Diego. My involvement is to work with them on upgrading the product, spend time with the editors, work on their relationships with our bureaus to ensure we're doing a good job for them. When they're making major changes we have discussions." In San Diego, Mr. Klein, who also is a company vp, sits on the editorial board of the flagship *Union*, as does ceo Helen Copley.

Park newspapers, most of them afternoon publications with circulations less than 30,000, include several common elements: On the left side of Page One, each paper runs a column of breaking news stories and each offers photographs of 125 to 150 local people daily.

A few chains say they are considering offering group sales to national advertisers. Park already employs a national sales representative; if an advertiser takes an ad in every Park paper where his company is represented, he receives a discount.

Although growth has been the byword for most of the middle-market companies, how big can they get and remain manageable —and profitable?

In March, 1986, Harte-Hanks Communications, San Antonio, Tex., announced it would add 19 newspapers to its group of 23 dailies and more than 100 nondailies; but at the end of the year it was divesting many of its smaller newspapers and shoppers.

Copley, for one, believes smaller is better. In terms of number of properties, it is the smallest of these chains. Although Mr. Klein says the company is seeking additional newspapers, he says there are advantages to its current 13-newspaper size. "It stays very personal."

Most of the middle-market chains, however, plan to continue seeking new properties.

"We've been very attentive to the newspapers that have come on the market," Cox's Mr. Easterly says.

Likewise, Mr. Park says, "We are always watching for newspapers to come on the market, and if we learn about them or they come our way, we follow through with some vim and vigor and try to make a deal if we can."

Guinness woes

Takeover scandal may crimp marketing

By LAUREL WENTZ

LONDON—The turmoil surrounding the government's investigation of Guinness PLC's takeover practices is raising questions about the future of the brewer's ambitious worldwide marketing plans.

Guinness had been trying to establish itself as an international spirits and beer giant. But that was before the ouster of Ernest Saunders, its marketing-minded chairman and ceo, and the continuing investigation into the company's takeover last year of Distillers Co. Ltd.

Mr. Saunders was fired amid widespread publicity about the U.K. Department of Trade & Industry's inquiry into whether Guinness executives led a campaign to drive up the price of Guinness stock through heavy outside buying during the $3.7 billion battle for Distillers last spring.

Since Guinness' bid was mainly in stock—which rose in value 25% during the period of heavy buying—it topped a rival offer from the Argyll Group, a large supermarket conglomerate.

On Jan. 16, Guinness acknowledged that some members of its management engaged in illicit deals in connection with the takeover.

Under Mr. Saunders, Guinness Brewing Worldwide was set up to promote Guinness as an international beer brand, and Ogilvy & Mather was appointed its global ad agency.

A review started last fall of all the marketing and advertising activities of the group's spirits brands—one of the first steps in the reorganization of Distillers—is continuing, said a company spokesman.

The $105 million in advertising, now divided among 30 ad agencies, is being reviewed by Guinness Beverage Group managing director Victor Steel and other senior Guinness executives with the help of Frank Lowe, chairman of Lowe Howard-Spink Marschalk, the agency handling Guinness' corporate account.

One account, for Gordon's gin, already has been reassigned from Foote, Cone & Belding to Lowe (AA, Oct. 27).

Last year, Guinness reported 30% growth in its key development markets—the U.S. and Western Europe—and launched Kaliber, an alcohol-free beer the company hopes has international potential, in the U.S. and the U.K.

Mr. Saunders masterminded the acquisition of Perth, Scotland-based whisky producer Arthur Bell & Sons in 1985 in addition to leading the acrimonious takeover battle for Distillers. Bell markets White Horse, the No. 1 U.K. brand, and Distillers produces Dewar's, the best-selling Scotch whisky brand in the U.S.

It was revealed in mid-January that Guinness last November sold the Dewar's trademark rights to its U.S. distributor, Schenley Industries, for a nominal amount. In another move, Schenley also bought the U.S. distributor of Gordon's gin and vodka, another Distillers' brand.

Schenley bought about $90 million of Guinness stock during the takeover battle for Distillers, giving the U.S. company more than 5% of Guinness' stock and helping to boost the Guinness stock price to make its offer to Distillers more attractive. Schenley, a unit of Rapid-American Corp., since has admitted to violating U.K. law by failing to disclose acquisition of more than 5% of a company's stock.

"Hopefully, the Saunders' plan is all still there and in

Cuba:

'Sunshine Channel' tells tourists about virtues of Cuban consumer products

By STEPHEN DOWNER

Editor's note: ADVERTISING AGE's Mexico City correspondent visited Cuba recently to report on the state of marketing and commerce in the communist nation. In the first of a two-part series, he looks at advertising in Cuba.

HAVANA—Commercial advertising is alive in Cuba, but does not exist as far as the average Cuban is concerned.

Tourists can see it by turning the dial of their invariably Japanese color tv sets in their hotel rooms to El Canal Del Sol (The Sunshine Channel).

Cuba's tourism institute launched the channel three years ago. It gives comprehensive information on the attractions and products available to tourists on the crocodile-shaped island in the Caribbean.

Commercials advertising tourist attractions are in Spanish, French and English. Most consumer products are advertised in English only.

"We offer duty-free shopping to meet every budget," blurts out a turbaned cartoon character, the mascot of Cuba's INTUR stores, which sell exclusively to tourists.

"Behind every woman there is always more than one perfume" is the message on a commercial for a variety of Cuban and imported perfumes sold by the same chain.

Another, for the Cuban cigar industry, shows a young woman dining with her escort and being bothered by his cigaret smoke. Suddenly she is distracted by the sight of a second bourgeois type happily smoking a Cuban cigar.

A woman's naked back is used in a spot for Cuba's Suchel toiletries and lotions. Black and White whisky, Chivas Regal, Havana Club rum and Cinzano all get a mention in commercials. Hola ground coffee ($6 for one kilo), restaurants, night spots, electrical appliances and Cuban handicrafts are all featured as well.

The Sunshine Channel employs female announcers and broadcasts news, pop videos and films such as "Quest for Fire" and "Lady Chatterly's Lover" late into the night.

Outside the hotels, commercial advertising is nonexistent. However, a giant poster near the resort of Varadero reminds

(Continued on Page 57)

World News Roundup

(Continued from Page 3)

new law limiting private tv ownership to two per person, sources say.

BRASILIA—An AIDS education campaign, the first funded by the Brazilian government, will break in March. Denison Propaganda and two regional agencies handle.

DUESSELDORF—Sonnen-Bassermann, a prepared foods marketer, chose HCM for its estimated $3.5 million account. Sportive Werbeproduktion previously handled.

TORONTO—RJR-Macdonald consolidated its $5.1 million tobacco products account at J. Walter Thompson Co., moving $2.9 million in billings from McCann-Erickson Canada.

FRANKFURT—Seagram Deutschland moved its estimated $2.7 million sparkling wine account to J. Walter Thompson Co. from Doyle Dane Bernbach.

BARCELONA—Cinzano moved its estimated $2.3 million vermouth and bitters account to Tiempo/BBDO from J. Walter Thompson Co.

HONG KONG—Schering-Plough chose McCann-Erickson to handle its Coppertone and Maybelline accounts, formerly with DMB&B.

TOKYO—A bulk-mail rate, long requested by U.S. direct marketers here, will be introduced this fall (AA, Aug. 11).

MANILA—Agency billings dropped 6% in 1986 from 1985 levels.

HONG KONG—Christian Dior fired J. Walter Thompson Co. Saatchi & Saatchi Wong Lam is expected to win the account.

Agency openings and acquisitions: Publicis, Paris, opened a Copenhagen office, called Publicis Daark. . .**The Ball Partnership**, Sydney, acquired Dow McIntosh & Kelly, Melbourne.

AA survey deadline

CHICAGO—The annual international survey of foreign advertising agency billings and gross income will be published by ADVERTISING AGE this spring.

By now, all agencies should have received questionnaires by mail in which they were asked to list their total billings and gross income for 1985 and 1986.

If your agency has not yet received a questionnaire, you should contact ADVERTISING AGE and request a copy as soon as possible.

To get a questionnaire, please do one of the following:

- Write to Ilse Cermak, Foreign Agency Income Editor, International Department, ADVERTISING AGE, 740 Rush St., Chicago, Ill. 60611, USA.
- Send a telex to 687-1231 CRAIN UW or a telefax to (312) 649-5331.

A reminder: Completed forms are due in Chicago no later than Feb. 27. Early filing of the responses would, of course, be appreciated.

Thank you for your cooperation.

Rodney-like aliens invade Lite spot

By MARCY MAGIERA

CULVER CITY, CAL.—It's a close encounter of the disrespectful kind when Bob Uecker, Mickey Spillane and 19 other Miller Lite "all-stars" meet an alien spaceship full of pop-eyed Rodney Dangerfield look-alikes in Miller Brewing's 11th annual "reunion" commercial.

The tv spot, filmed here this month and expected to break in February, reunites 22 celebrities previously featured in Lite advertising for a barbecue at the fictional ranch of rodeo champion Jim Shoulders. As the participants banter over a few Lite beers, a huge spaceship descends on the party. The frightened crowd agrees the aliens probably want the Miller Lite beer, but splits over the reason. The argument ends with the cast, minus one, fleeing when the spaceship opens to reveal hundreds of wise-cracking Dangerfields. The "aliens" scoop up the real Mr. Dangerfield and return to space.

Bob Giraldi once again directed the annual reunion spot for Miller Lite agency of record Backer & Spielvogel, New York.

Miller this year will add a separate Spanish-language execution to the 11-year reunion campaign. In a spot created by Mendoza, Dillon y Asociados, Newport Beach, Cal., athletes Alexis Arguello, Efren Herrera (also seen in the general-audience commercial) and Luis Tiant, entertainers Olga Breeskin, Willie Colon and Eulalio Gonzalez and sportscaster Jorge Berry quarrel over which Spanish dialect—Cuban, Mexican or Puerto Rican—is superior.#

Streibert dies; 1st USIA chief

SYOSSET, N.Y.—Theodore Streibert, 87, first director of the U.S. Information Agency and a founder and chairman of the Mutual Broadcasting System, died Jan. 18 at his home here of cancer.

Mr. Streibert began his widely diversified career with the Harvard graduate school of business administration before going into films and radio. He joined WOR, New York, in 1933 and became president of the radio station by 1945.

He served as chairman of Mutual from 1949 to 1951.

His work for the government started with the Eisenhower administration as a public affairs consultant in West Germany. In 1953, he became head of the new USIA and kept that post until 1957.

Later he returned to the private sector, first as vp of Time-Life Broadcasting and then as president of the Radio Free Europe Fund.#

AdWatch

(Continued from Page 3)

dan, Manning, Case, Taylor & McGrath, New York, because of account conflicts that developed when BBDO combined with Doyle Dane Bernbach and Needham Harper Worldwide to form the Omnicom group.

General Mills' Cheerios grabbed the top spot in the breakfast food category with 7.2% of first mentions, while Big G's Wheaties dropped to third spot with 5%.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Consumers are queried on the first ad they remember over-all from the last 30 days as well as those in a variety of product areas. During December, 1,000 consumers were polled by telephone.

Advertising showing the dancing raisins from the California Raisin Advisory Board (via Foote, Cone & Belding, San Francisco) once again was the most frequently recalled (unaided). The raisins' recall remained at 3.1% in December, the same level achieved in November (AA, Jan. 5).

Following the raisin board, the top 10 in descending order were Coca-Cola, Miller/Miller Lite, Budweiser/Bud Light, McDonald's, Chevrolet, Pepsi, Ford, Levi and Bartles & Jaymes.

Advertising for Anheuser-Busch's Budweiser brand gained 3.8 points, getting 15.7% of first mentions among beer advertisers.

Coors ranked second with 11% of first mentions, while Miller Lite garnered 9%.

Traditionally heavy pre-Christmas ad spending in the cosmetics and fragrance fields boosted ad recall scores for two colognes: Charlie and Forever Krystle.

Charlie added 2.7 points to its awareness level, raising its score to 3.7% of first mentions. Revlon introduced new creative for the brand that features 14 self-assured young women, replacing the single "Charlie girl." The effort is the first from new agency Hill, Holliday, Connors, Cosmopulos, New York.

Forever Krystle continued ads featuring "Dynasty" stars Linda Evans and John Forsythe. Its advertising came to mind first for 3.4% of the sample, up 2.8 points. Rosenfeld, Sirowitz & Lawson, New York, handles.

Maybelline still topped the category, garnering 4% of first mentions last month.

The following are the top three advertisers in other product categories for December:

- **Airlines:** United (14.7% of first mentions); TWA (8.8%); American (8.4%).
- **Apparel:** Levi (10.6%, includes 501 Blues); J.C. Penney (4.0%); Sears, Roebuck & Co. (3.6%).
- **Bread:** Wonder (16.9%); Holsum (3.3%); Colonial (2.5%).
- **Cameras:** Kodak (19.8%, includes Kodak Disc); Canon (11.8%); Minolta (10.2%).
- **Cars & trucks:** Ford (18.6%); Chevrolet (14.4%); Toyota (9.7%).
- **Coffee:** Folger's (23.1%); Maxwell House (20.8%); Sanka 4.6%).
- **Computers:** Apple (27.9%); IBM (17.3%); Radio Shack (3.8%).
- **Credit cards:** Visa (29.6%); MasterCard (21.2); American Express (10.9%).
- **Home electronics:** General Electric (3.6%); Black & Decker (3.1%); RCA (3.1%).
- **Financial institutions:** Merrill Lynch (6.6%); Dean Witter (3.6%, includes Sears); E.F. Hutton (2.8%).
- **Fast food:** McDonald's (45.4%); Burger King (14.0%); Wendy's (6.5%).
- **Frozen food:** Bird's Eye (8.5%); Swanson (5.8%); Stouffer (4.6%).
- **Laundry products:** Tide (24.5%); Cheer (4.4%); All (3.9%).
- **Liquor:** Seagram's (2.8%); Jack Daniel's (2.5%); Bacardi (1.2%).
- **Medicine & drugs:** Tylenol (23.5%); Advil (6.1%); Bayer (5.6%).
- **Pet food:** Alpo (11.7%); Purina (10.5%); Kibbles'n Bits (2.9%).
- **Soap & shampoo:** Ivory (8.7%); Head & Shoulders (5.0%); Prell (5.0%).
- **Soft drinks:** Coke (32.8%); Pepsi (26.2%); 7UP (3.4%).
- **Tea:** Lipton (34.4%); Tetley (3.5%); Nestea (2.4%).
- **Tires:** Goodyear (20.9%); Michelin (15.7%); Firestone (6.8%).
- **Tobacco:** Marlboro (7.0%); Winston (4.6%); Skoal (2.8%).
- **Wine:** Bartles & Jaymes (9.6%); Gallo (9.4%); Riunite (7.9%).#

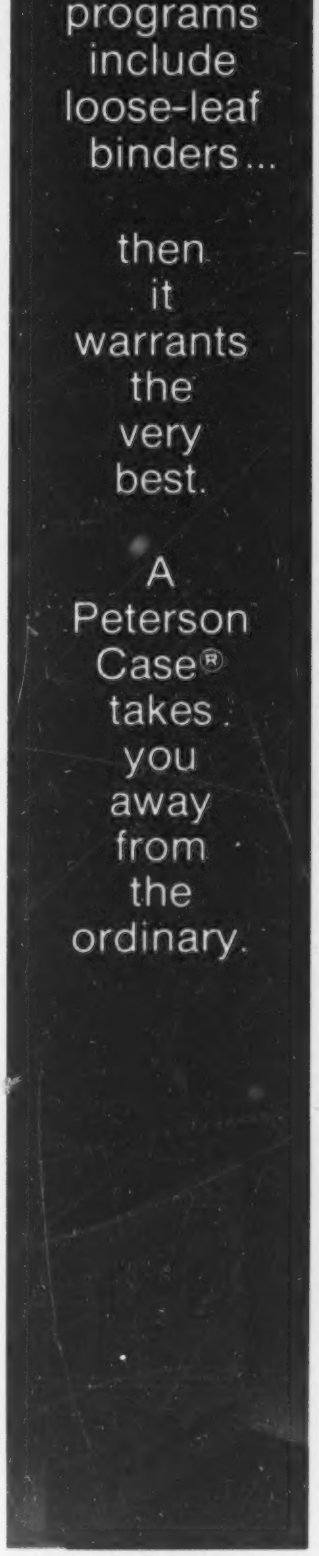
When your clients programs include loose-leaf binders...

then it warrants the very best.

A Peterson Case® takes you away from the ordinary.



A Peterson Case® identifies a uniquely constructed cover. It is an electronically sealed, turned edge, supported vinyl product which affords a rugged durability and exceptionally fine appearance. It can always be identified by the debossed line around the periphery of the lining which is a distinctive feature and has become a trademark of The Peterson Case®.

Many loose-leaf manufacturers incorporate "The Peterson Case®" in their "top-of-the-line" loose-leaf binders.

Ask your usual source for a sample or write to:

Johnston's reign questioned after O'Donnell ousted

By STEWART ALTER

NEW YORK—The crisis confronting J. Walter Thompson Co. is bringing to the forefront questions about the leadership and financial management of parent JWT Group.

Ironically, the swiftness with which JWT Group chairman-ceo Don Johnston acted last week in putting down what he saw as an attempted palace coup, by dismissing his hand-picked successor Joseph O'Donnell and taking the ceo title, is focusing attention on Mr. Johnston's own management of the agency group.

The people are gone but the issues remain: Why does JWT seem to run into crises every few years? And why does it do such a poor job of making money?

These old questions suddenly seem new and critical, especially since the dramatic events have filled Wall Street with the scent of a highly undervalued public company in distress.

And the handling of the events raises the question of whether Mr. Johnston did not overreact and inadvertently put JWT into play.

JWT's dilemma underscores the paradox of public ownership of agencies. Is the agency's com-

(Continued on Page 74)

Don Johnston has assumed control of the J. Walter Thompson Co. agency after firing Joseph O'Donnell, a move that brought little cheer to Wall Street.

Y&R uses Ayer's theme as Army's new agency

By JANET MEYERS

WASHINGTON—Young & Rubicam, the U.S. Army's first new ad agency in 19 years, plans to retain the 7-year-old "Be all that you can be" theme created by N W Ayer, the agency that was fired from the account.

The winner of the controversy-riddled Army shootout isn't likely to give the Army's advertising a new look any time soon, said Louis DiJoseph, Y&R exec vp-group creative director. The Army campaign will undergo a "gradual evolution" into new executions, he explained.

The Army recruiting account "is too big a piece of business to change anything suddenly. It's very complex," Mr. DiJoseph said.

He should know. As Ayer's group creative director from 1979 to 1980, he selected the "Be all that you can be" line from 16 suggestions pinned to a wall at the agency's New York office. That line, he said, was written by former Ayer copywriter Earl Carter.

Mr. DiJoseph, who began his career with Y&R, returned to the agency in 1981.

The Army assignment, he said, is a "terrific challenge. It sounds corny, but you're asking somebody to give up a few years of their life, not trying to talk them into buying a box of soap flakes. It's serious, not trivial. Everybody working on the account feels it."

The account, at about $100 million, also is the largest single piece of an estimated $650 million in new business that Y&R has picked up in the past 13 months *(see chart on Page 73)*.

At Ayer, the mood is a mixture of anger, disappointment and relief. "The government has been playing footsie for their own purposes," said Ayer chairman Louis Hagopian. In his first interview since Thanksgiving, he charged the government with political maneuvering to oust his agency from the account.

"I'm relieved it's over," Mr. Hagopian said. "I'm delighted to be rid of them."

He said his bitterness stems from the Army's insistence on "going back to some old malarkey" in sus-

Last Minute News

Fisher-Price debuts $150 camcorder

EAST AURORA, N.Y.—Fisher-Price is introducing a children's camcorder that records b&w images on standard audiocassettes instead of videocassettes and retails for less than $150, says *Crain's Chicago Business*, a sister publication of ADVERTISING AGE. F-P will unveil the PXL 2000 next week at the American International Toy Fair in New York *(see related story on Page 33)*. Units are expected in stores by early fall. J. Walter Thompson USA, Chicago, handles.

Bates wins $40 million Dole account

SAN FRANCISCO—Castle & Cooke has moved its $40 million Dole Food Co. account to Ted Bates Advertising/New York. Sister Saatchi agency William Esty Co. had held the account since last April.

Ogilvy profits drop 13.9% for quarter

NEW YORK—Ogilvy Group reports net income fell 13.9% to $12.3 million in the fourth quarter of 1986, though revenues were up 12.2% to $168.5 million. For the year, net income dropped 10.8% to $27 million, as revenues rose 14.2% to $560.1 million.

Grape ad spending increases by a bunch

FRESNO, CAL.—The California Table Grape Commission, expecting unusually large grape crops this year, will boost its ad and promo-

(Continued on Page 8)

Highlights

Y&R won't shoot down Ayer theme 1
Young & Rubicam, the U.S. Army's first new ad agency in 19 years, plans to retain the 7-year-old "Be all that you can be" theme created by N W Ayer, the agency fired from the account. The Army campaign will undergo a "gradual evolution" into new executions, said Louis DiJoseph, Y&R exec vp-group creative.

Juicy new market 3
The Food & Drug Administration's recent approval of aspartame for juices and related categories is likely to bring another spurt in ad spending, as a half-dozen major marketers plan new low-calorie drinks and frozen novelties using the noncaloric sweetener.

Airing condom ads 4
The nation's three leading condom marketers are racing to air tv spots as the number of stations willing to accept an anti-AIDS marketing approach increases daily.

Hormel unpacks microwave entrees 6
In a bold departure from its meat-packing base, Geo. A. Hormel & Co. is entering and expanding the microwave entree category. The Austin, Minn.-based company this week begins testing a line of shelf-stable microwave dinners under the Top Shelf name, which will pit it against package-foods giant General Foods.

Tv viewers play along 12
Mattel Inc. and its MTS Entertainment tv syndication arm hope to blast children's programing into a new era in September with new "interactive" toys and tv series. Along with Axlon Inc.'s MotoMonsters & the Tech Force, Mattel's Captain Power & the Soldiers of the Future may be this year's biggest innovations in the blossoming high-tech segment of the toy business. The syndicated tv shows allow viewers at home to play along.

DIRECT MARKETING

Food chains expand into direct mail 24
Rising costs for media advertising, coupled with the increasing media dominance by a handful of national competitors, are convincing many smaller restaurant chains to explore direct marketing. The shift is good news for Communicorp, a marketing agency specializing in direct mail for restaurants.

FEATURES

Fingerprints of a fine ad 41
Al Hampel, a longtime champion of print advertising who now heads Hampel Creative, a New York-based consultancy, rates some of this year's print ads. Gaining the reader's attention is really very simple, he says. All you have to do is make your ad as interesting as the editorial surrounding it.

INTERNATIONAL

Classifieds under Cuba's covers 46
In the second of his two-part series on marketing and commerce in Cuba, Advertising Age's Mexico City correspondent Stephen Downer reports Cuba will allow the reintroduction of classified advertising in at least one magazine within a few months.

A yen to stop ad sales tax 48
Some Japanese advertising industry leaders are urging changes in the government's proposed sales tax, fearing the new levy could cost the industry as much as $1 billion a year when it takes effect Jan. 1.

OTHER NEWS

Chrysler Corp. may have pulled out of the 14½-hour ABC miniseries "Amerika," but it could still have to pay the network as much as $6 million for the time it had ordered. Chrysler's announcement last week that it was withdrawing its support for the controversial "Amerika" has created an unusual and potentially explosive standoff between the nation's 22nd-largest advertiser and ABC. Page 3.

Some major toy marketers are proceeding with plans to introduce new action figures and fantasy dolls despite strong consumer interest in high-tech toys during the 1986 Christmas selling season. The industry's new-product strategies go on display next week at the 84th annual American International Toy Fair in New York. Page 33.

American Motors Corp. is adopting a comparative ad strategy as it tries to convince consumers to consider new, larger and more expensive Renault models. Its subcompact models squeezed by stiff competition, AMC is moving up to the compact segment with its new Medallion line and backing the model with an estimated $10 million media launch that begins March 1. Page 60.

Weyerhaeuser Co., the nation's leading supplier of private-label disposable diapers, is taking on Procter & Gamble and Kimberly-Clark with its first branded entry, First Choice diapers, priced 10% below the leaders. Page 78.

SPECIAL REPORT

The 12.5 million 18-to-24-year-olds in the collegiate market account for half of discretionary purchasing in the U.S. Many marketing strategists see collegiate advertising as a good investment because they predict that brand loyalty patterns will continue.

WILLIAM STRONG, vp-circulation; JOHN HUFFMAN, fulfillment director; DAVE KELLEY, circulation manager. Four weeks' notice required for change of address. Address all subscription correspondence to Circulation Department, Advertising Age, 965 E. Jefferson, Detroit, Mich. 48207 (313) 446-0494.

Giveaway
Continental has ticket to notoriety

By BRIAN MORAN

New York—Continental Airlines expects last week's court-ordered grounding of an admittedly "preposterous" ticket giveaway promotion will still pay big consumer awareness dividends.

National media attention surrounded New York City's refusal to permit Continental to pass out as many as 1 million free tickets. But the media eye immediately lifted the profile of an alternative promotion hatched by Continental and its new sister carrier, Eastern Air Lines.

Following the collapse of the ticket giveaway stunt, Continental and Eastern within hours introduced MaxSavers, a joint fare-slashing program designed to undercut competitors' super-saver prices.

In their first joint marketing effort as members of Frank Lorenzo's Texas Air Corp. empire, Continental and Eastern until May 20 will promote fares to all domestic destinations at up to 40% less than super-saver fares.

The promotion also reduces the advance booking requirement for discounted tickets to two days, down from 30 days on competitors' super-saver tickets.

The Continental-Eastern move touches off a new round of industry fare wars.

American, United and Trans World Airlines said they would match the MaxSavers fares on competitive routes. Delta and Northwest said they were considering similar moves.

MaxSaver tickets will be nonrefundable, an industry first and a potential pitfall in the marketing plan.

Houston-based Continental breaks tv commercials today in the top 15 markets supporting the promotion. The spots show a super-saver ticket being ripped apart and continue the new "Up where you belong" ad theme from N W Ayer here.

Miami-based Eastern is promoting the fares with newspaper spreads themed "Cut out America" that feature a map of U.S. destinations.

Eastern also is running radio spots; no tv is planned. Campbell-Ewald, Warren, Michigan, handles.

Continental, which recently broke its first-ever corporate image tv commercials, calling attention to its Feb. 1 takeover of People Express Airlines and New York Air (AA, Jan. 19), wanted to celebrate the event with a ticket giveway Feb. 1 at Madison Square Garden. But city officials, citing safety problems with an expected crowd of at least 250,000, sued Continental.

When a judge ruled in favor of the city, Continental made an 11th-hour bid to the Meadowlands sports complex in New Jersey, site of a celebration last week for the Super Bowl champion New York Giants.

Meadowlands executives were willing to listen to the airline's idea but were not willing to give a quick enough "yes" to hold the event Feb. 1, according to Continental marketing services vp James O'Donnell.

Continental said it worked with the city for six weeks on logistics for security at the Garden. Mr. O'Donnell said the airline conducted time-and-motion studies

West Coast News

Marineland goes belly up, leaving JWT out $2M

Los Angeles—J. Walter Thompson/West will lose $2 million in billings following the planned March 1 closing of Harcourt Brace Jovanovich's Marineland tourist attraction. The Palos Verdes Peninsula aquatic park anticipated it would lose $2 million this year unless it made $8 million in improvements.

Los Angeles—**James Spero**, a 16-year veteran of Doyle Dane Bernbach, will join Bozell, Jacobs, Kenyon & Eckhardt/Pacific as senior vp-media director, replacing Nelda Chambers, who is leaving the agency. Also leaving DDB is associate creative director Mas Yamashita, who will join Chiat/Day in a similar capacity. Mr. Yamashita succeeds Jeff Roll, who is moving to a senior creative position at Keye/Donna/Pearlstein, Los Angeles.

Encino, Cal.—**Arden-Mayfair** division Gelson's Markets hired Scott Lancaster Mills Atha, Los Angeles, as its first agency. The 30-year-old upscale supermarket chain with seven units will spend about $2 million annually. First ads are slated for March.

Los Angeles—**Merle Norman Cosmetics** named four agencies to compete against incumbent Della Femina, Travisano & Partners, New York, for its estimated $3 million-to-$5 million account. They are Asher/Gould, BBDO/West, Ogilvy & Mather and Ramey Communications. Presentations will be Feb. 11 to 13.

Los Alamitos, Cal.—**Button Industries**, licensor of Slim 'n Trim dairy products, is acquiring Glendale-based Johnston's Foods Co. from French owner Bonn Grain/Columbo. The acquisition will boost Slim 'n Trim's ad budget 30% to about $3 million. The Slim 'n Trim account, unassigned since Dec. 1, previously was handled by Keller-Crescent Co., Evansville, Ind.; Johnston's also is unassigned. The company is contacting agencies.

Hayward, Cal.—**Mervyn's**, a Dayton Hudson Corp. division, has narrowed the review for its $17 million broadcast account to Foote, Cone & Belding and Hal Riney & Partners, both San Francisco. Ads are currently in-house.#

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service, total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page
   Width and Depth in Inches
2. Determine Square Inches of Page
   Multiply Width by Depth Inches
3. Determine the Number of SAU Inches of Page
   Divide the Square Inches by 2.0625 (SAU Inches)
4. Measure the Total Lines of the Page
   Multiply Column Depth Agate Lines by the Number of Columns on the Page
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches
   Divide the Total Lines of Page by the Number of MRCS SAU Inches of the Page

Bonuses out, ads back in as Cuban economy worsens

By STEPHEN DOWNER

Editor's note: In the second of his two reports on marketing and commerce in Cuba, Advertising Age *Mexico City correspondent Stephen Downer examines the state of the Cuban consumer economy.*

Havana—Cuba will allow the reintroduction of classified advertising in at least one magazine within a few months, according to the Cuban Journalists' Union.

"There will be a magazine with classified ads, but there will be much greater control over it than before," said union president Julio Garcia.

Mr. Garcia said classified advertising will reappear in general-interest magazine *Opina*, which printed the ads for several years before the government outlawed them a year ago.

"People were using them to promote illegal businesses," said Mr. Garcia.

Another magazine, *Tribuna*, published classified ads for several months before the government clamp-down.

The projected lifting of the ban is an indication that Marxist-dominated Cuba's experiment with capitalist practices is not entirely finished as it struggles to overcome its economic crisis. But whatever steps it takes in that direction apparently will be small.

In a speech closing the third Cuban Communist Party Congress in early December, President Fidel Castro explained why the party had abandoned capitalist-style bonus systems in factories, despite the need for greater efficiency.

"Our man disguised as a capitalist produced whatever he felt like," said Mr. Castro. "He didn't care about quality. . .companies began to sell at high prices, to overcharge in order to turn a profit by year's end."

Mr. Castro argued: "A Communist consciousness and spirit, a revolutionary vocation and willingness were, are and always will be a thousand times more powerful than money."

The morning after the speech, Channel 6, one of two national tv networks, presented a discussion between a government official and a journalist on the merits of a small piece of Cuban-produced cable.

"The quality leaves a lot to be desired," the government official said. "This is something that could be exported. But how can you export it when it looks like this," he complained, referring to the plastic wrapping.

Mr. Castro said Cuba experienced a 40% decline in foreign earnings in 1986 because of one of the worst droughts of the century, a drop in the price of oil Cuba gets from the Soviet Union and the high price of imports from the West, sparked by a decline in the value of the U.S. dollar.

"Serious difficulties have been created," Mr. Castro said, adding that imports from countries such as Canada, Japan and Spain, Cuba's main Western trading partners, would be reduced from $1.2 billion in 1986 to $600 million in 1987.

Jose Luis Rodriguez, deputy director of the Cuban World Economic Study Center, said productivity is not a problem in Cuba. "The problem is international prices for raw materials and agricultural products," he said.

In 1974, he said, sugar was sold on the open market for 29¢ a pound. In 1985, the price was 4¢ a pound. "In 1981," he said, "Cuba earned $866 million from sugar sales on the open market. In 1985 it earned $171 million."

Mr. Rodriguez said Cuba would try to ride out the crisis by eliminating purchases of new technology and making better use of existing resources,

Spirited debate

Tariffs threaten $30M in advertising

An Advertising Age roundup

The Reagan administration's plan to impose 200% tariffs on $400 million in goods imported from Common Market countries could devastate some distilled spirit and wine importers, imperil more than $30 million in advertising and force a trade war, observers warn.

Among European products targeted are French brandy and cognac (a $165 million category in the U.S.) and English gin ($72 million).

The tariff is in retaliation for U.S. grain sales lost when Portugal and Spain joined the European Community (EC), thereby adopting the group's higher import duties.

Industry officials say a 200% duty on imported brandy, cognac and gin would sharply reduce U.S. marketing of those products, which represent about $30 million to $35 million in advertising annually.

"If I'm going to lose 50% of my sales, which is not inconceivable, I'm certainly not going to continue spending $7 million a year on advertising," said Richard Shriner, senior vp-marketing for Kobrand, New York, marketer of Beefeater gin.

Kobrand's Beefeater and Tanqueray, which is marketed by Distillers Somerset, New York, are the leading imported gins in the U.S. Tanqueray depleted 1.17 million cases in 1985; Beefeater depleted 1.12 million. AC&R, New York, handles Beefeater; Smith/Greenland, New York, handles Tanqueray.

Mr. Shriner says the tariff would almost double gin's retail price, pushing the price of a bottle of Beefeater to $18.75 from about $10.50. That could cost James Burrough PLC, London, which makes Beefeater gin, as much as two-thirds, or $10 million, of U.S. sales.

Marketers say the lower retail prices would give Soviet imports a marketing edge. "If someone goes into the store and is looking for a prestigious drink and has the choice between Russian vodka at $11 or an English gin at $18, what are they going to go for?" said Don Gregory, Burrough's export director. Bartle Bogle Hegarty, London, handles Beefeater.

Villa Banfi, which makes Riunite Lambrusco, stands to lose much of its $96 million in U.S. white wine imports. Managing director Izio Rivella said the company "will have to work very hard to maintain our position in the U.S. market."

The Cognac Information Bureau, New York, estimated the average 750ml bottle of French cognac would jump from $18 to $38, causing sales to drop as much as 80%.

The brunt of the trade issue falls on six U.S. companies, "which is grossly unfair to us," Kobrand's Mr. Shriner said.

Besides gin marketers Kobrand and Distillers Somerset, they are cognac sellers Remy Martin, New York; W.A. Taylor & Co. (Courvoisier), Miami; Schieffelin & Co. (Hennessy), New York, and J. & F. Martell, New York.

The U.S. is the No. 1 overseas market for French cognac.

"The idea of building the brand through advertising and public relations would be too expensive," said Evan Galbraith, chairman of Moet-Hennessy U.S. "It would end the market in the U.S."

He predicted an all-out trade war if the controversy is not resolved. The EC already has proposed increasing the duty on U.S. corn gluten and rice, which affects about $402 million in U.S. exports, an EC spokeswoman said.

Sources in Washington say the U.S. has prepared a "hit list" of European imports, targeting German autos and Scotch whisky, for higher import duties.

As of last week, the EC and the Reagan administration had only agreed that they had to reach a settlement of the issues by Jan. 30. Whether that meant agreeing to a trade war or agreeing to drop all "unreasonable" tariffs remained to be seen.

Contributing to this story were Julie Franz, Chicago; Michelle McCarter, Rome; Sean Milmo, London; Claire Wilson, Paris, and Patricia Winters, New York.

Stars & Stripes skipper Dennis Conner's hat proclaims his success at signing Pepsi-Cola and other corporate sponsors for his America's Cup yacht racing syndicate.

Sell on

Conner says g'day to Philip Morris, Pepsi

By ROBERT RAISSMAN

The America's Cup may be safely tucked away in the San Diego Yacht Club, but the race to enlist new corporate sponsors for both the yacht, Stars & Stripes, and its skipper, Dennis Conner, continues at a breakneck pace.

Representatives of the San Diego Yacht Club's Sail America syndicate, with Mr. Conner himself making the corporate contacts, have received $10 million in new commitments from sponsors.

The money will be used to pay off debt from the current Stars & Stripes campaign and to finance the defense of the cup in 1990 or 1991.

Mr. Conner last week avenged his historic 1983 loss to Australia by skippering Stars & Stripes to a 4-0 sweep of Kookaburra III in Freemantle, Australia, to regain the cup.

He thus became the first American ever to win, lose and then regain the yachting championship. (Mr. Conner first won the America's Cup in 1980 as skipper of Freedom, then lost the title in 1983 with Liberty.)

Sources said Philip Morris USA is

Competitors face Big Mac promo attack

By SCOTT HUME and PATRICIA WINTERS

McDonald's Corp., the nation's No. 1 fast-food chain, is preparing a nationwide promotional-marketing event, and this time Big Mac is upping the ante.

A scratch-card game involving up to $65 million in prizes—including free food and cash—and tied to Parker Brothers' popular board game Monopoly reportedly will be launched April 3, according to industry sources.

As with its previous games, prizes include free food—$20 million worth, say these sources. But McDonald's plans to give away anywhere from $30 million to $45 million in cash during the six-to-eight-week promotion, according to source estimates.

TV advertising support, from Leo Burnett USA, Chicago, could top $25 million.

Simon Marketing, Los Angeles, and Frankel & Co., Chicago, are coordinating creation of the promotion.

Oak Brook, Ill.-based McDonald's, which recently announced global sales of more than $12 billion for 1986, declined to confirm the promotional plans.

That kind of massive national marketing effort, anchored by heavy network TV buys, runs counter to a shift toward local marketing and promotion many chains are making to combat flat sales and increased competition.

While declining to discuss its local/national marketing spending strategy, Burger King Corp. President Charles Olcott said in a

Miller in huge buy for '88 Olympics

By VERNE GAY

New York—Miller Brewing Co. is close to signing a spectacular multimillion-dollar 1988 Olympics advertising deal with NBC-TV and ABC-TV.

The huge deal, believed to be worth more than $25 million on NBC alone, represents the largest advertising commitment to date for the 1988 Summer Olympics in Seoul, South Korea, and the 1988 Winter Olympics in Calgary, Alberta.

NBC, which will telecast the Summer Games beginning September 1988, has reportedly sold up to 50% of all inventory to a number of other major advertisers, including Eastman Kodak Co., Coca-Cola and Federal Express Corp.

As part of the Summer Olympics deal, Miller also becomes NBC's exclusive beer sponsor on its Saturday Major League Baseball broadcasts for the next three years.

The Milwaukee-based brewery has also agreed to what amounts to one of the most unusual media deals of the decade with ABC. According to sources, the Winter Olympics package also includes a three-year partial beer sponsorship of ABC's "Monday Night Football." That deal, however, is contingent on ABC re-signing with the National Football League for the games.

The current NFL network TV contracts have expired, and negotiations on a new broadcast package begin this month. The Miller deal could have a major impact on the outcome of those talks.

Sources said the Miller deals do not amount to a preemptive strike against archrival Anheuser-Busch. Both brewers have shared "MNF" for several years. A-B probably will agree to a continuation of the beer category split on "MNF" and is expected to pick up the other half of the beer category on the Summer Olympics.

Miller's NBC deal will apparently be for one-half of the total Summer Olympics beer sponsorship.

Details on rates paid by Miller remain scant, although industry observers said the brewer secured lower-than-average rates on

Last Minute News

VW enters 'Amerika'

Troy, Mich.—Volkswagen U.S. has purchased "at a lucrative discount" 12 30-second units in ABC-TV's controversial miniseries, "Amerika." The time previously was held by Chrysler, which on Jan. 27 pulled 37 units, worth more than $5 million, from the program. ABC could lose as much as $3 million on "re-expressing" Chrysler's "Amerika" time in other programming. Chrysler now will pay the ABC per-unit rate for the new shows, which will generally be less than the $142,000 ABC sources say Chrysler paid for "Amerika." Any advertiser transferring into "Amerika" from another ABC show will still pay

JWT alarms Wall Street with losses

By STEWART ALTER

JWT Group last week said it will post a $5 million-plus fourth-quarter 1986 loss, which Wall Street analysts are calling "serious" and "scary."

These analysts, who point out that the fourth quarter traditionally is a profitable one for ad agencies, left unimpressed from their first meeting with JWT Group Chairman-ceo Don Johnston since he ousted Joseph O'Donnell from JWT (AA, Feb. 2).

Agency execs discuss public vs. private. See Page 70.
Do JWT's problems make mega-mergers look good? See Page 48.

According to reports of the meeting, Mr. Johnston read from a prepared text and disclosed two previously unreported facts about the fateful Jan. 20 meeting at which Mr. O'Donnell, who held the title of chairman-ceo at J. Walter Thompson Co., first presented his proposals to restructure JWT Group and have Mr. Johnston step down as JWT Group ceo.

First, it was Mr. O'Donnell who requested the presence of JWT General Counsel Stephen Salorio and, second, ousted JWT President-Chief Operating Officer John Peters also was at the meeting.

Although seemingly minor, the fact that Messrs. Salorio and Peters were present tends to support a growing belief that Mr. O'Donnell

Buying power bursts poverty-stricken image

By Ed Fitch

A *pinata* promises players a shower of treats, typically candy, fruit and pocket change. Those involved in selling the hispanic market make a similar promise to interested advertisers—except they promise more than small-change results.

To attract more players, hispanic marketers and media want to clear corporate America's vision of the segment's purchasing power and erase the stereotype of the impoverished hispanic.

Market watchers are amazed by the segment's population growth, from about 14.6 million in 1980 to 18.9 million this year. Although astounding, this oft-repeated figure is not news and obscures new wrinkles in the market's complexion. "The most dramatic finding of our ["1987 U.S. Hispanic Market Study"] study was the jump in household income, not the rate of population growth," says Richard Tobin, president, Miami-based Strategy Research.

Growth in hispanics' median income kept pace with that of the total U.S., rising 15.1% from $19,900 in 1985 to $22,900 in 1987. The total U.S. figure increased 15.5% to $32,800 during the same time period.

The hispanic market's aggregate household income rose 27.9% from $123.4 billion in 1985 to $157.8 billion this year, representing $134.1 billion in purchasing power, according to Strategy Research. During the same time period, the hispanic population rose 7.5%.

"The bottom line income of hispanics is growing at a faster rate than that of whites or blacks," says Robert Hitchens, VP-marketing, Univision/Spanish International Network, New York. From 1980 to 1984, after-tax income per U.S. household increased 8.7% annually, as hispanics' grew 12.5% annually, he says.

"Hispanics, of course, are starting at a lower base," he says.

Asians share certain hispanic values

Marketers who find targeting hispanics intimidating shouldn't bother reading this story. They won't be comfortable with the following: Another immigrant group is on the rise, one that will make forays into the hispanic market seem like a picnic.

"The U.S. Asian market is much more complex," says Ruben Lopez, marketing director for special projects, Metropolitan Life Insurance Co., New York. "There are more languages, more cultures, more subtleties to deal with."

In addition to this marketing conundrum, Asians probably never will exceed hispanics in sheer numbers. Although the Washington-based Population Reference Bureau estimates the U.S. Asian population will double to 10 million by 2000, that figure falls far short of the 27 million to 30 million U.S. hispanics forecast by century's end. Asian immigrants bring some tempting gifts to the party, however. They generally are better educated and have more disposable income than recently arrived hispanics, Mr. Lopez says.

Met Life marketers have found targeting the U.S. Asian market even more inscrutable than the hispanic segment.

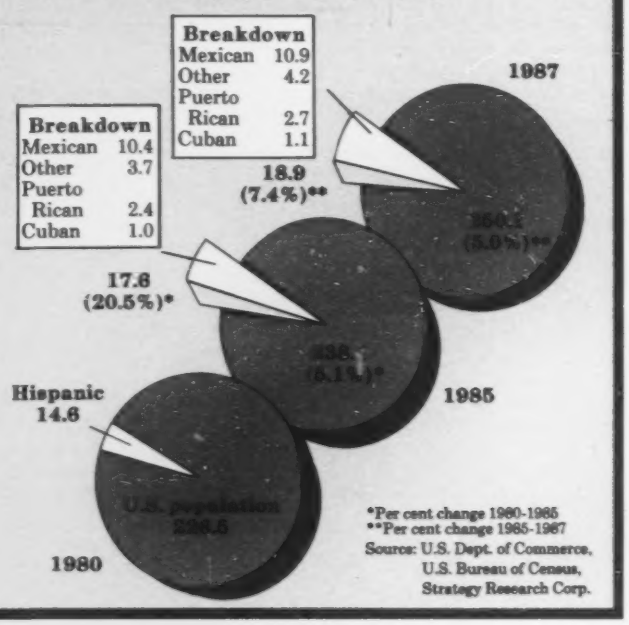
In fact, U.S. Asians had a 1980 median family income of $23,000 compared with a total U.S. figure of $20,000. And some 32% of Asian adults are college educated compared with 17% of white adults.

Enough similarities exist between the hispanic and Asian immigrant groups that Mr. Lopez has been placed in charge of Met Life's attempts to reach both. His description of the Asian market sounds like an attitudinal profile of a typical U.S. hispanic. "They are conservative, traditional and

(Continued on Page S-6)

Redefining the "population bomb"

Total population (000,000)



Buying power

(Continued from Page S-1)

couraging."

Because average weekly household grocery expenditures have increased from only $99 in 1984 to $102 in 1987, the "increased household income is going to other products," Mr. Tobin says, particularly more high-ticket goods.

"Hispanics no longer are being looked at simply as people who have headaches, sinus trouble and eat," says Mr. Hitchens. "They are being recognized as targets for financial services and computers. That should put the change in perspective."

Many assumed all hispanics were on welfare, says Alicia Conill, who heads Conill Advertising, a New York-based hispanic market ad agency. "That's never been true, but the realization it's not true is just coming out in the marketplace. A lot more hispanic women are working, which is having an effect on the increase in disposable income."

The latest employment figures show 49% of hispanic women work vs. 53% for the general market, says Dale Dauten, president, Research Resources, Westlake Village, Calif. "And more than half the nation's hispanics own their own homes. In fact, if you count income and non-cash benefits, only 11.4% of hispanics are living below the poverty line."

Despite this, many companies that sell premium items, regardless of their price, don't target hispanics, he says. "Even those selling premium soap won't consider their products appropriate."

Hispanics select products from a smaller universe because fewer brands are distributed and advertised to them. "This not only shrinks the brand pool, it shrinks it in favor of premium brands because they view these as a guarantee they will like the product. To them, premium price is a guarantee of quality," Mr. Dauten says.

Premium quality also will fetch premium sales, says Carlos Rossi, Conill's president and ceo. "If a product's quality matches its premium price, they'll buy it; they buy products on a cost-value relationship. Companies' perception that big ticket products are priced out of hispanics' reach is not realistic."

In 19 markets, automobile sales to hispanics jumped 36%, while general market auto purchases went up 23%. "Now that's a pretty lusty increase in sales of a big-ticket item," Mr. Hitchens says.

In 1986 companies asked Univision to produce hispanic product consumption studies for categories like candy, footwear, analgesics, cereals, tires and cosmetics—nothing too surprising. But, he says, marketers also requested usage information on photography equipment, large appliances and life insurance, highlighting the market's migration into higher price-tag product categories.

"We've always had the food and household care products," says John Pero, Univision's VP, national sales manager. "But we're branching out as new categories become interested. More companies are looking at the market because its income level is moving into their realm."

The trend will snowball as hispanic consumption evolves into new areas. "For example, now that automotive marketers are targeting the market, after-market advertisers will follow naturally," he says.

The most natural pull for advertisers, however, will be the magnetic attraction of consumer dollars. "With a $134 billion potential, the market has become very attractive to Eastern," says Rob de-Cespedes, manager-international advertising at Miami-based Eastern Air Lines. "Travel, for example, has come within the reach of a greater number of hispanics."

The income of hispanics who have lived in the U.S. for 10 or more years—and this segment's numbers swell daily—equals or exceeds that of non-hispanics, says Ruben Lopez, marketing director-special projects, Metropolitan Life, New York. "It is a natural evolution." The longer they are in the U.S., the higher their incomes and education, he says.

"The hispanic that is attracted to Met Life's product earns $25,000, $30,000 or more," Mr. Lopez says. "In that regard, they don't differ too much from Met Life's non-hispanic customer."

This raises great speculation over future targeting methodology. As their income grows, hispanics theoretically will become more like the general market and could then be targeted increasingly in terms of income level rather than by nationality. Met Life already segments the market along income lines, Mr. Lopez says.

"This is the first time the market is segmenting more on income lines," says Arturo Villar, publisher of *Vista*, a Coral Gables, Fla.-based, English-language, hispanic-oriented newspaper insert. Income analysis has been performed on a market-by-market basis, he says. "For example, Miami is richer, so that's the place to sell upscale." This approach is simplistic, Mr. Villar says, because "even in Miami there is income stratification."

Current targeting factors like cultural composition will diminish in relevance as the market continues its upscale odyssey, he says. "As income rises, there are less differences and more commonalities among hispanics, whether they have a

Amnesty impact borders on dramatic

In describing the U.S.-Mexican border, a word like "sieve" invariably comes to mind. In recognizing the border's porousness and attempting to seal it, Congress passed the ominous-sounding Immigration Reform & Control Act of 1986, which took effect last Nov. 6.

The law holds stiff penalties over employers' heads—up to $10,000 per illegal employee and six months in jail—who hire illegal aliens. It also offers an amnesty program for those undocumented aliens who can prove continuous, illegal U.S. residency since January 1982.

The latter provision could have a significant effect on both the size of the hispanic market and its demographic profile. Currently, the U.S. Census Bureau adds a 200,000-person fudge factor into its official tally to account for undocumented aliens, says Richard Tobin, president, Strategy Research, Miami.

"But 1.8 million illegals were turned back at the border in 1986 alone," he says. "And the Immigration and Naturalization Service estimates that the ratio of attempted crossings to successful crossings is either 1-to-1, 1-to-2 or 1-to-3." That translates into 1.8 million to 5.4 million undocumented hispanics entering the U.S. last year alone.

Census Bureau analysts take a less extreme view, estimating the total group of hispanics eligible for the amnesty program will total 2.5 million to 4 million, says Edward Fernandez, special assistant at the Census' Suitland, Md.-based Population Division. "I don't think the numbers will be radically affected by the amnesty program because I feel a good portion did report in the 1980 Census."

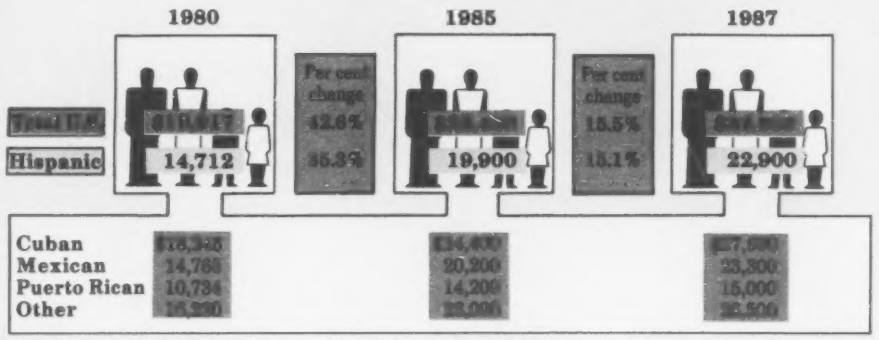
He credits talk of an amnesty program back then—"by taking part in the Census, they could prove residency"—and a major push for hispanic participation with boosting 1980 involvement. "This helps explain the phenomenal 61% growth from the 1970 to 1980 Census," he says.

He admits the official Census figures are almost comical. "In 1980 the Census reported there were 17,000 people of hispanic

(Continued on Page S-6)

Keeping pace with the nation's dollar power

Median family income



Sources: U.S. Dept. of Commerce, U.S. Bureau of Census, Strategy Research Corp.

Amnesty

(Continued from Page S-2)

origin in Washington, D.C.," Mr. Fernandez says. "The figure is a total absurdity. Hispanics were laughing at it."

Some say the program will cause a substantial blip in the population growth curve. Eduardo Caballero, president of New York-based Caballero Spanish Media says the result will be a 20% increase over 1990 Census projections.

Dale Dauten, who heads Westlake Village, Cal.-based Research Resources, says that although he feels a 2 million to 5 million increase is pretty realistic, the program also may make some 8 million to 12 million relatives currently residing in other countries eligible for citizenship. "The program's main effect will be to close off the illegal flow and open up the legal flow."

Visions of a torrent of legal crossings has some marketers flying high. "It is inevitable the immigration law will increase our business," says Rob deCespedes, manager-international advertising at Miami-based Eastern Air Lines. Instead of wading the Rio Grande to visit family or their homeland, the newly documented will fly and walk through customs.

Between 1.8 million and 5.4 million undocumented hispanics may have entered the U.S. last year.

Hispanic media and agencies pushing much less glamorous products also will benefit from larger numbers, says Alicia Conill, head of the New York-based agency that bears her name. "We know the undocumented are out there, and we know they buy Campbell's soup and Dial soap. But now they will be an official part of the market and their contribution to it will be counted."

Although the program invariably will boost the market's numbers, it may cause it to stumble in its quest for upward mobility. Those who become legal under the amnesty offer, says Mr. Fernandez, "will be the lowest strata of hispanic society." Their income, educational and acculturation levels will be at or near the bottom of the segment, he says.

The program also may fail miserably in achieving its main goal of tightening up the border. "The undocumented are in a state of desperation to escape a life they cannot continue living; they will leave at any cost," he says. "They are not tourists."

—Ed Fitch

In South Florida, nearly a million people think in Spanish, do business in Spanish, make love in Spanish and you're advertising to them in English.

They won't buy that.

There's only one way to reach one of the most dynamic markets in the country. In their language. On their station. For more information call your Univision sales representative or Blaine Decker, Vice President and General Sales Manager, WLTV Miami, at (305) 856-2323.

WLTV. Channel 23. America's highest rated Spanish TV station.

Asians

(Continued from Page S-2)

maintain their native language. They are family oriented and feel a strong need to improve their education. "In fact," he says, "these tendencies are more accentuated in the Asian market."

These similarities give companies that have come to grips with the hispanic segment a distinct advantage in pursuing the Asian market. "We use the hispanic market as a prototype for our efforts in the Asian market," he says. "A lot of what we learned in the hispanic market can be applied to the Asian market."

—Ed Fitch

Moms-and-pops out of TV ownership picture

By Marie Spadoni

In the wake of a booming hispanic market, the Spanish-language TV industry suddenly is hotter than a *chile*. The business is on the verge of a new era, rife with ownership changes and increased competition.

The reason for the upsurge is that the Spanish-language TV business is speaking a language any company understands. Last year, advertisers spent nearly $400 million on Spanish-language media, a 19.9% increase from $333.5 million in 1985. Although this is a fraction of general media expenditures, the business is on an established growth track. Ad expenditures totaled $224.4 million in 1983 and $284.5 million in 1984, according to *Hispanic Business*, Santa Barbara, Calif. Growth from 1983 to 1986 stands at 78.3%.

A more sophisticated management style may be the primary result of the ownership changes and consolidation. "There will be no effect other than Spanish-language TV might get that much more sophisticated with the presence of true U.S. business savvy," says Sharon Armbrust, analyst with Paul Kagan & Associates, Carmel, Calif.

The business has outgrown its humble beginnings, says an industry source. "It was not benefitting the industry to be in the hands of people who didn't know where to take it from here. What hispanic media needs is true broadcast management."

"Those days of mom-and-pop ownership have slowly disappeared as the market has matured," says Daniel Villanueva, president of KMEX-TV in Los Angeles. "As with banks and airlines, hispanic media is going the way of American business."

That maturation process—more than two decades of slowly built groundwork—accelerated last year with the Federal Communications Commission-mandated sale of 10 stations owned by Spanish International Communications Corp.

Pending FCC approval, the stations will be purchased for $301.5 million by Kansas City, Mo.-based Hallmark Cards and First Capital Corp. of Chicago.

In addition, a new Spanish-language network, New York-based Telemundo Group, was recently organized to challenge the long-running domination of Univision/Spanish International Network.

Univision, the New York-based satellite programming service and sales representative organization, currently reaches a possible 82% of U.S. hispanic households through its more than 400 affiliates.

Telemundo Group—formed by Saul Goldberg's Reliance Capital Group, New York—unites NetSpan and BlairSpan, two hispanic programming and sales representative services, and controls four owned-and-operated, Spanish-language stations.

"Our intention is to purchase additional stations in the top 10 markets, and to work with affiliates in smaller markets," says Henry Silverman, Reliance's ceo.

Although it's off to a good start—its four stations serve Los Angeles, Miami, New York and San Juan, Puerto Rico—Telemundo has substantial ground to cover before its clout and coverage mirror Univision's.

In 1985, when it was still called SIN Television Network, Univision controlled an estimated 85.4% of all hispanic TV ad dollars, according to *Hispanic Business*.

"For 25 years, SIN had a monopoly in Spanish TV," says Mr. Silverman. "For the first time, there is competition. Now viewers have a choice." The new network's first national broadcast, a news program, aired Jan. 12.

More programming than the nightly news will be affected by increased competition. For example, Telemundo will begin producing in the U.S. this year; with the exception of news, most Spanish-language programming is currently produced outside the U.S. "We think U.S. hispanics would rather see *novellas* that are more relevant to their life here in the U.S.," says Mr. Silverman, whose company is earmarking $20 million for 1987 programming.

Perhaps in response to Telemundo's efforts, Univision has beefed up its news program for 1987. "We are not resting on our laurels," says Robert Hitchens, vp-marketing for Univision.

"Viewers will see some things they have not seen before," says Mr. Villanueva. Spanish-language TV had been criticized by some for offering programming its managers and owners be-

Cuban, Mexican or Puerto Rican background. There are more differences, including cultural, among Mexican-Americans living in Los Angeles at varying social, income and educational levels than there are among those living at the same level regardless of their heritage or where they live," Mr. Villar says.

In the past, where hispanics lived provided a convenient clue to their nationality. Although the Southwest remains mainly Mexican-American and the Northeast predominantly Puerto Rican, the geodemographic guidelines now are increasingly fuzzy.

"The wisdom is that a Puerto Rican appproach will work in New York," says Mr. Hitchens. "But 46% of the hispanic population is non-Puerto Rican, so you can't approach it simply as a Puerto Rican market."

This transcultural blending only will intensify, says Edward Fernandez, special assistant, Population Division, U.S. Census Bureau, Suitland, Md. "The 1990 Census should show that the traditional migration patterns to the metro areas are not as well-defined." More Mexicans are moving into the Northeast and Puerto Ricans are branching out of New York, he says.

Mr. Fernandez, however, cautions against using income as the common ground between hispanic segments. "[Major metro hispanic markets] may appear to become more homogeneous, but in reality they will be very heterogeneous. This cannot be emphasized enough."

Marketers will have to look at each individual group and try to walk a middle road, he says. "They will need a lot of sociologists in hispanic marketing."

Extreme differences in other demographic factors, such as age, education, gender and family size, will be more important than similarities in income; cultural factors will outweigh income considerations, he says. "In a simplistic description, it's true that hispanics become more similar as they become more affluent, but there are still vast cultural differences."

Stratifying the market by income is a long way off, Mr. Fernandez says. The continuing effects of immigration will reinforce cultural patterns and prevent homogenization of the hispanic populace, he says.

Mrs. Conill agrees. "Recent studies showed that although income is rising, the bonds to culture are getting stronger."

And with a median household income of $22,900 compared with the nation's $32,800, hispanics will not be thought of as an affluent group. "The hispanics who drive Mercedes are not representative of the entire market in terms of volume," says Ken Ocepek, Univision's midwest sales manager.

"But the people who make up that volume have the same mentality as the general market in the mid-1950s—one of optimism, opportunity."

That's a great mindset for companies willing to take a poke at the market's *pinata*.

CHICAGO'S SPANISH RADIO

When you are the Chicago station that has grown up with a community that is young, *75% under 35*; that works hard, *66% of Hispanic households have dual incomes*, and that prospers, *average household income of $23,300*, you become part of the community.

That's why we're Chicago's Spanish Radio.

Moms-and-pops fade out

(Continued from Page S-8)
lieved the audience wanted to see. Future programming decisions now will be based more on audience research, sources say.

"The viewer is definitely going to benefit," says Paula Tuchman, former hispanic programming director at KSCI-TV, Los Angeles. "The agencies and clients are going to benefit also. Both companies [Reliance and Hallmark] are very serious and are coming into this with huge dollars," she says.

Many look to increased financial backing as a means to generate more sophisticated research. "The biggest hindrance in the industry is lack of research," says Laura Marella, media director, Casanova, Pedrill Publicidad, Los Angeles. "When you want true respect of national advertisers, you have to speak their language and we cannot do that now."

Although industry observers maintain the changes will bring a new level of sophistication to hispanic media, a sensitive issue has been the industry's obvious shift to non-hispanic ownership.

"As with any growth industry in the U.S., Spanish-language TV became too important for major corporations not to pay attention," says Gary Berman, VP, Strategy Research, Miami. When word of the Hallmark purchase got out, there was industrywide speculation as to whether the company would maintain a hispanic format.

Although Hallmark has seriously targeted products to hispanics since 1982, the market segment was not the attraction, says Charles Hucker, Hallmark spokesman. Entering the TV industry was the draw, he says.

Nevertheless, Hallmark stands behind the hispanic market's validity and will maintain the stations' current format, Mr. Hucker says. The decision is reinforced by a contractual agreement with SICC that forces Hallmark to carry hispanic programming for at least two years. (See related story below.)

Despite such assurances, watching hispanic ownership shift into corporate America's hands is a bitter pill hispanic media must swallow.

"The hispanic broadcast industry worked hard and long to develop its craft," Mr. Berman says. "It must be difficult to give it up."

Mr. Villanueva agrees that letting go is not easy: "It is a highly emotional situation because we gave birth to this thing. We cannot believe we are giving up our baby."

Hispanic and general-market media are becoming closer, he says. "It is the wave of the future. I am not sure it is good news, but it is a reality."

The two TV worlds are inherently different, however. Hispanic TV is by definition a targeted medium and therefore a more risk-oriented business, says Ms. Armbrust.

In the future, however, general market independent stations may turn to the increasingly lucrative hispanic market and make a pitch for hispanic-targeted ad dollars, she says, through Spanish-language programming or bilingual broadcasts. "Not all hispanic dollars have to stay in Spanish-language TV."

A current unknown is whether traditional general market media will sell their ability to deliver a segment of the hispanic audience. Some clients, Golden, Colo.-based Adolph Coors Co., for example, already are combining English-language and Spanish-language placements in hispanic media plans, insisting younger hispanics watch English-language TV.

Spanish-language stations currently are in the best position to continue commanding the lion's share of hispanic-targeted TV ad budgets. According to Strategy Research, 66.5% of the nation's hispanics say they feel most comfortable speaking Spanish, and only 15.4% prefer to speak in English.

A wild card exists in the under-18 age group, which represents a whopping 37.3% of the total hispanic market. Language preference figures are not available for this group, but current thought suggests they will be increasingly comfortable with English as a result of being schooled in the language.

However, it has been recognized that hispanics will retain their native tongue, says Maura Donohue, sales manager, WOJO-FM in Chicago. "A cultural understanding, rather than knowing the language, is key to hispanic media."

The tailored programming anticipated from increased competition may be Spanish-language TV's best defense against English-language inroads. "I am very sanguine about the prospect of two forces in Spanish TV," says Charles Curran, national sales manager for New York-based BlairSpan. "There is room for both of us to provide a service—and make a lot of money."

But an increased Anglo interest, whether through programming or ownership, in Spanish-language TV probably will continue. As Mario Lazo, vp-media director for Mendoza, Dillon & Asociados, Newport Beach, Calif., says: "Money does not have a nationality."

We have an 'el' of an audience.

We deliver the most affluent Hispanic market in the United States. Miami.

'Yelling and screaming' attends SICC purchase

It seems only fitting that in these times of corporate raiding even congenial sales create their share of grief for buyers and sellers. Such is the case with Kansas City, Mo.-based Hallmark Cards' and First Capital Investment Corp. of Chicago's purchase of 10 TV stations formerly owned by Spanish International Communications Corp.

SICC felt it had covered its bases pretty well in meeting a Federal Communications Commission mandate to somehow resolve a question of foreign control. "Everyone knew that when the stations were put on the block that if they didn't stay hispanic, there would be yelling and screaming," says a lawyer involved in the purchase who requested anonymity.

SICC shareholders included in the purchase agreement a clause that forced any buyer to continue employing station management for a period of one to three years, depending on how long they had worked at the station. "This was a very practical incentive for the buyer to stay in Spanish," the lawyer says.

The shareholders also insisted any buyer be contractually obligated to broadcast in Spanish for two years. "Although it may very well be that these stations could operate more profitably as Spanish-language stations, somebody could look at them and see them as the nucleus of an English-language network. "That's what Fox did, that's what Telepictures is doing," the lawyer says. A number of program providers looked at the stations in this light, he says.

"We thought the contract stipulations would diffuse the outcry, but they haven't." Nine different groups were petitioning the FCC against the sale to Anglos at presstime.

"What's funny is that nobody did this when Anglo Saul Steinberg bought WNJU," a major Spanish-language station serving the New York metro area. "He's Mr. Bottom Line, and nobody said a word about his intentions." The SICC sale, he says, simply was under more scrutiny.

"It's ironic that the people who started this business—and stood through it when nobody in their right mind would have stuck with Spanish TV—are taking all the grief."

—*Ed Fitch*

Ayer pays $25M for C&W Group

Price called conservative

By STEWART ALTER

N W Ayer is paying $25 million to Mickelberry Corp. to acquire C&W Group, parent of Cunningham & Walsh (AA, Nov. 24, *et seq.*). That figure is in the lower range of expectations in this era of megadeals and megamergers, when many advertising agencies go for huge sums seemingly equal to their annual revenues.

The $25 million price tag was figured as a combination of book value plus $10 million, as described in a recent filing with the Securities & Exchange Commission. By comparison, C&W's revenues for 1985, the last year for which Mickelberry has released data, were $39 million.

The setting of the $25 million price involved Mickelberry first lowering C&W's book value through such steps as removing $1.5 million to $2 million in excess cash from C&W's retained earnings.

In a separate development, C&W sued the federal government last month to collect $500,000 in employment taxes it says were illegally and erroneously collected from it. The suit was brought "in order to get [federal officials] to focus on the issue," said C&W President Horace Malfa.

As for Ayer buying C&W, using a formula of book value plus a percentage of gross income is "not uncommon" in selling agencies, said Don Ambuhl, senior VP at the American Association of Advertising Agencies. He noted that the percentage employed can vary from 30% to 60% of one year's gross income, depending on earnings.

Based on that formula, the $10 million added to C&W's book value would come in slightly below 30% of gross income. Thus, C&W was sold at the lower range of what agencies sell for, said Mr. Ambuhl.

The filing with the SEC, called an 8-K, did not include information about C&W's revenues or earnings.

The sale was structured to make sure C&W was sold before the tax laws changed Dec. 31. The day before, Dec. 30, a stock purchase agreement was signed transferring 49% of the shares of C&W Group to Ayer.

The sale, agreed upon in principle Dec. 19 and approved by both the Ayer and Mickelberry boards Dec. 22, is slated to be concluded by Feb. 17.

The actual book value of C&W Group before the sale was $18.4 million, but Mickelberry was to make a "reasonable effort" to reduce that figure to $15 million.

Three steps taken to reduce the book value: removing the Chicago-based BBDM/C&W, with book value of $800,000 to $1.6 million, from the sale; removing $1.5 million to $2 million in excess cash from C&W's retained earnings "while still leaving adequate working capital remaining," and reflecting "normal income tax liabilities" of these Mickelberry subsidiaries.

C&W was originally sold to Mickelberry on March 22, 1982, for $17.4 million. For the previous year, its book value was $10.4 million, its total operating income $33 million and its net income $2.2 million.#

Mac attack

(Continued from Page 1)

phone interview that the Miami-based company has grown more sensitive to the demand for a regional approach. He noted that local offices of the No. 2 chain's agency, J. Walter Thompson USA, New York, are working "more closely" with the regions to respond to individual needs.

"A single homogenized national strategy is not as sensitive to regional needs as one with more local influence," Mr. Olcott said. "Our advertising strategy is more sensitive to local needs. ... We're giving more power to regions to make local decisions."

It was apparently this attitude that led Burger King at franchisees' requests—to appoint Admarketing, Los Angeles, last year as the company's first local agency for the Los Angeles area. While Wendy's and McDonald's both use a stable of local agencies to address regional needs, BK uses JWT for all advertising. The local assignment in Los Angeles could be the start of a local-agency network for Burger King, but Mr. Olcott would only say that BK is closely watching the southern California arrangement.

Burger King raised upfront spending 25% to $50 million for the 1986-87 season. BK's total budget is about $200 million (AA, July 14).

Some chains say they now are shifting spending in the face of McDonald's advertising onslaught.

"We can't compete with that," said Lawrence Krueger, senior VP-marketing for Atlanta-based Arby's, referring to McDonald's network TV presence. As a result, Arby's last year halved its network TV budget to about $2.5 million and increased spot TV buying to about $25 million, which it has found to be a more effective strategy.

Unfortunately, the second phase of its "Taste the difference at Arby's" campaign via Backer & Spielvogel is planned for April, when the mammoth McDonald's push arrives. Arby's ads, introducing a Chicken Club sandwich and featuring the chain's first (as yet undisclosed) spokesman since it used Will Geer of "The Waltons" in the mid-'70s, will run predominantly locally.

"Our [operators] believe in network TV, but they're saying, 'Hey, I'm in a dogfight out here in Denver, or wherever, give me more control of my marketing money so I can compete,' " says Mr. Krueger. Arby's has responded by building up operator co-op groups and expanding field marketing staff to increase local marketing efforts such as event sponsorship.

"You want to try to outspend McDonald's [on TV]? Good luck to you," says Allan Zuckerman, president of Montgomery, Zuckerman, Davis, Indianapolis, which handles field marketing for Chi-Chi's and has done the same for Pizza Hut, Burger Chef and others.

"The restaurant industry is flat and doesn't promise to change soon," Mr. Zuckerman says. "I think a lot of executives are looking at their budgets and specifically at network TV and asking 'Is this doing anything for me and do I have the guts to get out?'

"There's definitely a trend, and that is to get closer to your customers. There are terrific differences between markets. ... National, umbrella advertising campaigns can't address those differences."

Hardee's Food Systems, a regional chain that in the past used a singular ad strategy in all markets, implemented a local-regional approach last year. The Rocky Mount, N.C.-based company now uses a common positioning theme—"We're out to win you over"—but changes specifics in the ad message market by market.

In 1985, Hardee's tried putting one-third of its TV budget into "regional network" (selling off coverage in markets where it has no stores). But last year it returned more heavily to local buys. It may again dabble in the networks, but probably not until the second half of this year. Ogilvy & Mather, New York, handles.

"Technology has evolved to the point where you can achieve efficiencies in being able to recognize that just like no two people are alike, no two geographies are alike," said Gary Langstaff, senior VP-marketing.

Mr. Langstaff said the strategy has not only been successful, but he views it as the wave of the future: "I don't think a lot of us truly recognize the opportunities in a more segmented approach—in this case it's geography, but longer term it will be according to demographics and psychographics."

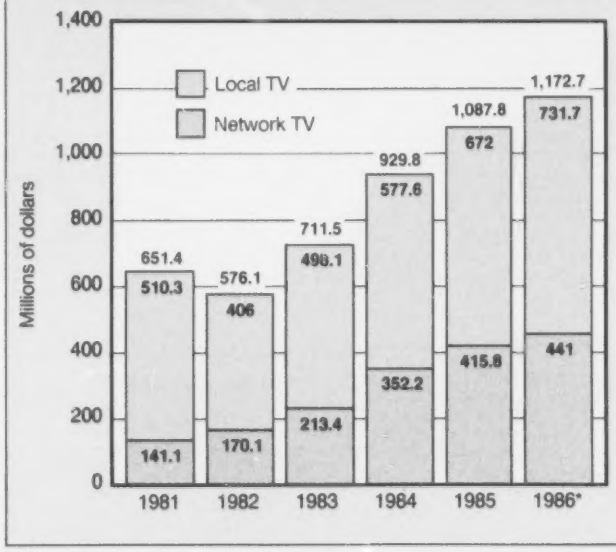
But some chains are maintaining a single, national strategy. Red Lobster Restaurants, Orlando, Fla., invests the majority of its ad dollars in network TV. "We feel if we advertise our high-quality food and good service [in all markets] that will motivate people to come into our restaurants," said Dick Monroe, Red Lobster's PR director.

McDonald's Corp. remains the one company that can have it all. With more than 7,200 U.S. stores covering every major market and more than $600 million last year to fund domestic advertising and promotion programs, Big Mac spends enough to command the best network TV slots (such as during the coveted first half of the Super Bowl) while still outspending its rivals on spot TV and local-market community projects.

Admitted one competitor, "We don't compete with McDonald's. We try to work around them."#

Restaurant ad spending on TV

Network tv ad spending by restaurants increased from 21.7% of the total in 1981 to 38.2% in 1985. But that trend showed signs of slowing in 1986, and industry execs expect the share of ad budgets given to network TV to begin shrinking in 1987. *Projected from first nine months' data. *Source: Television Bureau of Advertising from Broadcast Advertisers Reports data.*



Thrill of corduroy, agony of pleats: ABC presses deal for sports clothes

By PAT SLOAN

New York—ABC Sports has licensed its name to Entertainment Properties for sports clothes carrying the ABC logo, a line expected to be backed by a $10 million ad budget.

Neither ABC nor Entertainment Properties would comment on the apparel deal. However, sources said the two companies were brought together by George Lois, whose agency, Lois Pitts Gershon Pon/GGK, last fall took over ABC Sports print and radio advertising from McCaffrey & McCall.

Since Mr. Lois initiated the deal, he is expected to have the inside track on the account. However, Lois Pitts is also the agency of record for Murjani International's Tommy Hilfiger clothes.

"We are semi-involved with the licensing, but nothing's been formalized yet," said Mr. Lois.

ABC's other agencies include Grey Advertising for prime time and Grey Entertainment Media for daytime.

Fisher, Jackson, Levy, Flaxman is the agency of record for Entertainment Properties.

Entertainment Properties was formed by Chuck Sullivan, whose family owns the New England Patriots, and is run by Warren Hirsh, president. The company's other clothing venture is the Michael Jackson apparel line introduced last year with $3 million in ad support.

The ABC Sports/Entertainment Properties agreement is patterned after the deals struck between a score of brand name and apparel marketers in the last two years, involving such brands as Coca-Cola, Pepsi-Cola, Jell-O, Winnebago, Miller Lite beer and, most recently, Budweiser.

Part of the reason for the growth is that apparel is the fastest-growing segment of the $50 billion licensing market, accounting for 40% of the total market, according to the Licensing Industry's Merchandisers Association.#

Miller

(Continued from Page 1)

the Olympics by securing long-term deals on the other sports properties.

The networks would presumably agree to lower Olympic commercial rates for Miller because it assumed a long-term risk in the baseball and football telecasts. The long-term buy would also help the networks because, by preselling some of the commercial inventory in the future telecasts, rates in general would be firmed up.

NBC officials vigorously denied any "discount," however. "Miller will pay the full rate card price on the Olympics," according to one executive.

However, if Miller paid rate card for the Olympics, it purchased NBC's baseball package at a bargain price. In 1984, Miller spent $26 million for half-exclusivity in ABC's Summer Olympics, and that deal did not include any other sports.

NBC, which is not offering audience guarantees in the Olympics, has projected a 21 prime-time rating for its coverage of the Summer Games. NBC reportedly is seeking a $14 household cost-per-thousand rate, or between $260,000 and $300,000 per 30-second prime-time spot (AA, April 21, 1986).

Backer & Spielvogel, Miller's agency of record for network TV buying, declined comment.

Steve Leff, exec VP-director of media services at B&S, has secured other highly innovative deals for Miller in the past. He was the first network TV negotiator to develop "category exclusivity" for a sponsor. By securing a large amount of time in a sports telecast, competing sponsors were effectively blocked from buying time in the event.

A Miller spokesman said, "We are in negotiations on a number of packages with different networks that may or may not lead" to an Olympics buy. He said the brewer would not make an announcement until all deals are completed.#

Chesebrough shakeup

O&M, McCann winners

By PAT SLOAN

Chesebrough-Pond's has completed a worldwide agency review that will consolidate nearly all its domestic brands at Ogilvy & Mather, a key agency of Unilever. The U.K.-Dutch consumer products giant last week made final its acquisition of Greenwich, Conn.-based Chesebrough.

The reassignments, valued around $70 million, transfer about $55 million in business to O&M, while McCann-Erickson, another major Unilever agency, picks up the Vaseline line, which receives about $14 million in support. Waring & LaRosa retains Ragu and Adolph's food products, valued at approximately $19 million

Also, McCann and Ogilvy came away the big winners in a separate international review, begun before Chesebrough was sold. At the time, a Chesebrough executive said the review would not affect domestic assignments (AA, Sept. 1).

Vaseline, one of the key brands involved in the $50 million international review, will be assigned to McCann, a company spokesman said. Pond's, another key brand, will go to O&M. Pond's is now handled by O&M in several international markets.

The losing agencies on the domestic side are Waring & LaRosa, which says goodbye to Aziza makeup and Cutex nailcare and makeup; William Esty Co., agency for fragrances and only last month named to handle the new Elizabeth Taylor's Passion fragrance; and Lowe Marschalk, the Q-tip agency. These brands shift to Ogilvy.

In addition to fragrances, Esty loses Vaseline to McCann and Pond's creams and lotions to O&M.

W&L will lose more than $13 million in billings, and Esty stands to lose more than $20 million. Q-tips, at Lowe Marschalk, receives about $8 million in ad spending.

O&M's new assignments, according to the latest full year estimates, break down as follows: $17 million in fragrance billings, $13 million from Cutex and Aziza, $6.5 million from Pond's, $8 million from Cutex, $250,000 from Erno Laslo skin care products and $9 million from haircare products.

Chesebrough divisional executives apparently were stunned by word of the re-

(Continued on Page 80)

Secondary role spurred O'Donnell

By STEWART ALTER

New York—The issues that triggered Joseph O'Donnell's sudden ouster as chairman-ceo of J. Walter Thompson Co. involved his frustrations with the agency's secondary role to the parent JWT Group.

But the ammunitior he attempted to use against his boss, Don Johnston, chairman-ceo of JWT Group, backfired.

As more becomes known about the environment at JWT Group in the period before the confrontation between Mr. Johnston and Mr. O'Donnell, the picture emerges of an agency head who felt he could not control his agency's destiny as long as the parent actually was running the show.

"Clearly one of his top motivations was to control the destiny of the advertising agency," one source said of Mr. O'Donnell. He was said to have felt that although Thompson accounted for the bulk of JWT Group's revenues, Thompson could not exert the influence it needed in the Group setup. Mr. O'Donnell also was concerned lest the agency suffer from the rub-off effect of problems that were really the parent's.

New information about the events that led to Mr. O'Donnell's fateful Jan. 23 showdown with Mr. Johnston contains glimpses of issues that apparently were used to justify a demand that Mr. Johnston surrender the ceo post to Mr. O'Donnell and take the lesser title

Last Minute News

Mars is sweet to Saatchi

Hackettstown, N.J.—Mars Inc., satisfied that Saatchi & Saatchi Co. has cleared its decks of client conflicts, has awarded a secret, $30 million confectionery product to a second Saatchi agency, Backer & Spielvogel, New York. Although not condoning the agency holding-company concept, Mars is further indicating by the assignment it is willing to do substantial business with affiliated agencies once their loyalties are established. Earlier, it awarded new business to Saatchi & Saatchi, London (AA, Dec. 15, *et seq.*), after forcing DFS Dorland Worldwide to resign an estimated $30 million in Cadbury USA billings and the parent company to resign $14.6 million in Carnation and Rowntree Mackintosh billings. Mars would not comment on the nature of the confection but noted it will not roll out this year. Sources said Mars considers a confection any sweet-based product.

CBS' Thomas Leahy considers dropping some demographic guarantees to buyers next season.

CBS' challenge

Seeks new way to sell TV

By VERNE GAY

New York—CBS Television Network is ready to change the nature of TV ad time buying.

The network wants to lay off some risk it assumes when it guarantees advertisers an audience size by instead "selling" TV time on its ability to move products or services. This also would get around anticipated audience shortfalls under the new people meter system.

In an interview last week, CBS-TV Network President Thomas Leahy said CBS next season will drop audience delivery guarantees for certain "small" demographic clusters, although he admitted he was being purposefully vague about which ones. CBS currently does not guarantee some demographic subcategories, such as women aged 25 to 34.

Mr. Leahy said that audience guarantees, which eliminate any semblance of risk for ad-

(Continued on Page 80)

Highlights

Consolidation under way at Chesebrough 1
After a worldwide agency review, Chesebrough-Pond's has transfered about $55 million in U.S. business to Ogilvy & Mather, a key agency of Unilever, which last week completed its acquisition of Chesebrough. McCann-Erickson, another major Unilever agency, has picked up the $14 million Vaseline line account in the U.S., which receives about $14 million in ad support.

CBS proposes new way of doing business 1
CBS Television Network is ready to change the nature of TV ad time buying. CBS' plan involves positioning network TV on its effectiveness in selling products rather than its cost efficiency.

Pet sheds origins 4
Pet Inc. finally has gained control of its destiny. In the nine years since Pet was acquired by Chicago-based IC Industries, the company has shed completely its origins as a commodities-based company subject to the whims of the market.

Ayer's exposure 6
The crucial evidence that led the Army to fire N W Ayer last year apparently was supplied by a single witness, the same New York production company executive who earlier helped expose a kickback scheme involving an Ayer VP working on the Army account.

Illinois ponders ad tax 24
The threat of possible state taxes on advertising and media services has spread to Illinois, where the ad community is bracing for a fight with Republican Gov. James Thompson. In what has been described as an informal proposal, the governor has suggested expanding the state's sales tax to include professional and other services.

FCC's heir apparent 28
After the Reagan administration's impressive record of deregulation at the Federal Communications Commission, its choice for the next FCC chairman, Dennis Patrick, faces a harsher political climate. The Senate and House, controlled by Democrats, are expected to be less enthused about further deregulation.

Nutrition for 'Self' 34
Self is reshaping itself editorially to focus more on health and nutrition in a refinement also expected to have advertising and marketing implications.

Networks reject condom ads 79
The Big 3 networks bent slightly but didn't break last week under congressional pressure to revise their policies against airing condom ads. Executives from ABC, CBS and NBC said their networks will continue to reject ads for condoms, because of the moral implications associated with all contraceptive advertising. But the nets left the door open for future policy changes.

INTERNATIONAL

Superchannel takes on Sky 54
Superchannel, the Pan-European satellite TV channel launched last month, is the first head-to-head competitor to Rupert Murdoch's Sky Channel. The channels' common goal is to increase the size of the tiny Pan-European TV advertising market.

O&M Stockholm reorganizes 54
Ogilvy & Mather's Stockholm office is experiencing a major upheaval and has dismissed most of its employees. A younger team of copywriters and art directors has been brought in to start a new agency, called O&M2.

OTHER NEWS

In an unusual link, Davis, Johnson, Mogul & Colombatto next month will join forces with Mexico's largest ad agency, Publicidad Ferrer, in a joint venture called Ferrer Ad America. Page 3.

VLI Corp. was one of six advertisers that modified or discontinued claims after a review last month by the National Advertising Division of the Council of Better Business Bureaus. Page 12.

Selected video stores soon will offer advertiser-sponsored videocassettes for at-home viewing. Video rental customers will be allowed to take home the advertiser tapes at no charge through a service called FreeVees by Video Information Network, Redmond, Wash. Page 22.

Prevention is stepping up efforts to boost advertising and circulation under its new publisher. "We want to demonstrate to everyone *Prevention* is a very strong factor in the health market," said Sanford Beldon, who last July became publisher of the Rodale Press monthly. Page 34.

Consumer promotions, effective in building short-term market share, may not have the long-term negative effects that worry some critics. Page 39.

Michael Ball, largely credited with building Ogilvy & Mather into the largest agency network in the Asia-Pacific region, is moving on. Last week Mr. Ball, who was chairman of the Ball Partnership, a second agency network spun off from O&M, announced he was joining the U.K.'s fast-growing WCRS Group. Page 77.

SPECIAL REPORT

The alcoholic beverage industry advanced 1.1% during the first half of 1986, thanks in large part to a 71.1% growth in the cooler category. The slight gain points to a new era in alcoholic beverage marketing.

Pepsi-Jackson 'spectacular' set for spring

By NANCY GIGES

Pepsi-Cola USA is delaying the long-awaited debut of Pepsi TV spots with Michael Jackson until after the singer's new album is released sometime this spring.

The spots were set to air Feb. 24 on CBS' telecast of the Grammy Awards. Sources say the company and star mutually agreed it would be best to let Mr. Jackson reintroduce himself to the public via his new album, and not pre-empt his emergence with the TV spots.

> "We have some of the most spectacular advertising ever produced, and timing is critical. We are taking a hard look at that, and we will make an announcement Feb. 23."
> —*A Pepsi official*

The singer has not been very visible to the public for a number of months.

Purchase, N.Y.-based Pepsi calls the new spots the "most spectacular" ever created. BBDO Worldwide, New York, is the agency. When the spots do break, they are expected to account for a major portion of the $150 million Pepsi spends annually in advertising.

A Pepsi official would neither confirm nor deny the report of the new introductory plans. He said, "We have some of the most spectacular advertising ever produced, and timing is critical. We are taking a hard look at that, and we will make an announcement on Feb. 23."

Pepsi still plans to fill the five minutes of commercial time it bought on the Grammy Awards with new commercials for Pepsi and Diet Pepsi plus a 45-second teaser/preview spot for the new Jackson spots.

The Pepsi/Jackson spots mark a number of firsts. For one, the song that Pepsi expects to be the album's biggest hit is featured in one Pepsi spot. It is unusual to buy the rights for a TV commercial before the song has proved itself on the charts. Pepsi bought the rights as part of the $10 million deal it made with the entertainer.

The postponement also allows the expected hit song to be introduced as entertainment, rather than in the Pepsi spot. The Columbia/Epic album was to have come out this month or next, but has been postponed.

Another first: The two Jackson commercials cost a record $2 million-plus to produce, double the amount Pepsi spent in its earlier Jackson commercials.

According to sources close to the project, the singer is much more visible in these two spots than in his 1984 Pepsi deal when he limited the time his face was on camera to a few seconds.

In the second new spot, described as a lavish fantasy sequence, Mr. Jackson, chased by crowds, escapes in miraculous ways. In one scene he is chased into a museum, where he becomes

(Continued on Page 80)

Vons searching to replace Grey

EL MONTE, CALIF.—Vons Grocery Co., is reviewing its $10 million-to-$15 million broadcast account following a split with Grey Advertising, Los Angeles.

The supermarket chain initially is contacting eight to 10 Los Angeles agencies, but intends to pare the list to three or four soon. Early contenders are believed to be Admarketing, Chiat/Day, DDB Needham Worldwide, Keye/Donna/-Pearlstein, McCann-Erickson, Ogilvy & Mather, J. Walter Thompson/West and Della Femina, Travisano & Partners, Los Angeles. Another likely entrant is Cochrane Chase, Livingston & Co., Irvine, which last week lost the $10 million-to-$12 million Lucky Stores' Southern Food division (AA, Feb. 9).

About a year ago Vons reviewed its account (AA, March 24), but ultimately opted to keep its business at Grey. Two months ago, Von's named K/D/P agency for its Pavilions superstore grocery account, (AA, Dec. 8).

The moves precede Vons' pending merger with Detroit-based Allied Supermarkets and the arrival of VP-Advertising Larry Davis, a former executive with Lucky Stores. Vons officials were not available for comment.

Sega of America, South San Francisco, Calif., is moving what was to be a $20 million account at J. Walter Thompson/West, San Francisco, in-house. The split severs a 6-month relationship. The U.S. marketing arm of the Japanese videogame marketer will halve its U.S. ad budget in 1987 because of cuts in profits.

Giorgio Parfums, Beverly Hills, Calif., is contacting ad agencies concerning its $2.5 million women's and men's fragrance account now at Eisaman, Johns & Laws, Los Angeles. Among those battling the incumbent are BBDO/West and Ogilvy & Mather, Los Angeles.#

Special Report

Industry's successes help ease fear of a cloudy future

By Denise Frenner

Attempting to get a handle on evolving consumer taste preferences in an era of declining alcohol consumption is like trying to predict the weather. But producers can boast more than a few success stories, which at least partially clear the storm clouds looming on the industry's horizon.

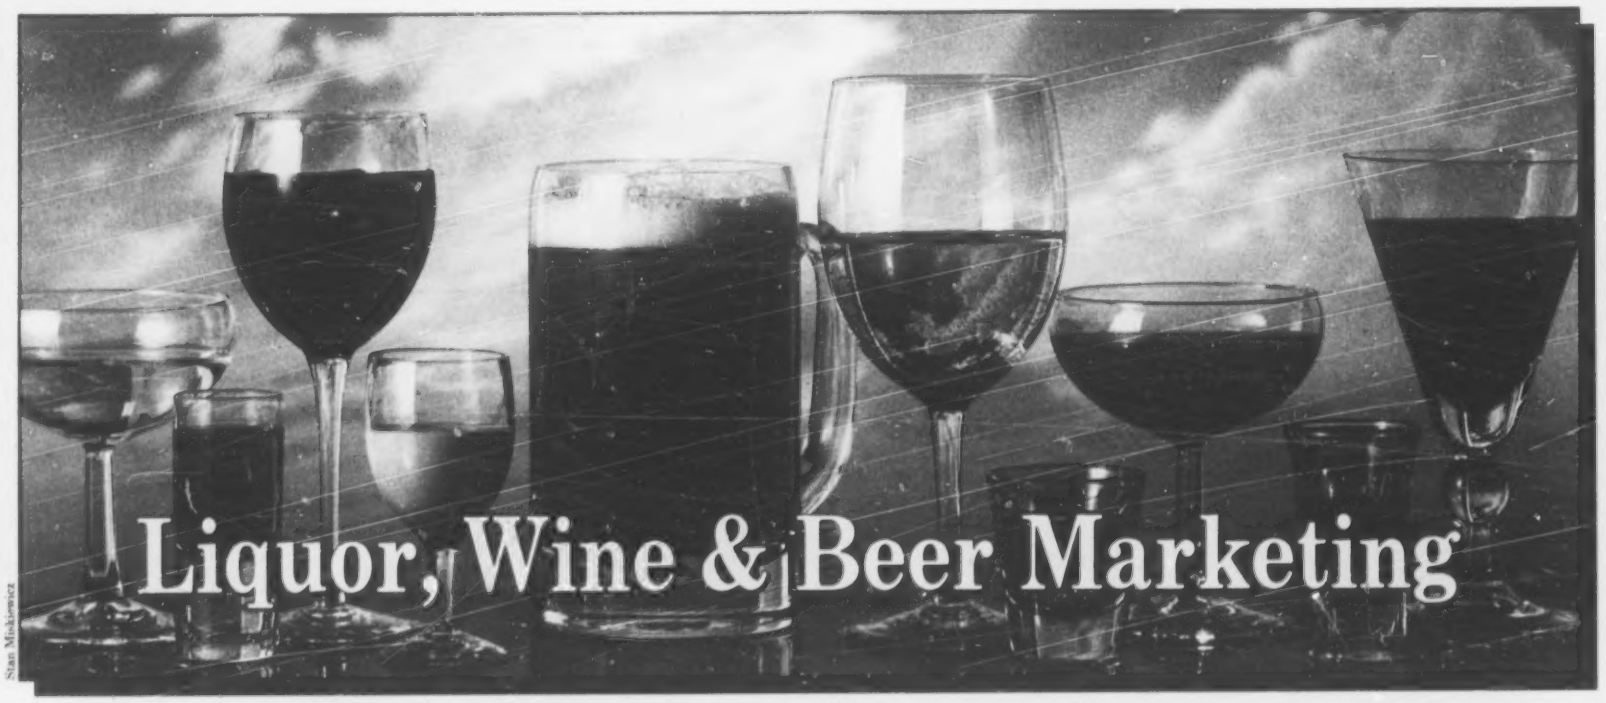
It already has been established that, for the moment, today's health-conscious consumers are looking for lighter, sweeter, lower-calorie and lower-proof products, preferably with some inherent snob appeal.

In response, alcoholic beverage marketers seeking new growth opportunities have marched out a bevy of new products, creating new categories, bolstering existing ones and blurring the lines between others. In many cases, their entries have been right on target.

Last year wasn't exactly a year to write home about. But the industry, buoyed by the cooler category's 71.7% growth, advanced 1.1%—approximately 37 million gallons—during the first half of 1986 compared with the same period in 1985, according to *Impact*, a New York-based industry newsletter. While the gain thus far is slight, it's a definite improvement over 1985, when the industry posted a 0.4% increase after a 0.2% dip in 1984.

Charting the future is probably best left in the hands of time. As Nicolas Furlotte, editorial director of the Jobson Liquor Group, New York, comments in the analysis below on the industry's future: "We are embarking on a new era of alcoholic beverage products and marketing ... Some brands that don't yet exist will likely find enormous success within the next 15 years."

One way to determine where consumer tastes might be heading, however, is to look at where they are today. Particular insight can be gleaned by examining products and categories that are registering gains or showing promise. This Special Report salutes a few that fit these criteria.



Stan Mickiewicz

Drinking in the future: New styles, new tastes

By Nicolas Furlotte

A top executive from one of the country's largest distillers recently told me he had noticed an increase in martini sales in bars and restaurants. He wanted to know if I had observed the same thing and did I think the martini, and other "traditional" cocktails, would make a comeback.

This is really part of a larger and frequently asked question about the alcoholic beverage industry: Is the business cyclical? Does consumption increase and decrease in any kind of historical or discernible pattern?

I can probably count on one hand the number of bars and restaurants that are serving a significantly greater number of martinis today than a year ago. It is unlikely that these drinks will come back into fashion to a degree great enough to influence overall spirits consumption.

There is no such thing as a comeback in the alcoholic beverage industry. There have been a few successful product reformulations and repositioning efforts, but, almost without exception, once a brand has gone into decline, it has never been successfully revived.

The same is true with the various categories of distilled spirits. Once a category has gone into a serious decline, it has never been brought back.

In terms of overall distilled spirits consumption, we are now drinking about as much as we were, on a per capita basis, in 1968. According to *Jobson's Liquor Handbook*, annual per capita consumption of spirits peaked at 2.04 gallons in 1979. Consumption has dropped about 1 quart per person since then. And it is not hard to imagine consumption dropping another quart per person within the next seven or eight years, if not sooner. That would put us at about 1.5 gallons per capita, roughly the same level as in 1965.

Nicolas Furlotte is editorial director of the Jobson Liquor Group, which includes Liquor Store *and* Stateways *magazines,* Jobson's Liquor Handbook, Jobson's Wine Marketing Handbook, Jobson's Liquor Industry Marketing, *and* Jobson's Liquor Handbook Advance.

Commentary

Are we really headed back to the future? In terms of consumption, probably yes. But in terms of what we drink, wishful martini thinking aside, probably not. Without sounding too grandiose, we are embarking on a new era of alcoholic beverage products and marketing.

The trends we have seen during the past decade, and more recently, will continue for the next five to 10 years, perhaps even longer. That doesn't necessarily mean, however, that by combining current taste preferences, a successful new product can be created—an imported, peach-flavored, low-proof, sparkling vodka, for example. On the other hand, some brands that don't yet exist will likely find enormous success within the next 15 years.

Prepared cocktails and cordials (the distinction becomes blurred at times) may hold the most potential for the distilled spirits business in the next 10 to 20 years.

Because taste preferences are evolutionary rather then cyclical, each generation claims a certain type of drink as its own. There was a time when the drink was bourbon. Later it was vodka, then white wine, and now, perhaps, bottled water.

But, of all the demographic groups influencing the alcoholic beverage business today, none is having a greater effect than the generation brought up on the sweet, fizzy taste of soda pop.

The alcoholic beverage industry might take a cue from the soda business where brands such as Slice, with real fruit juice as a prominently promoted ingredient, are the latest success. If I were in new product development, I'd be working on a carbonated cordial/prepared cocktail that featured, and heavily promoted, real fruit juice and would be marketed in four-packs or single-serve bottles.

That tastes are changing is a given, but because they're still evolving, neither the new generation of consumers nor the marketers trying to appeal to them knows exactly what it is they want. Joseph E. Seagram & Sons is making a determined effort with its spirits-based cooler line. James B. Beam Distilling has its line of Zzzingers and its promising Fletcher & Oakes (a schnapps-based cooler). Heublein Inc. has Tropic Freezer, a sort of cherry slush for adults.

New flavors spice up vodka category

By Patricia Winters

What do you get when you mix a cayenne pepper, a bottle of vodka and a yuppie? A whole new trend in the liquor industry.

For a decade, consumer demand in liquor has been for sweet, light, low-alcohol drinks. Witness the peach schnapps explosion, the popularity a few years ago of cream liqueurs or the continuing popularity of wine coolers.

But then young, upscale professionals discovered the Bloody Mary brunch and the Cajun martini dinner, and suddenly the trend has taken a 180-degree turn, spawning a shelf full of flavored vodkas ranging from basic pepper—such as Absolut Peppar—to the more exotic Stolichnaya's Zubrowka, a musky-tasting vodka flavored with northern European buffalo grass.

What happened?

"People like to try products that are new and different," says Peter Bordeaux, president of the Sazerac Co., New Orleans, which markets Chef Paul Prudhomme's Original K-Paul's Cajun Martini. "And Americans like spicy food."

While import giants Absolut and Stoli have only recently entered the flavored vodka arena, the category isn't really new. Flavored vodkas have been retailing in the U.S. since the repeal of Prohibition, and despite occasional marketing efforts, the drink never quite caught on.

The new generation of flavored vodkas is an outgrowth of three factors: A trend toward spicy food, a demand for full-tasting drinks and the recent popularity of imported vodka.

Imported vodka is growing rapidly, showing a 35% volume increase from January to November 1986, compared to the same period in 1985, according to the National Association of Beverage Importers, Washington. These gains are even more impressive in light of the fact that total white goods declined 7.6% during the first half of 1986, reports New-York based industry newsletter *Impact*.

Leading the flavored-vodka parade are Carillon Importers,

The future

(Continued from Page S-1)

Schieffelin & Co. has Petite Liqueur, a wine-based cordial, and Kobrand Corp. is marketing Alize, a cognac and passion fruit mixture.

Convenience has been the traditional appeal of prepared cocktails, and the category has never been much more than the lazy man's answer to a Bloody Mary. But the most recent entries are a new breed of drink.

These and future new drinks may do for prepared cocktails and cordials what Lean Cuisine has done for TV dinners.

What else lies ahead for the alcoholic beverage industry?

- Cooler sales will continue to grow through 1990, but the enormous percentage gains of the past few years are over. The battle is now for market share and profitability. By 2000, coolers will be about as important as Boone's Farm is today. Today's cooler consumer will tire of the product.

In 20 years we may well look back upon coolers not so much as a sales phenomenon of the 1980s, but as a transitional product to a new style of beverages.

- The over-50 age group will become increasingly important and alcoholic beverage marketers who can reach this segment (it will be a richer, better educated and more sophisticated group than ever) will have struck gold.

But this group won't be attracted by non-alcoholic wine or beer. They will go for low-proof spirits, new drinks, and super-premium wines and cognacs.

- In general, high-priced, premium and super premium distilled spirits, wines and beers will continue to grow for the next three to five years. But there are limits to everything—prices can only go so high so fast. There are absolutes to the amount of money people will spend.
- The U.S. will never be a wine-drinking country, but it will become more sophisticated: Sales of premium and super premium varietal wines will grow over the next 15 years.
- Brand loyalty will erode as marketers increase their rebate/discount/coupon programs.
- Advertising strategies seem cyclical. Bottle and glass shots have given way to lifestyle and image advertising. Over the next three years, head-to-head comparative advertising—"our brand is better than yours"—will become increasingly prevalent as suppliers fight over a smaller pie. In 10 years, the creative director of a hot new ad agency will rediscover bottle and glass shots.
- Imported beers will grow for at least 10 more years.
- Domestic specialty/regional breweries and micro-breweries and their counterparts in the wine business will prosper in the next decade. The huge domestic brewers will continue to dominate the U.S. beer scene, but consumption will erode.
- Wines from non-wine states —Texas, for example—will gain favor, but never great sales.
- In 10 years, Australia will be this country's fourth largest source of wine imports.
- In 20 years, the last of the serious martini drinkers will have vanished from the face of the earth and the drink will never be heard of again.

Blow up your ideas

Over the years, we've had the opportunity to work with some very creative people and bring their ideas to life. Our willingness to innovate and our attention to detail will compliment your creative ideas. From complete hot air balloon programs to cold air and helium inflatables, let Aerostar International help you create excitement, traffic and brand awareness.

Flavors spice up vodkas

(Continued from Page S-2)

Teaneck, N.J.-based marketer of imported vodka leader Absolut from Sweden, and Monsieur Henri, White Plains, N.Y., marketer of No. 2 Stolichnaya Russian vodka. They are followed by smaller companies like Adamba Imports, Maspeth, N.Y., marketer of Luksusowa Polish potato vodka, and Sazerac Co.

A trend toward spicy food, a demand for full-tasting drinks and imported vodka's recent popularity all gave rise to flavored vodkas.

The product introductions started with pepper-flavored vodkas rolled out by Monsieur Henri and Carillon. Carillon decided to move ahead with its pepper-flavored vodka after noting the increasing number of trend-setting restaurants and bars that were marinating pepper in vodka for drinks like the Bloody Mary.

"We saw something happening where we felt we could provide a convenient product for restaurant and bar owners," explains Ernie Capria, Carillon director of marketing services.

Carillon introduced Absolut Peppar in September 1986, and has marketed heavily to on-premise establishments, gaining accounts in such trendy restaurants as the Hard Rock Cafe in New York.

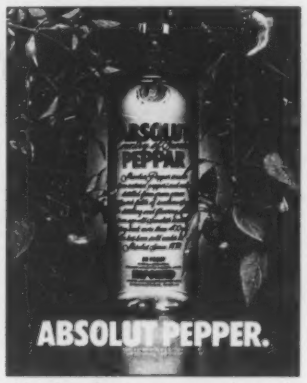
Absolut Peppar magazine ads, via TBWA Advertising, New York, use a lush product shot of the Absolut bottle in a jungle of peppers hanging from vines. The single copy line plays off the product name: "Absolut Pepper," and also off Absolut's long-running advertising approach of basing creative around the brand name.

Monsieur Henri, on the other hand, says a larger movement prompted marketers to introduce the new flavored vodkas. "With the trend toward tasteful drinks, we feel flavored vodkas are a natural line extension for Stolichnaya," says Larry Soll, Monsieur Henri VP.

MH introduced Pertsovka pepper-flavored vodka two years ago. Capitalizing on the growing Cajun rage, MH began advertising the brand and expanding distribution nationwide in the summer of 1986 via Calet, Hirsch & Spector, New York. Pertsovka case depletions increased 25% from 1984 to 1985, to a total of 10,000 cases, according to *Market Watch*, a New York-based industry magazine.

The company also started national distribution in 1986 of Okhotnichya, a vodka spiced with ginger, cloves, juniper, anise and lemon peel, among other ingredients. Last December it introduced Limonnaya, a lemon-flavored vodka, in New York, New Jersey, Boston, Chicago and Los Angeles. National roll-out is planned later this year. Monsieur Henri also plans to introduce Zubrowka later in the year. All are under the Stoli label.

So far, MH has only advertised Stolichnaya Pertsovka in New York and Los Angeles—two key trend-setting markets.



Absolut Peppar magazine ads display the product in a jungle of pepper-laden vines.

Ads, via CH&S, team regular Stoli ads with Stolichnaya Pertsovka. The first ad, showing an iced bottle of Stoli under a headline that says "Stoli. The Vodka" is contrasted with an ad showing reddish-colored Pertsovka, surrounded by red mist, under a headline that reads "Pepper Stoli. The Hot Vodka."

The company says it will team Stoli Limonnaya and Pertsovka in new ads this spring, via CH&S. Both Carillon and MH declined to disclose ad budgets.

No one thinks flavored vodka will sweep the country as the drink of choice, but many industry observers believe it will represent a long-term niche in the lucrative imported vodka segment. They say the flavored vodka market could reach 1 million to 2 million cases during the next few years.

Presenting a paper route

Booth Newspapers.
The best way to reach the millions of Michigan customers outside Detroit.

The area our paper route covers is affectionately known as Boothland. And it's made up of 44 Michigan counties, including eight major Michigan cities.

Our advertisers, however, know us better as America's 7th largest metro market with over 3.5 million people, living in 1.2 million households and spending over 17 billion dollars.

Now that we have your attention, we'd like you to meet some of our best customers.

America's 13th largest male market.

If your target audience is men, then a Booth Newspaper buy is an easy way to instantly improve your aim.

Because Boothland is populated by more men in the 25-49 age bracket than San Francisco, Kansas City, Miami, or Seattle. And there isn't another Michigan paper around that comes close to reaching those men as well as Booth.

America's 11th largest female market.

If you overlooked Booth in your last buy, then you also overlooked nearly half a million women between the ages of 25 and 49. That's more than you'll find in Dallas, Minneapolis or Pittsburgh. And if you thought you had Michigan covered by buying a Detroit paper, consider this: In our market Booth delivers so many women that, even combined, the Detroit News and the Free Press can't come close to matching our figures.

America's 10th largest market of households with children.

When it comes to delivering households with at least

But there's some disagreement about who is drinking flavored vodka. MH and Carillon view the market as an upscale phenomenon, with particular appeal among 25-to-50-year-old, metropolitan-area consumers.

The pepper-flavored vodkas, because of their strong flavor, are skewed slightly toward men. But Sazerac's Mr. Bordeaux believes pepper-flavored vodka, while attracting upscale professionals, also has strong appeal among minimum-age drinkers who down the stuff in shot glasses at nightclubs.

Vodka marketers "don't want to admit that people are doing shots any more than the cognac marketers advertise that a lot of people drink cognac with Coke because it's looked to be down-scale," says Mr. Bordeaux.

Sazerac hopes to attract this segment, as well as the more sophisticated drinkers, by pricing its Chef Paul's Cajun Martini at about $7.50 a bottle, some 40% less than the average price of Stoli or Absolut. An authentic cayenne pepper is attached to the bottle's neck, an interesting package detail that has a reason: Mr. Bordeaux says consumers can make their vodka spicier by marinating it further.

Despite initial positive response to the new breed of flavored vodkas, many are still watching the market cautiously. Says Jack Shea, spokesman for Farmington, Conn.-based Heublein Inc., marketer of Smirnoff, the world's largest-selling vodka: "Heublein's attitude is that there is just not enough evidence yet to know whether this is a fad or a long-term phenomenon. And we are not going to risk the reputation of the world's No. 1 vodka on a fad."

Ads for Stolichnaya Pertsovka broke in the summer of 1986.

But even those who question the longevity of flavored vodka in the market are capitalizing on the trend in promotion and marketing. Heublein, Mr. Shea says, is "encouraged by the phenomenon" and is taking advantage of the new interest in flavored vodka by promoting "The Smirnoff Guide to Flavoring Vodka," a booklet distributed in retail outlets that explains how consumers can flavor their vodka at home. Heublein also has lime-flavored and cherry-flavored vodkas under its largely unsupported Arrow line of cordials.

Mr. Shea notes that the brands exist to give people a choice, and while they aren't very big sellers, they have pockets of popularity in the Midwest, particularly in Wisconsin, Illinois and Ohio.

Adamba Imports, a small marketer of Polish goods, is certain flavored vodka is a fad, says Christina Gutt, marketing director. But increased interest in well-established imported vodkas is not, she says. This is why Adamba, which markets Starka, vodka distilled from rye, and Jarzebiak, a tart, berry-flavored vodka, will promote Zubrowka via local print and outdoor campaigns later this year.

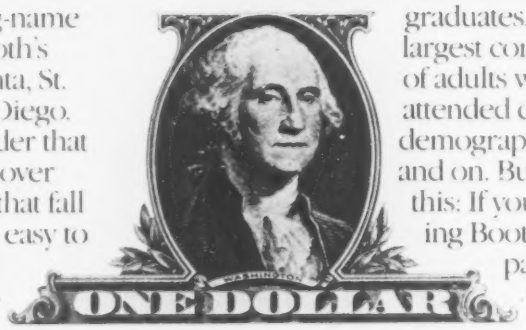
> ***"Heublein's attitude is that there is just not enough evidence yet to know whether [flavored vodka] is a fad or a long-term phenomenon."***
> **Jack Shea**
> **Heublein Inc.**

Zubrowka has an established following among vodka connoisseurs and Europeans. And in Russia, Stoli Pertsovka is a favorite. Flavored vodkas, in fact, have actually been around for centuries. Okhotnichya, known as "hunter's vodka," was traditionally enjoyed by nobles in czarist Russia to celebrate a successful hunt.

America, which often starts worldwide trends, was a bit late on this one.

that delivers customers.

one child, a lot of big-name cities can't match Booth's family plan. Not Atlanta, St. Louis, Miami or San Diego. And when you consider that Boothland's got well over 830,000 households that fall into that category, it's easy to see why you should join our family of satisfied advertisers.



America's 9th largest market of households that earn $25,000+.

When you advertise in Booth Newspapers, you're advertising to a market where nearly one million households make over $25,000 a year. And when Boothland customers spend their money, they become America's 9th largest car market, the 10th largest food market and the 10th largest market of retail sales.

America's 10th largest market of homeowners.

With over 1.3 million homeowners, Boothland gives new meaning to the term "home delivery." And when you compare our house numbers to Minneapolis, San Francisco, St. Louis or Seattle, you'll find that we're in a much nicer neighborhood. One that delivers to over seven times as many customers outside Detroit as the Free Press does.

More customer deliveries.

If what you've read so far isn't enough to get you to start advertising in Booth Newspapers, then keep reading. Because we haven't finished yet.

We haven't told you that Boothland has America's 9th largest concentration of adults between the ages of 18 and 24. The 10th largest concentration of high school graduates. And the 14th largest concentration of adults who have attended college. The demographics go on and on. But our point is this: If you're not buying Booth Newspapers, then you're missing out on some of the biggest and easiest target markets in America.

Booth delivers the final punch.

The fact that Boothland does so well against so many big cities is probably quite a

surprise to you. But it's only part of our story. Because what makes Booth Newspapers even more appealing are our small delivery charges. For all the information on our rates, give us a call at (313) 540-5600. And we'll show you how painless it is to cash in on our customers. Represented nationally by Newhouse Newspapers.

Blush wines still blooming, but may soon turn pale

By Len Strazewski

When blush wines hit the racks in the late 1970s, one of the greatest wine industry innovations in recent history had arrived. It reached new consumer categories, pumped financial life into small wineries and rescued a once-popular grape from near extinction.

But now, some industry observers are saying the blush may soon be off the blush wine boom. Conditions are ripe for a shakeout, they say, and the business needs another product or marketing trick to keep growing.

"The boom is definitely over," says Nicolas Furlotte, editorial director of the Jobson Liquor Group, New York, publisher of *Jobson's Wine Marketing Handbook*. "There's a curve up and down to these things. The blush wines will do well this summer, but that's probably it."

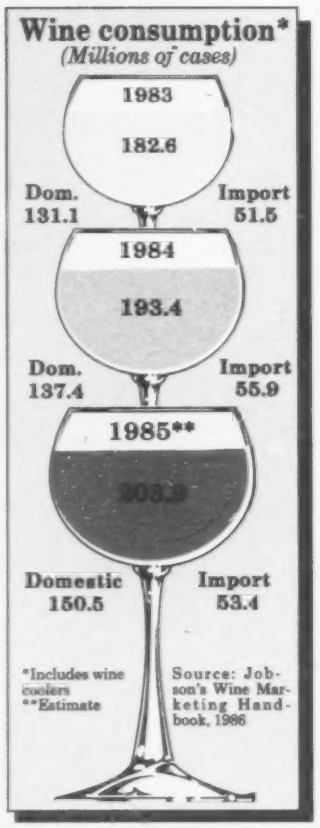
Wine marketers might argue that point. While there are no industry statistics on blush sales, production of the wines has been steadily rising. Industry sources estimate that some 3 million cases of White Zinfandel —which represents 90% of the blush market, according to sources—were produced last year. Indicative of the category's growth, Sutter Home Winery, St. Helena, Calif., sold half that amount in 1986, up substantially from its 25,000 cases in 1980.

It's because of the meteoric growth rate, however, and the sheer volume of contenders in the marketplace, that Mr. Furlotte predicts the blush category will soon top out.

"Mass producers are making a lot of it," he adds. "Some is of better quality, some of lesser quality." He forsees an industry shakeout, with some of the more mediocre products falling by the wayside.

David Pursglove, president of Wine Industry News, a Washington-based industry consulting company, predicts a collapse in the blush boom. Wine Industry News polls 2,500 "trend setters"—affluent East and West Coast consumers—and "trend emulators" about their tastes, and the latest survey says that trend setters never really liked the fruity, light pink wines that make up the blush category, which, besides White Zinfandel, includes White Cabernet and White Beaujolais, among others.

"Barely over 20% ever had any interest in the product at all," Mr. Pursglove says. "And without the interest of the real trend setters, the popularity can't be sustained. This summer will be the last of it."



Market leaders in the blush wine field, however, say the business is growing with little signs of collapse. Some agree it may eventually level off, and that a shakeout is likely. But for now, they maintain, blushes are still shepherding new customers into the wine-drinking fold.

Blush wines, a category of pink or rose-colored wines usually made from grapes pre-

viously reserved for stronger, more concentrated red wines, began bringing a touch of color to an otherwise drab wine industry in the late 1970s. By 1984, the whole industry was going pink, with everyone from mass jug-wine marketers such as Sebastiani Vineyards, Sonoma, Calif., and Almaden Vineyards, San Jose, Calif., to tiny mom-and-pop-owned wineries making the products.

Sutter Home Winery was one of the first to make White Zinfandel. A small, family-owned specialty winery previously known for a highly concentrated Red Zinfandel that had fallen out of fashion, Sutter Home began making a White Zinfandel to deal with an oversupply of zinfandel grapes.

In 1979 Sutter Home made a few thousand cases for on-winery sales. In 1980, the winery increased its White Zinfandel output to 25,000 cases and expanded its distribution to West Coast wine retailers—who bought every drop immediately.

Last year, Sutter Home, whose total output had been less than 100,000 cases during the 1970s, made 1.5 million cases of White Zinfandel. The winery estimates 1987 production at 2.25 million cases and sees no slackening in orders.

Sutter Home President Louis "Bob" Trinchero says he expects White Zinfandel's growth eventually will taper off, but that the category is not likely to collapse as Mr. Pursglove predicts. However, he does foresee a shakeout, as more than 100 wineries now make a blush wine product.

The next largest blush producer, with about a quarter of the White Zinfandel market, is Beringer Vineyards, St. Helena, Calif., which also started making the product in the late 1970s. Group product director Janelle Thompson doesn't see the blush business fading. With marketing savvy from its parent company, Nestle Foods, Beringer has taken its White Zinfandel into national distribution and has seen a steadily upward sales curve.

"White Zinfandel is a product that has touched the taste of the American consumer, and the taste shows no signs of changing," she says.

Beringer is the only winery to nationally advertise White Zinfandel to a mass market. Radio spots by Allen & Dorward, San Francisco, run on network and spot radio around the country. Ms. Thompson will not reveal the budget.

Cecil De Loach, president, De Loach Vineyards, Santa Rosa, Calif., has held his production stable at about 25,000 cases for the past five years, but not because he feared a bust.

"We just want to make some other wines," he explains. "We consistently sell out of the White Zinfandel and have requests for several thousand cases over our production run. And there's no reason to believe the demand is going to let up.

"In the beginning, nobody thought there was any sense at all to making the product," he continues. "But we tried it as an experiment and what we discovered was that we had finally cornered the taste the American public was after."

De Loach does a small amount of print advertising in publications including *The Wine Spectator*, but notes that White Zinfandels have been so popular that little marketing is needed to build demand. Mary Tanner, Sebastopol, Calif., handles a $40,000 annual ad budget.

Outside of White Zinfandel, other blush wines are continuing to do well. Sebastiani, which sells White Cabernet, White Beaujolais, White Zinfandel and Pinot Noir Blanc, reports all of the products doing well, up to expectations. Sebastiani's 1986 blush wine output was half a million cases.

And Almaden, which markets a White Zinfandel and a new "Blush Chablis" blend, says the market will continue to grow.

"We still expect it to grow, filling the niche that Chablis used to fill," says advertising manager Bob Delsol. "People want a light drinking wine that can be had with food or as a cocktail. The blush wines offer a little more choice and flavor."

Almaden's advertising is handled by Ciociola & Co. Advertising, New York, and the budget for 1987 is undetermined, pending approval of new parent Heublein Inc., which bought the winery late last year.

Among smaller blush wine producers, the attitude is also positive. Simi Winery, Healdsburg, Calif., has been making a Rose of Cabernet since 1974 and has seen no lack of interest. The winery prices its blush a bit higher than most at $7 a bottle, but sells out every year, says Michael Dixon, president, who also forsees a shakeout.

"I expect demand will steady out for blush wines and some of the bad ones may disappear, but the lighter, fruitier wines are here to stay, alongside the fine traditional reds and whites."

If the blush wine boom does wane, wineries probably won't be crushed. Jobson's Mr. Furlotte predicts continued growth in a line extension—Sparkling White Zinfandel. Both Sutter Home and Almaden made the product at a caseload of 100,000 each in 1986.

Sutter Home, the White Zinfandel specialist, is already using its new-found cash flow to diversify its offerings to include Cabernet Sauvignon, Chenin Blanc and Muscat d'Alexandria, as well as its Red Zinfandel.

And if blush wines pave the way for a return to traditional reds, as Mr. Pursglove and his trend surveys indicate, Sutter Home won't be embarrassed. The winery will be back in the same business it was in before anyone ever heard of a White Zinfandel.

Genuine Draft pours new life into Miller sales

By Scott Hume

They said it couldn't be done. Miller Brewing has refused to believe them, and may yet prove them wrong.

"They" are the majority of brewing industry executives who long have clung to the principle that once a beer brand begins to decline in sales, rescue efforts are fruitless. But Miller is confident it will disprove that axiom by reversing the steady sales slide its once-powerful High Life brand has suffered during the past five years.

If Miller succeeds, much of the credit will belong to High Life Genuine Draft, a "flanker" brand Miller began testing in late 1985 before introducing nationally last spring. Genuine Draft's success—sales of more than 1.5 million barrels in 1986, according to industry analysts' estimates—has helped modernize and repopularize a brand name Miller Brewing was determined wouldn't fail.

Some observers are skeptical of Miller's chances, however. Manny Goldman, beverage analyst at Montgomery Securities, San Francisco, has called the High Life rescue mission "as great a challenge as [Miller parent] Philip Morris has ever had."

Brewing industry history supports the doubters, who point to Ballantine, one of the country's top sellers in the years after World War II, and Schlitz. Both brands went into tailspins from which they never recovered.

During the past several years, it has appeared that High Life might be inexorably marching along the same downward course taken by these and other has-been beers.

After Philip Morris acquired Milwaukee-based Miller Brewing in 1970 and pumped millions of dollars into the company's brewing and marketing capabilities, High Life's sales and share rose. According to analysts' estimates, High Life sales peaked in 1979 at 23.3 million barrels, second only to Anheuser-Busch's Budweiser at 31.4 million.

It's been downhill since then. By 1982 High Life was down to 20.3 million barrels; by 1984 it had plummeted to 14.1 million. Last year it fell below 12 million barrels, analysts estimate, although it remains the nation's third most popular brand.

Miller execs say that they have met the challenge, that High Life's sales erosion slowed in 1986 and that they now are beginning the process of building original High Life's sales.

Despite its unflagging confidence that High Life eventually would turn around, Miller made two important strategic moves in 1984, as High Life sales were plummeting: It opened for review the $50 million High Life advertising account then held by Backer & Spielvogel, New York, and it began more aggressively testing new beer brands to bolster its market presence, especially in the premium-price category. Both actions have produced results aiding recovery.

After 20 months of deliberation, Miller in August 1985 awarded J. Walter Thompson USA, New York, the High Life assignment. Its "Made the American way" campaign, replacing B&S' "Welcome to Miller time" positioning, helped give High Life a tougher image that has broadened its appeal, Miller execs say.

The parade of new-product tests has included popular-price Meister Brau Light and low-alcohol Sharps L.A. in August 1984; premium-price, draft-style Plank Road Original Draught in October 1984; premium-price Gettelman Lager in July 1986; and premium-price "wheat beer" Dakota in September 1986. Of these brands, Meister Brau Light is currently available nationally, Sharps is in limited markets, Gettelman has been discontinued, Plank Road is being retooled, and Dakota is still in the test phase.

The most intriguing of the premium-price test products was Plank Road Original Draught. Hamish Maxwell, chairman of Philip Morris, for some time had been suggesting that Miller consider the draft-beer niche.

"With his international experience and perspective, [Mr. Maxwell] asked us to look into packaged draft beer," says Miller group product manager Jerry Schmutte. "It represents one-third of Japanese volume, but its U.S. penetration has been inconsequential."

Mr. Schmutte says it was "a concern but not a worry" that by selling its own draft beer, Miller might aid the sales of Coors, also an unpasteurized, or "draft" beer. "I don't think the average consumer immediately thinks of Coors as a draft beer. They haven't pushed [that attribute] that hard," Mr. Schmutte says. "But our draft process is different. We went to Sapporo Brewery in Japan and imported their technology for using ceramic filters to remove impurities. It's different than the process Coors uses."

There was only one problem: Plank Road test results "did not set the world on fire," he says. "Plank Road was a strong test, but probably not the optimal one.

"But we knew there was something there. We had too much research that said consumers prefer draft beer. So we decided to try again with it as a line extension, and we hit the second time around."

That second try, of course, was High Life Genuine Draft, an assignment this time given to Backer & Spielvogel, Miller's agency of record and creator of the classic "Lite All-Stars" advertising series.

Where Plank Road had been received with a yawn, "distributors, retailers and consumers sparked to Genuine Draft from the start." It captured the 1%-plus market share the brewer looks for from test products, Mr. Schmutte says. After testing in 24 markets for less than six months, Genuine Draft was rolled nationally last spring.

Why did Genuine Draft succeed where Plank Road failed? Mr. Schmutte points to three important factors: Name, packaging and advertising.

"There's no question the Miller High Life name was a boost," he says. "There have been few successful launches of beers with free-standing brand names. They don't have the value of heritage and tradition, and the consumer wants to think there's some substance, some history to a brand."

While the High Life name helped Genuine Draft, the reverse also has proved true. Miller was concerned about "diluting" the High Life brand with a flanker brand, but "the addition of Genuine Draft has energized all the equity we have in the Miller name."

Landor Design, San Francisco, developed Genuine Draft's packaging. While keeping the basic elements of original High Life's look, including the clear glass bottle, Landor also managed to set Genuine Draft apart with a black foil label that Mr. Schmutte says gives it "a more masculine image."

"Package design can be the most important element, especially for a new beer," says Mort Libby, a principal in Libby Perszyk Kathman, Cincinnati, which has done design work for Coors, Schoenling Brewing and others. "Like food products, beer is sold on taste, but you can't use photos to increase appetite appeal like you can with cake packaging. So you have to design a label that has emotional appeal."

Says partner Ray Perszyk: "Personality drives beer marketing, and packaging has to convey the personality you want a beer to embody."

In place of the manufactured history and re-creations of old-time breweries used in Plank Road advertising (from Chiat/Day, New York), the Genuine Draft campaign has been purposely straightforward and simple. Executions in all media play off that research-based belief that consumers prefer draft beer; they share the theme line, "Beer at its best."

In 1986, Miller spent approximately $30 million on media advertising for Genuine Draft, compared with nearly $60 million for original High Life. This year, however, sources say Miller is reversing that ratio, budgeting $75 million for the draft version and $30 million for the regular brand. Miller execs would not confirm that report.

Print ads share the "Beer at its best" theme with other media.

Print ads show a spiggot-equipped Genuine Draft bottle and the no-nonsense headline, "Look guys, no keg." Fifteen-second TV commercials say simply, "When you want the rich, smooth, fresh taste of real draft beer in a bottle [or can], ask for Miller Genuine Draft. The Miller with the black label." Thirty-second spots say Genuine Draft "will remind you of the best beer you ever had."

Some industry observers project Miller Brewing's total production for 1986 up nearly 4% to 38.5 million barrels, with Genuine Draft's success a major contributing factor. For the first time in years, Miller is able to suggest convincingly that the worst of High Life's troubles are behind it.

"We consider Genuine Draft a success," Mr. Schmutte says. "We know that it has captured people's imagination, and it has exceeded our initial goals.

"We look at Miller High Life as a franchise, and we're determined to strengthen it. Original High Life is still the No. 3 brand [behind Budweiser and Miller Lite], so any talk of Genuine Draft dethroning it or threatening it is preposterous. The two are moving together to turn around that franchise. We've reduced the rate of decline and strengthened the Miller brand name.

"It's all going in the right direction." AA

What do 843,000 New Orleanians thirst for every week?

Want to sell liquor in New Orleans? Then put your ad where 843,000 adult New Orleanians drink in the news every week—The Times-Picayune.

Fact: New Orleans is the 20th ranked liquor market in the country. With an ad scheduled in The Times-Picayune, you have the opportunity to reach 9 out of 10 New Orleanians. And, your advertising message will also go to the hundreds of thousands of thirsty tourists who pick up the paper every month.

To start toasting higher sales, call Lester Key at (504) 826-3075.

MAXWELL'S MARKET SHARES

Excise tax hike hurts liquor sales

By JOHN C. MAXWELL JR.

In 1986 the liquor industry experienced approximately a 5%-to-6% volume decline, due primarily to the impact of the federal excise tax increase in October 1985. Domestic cordials, imported brandy, tequila and imported vodka were the only exceptions.

Tequila's impressive 5% gain (relative to the industry decline) is largely attributable to Heublein's Jose Cuervo, up 20%. This increase may be an effect of the growing popularity of Mexican food and drinks (witness the amazing jump of Corona to the No. 2 position in imported beers). Cordials were up almost 0.5% due to domestic growth, probably from flavored schnapps. An impressive increase was the 36% rise of imported vodka, with particularly strong gains made by Absolut, up 47.1%.

The outlook for 1987 is another year of volume decline in spirits with the exception of specific imports such as vodka and brandy.

Of the top 10 brands, almost all showed declines. The one exception was Heublein's Popov vodka, which increased 4% and moved from sixth to fourth position. Of the 1985 leading brands (those that sell over 1 million cases) only three brands showed volume gains. Aside from the increase of Popov, Peachtree schnapps, which was introduced in 1984, doubled its volume and rose from the 24th to the 12th top-selling brand. Another share increase was seen by Heublein's Jose Cuervo tequila, which rose to 25th from the 34th position. The only newcomer to this list was Absolut vodka.

As a result of the success of National Distiller's Dekuyper's Peachtree schnapps, the Dekupyer line overall maintains its position for the second consecutive year as No. 1 in the cordial area.
